

# Legends Class Report Spring 2023

Staff -

Legends 1: Mr Kelleher, Miss Coates, Mr Parker-Brine, Mr Knight

Legends 2: Mrs Maudsley, Mrs Love, Mr Palmer

## Maths

The children have looked at and worked on mental addition and subtraction and applied these new skills to their work. They are learning how to find factors of given numbers and how these can help with multiplication and division. We have worked hard to understand and solve word problems identifying the calculation required and deciding which information is required to answer the question. We got wet estimating capacity of containers and converted between millilitres and litres. We have calculated angles on a straight line and round a point as well as figuring shape reflection and translation.

## English

This term we have Created an action plan/leaflet to save Pompeii from the eruption of Mount Vesuvius, studying volcanoes and planning an escape route for the inhabitants of Pompeii. We have also studied the Genre of Science Fiction which lead to discussions around what the future will look like, the gadgets we will have and how we will live. We also wrote our own sci-fi story. We have continued to complete WOW writes on Friday and all of our story writing and comprehension skills have improved.

## Jigsaw PSHE

Continuing with our new 'Jigsaw' PSHE we have been focussing on our Dreams and Goals, not only for ourselves but for the community across the world. We looked at charities that help people who are less fortunate than us and came up with some ideas for raising money to help. Our ideas included a sponsored mile and a donut eating competition. We enjoyed working together and we have shared some feelings and hopes for the future, both in school and after we finish our education.

## Science, Thrive and outdoor learning

We have continued to follow a Thrive approach for most of our afternoon learning again this term and have worked both indoors and out. Our friendships have built and we enjoy a wide variety of activities both in and out of class. The science has been focussed on our health, exercise and the food we eat. In Thrive we have made passports and talked about places we would visit. We have played games, Lego, baked cookies, drawn some art work and generally had fun whilst we learn.

### Valentine Cookies

### Fun and games

### Lego Passport destinations
