

## Lightbulbs Autumn Term

The children in lightbulbs have had a very busy start to the school year but they have all settled well into their cabin classroom. All children have worked hard in all subjects and activities they have participated in.

### English

In English we have looked at descriptive writing using adjectives as well as conjunctions to extend and make our sentences more interesting. We even tried different foods to see what sounds they made so we could describe them. We have also looked at different types of punctuation and when we would use them. We used kung-foo punctuation to help us.

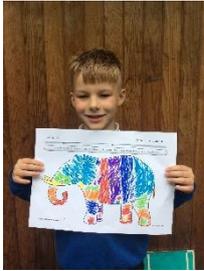

### Maths

In maths we have looked at a variety of different topics, we started working on recognising numbers and place value then moved onto addition and subtraction. We then spent time looking at 2D and 3D shapes, the children enjoyed exploring the shapes to learn about their properties and how to sort them.

## Creative

We have been exploring wildlife from different areas. We learnt about the different continents and which animals you would find in each of them. We then moved on to learn about the different countries in the UK and what animal we would find in our local area.

## Forest School

All the children have enjoyed all the activities completed in the forest this term, even if we did get a little wet and muddy at times. We learnt how to tie knots, made bug hotels and even made our own wormeries. We finished our sessions with story telling taking it in turns to sit on the throne.

## Thrive

In thrive the children have been having fun getting messy and using their imagination to create balloon friends. They spent time designing them on paper and giving their friends different characteristics. The children then brought their designs to life to make their balloon friend.
