

Wizards Spring Term

The children in Wizards have worked super hard since returning to school after the Christmas holidays. They have enjoyed all the exciting lessons that have involved lots of new experiences for the children.

English

In English we have looked at traditional tales, classic stories that are based on a theme and instructions. The children have looked at stories they like and dislike and have been able to explain why. We focused on the Alien Tea party as this linked with our creative topic this term. They wrote about what we would have for their own tea party and made their own invitations. We even had our own tea party with Incredibles class where we played lots of games and tried new foods.

Maths

In maths we have looked at a variety of different topics, we started working on recognising numbers and place value then moved onto addition and subtraction. We then spent time looking at 2D and 3D shapes, the children enjoyed exploring the shapes to learn about their properties and how to sort them. We have also looked at measuring and weighing using standard and none standard units as well as how to use the more than, less than and equal to symbols to compare objects.

Creative

We have been exploring space. We have looked at what it is like to live in space and all the equipment astronauts need to survive. We have designed our own space menu and rocket that all had a unique feature. We have learnt all about different events that have happened including when the first rocket went into space, the first man on the moon and the significance of Mae Jemison.

Forest School

All the children have enjoyed all the activities competed in the forest this term, even if we did get a little wet and muddy at times. We learnt how to make bird feeders, whittle sticks, build dens and even how to make a fire. Everyone enjoyed all the activities especially when they got to toast marshmallows and eat them!

Thrive

In thrive the children have been having fun in their groups working on their action plans. Some children have enjoyed the use of the thrive rooms and others have used technology to make their own presentation. One group have made passports and masks to travel to a made-up world that they have created. While another group have been looking at different feelings and how colouring can help create a healthy mind.
