THE STONE AGE KNOWLEDGE ORGANISER

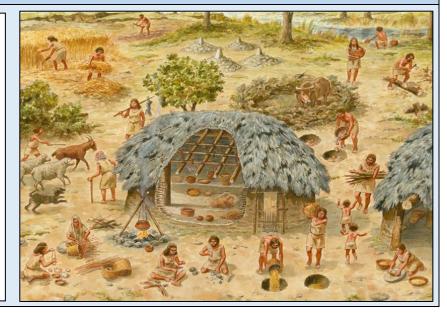

Overview

The Stone Age

The Stone Age is the name given to the earliest period of human culture – from the dawn of civilisation 2.5 million years ago, to around 5000 years ago, when humans began utilising stone to make tools and objects. The Stone Age is often divided into three periods:

- -Paleolithic (Old Stone Age);
- -Mesolithic (Mid Stone Age);
- -Neolithic (New Stone Age);

The Paleolithic era lasted for such a long time that it accounts for 99% of all human history!

		Life in the Stone Age			
Food - Hunter Gatherers		In the Paleolithic era, humans found their food from the local environment. They mainly used tools such as spears and slings to kill and capture animals. They moved from site to site depending on 			
Tools		Early hominids (even homo erectus) used tools in order to aid everyday life. Many were chopping and cutting tools, although basic spears and hand axes have been found from the era. Tools increased in complexity over the Paleolithic era.		THE PALEOLITHIC	
Language	↑ 0 1 ♥ # X ∴ ↓ ↓ ↓ ↓ ↓ ↓ ↓ ↓ ↓ ↓ ↓ ↓ ↓ ↓ ↓ ↓	Perhaps the most important innovation of the Paleolithic era was the beginnings of language. Scientists can infer from cave drawings and the establishment of social structures that Paleolithic humans must have developed language.	the beginnings of language. From cave drawings and the al structures that Paleolithic		
Religion		The period also saw the development of religions. Cave paintings suggest that many tribes believed in 'animism', or the idea that everything has a spirit, including animals, plants and inanimate objects.	Fact Cave paintings found in France are about 40,000 years old!		
Food – Hunting and Fishing		More elaborate weapons, such as arrows and spears, were developed. Canoes were constructed to allows humans to fish in the rivers and seas, probably carved from tree trunks and branches	Fact The oldest discovered canoe is 8,200 years old!		
Domestication	S S S S S	Humans began to domesticate animals for various uses. For example, it is thought that dogs were domesticated from breeding the tamest wolves, and were used to aid hunting.	Fact It is thought Stone Age man also bred dogs to be cute pets!	THE MESOLITHIC ERA	
Clothes		Mesolithic humans used to wear clothes made of bark and leaves in the summer months, and clothes made of animal skins in the winter months.	Fact The first leathers were probably made in this era.		
Culture		As languages developed, so did distinct cultures. Art, dance, and social traditions appear to have been formed by this point in time.	Fact Burials took place for the dead		
Food - Agriculture		Animals such as cows and sheep were domesticated, providing a ready-made supply of meat, milk and bone. Grain was developed as it could be stored for a long time.	Fact Agriculture meant that people settled in one place		
Construction		Better tools and permanent settlements meant that large scale construction could take place. People lived in more permanent houses, which were congregated together in villages.	Fact 'Skara Brae' off Scotland, is a well-preserved Neolithic village.	THE	
Roles/ Occupations		Neolithic peoples created different roles in their societies, for example farmers, priests, and hunters. There is evidence that some people were made into leaders, whilst some became slaves.	Fact N Roles were decided based on gender and age.	NEOLITHIC ERA	
Culture		A range of carvings and other art forms demonstrate rapid developments in culture. These moved beyond what was literally seen in the world to include moral/ spiritual ideas. This was influenced by improved language, society structures and tools.	Fact People from this time were able to make mud and clay objects.		

				Stone Age Timeline					
	2.5 million years ago – Stone Age begins – first rock artefacts.	300-150,000 years ago – Home sapiens appear in Africa.	40,000 YA – First cave painting and carved figures, (Spain).	 25,000 YA– Use of needles, saws and harpoons		15,000 YA – Domestication of pigs	11,000 YA– End of the last Ice Age	10,500 YA – Cattle were domesticated	8,9 Whe irrige
