

Headteacher: Stav Stavrinou

Dear Parents and Carers,

We have had a good start to the year and so far and thankfully we have had no infection cases.

However due to the rising numbers in COVID cases we are taking extra precautions in reminding our children about handwashing and using tissues when coughing and sneezing as well as keeping up with our extra cleaning routines.

In case we do get a case of infection we are sending this simple diagram to help you remember the likely outcomes should an infection arise in school.

The safety of our children depends on good communication between home and school, so please keep us informed if you have any worries and make sure you let us know if your child is unwell.

Thank you in advance and have a great weekend!

Mrs Stav
Headteacher

Pupil displays any of the symptoms: Cough, temperature, loss of taste or smell

Pupil is sent home.
Parent/Carer administers test

NEGATIVE TEST RESULTS
NO COVID

Pupil returns to school and continues normally

POSITIVE TEST RESULTS
COVID

Parents/Carers inform school *immediately*

Whole year group isolates for 14 days.
School contacts local health protection team for advice
Remote learning continues as before.
