

Moving Minibeasts

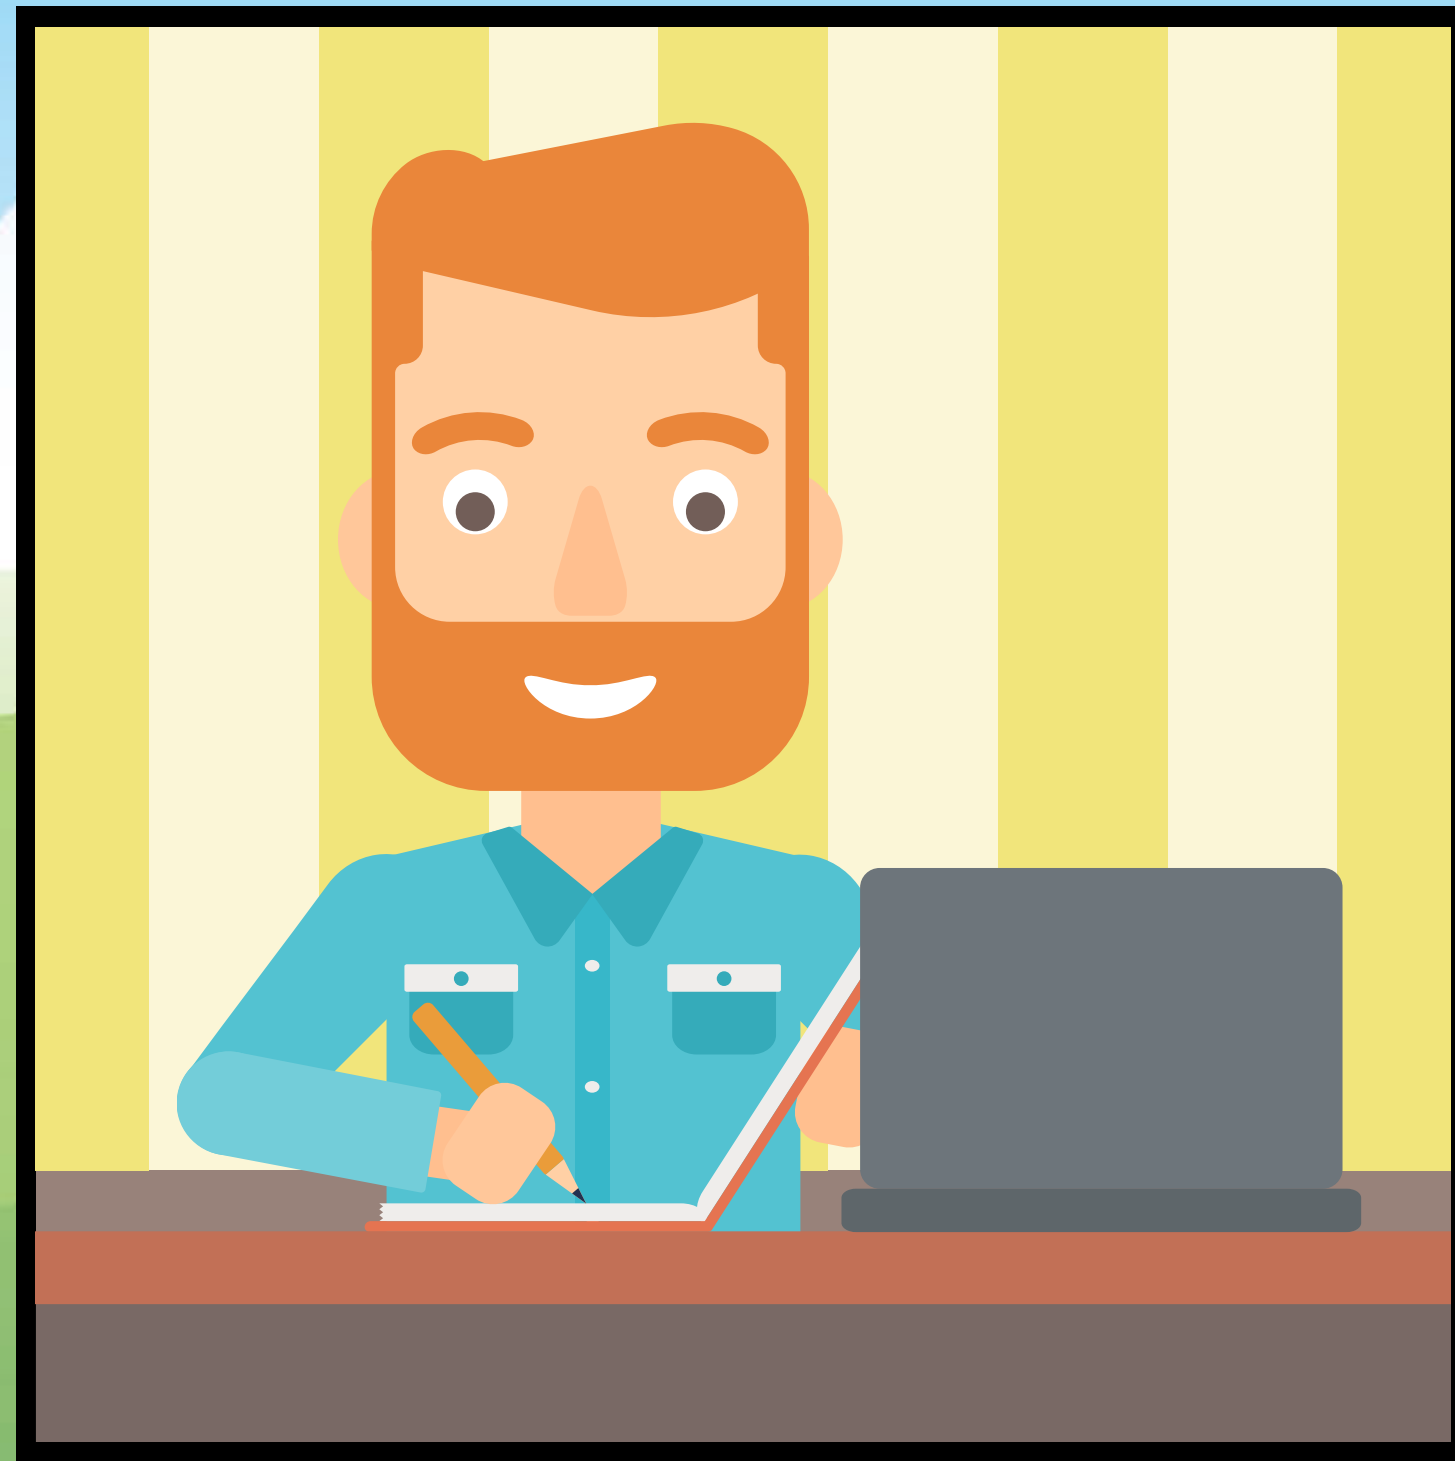

Today we will be...

making a minibeast-themed moving picture

Back

Next

In the last lesson, we **designed** some moving pictures for an author called Tom, who is writing a book about minibeasts for 3-5 year olds.

Tom has now taken a good look at all of your designs, and has sent you a message...

Let's take a look at it...

Back

Next

Hi everyone!

I was really impressed with all of the designs for the moving minibeast pictures that you created for me!

I would like you to make them all for me to use in my minibeast book!

Thank you very much!

from,
Tom

Back

Next

That's great news! Tom liked all of your designs!

Before you start to make your moving minibeast picture for Tom's book, what do you need to do?

Think, pair, then share your ideas.

Back

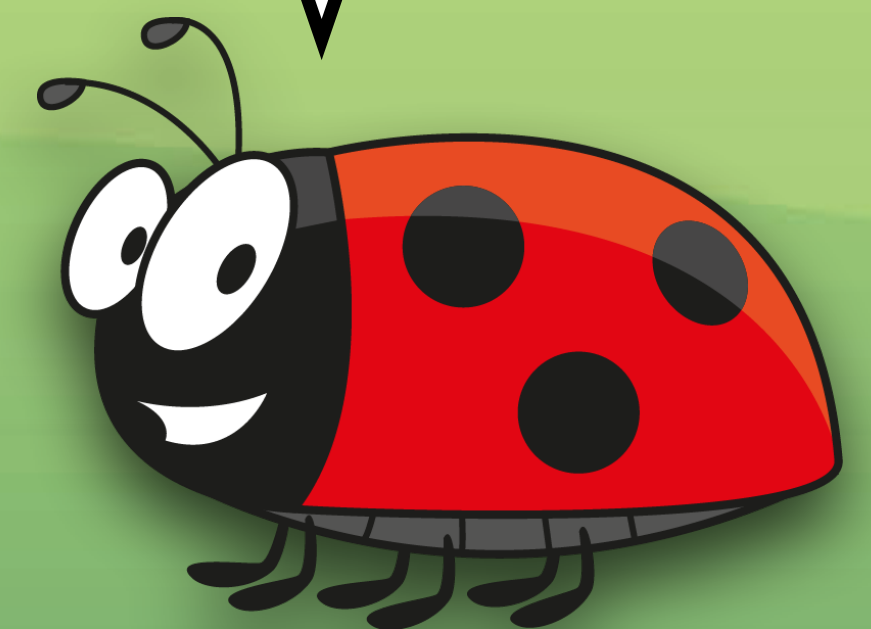

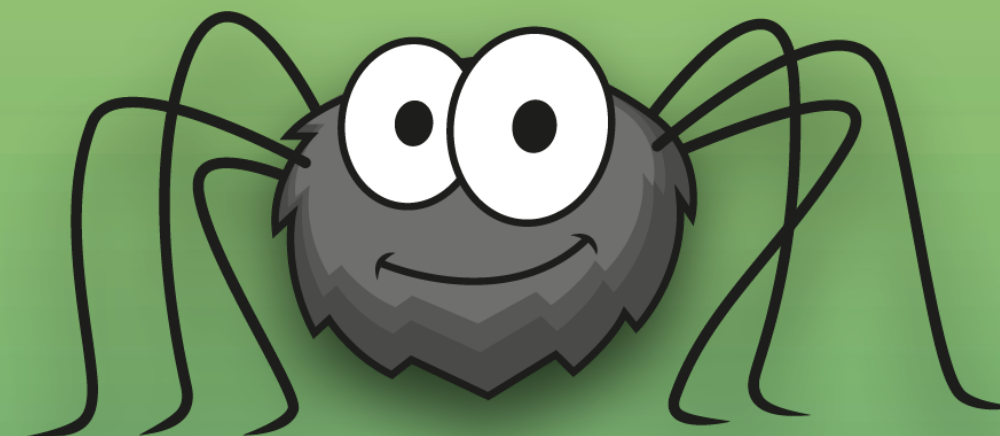

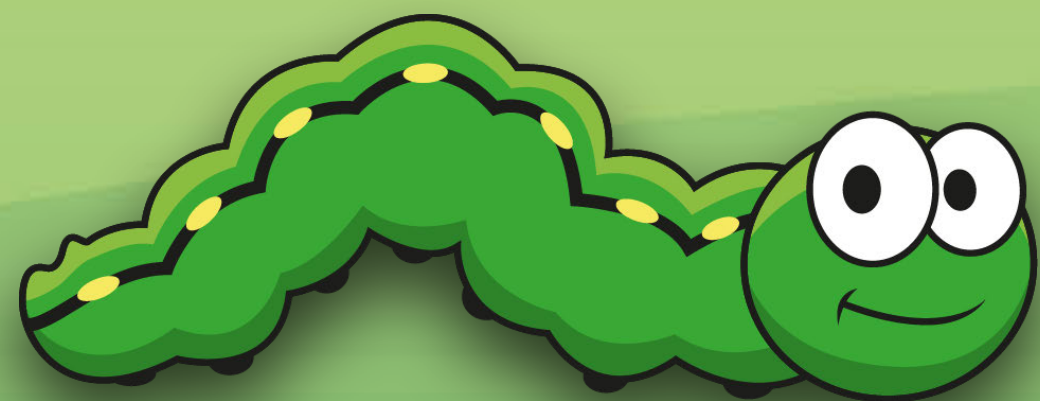

Next

The first thing you should do is look at your **design sheet** from the last lesson. Make sure that you...

...remember how to make the **mechanism** for your moving picture.

...have all of the **equipment** you need.

...know what your **order of work** will be!

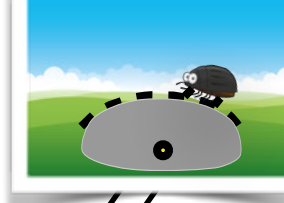

Back

Next

The **order of work** means what you will need to first, next, after that, and so on to make your moving minibeast picture.

 **Sliding mechanism**

 **Lever & pivot mechanism**

 **Wheel mechanism**

Explain the order of work for one of the moving pictures above which uses the mechanism that you will be using.

Back

Next

The final, and most important, thing that you need to think about is...

scissor safety.

Sit down at a table when you are cutting.
Never run with scissors.

Always look carefully at what you are doing.

Cut in the direction **away** from your body.

Back

Next

Make sure your **fingers** are not in the way of the scissors.

If you are passing scissors to someone else, **close them** and hold them by the blades so that the other person can take the handles.

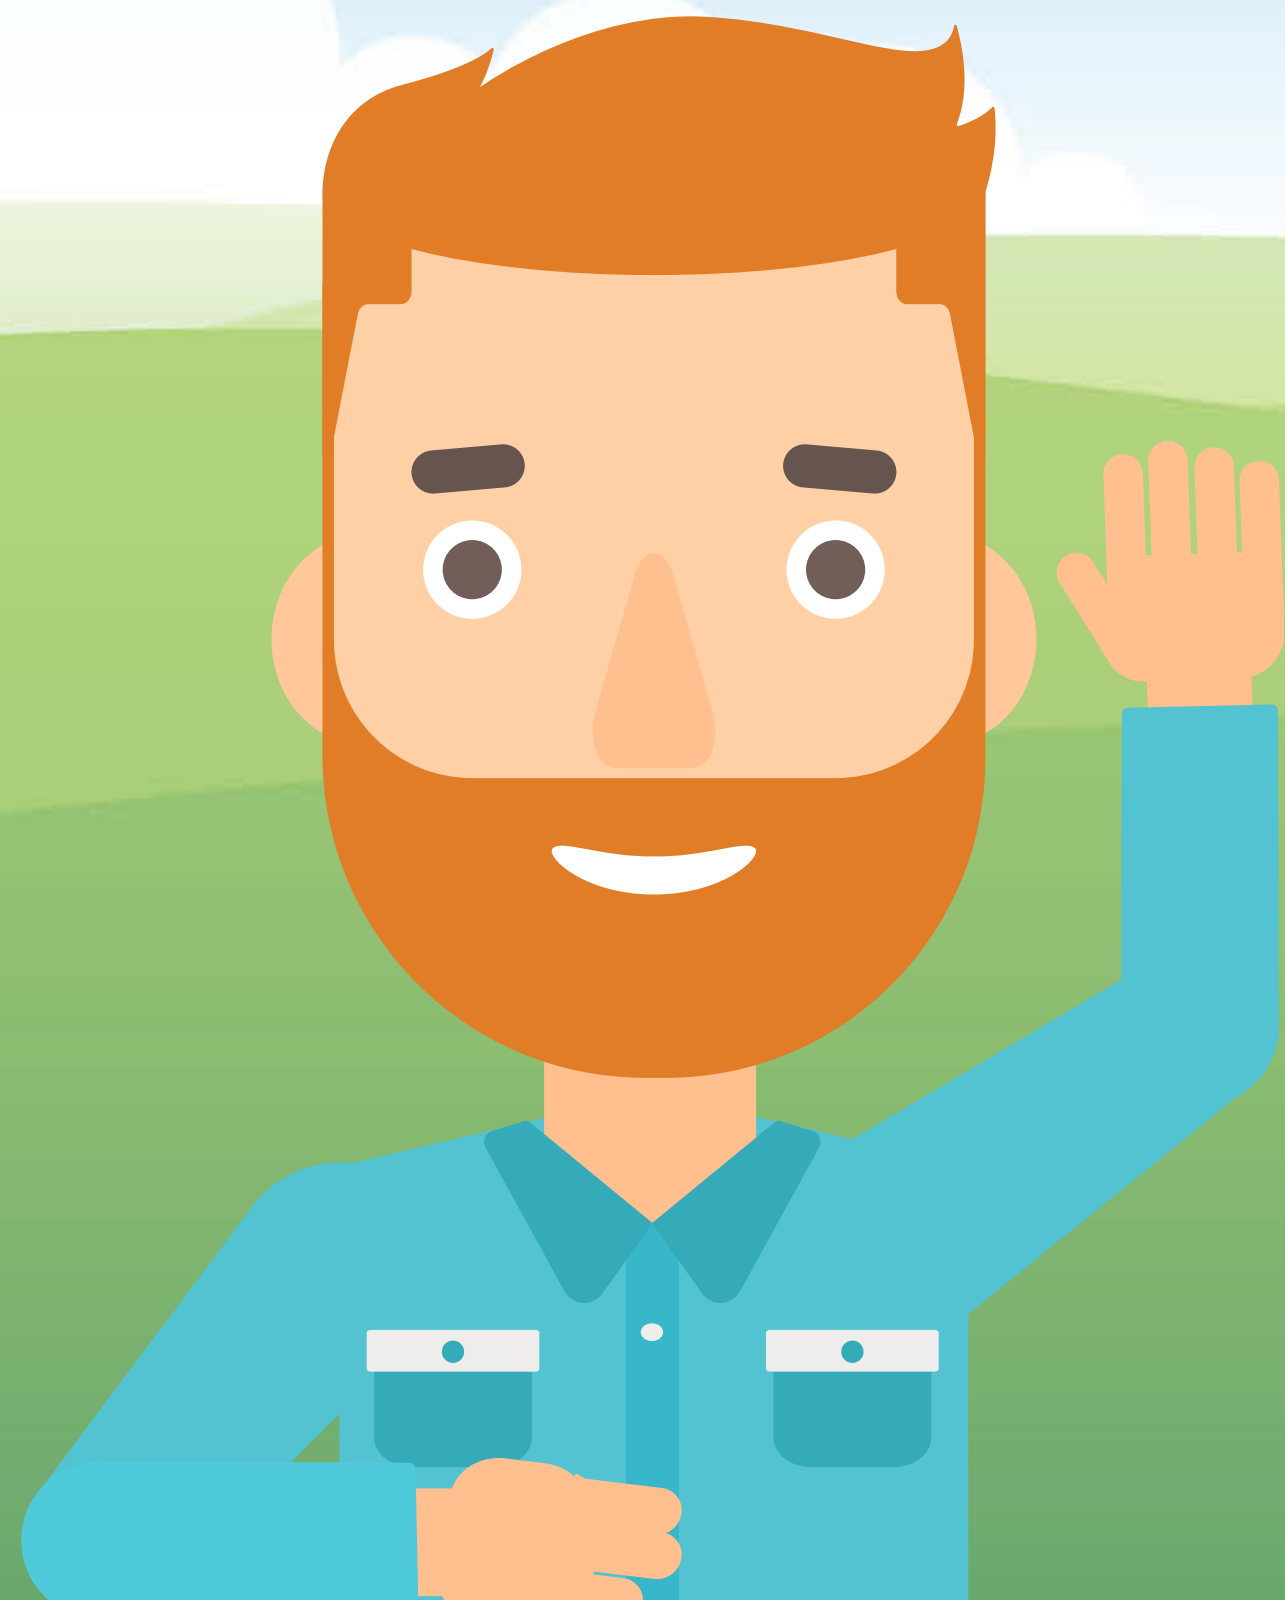

When you have finished using the scissors, put them away.

Make sure you follow all of these **scissor safety** rules!

Back

Next

Now that you have thought carefully about how to make your moving minibeast picture, it is time to begin creating it!

Good luck everyone!
I can't wait to see the
finished pictures!

Next

Plenary:

Before we give our completed moving minibeast pictures to Tom, let's first ask ourselves the following questions:

Are there any edges you have cut out that could be neater?

Is there any colouring you can make tidier?

Are all the pictures clear?

Does the moving part move easily?

If you need to make any adjustments, do it now!
