Daven Primary School: design and technology curriculum

Roadmap

Unit overviews

Knowledge and skills mapping

						Reception					
Nursery 1 Make simple models which express their ideas. Use their imagination as they consider what they can do with different materials.		Nursery 2 Make imaginative and complex ‘small worlds’ with blocks and construction kits. Join different materials & explore textures.				Soup Fantastic fruits and vegetables. Pumpkin soup. Designing soup. Fine motor skills. Making soup. Designing soup packing		Boats Waterproof materials. Floating and sinking. Boats. Investigating boats. Designing boats. Making and evaluating boats.		Junk modelling Exploring junk modelling. Cutting and scissor skills Choosing resources. Making models. Evaluating. Temporary joins.	
Year 1 and 2 CYCLE A						Year 1 and 2 CYCLE B					
Mechanisms: making a moving story book Exploring sliders and movement. Design. Construct. Test and evaluate	Structures: stable structures Exploring stability. Building stable towers. Stablilising structures with weight. Designing a stable pencil pot and making it.	Textiles: puppets Joining fabrics. Designing a puppet. Making and joining my puppet. Decorating my puppet.	Mechanisms: wheels and axles Wheels. Improving wheels (1 and 2). Designing a pull toy. Making a pull toy.	Cooking and nutrition: smoothies Fruits. Growing. Cutting and juicing. Testing ingredients. Making a smoothie. Evaluating.		Cooking and nutrition: balanced diet Food groups. Balanced meals. Preparing ingredients. Testing ingredients. Planning recipes. Making and evaluating wraps.	Mechanisms: making a moving monster Pivots, levers and linkages. Making linkages. Designing my monster. Making my monster.	Structures: a chair for a bear All about chairs! What does the shape of something have to do with its strength? How does thickness affect strength? Making a chair. Evaluating and improving.	Textiles: pouches Running stitch. Using a template. Making a pouch. Decorating a pouch.	Mechanisms: fairground wheel Designing a fairground wheel. Planning the build. Building the frame and wheel. Surveying design opinions. Adding pods and decoration.	
Year 3 and 4 CYCLE A						Year 3 and 4 CYCLE B					
Mechanical systems: pneumatic toys Exploring pneumatics. Drawing diagrams. Designing my pneumatic toy. Making. Finishing the toy.	Digital world: wearable technology Evaluating wearable tech. Light up wearables. Programming. Product concept. Point of sale. Focus group.	Electrical systems: electric Poster Information design. Topic research. Design development. Electrical poster assembly.	Structures: constructing a castle Features of a castle. Designing a castle. Nets and Structures. Building	Textiles: Egyptian collars Cross-stitch and applique. Egyptian collars. Developing my collar. Finishing my collar.	Cooking and nutrition: eating seasonally Food around the world. Seasonal food. Cutting and peeling. Tasting seasonal ingredients. Make a mock up. Evaluating.	Mechanical systems: mechanical cars Inclined plane. Slingshot car. Wind up car. Designing. Making and evaluating.	Digital world: mindful moments timer Analysing timers. Designing for the user. Programming the timer. Prototypes. Brand identity. An exhibition.	Cooking and nutrition: adapting a recipe Existing biscuits. Basic biscuits. Budgeting. Packaging. Testing a new recipe. Evaluating the recipe.	Structures: pavilions Exploring frame structures. Designing a pavilion. Pavilion frame. Pavillion cladding.	Textiles: fastenings Evaluating fastenings. Designing my book sleeve. Paper mockup and preparing fabric. Assembling my book sleeve.	Electrical systems: torches Electrical products. Evaluating torches. Torch design. Torch assembly.
Year 5 and 6 CYCLE A						Year 5 and 6 CYCLE B					
Textiles: stuffed toys Designing. Blanket stitch. Details and appendages. Stuffed toy assembly.	Electrical systems: wobble bots Circuits and motors. Meet the Kapow	Structure: bridges Arch and beam bridges. Spaghetti truss bridges.	Digital world: monitoring devices Monitoring devices. Programming	Cooking and nutrition: developing a recipe From farm to fork.	Mechanical systems: gears and pulleys Gears. Improving my	Textiles: bags Deconstructing a bag. Pattern pieces. Designing a bag. Prototype.	Electrical systems: steady hand game Developing through play.	Structures: playground pioneers Playground design challenge.	Digital world: navigating the world Navigating the world. Programming a	Cooking and nutrition: come dine with me Complimentary flavours. Three	Mechanical systems: automata toys Automata. Frame assembly. Experimenting with

	Doodlers. Exploring wobble bots. Designing for a purpose. Making and evaluating.	Building bridges. Finalising bridges.	an animal monitor. Plastic. 3D CAD skills.	Different choices. Nutritional value. Preparing ingredients. Designing labels. Making bolognese.	gear design. Pulleys. Eco- gadget: Bike project market research. Design.	Adding features.	Game plan. Base building. Electronics and assembly.	Designing structures with tinkercad. Making a prototype structure. Finishing a prototype structure. Evaluating.	navigation tool. Product concept. £D CAD models. Product pitch.	ingredients, three courses. Ingredients and skills. To start. The main. The dessert.	cams. Final touches.

How is the Design and technology scheme of work organised?

		EYFS (Reception)	
		Junk modelling	Boats
Skills	Design	• Making verbal plans and material choices. • Developing a junk model.	• Designing a junk model boat. • Using knowledge from exploration to inform design.
	Make	• Improving fine motor/scissor skills with a variety of materials. • Joining materials in a variety of ways (temporary and permanent). • Joining different materials together. • Describing their junk model, and how they intend to put it together.	• Making a boat that floats and is waterproof, considering material choices.
	Evaluate	• Giving a verbal evaluation of their own and others' junk models with adult support. • Checking to see if their model matches their plan. • Considering what they would do differently if they were to do it again. • Describing their favourite and least favourite part of their model.	• Making predictions about, and evaluating different materials to see if they are waterproof. • Making predictions about, and evaluating existing boats to see which floats best. • Testing their design and reflecting on what could have been done differently. • Investigating the how the shapes and structure of a boat affect the way it moves.
Knowledge	Technical	• To know there are a range to different materials that can be used to make a model and that they are all slightly different. • Making simple suggestions to fix their junk model.	• To know that 'waterproof' materials are those which do not absorb water.
	Additional		• To know that some objects float and others sink. • To know the different parts of a boat.

Year 1/2 cycle A		
Option 1: Stable structures		
Skills	Design	- Thinking about what others might want from a design. - Beginning to recognise how products and designs in the world around us solve certain needs. - Considering who they are designing for – identifying the user. - Stating what they intend to make and why – identifying the purpose. - Talking about ideas, with purpose and user in mind. - Talking about existing products when generating ideas. - Using basic drawing skills to communicate ideas.
	Make	- Choosing between a small number of materials, ingredients or components. - Explaining their choices based on personal experiences. - Requesting equipment appropriate to the purpose. (e.g. scissors for cutting, glue for joining) - Beginning to use objects with a fixed width or length to create even spacing of markings or cuts (e.g. a lolly stick). - Refining their grip to cut competently and confidently. - Cutting straight lines and evenly spaced lines. - Beginning to cut large shapes and thicker materials like card.
	Evaluate	- Discussing existing products, saying what they like about them. - Comparing two products and discuss which is better for a specific purpose. - Saying what they like about their peers' designs and products. - Accepting feedback and understanding it is meant to improve their work.
Knowledge	Technical	- Recognising that different structures are used for different purposes. - Exploring the features of structures. - Describing structures as buildings or freestanding structures. - Making stable structures from card. - Creating supporting structures to aid stability. - Using stable objects like cylinders to create structures.
	Additional	- To know that the 'user' is the person who will use the product. - To know that different users may want different things from a design. - To know that who they are designing for makes a difference to what they design. - To know that the purpose is what something is for. - To know that existing products can help when deciding what to design. - To know that drawings are a way to explain ideas. - To know that a plan is deciding what to do first and next. - To know that different equipment does different things. - To know the names of common pieces of equipment. - To know that some tools are sharp like scissors and knives. - To know that spacing cuts or marks evenly can be useful. - To know that different glue can be used to join different things. - To know that some products will be better than others. - To know that other people's ideas can help make their work better. - To know that a structure is something that has been made and put together. - To know that stable structures do not topple. - To know that shapes and structures with wide, flat bases or legs are the most stable. - To know that adding weight to the base of a structure can make it more stable.

Year 1/2 cycle A		
Option 2: Constructing a windmill		
Skills	Design	• Learning the importance of a clear design criteria. • Including individual preferences and requirements in a design.
	Make	• Making stable structures from card. • Following instructions to cut and assemble the supporting structure of a windmill. • Making functioning turbines and axles which are assembled into a main supporting structure. • Finding the middle of an object. • Puncturing holes. • Adding weight to structures. • Creating supporting structures. • Cutting evenly and carefully.
	Evaluate	• Evaluating a windmill according to the design criteria, testing whether the structure is strong and stable and altering it if it isn't. • Suggest points for improvements.
Knowledge	Technical	• To understand that cylinders are a strong type of structure (e.g. the main shape used for windmills and lighthouses). • To understand that axles are used in structures and mechanisms to make parts turn in a circle. • To begin to understand that different structures are used for different purposes. • To know that a structure is something that has been made and put together. • To know that the sails or blades of a windmill are moved by the wind. • To know that a structure is something built for a reason. • To know that stable structures do not topple. • To know that adding weight to the base of a structure can make it more stable.
	Additional	• To know that design criteria is a list of points to ensure the product meets the clients needs and wants. • To know that a windmill harnesses the power of wind for a purpose like grinding grain, pumping water or generating electricity. • To know that windmill turbines use wind to turn and make the machines inside work. • To know that a windmill is a structure with sails that are moved by the wind. • To know the three main parts of a windmill are the turbine, axle and structure. • To know that windmills are used to generate power and were used for grinding flour.

Year 1/2 cycle B		
Option 1: <u>A chair for a bear</u>		
Skills	Design	• Using a simple design brief that outlines the intended use, target user, and key features of the product, to create simple design criteria. • Creating ideas with design criteria in mind. • Referring to specific parts of existing products when generating ideas.
	Make	• Choosing materials, ingredients or components from a wider range of materials, ingredients or components. • Explaining their choices based on the properties of materials and components. • Looking for ways to make cutting easier, like turning the material they are cutting, not fully closing scissors etc. • Choosing known geometric shapes when making. • Beginning to shape objects to improve how they work.
	Evaluate	• Discussing a range of existing products and saying what they like and dislike about them. • Comparing a range of products and explaining why some better meet different design criteria than others. • Evaluating their ideas and creations against simple design criteria.
Knowledge	Technical	• Recognising that different structures are used for different purposes. • Exploring the features of structures. • Making stable structures from card. • Creating supporting structures to aid stability. • Using stable objects like cylinders to create structures. • Building a strong and stiff structure by folding paper. • Folding to strengthen or stiffen. • Comparing the stability of different shapes. • Identifying the weakest part of a structure.
	Additional	• To know that a design brief helps to decide what to make. • To know that design criteria are the steps for making a product successful. • To know that design criteria help when thinking of ideas. • To know that different products work in different ways and have parts that make them work. • To know some properties of materials like hard, soft, flexible, waterproof, strong etc. • To know the names of some geometric shapes, triangle, pyramid, square, cube, circle, sphere. • To know that existing products can be evaluated against design criteria. • To know that design criteria help to decide if their product is a success. • To know that improve means to make something better. • To know that a structure is something that has been made and put together. • To know that the shape of a structure affects its strength. • To know that materials can be manipulated to improve strength and stiffness. • To know that a 'strong' structure is one which does not break easily. • To know that a 'stiff' structure or material is one which does not bend easily.

		Year 1/2 cycle B
		Option 2: Baby bear's chair
Skills	Design	• Generating and communicating ideas using sketching and modelling. • Learning about different types of structures, found in the natural world and in everyday objects.
	Make	• Making a structure according to design criteria. • Creating joints and structures from paper/card and tape. • Building a strong and stiff structure by folding paper.
	Evaluate	• Exploring the features of structures. • Comparing the stability of different shapes. • Testing the strength of own structures. • Identifying the weakest part of a structure. • Evaluating the strength, stiffness and stability of own structure.
Knowledge	Technical	• To know that shapes and structures with wide, flat bases or legs are the most stable. • To understand that the shape of a structure affects its strength. • To know that materials can be manipulated to improve strength and stiffness. • To know that a structure is something which has been formed or made from parts. • To know that a 'stable' structure is one which is firmly fixed and unlikely to change or move. • To know that a 'strong' structure is one which does not break easily. • To know that a 'stiff' structure or material is one which does not bend easily.
	Additional	• To know that natural structures are those found in nature. • To know that man-made structures are those made by people.

		Year 3/4 cycle A
		Option 1: Product packaging
Skills	Design	• Creating simple design criteria that outline basic functionality and appeal to individual users or target audiences. • Beginning to use 2D CAD software to communicate their ideas.
	Make	• Creating accurate shapes from templates. • Cutting out more complex shapes accurately. • Choosing shapes to suit the function of a product.
	Evaluate	• Explaining why they think certain aspects of a peer's design are effective or why they suggested specific improvements. • Investigating and analysing a range of existing products by looking at their functionality and appeal. • Reflecting on feedback to decide if and how it could be used to improve future iterations.
Knowledge	Technical	• Beginning to understand how different structures are built. • Strengthening structures by ribbing. • Constructing a range of 3D shapes.
	Additional	• To know that creating accurate shapes improves how they look and sometimes their function. • To know good suggestions help give better feedback. • To know that they can choose to use feedback or not. • To know that a shell structure is a hollow shape with a thin outer layer. • To know that 3D shapes can form structures. • To know structures can be strengthened by manipulating materials and shapes.

		Year 3/4 cycle A
		Option 2: Constructing a castle
Skills	Design	• Designing a castle with key features to appeal to a specific person/purpose. • Drawing and labelling a castle design using 2D shapes, labelling: -the 3D shapes that will create the features - materials needed and colours. • Designing and/or decorating a castle tower on CAD software.
	Make	• Constructing a range of 3D geometric shapes using nets . • Creating special features for individual designs. • Making facades from a range of recycled materials.
	Evaluate	• Evaluating own work and the work of others based on the aesthetic of the finished product and in comparison to the original design. • Suggesting points for modification of the individual designs.
Knowledge	Technical	• To understand that wide and flat based objects are more stable. • To understand the importance of strength and stiffness in structures.
	Additional	• To know the following features of a castle: flags, towers, battlements, turrets, curtain walls, moat, drawbridge and gatehouse - and their purpose. • To know that a façade is the front of a structure. • To understand that a castle needed to be strong and stable to withstand enemy attack. • To know that a paper net is a flat 2D shape that can become a 3D shape once assembled. • To know that a design specification is a list of success criteria for a product.

		Year 3/4 cycle B	
		Option 1: Helmets	Option 2: Pavilions
Skills	Design	• Creating simple design criteria that outline basic functionality and appeal to individual users or target audiences. • Noticing simple problems or needs in everyday life. • Developing drawing and sketching skills with a focus on clarity and simplicity.	• Designing a stable pavilion structure that is aesthetically pleasing and selecting materials to create a desired effect. • Building frame structures designed to support weight.
	Make	• Selecting materials, components or ingredients based on their form as well as their functional properties. • Explaining choices with regard to function and form. • Choosing shapes to suit the function of a product.	• Creating a range of different shaped frame structures. • Making a variety of free standing frame structures of different shapes and sizes. • Selecting appropriate materials to build a strong structure and cladding. • Reinforcing corners to strengthen a structure. • Creating a design in accordance with a plan. • Learning to create different textural effects with materials.
	Evaluate	• Evaluating designs by comparing them against design criteria. • Considering feedback from peers to suggest improvements. • Evaluating how effective the chosen materials were in fulfilling the design brief.	• Evaluating structures made by the class. • Describing what characteristics of a design and construction made it the most effective. • Considering effective and ineffective designs.
Knowledge	Technical	• Strengthening structures by layering materials (lamination). • Strengthening structures by ribbing. • To know how some different structures are built. • To know that structures can be strengthened by manipulating materials and shapes. • To know a shell structure is a hollow shape with a thin outer layer.	• To understand what a frame structure is • To know that a 'free-standing' structure is one which can stand on its own
	Additional	• To know form is the look and shape of something. • To know function is what something does and how it works. • To know that creating accurate shapes improves how they look and sometimes their function. • To know choices of materials and equipment can affect the final product.	• To know that a pavilion is a decorative building or structure for leisure activities. • To know that cladding can be applied to structures for different effects. • To know that aesthetics are how a product looks. • To know that a product's function means its purpose. • To understand that the target audience means the person or group of people a product is designed for. • To know that architects consider light, shadow and patterns when designing.

Year 5/6 cycle A		
Bridges		
Skills	Design	• Designing a stable structure that is able to support weight. • Creating a frame structure with a focus on triangulation.
	Make	• Making a range of different shaped beam bridges. • Using triangles to create truss bridges that span a given distance and support a load. • Building a wooden bridge structure. • Independently measuring and marking wood accurately. • Selecting appropriate tools and equipment for particular tasks. • Using the correct techniques to saw safely. • Identifying where a structure needs reinforcement and using card corners for support. • Explaining why selecting appropriate materials is an important part of the design process. • Understanding basic wood functional properties.
	Evaluate	• Adapting and improving own bridge structure by identifying points of weakness and reinforcing them as necessary. • Suggesting points for improvements for own bridges and those designed by others.
Knowledge	Technical	• To understand some different ways to reinforce structures. • To understand how triangles can be used to reinforce bridges. • To know that properties are words that describe the form and function of materials. • To understand why material selection is important based on properties. • To understand the material (functional and aesthetic) properties of wood.
	Additional	• To understand the difference between arch, beam, truss and suspension bridges. • To understand how to carry and use a saw safely.

Year 5/6 cycle B

Option 1: Playground pioneers

Skills	Design	- Identifying more complex problem statements that consider multiple factors and constraints with guidance. - Developing more independence in generating ideas. C - Coming up with a broader range of ideas and deeper innovation, requiring pupils to think critically about their ideas' practicality and originality. - Using 3D CAD software to communicate their ideas. - Using a series of prototypes to refine and improve their designs.
	Make	- Producing lists of equipment, materials and tools that they need for a task. - Selecting materials, components or ingredients based on research or user needs. - Assessing risks associated with different tools and equipment. - Understanding and explaining the importance of each safety rule. - Consistently apply safety instructions. - Using a ruler to accurately measure and draw lines and marks. - In small groups, cutting harder wood with a saw. - Cutting in a back-and-forth sawing motion where appropriate. - Balancing aesthetics and functionality when creating parts of a design. - Considering when best to apply finishing effects.
	Evaluate	- Reflecting on the usability, aesthetics, innovation and sustainability of products and discussing how design choices impact these aspects. - Assessing their designs against a more complex set of design criteria that includes functionality, aesthetics, user experience, sustainability and cost. - Considering alternative materials, tools or techniques that could enhance the product.
Knowledge	Technical	- Understanding how to reinforce structures to make them more stable. - Using triangulation to strengthen or stabilise a structure. - The know that constraints are limits or conditions when making a product. - To know that the environmental impact is how the product and making the product might affect the environment. - To know that original and innovative ideas are different from what has been made before. - To know drawings and diagrams can be communicated in 3D. - To know that annotations are detailed labels and comments on diagrams. - To know that improving on prototypes can help to improve the final design. - To know that materials and equipment lists help with planning. - To know aesthetics are the way something looks. - To know that risks are things that might go wrong. - To know the shape of an object can affect both its aesthetics and function. - To know aesthetics is how something looks. - To know that the finish can make a product suitable to be used outside.
	Additional	- To know that sustainability means thinking about the materials that were used to make a product and how the product was made. - To know that their final product can still be improved by using different materials or techniques. - To know that evaluating their designs in detail will help them understand its successful and less successful parts. - To know that a frame structure supports or holds a shape, and is made up of strong parts joined together, like a skeleton or a climbing frame. - To know how to reinforce structures. - To know triangles can be used to reinforce structures. - To know triangles can create strong and stable structures. - To know that bracing is a way of reinforcing a structure.

		Year 5/6 cycle B
		Option 2: Playgrounds
Skills	Design	• Designing a playground featuring a variety of different structures, giving careful consideration to how the structures will be used, considering effective and ineffective designs.
	Make	• Building a range of play apparatus structures drawing upon new and prior knowledge of structures. • Measuring, marking and cutting wood to create a range of structures. • Using a range of materials to reinforce and add decoration to structures.
	Evaluate	• Improving a design plan based on peer evaluation. • Testing and adapting a design to improve it as it is developed. • Identifying what makes a successful structure.
Knowledge	Technical	• To know that structures can be strengthened by manipulating materials and shapes.
	Additional	• To understand what a 'footprint plan' is. • To understand that in the real world, design , can impact users in positive and negative ways. • To know that a prototype is a cheap model to test a design idea.

Year 1/2 cycle A

Option 1: Matching slider game

Skills	Design	- Thinking about what others might want from a design. - Beginning to recognise how products and designs in the world around us solve certain needs. - Considering who they are designing for – by identifying the user. - Stating what they intend to make and why – by identifying the purpose. - Talking about ideas with purpose and user in mind. - Talking about existing products when generating ideas. - Creating mock-ups to communicate designs.
	Make	- Planning more than one step ahead. - Choosing between a small number of materials, ingredients or components. - Explaining their choices based on personal experiences. - Requesting equipment appropriate to the purpose. (e.g. scissors for cutting, glue for joining). - Explaining in simple terms why certain tools must be handled carefully. - Following and recalling simple safety instructions. - Beginning to use objects with a fixed width or length to create even spacing of markings or cuts. (e.g. a lolly stick). - Refining their grip to cut competently and confidently. - Cutting straight lines and evenly spaced lines. - Beginning to cut large shapes and thicker materials like card. - Puncturing holes. - Applying masking tape to fix something in place or join to edges. - Using tools, like scissors, to create shapes. - Beginning to cut large shapes and thicker materials like card.
	Evaluate	- Discussing existing products, saying what they like about them. - Discussing how their products could be improved based on personal preferences. - Saying what they like about their peers' designs and products. - Accepting feedback and understanding it is meant to improve their work.
Knowledge	Technical	- Recognising and exploring everyday objects that have mechanisms. - Recognising everyday objects that use a slider mechanism (eg. drawers, sliding doors, paper trimmer).
	Additional	- To know that the 'user' is the person who will use the product. - To know that different users may want different things from a design. - To know that designers usually design and make something to solve a problem. - To know that who they are designing for makes a difference to what they design. - To know that the purpose is what something is for. - To know that a mock-up is a model of how something works. - To know that choosing different materials or components will have an effect on what their product does or looks like. - To know that different equipment does different things. - To know the names of common pieces of equipment. - To know that some tools are sharp like scissors and knives. - To know that following instructions helps with safety. - To know that cutting in a straight line can be helpful when making. - To know that some products will be better than others. - To know that their ideas or products can be made better. - To know that many things that move have parts inside to help them work. - To know that mechanisms usually limit unwanted movement. - To know that a slider mechanism moves an object in a straight line (eg. left/right, up/down). - To know that sliding mechanisms are designed to keep movement in one direction (eg. using guides/rails etc).

		Year 1/2 cycle A
		Option 2: <u>Making a moving storybook</u>
Skills	Design	- Explaining how to adapt mechanisms, using bridges or guides to control the movement. - Designing a moving story book for a given audience.
	Make	Following a design to create moving models that use levers and sliders.
	Evaluate	- Testing a finished product, seeing whether it moves as planned and if not, explaining why and how it can be fixed. - Reviewing the success of a product by testing it with its intended audience.
Knowledge	Technical	- To know that a mechanism is the parts of an object that move together. - To know that a slider mechanism moves an object from side to side. - To know that a slider mechanism has a slider, slots, guides and an object. - To know that bridges and guides are bits of card that purposefully restrict the movement of the slider.
	Additional	To know that in Design and technology we call a plan a 'design'.

		Year 1/2 cycle A	
		Option 1: Wheels and axles	
Skills	Design	- Thinking about what others might want from a design. - Beginning to recognise how products and designs in the world around us solve certain needs. - Considering who they are designing for - by identifying the user.	- Stating what they intend to make and why - by identifying the purpose. - Talking about ideas with purpose and user in mind. - Talking about existing products when generating ideas. - Using basic drawing skills to communicate ideas.
	Make	- Planning more than one step ahead. - Choosing between a small number of materials, ingredients or components. - Explaining their choices based on personal experiences. - Requesting equipment appropriate to the purpose (e.g. scissors for cutting and glue for joining). - Explaining in simple terms why certain tools must be handled carefully. - Following and recalling simple safety instructions.	- Finding the middle of an object. - Refining their grip to cut competently and confidently. - Cutting straight lines and evenly spaced lines. - Beginning to cut large shapes and thicker materials like card. - Puncturing holes. - Recognising the edges of paper and card need to be stuck firmly using a glue stick. - Using tools, like scissors, to create shapes. - Beginning to cut large shapes and thicker materials like card. - Beginning to use controlled painting or colouring techniques to finish a product. - Adding texture to create visual interest.
	Evaluate	- Discussing existing products, saying what they like about them. - Comparing two products and discussing which is better for a specific purpose. - Discussing how their products could be improved based on personal preferences.	- Comparing their finished products with their original designs. - Saying what they like about their peers' designs and products. - Accepting feedback and understanding it is meant to improve their work.
Knowledge	Technical	- Recognising and exploring everyday objects that have mechanisms. - Many things that move have parts inside to help them work.	- Mechanisms usually limit unwanted movement. - An axle allows the wheel to turn without falling off.
	Additional	- To know that the 'user' is the person who will use the product. - To know that different users may want different things from a design. - To know that designers usually design and make something to solve a problem. - To know that who they are designing for makes a difference to what they design. - To know that the purpose is what something is for. - To know that existing products can help when deciding what to design. - To know that drawings are a way to explain ideas. - To know that a plan is deciding what to do first and next. - To know that choosing different materials or components will have an effect on what their product does or looks like.	- To know that different equipment does different things. - To know the names of common pieces of equipment. - To know that some tools are sharp like scissors and knives. - To know that following instructions helps with safety. - To know that cutting in a straight line can be helpful when making. - To know that tools can be used to shape objects. - To know that different materials can be shaped by different tools. - To know that some products will be better than others. - To know that their ideas or products can be made better. - To know that their final product might be different to their original idea. - To know that their ideas can make someone else's work better. - To know that other people's ideas can help make their work better.

		Year 1/2 cycle A
		Option 2: Wheels and axles
Skills	Design	• Designing a vehicle that includes wheels, axles and axle holders, that when combined, will allow the wheels to move. • Creating clearly labelled drawings that illustrate movement.
	Make	• Adapting mechanisms, when: • they do not work as they should. • to fit their vehicle design. • to improve how they work after testing their vehicle.
	Evaluate	• Testing wheel and axle mechanisms, identifying what stops the wheels from turning, and recognising that a wheel needs an axle in order to move.
Knowledge	Technical	• To know that wheels need to be round to rotate and move. • To understand that for a wheel to move it must be attached to a rotating axle. • To know that an axle moves within an axle holder which is fixed to the vehicle or toy. • To know that the frame of a vehicle (chassis) needs to be balanced.
	Additional	• To know some real-life items that use wheels such as wheelbarrows, hamster wheels and vehicles.

		Year 1/2 cycle B
		Fairground wheel
Skills	Design	• Conducting simple surveys or discussions to gather opinions on what others need or like in a design. • Knowing that a survey is used to find out what people like. • Using a simple design brief that outlines the intended use, target user, and key features of the product, to create simple design criteria. • Knowing that a design brief helps to decide what to make. • Knowing that design criteria are the steps for making a product successful. • Creating ideas with design criteria in mind. • Referring to specific parts of existing products when generating ideas. • Knowing that the design criteria help when thinking of ideas. • Using labels to explain parts of a design, label materials, etc. • Using labels to explain parts of a design, label materials, etc. • Knowing that drawings can help explain how something works. • Knowing that a label explains part of a drawing.
	Make	• Choosing materials, ingredients or components from a wider range of materials, ingredients or components. • Explaining their choices based on the properties of materials and components. • Knowing some properties of materials like hard, soft, flexible, waterproof, strong etc. • Following and recalling simple safety instructions. • Knowing that some tools are sharp like scissors and knives. • Choosing known geometric shapes when making. • Beginning to shape objects to improve how they work. • Knowing the names of some geometric shapes: triangle, pyramid, square, cube, circle, sphere. • Considering balance in their finishing, like evenly spaced decoration.
	Evaluate	• Discussing a range of existing products and saying what they like and dislike about them. • Evaluating existing products against design criteria. • Evaluating their ideas and creations against simple design criteria. • Knowing that design criteria help to decide if their product is a success. • Suggesting improvements to their peers' designs and products. • Knowing that improve means to make something better. • Knowing that their suggestions can improve someone else's work.
Knowledge	Technical	• To know everyday objects have mechanisms. • To know many things that move have parts inside to help them work. • To know mechanisms usually limit unwanted movement. • To know everyday objects utilise wheels and axles. • To know wheels must be able to turn to work effectively. • To know axles allow wheels to turn without falling off.
	Additional	• To know the features of a fairground wheel include the wheel, frame, pods, a base an axle and an axle holder.

		Year 1/2 cycle B	
		Option 1: Levers	Option 2: Making a moving monster
Skills	Design	• Creating ideas with design criteria in mind. • Referring to specific parts of existing products when generating ideas. • Using labels to explain parts of a design, label materials etc, including using ICT. • Integrating moving parts when creating mock-ups.	• Selecting a suitable linkage system to produce the desired motion. • Designing a wheel.
	Make	• Integrating moving parts when creating mock-ups. • Planning more than one step ahead. • Choosing materials or components from a wider range of materials or components. • Choosing between pieces of equipment that are used for the same purpose (e.g. joining) and explaining why their choice suits the task. • Explaining their choices based on the properties of materials and components. • Following and recalling simple safety instructions.	• Selecting materials according to their characteristics. • Following a design brief.
	Evaluate	• Discussing whether they were able to use the tools and techniques effectively. • Comparing a range of products and explaining why some better meet different design criteria than others. • Evaluating their ideas and creations against simple design criteria.	• Evaluating different designs. • Testing and adapting a design.
Knowledge	Technical	• Recognising and exploring everyday objects that have mechanisms. • Exploring everyday objects that use levers (e.g scissors, tongs, door handle, stapler).	• To know that different materials have different properties and are therefore suitable for different uses.
	Additional	• To know that different products work in different ways and have parts that make them work. • To know drawings can help explain how something works. • To know many things that move have parts inside to help make them work. • To know some properties of materials, e.g., hard, soft, flexible, waterproof, strong, etc. • To know some pieces of equipment are better suited to certain jobs. • To know some tools are sharp like scissors and knives. • To know following instructions helps with safety. • To know many things that move have parts inside to help them work. • To know mechanisms usually limit unwanted movement. • To know a pivot is the part that a lever moves around.	• To know the features of a ferris wheel include the wheel, frame, pods, a base an axle and an axle holder. • To know that it is important to test my design as I go along so that I can solve any problems that may occur.

Year 3/4 cycle A

Option 1: **Pneumatic toys**

Skills	Design	• Creating simple design criteria that outline basic functionality and appeal to individual users or target audiences. • Taking part in structured idea blasting sessions. • Coming up with more ideas and considering the feasibility of their ideas in the classroom. • Developing drawing and sketching skills with a focus on clarity and simplicity. • Developing designs by adding detail and justifications about materials, tools, methods. • Beginning to recognise the benefit of a range of diagram types or prototypes to communicate ideas. (eg. sketches, cross-sectional diagram, thumbnail sketches and exploded diagrams).
	Make	• Selecting equipment required for a series of tasks based on the plan. Explain why each piece is suitable for each stage. • Suggesting simple safety rules based on their understanding of tool dangers. • Participating in discussions about classroom safety procedures. • Cutting out more complex shapes accurately. • Handle different sizes and types of scissors with confidence. • Using PVA glue to join corrugated card and light wood (e.g. balsa wood). • Choosing shapes to suit the function of a product. • Painting or colouring precisely to improve the finish. • Making facades from a range of materials. • Sealing edges with tape to cover gaps in joins.
	Evaluate	• Analysing why specific products, designers or inventors are successful. • Evaluating their designs by comparing them against design criteria and considering feedback from peers to suggest improvements. • Explaining why they think certain aspects of a peer's design are effective or why they suggested specific improvements. • Reflecting on feedback to decide if and how it could be used to improve future iterations.
Knowledge	Technical	• Beginning to understand how mechanisms work. • Recognising pneumatic systems in everyday objects (e.g. car boot, adjustable chair.)
	Additional	• To know that a problem or need is something that a designer can help to solve. • To know that extra information on drawings or diagrams can help the user understand a design or idea. • To know that thumbnail sketches are less detailed quick sketches. • To know that a cross-sectional diagram shows the inside of a product. • To know that an exploded diagram shows how the parts of a product fit together. • To know that different pieces of equipment will be used at different stages in a plan. • To know that different tools and equipment have different dangers. • To know that scissors are useful for cutting out complex shapes, • To know that designers and inventors create products. • To know that choices of materials and equipment can affect the final product. • To know that feedback is ideas and suggestions from other people that can help improve their work. • To know that they can choose to use feedback or not. • To understand that a mechanical system can allow us to move something more easily. • To know that mechanical systems have more than one mechanism that moves to make them work. • To know that mechanical systems are often hidden in products to make them look more appealing. • To know that pushing air can be used to move a mechanism. • To know that pivots can be used to create more movement in the mechanical system. • To know that a combination of mechanisms can improve a product.

		Year 3/4 cycle A
		Option 2: Pneumatic toys
Skills	Design	• Designing a toy which uses a pneumatic system. • Developing design criteria from a design brief. • Generating ideas using thumbnail sketches and exploded diagrams. • Learning that different types of drawings are used in design to explain ideas clearly.
	Make	• Creating a pneumatic system to create a desired motion. • Building secure housing for a pneumatic system. • Using syringes and balloons to create different types of pneumatic systems to make a functional and appealing pneumatic toy. • Selecting materials due to their functional and aesthetic characteristics. • Manipulating materials to create different effects by cutting, creasing, folding and weaving.
	Evaluate	• Using the views of others to improve designs. • Testing and modifying the outcome, suggesting improvements. • Understanding the purpose of exploded-diagrams through the eyes of a designer and their client.
Knowledge	Technical	• To understand how pneumatic systems work. • To understand that pneumatic systems can be used as part of a mechanism. • To know that pneumatic systems operate by drawing in, releasing and compressing air.
	Additional	• To understand how sketches, drawings and diagrams can be used to communicate design ideas. • To know that exploded-diagrams are used to show how different parts of a product fit together. • To know that thumbnail sketches are small drawings to get ideas down on paper quickly.

Year 3/4 cycle B		
Mechanical cars		
Skills	Design	• Taking part in structured brainstorming sessions. • Developing drawing and sketching skills with a focus on clarity and simplicity. • Beginning to recognise the benefit of a range of diagram types or prototypes to communicate ideas. (eg. sketches, cross-sectional diagram, thumbnail sketches and exploded diagrams) • Creating prototypes using materials with similar properties to their final design. • Creating simple design criteria that outline basic functionality and appeal to individual users or target audiences. • Developing designs by adding detail and justifications about materials, tools, methods.
	Make	• Following detailed safety instructions. • Using a ruler as a measuring tool with increasing accuracy by creating spaced marks using millimetres and measuring lengths of objects. • Handle different sizes and types of scissors with confidence. • With close supervision using a hot glue gun to join wooden materials (e.g. lolly sticks). • Selecting equipment required for a series of tasks based on the plan. Explain why each piece is suitable for each stage. • Selecting materials, components or ingredients from a wider choice but within a limited design space (e.g. seasonal ingredients from May and June in the UK).
	Evaluate	• Explaining why they think certain aspects of a peer's design are effective or why they suggested specific improvements. • Reflecting on feedback to decide if and how it could be used to improve future iterations. • Investigating and analysing a range of existing products by looking at their functionality and appeal. • Analysing why specific products, designers or inventors are successful. • Evaluating their designs by comparing them against design criteria and considering feedback from peers to suggest improvements. • Evaluating how effective their chosen materials and tools were in fulfilling the design brief.
Knowledge	Technical	• To understand that a mechanical system can allow us to move something more easily. • To know that mechanical systems have more than one mechanism that moves to make them work. • To know that mechanical systems are often hidden in products to make them look more appealing.
	Additional	• To know that extra information on drawings or diagrams can help the user understand a design or idea. • To know that an exploded diagram shows how the parts of a product fit together. • To know that a prototype is a detailed model that helps a user understand how a product will work. • To know that a target audience is a group of people that might like the idea. • To know that different tools and equipment have different dangers. • To know that a ruler can be used to measure length. • To know that a hot glue gun can be used to join materials. • To know that better suggestions of improvements mean better feedback. • To know that they can choose to use feedback or not. • To know that some products are more successful than other because of their function. • To know that choices of materials and equipment can affect the final product. • To know that feedback is ideas and suggestions from other people that can help improve their work.

Year 5/6 cycle A

Gears and pulleys

Skills	Design	• Noticing wider-reaching problems or needs in the community. • Identifying a wide range of needs and potential barriers through market research. • Writing more complex problem statements that consider multiple factors and constraints. • Creating more complex design criteria that require considering detailed user needs, environmental impact, materials and cost. • Coming up with a broader range of ideas and deeper innovation, requiring pupils to think critically about their ideas' practicality and originality. • Beginning to use more complex annotated sketches, such as cross-sectional and exploded diagrams and pattern pieces in design. • Using a series of prototypes to refine and improve their designs.
	Make	• Consistently apply safety instructions. • Select appropriate scissors to handle delicate cutting tasks and challenging materials. • Cutting patterns and drawings accurately. • In supervised groups, using hot glue guns safely. • Recognising that hot glue is useful for joining materials that need a strong bond that sets quickly. • Choosing PVA glue over hot glue for its safety when joining materials in less intensive projects.
	Evaluate	• Reflecting on the usability, aesthetics, innovation and sustainability of products and discussing how design choices impact these aspects. • Assessing their designs against a more complex set of design criteria that includes functionality, aesthetics, user experience, sustainability and cost. • Considering alternative materials, tools or techniques that could enhance the product. • Providing feedback that is helpful, specific, and encouraging. • Incorporating feedback from peers or users improve their product further, explaining the changes they made and the impact they had.
Knowledge	Technical	• That mechanical systems that use gears in everyday objects (eg bicycle, clock). • That gears and pulleys allow us to transfer movement and force from one part of a mechanical system to another. • That gears allow us to increase the output of a mechanism.
	Additional	• That market research is a way of collecting information about problems or needs. • That constraints are things that might stop our ideas being successful. • That original and innovative ideas are different from what has been made before. • That annotations are detailed labels and comments on diagrams. • That risks are things that might happen. • That hot glue creates a strong bond quickly. • That is often better to choose safer equipment. • That sustainability means thinking about the materials that were used to make a product and how the product was made. • That their final product can still be improved by different materials or techniques. • That evaluating their designs in detail will help them understand its successful and less successful parts. • That feedback should be positive, helpful and specific. • That explaining how they used feedback to improve their design can help them create better products in the future.

		Year 5/6 cycle B
		Automata toys
Skills	Design	• Noticing wider-reaching problems or needs in the community. • Coming up with a broader range of ideas and deeper innovation, requiring pupils to think critically about their ideas' practicality and originality. • Beginning to use more complex annotated sketches, such as cross-sectional and exploded diagrams and pattern pieces in design.
	Make	• Producing lists of equipment, materials and tools that they need for a task. • Selecting materials, components or ingredients based on research or user needs. • Explaining their choices, referring to their research. • Considering which equipment will work well together. • Choosing from the known range of equipment available to them with little guidance. • Assessing risks associated with different tools and equipment. • Understanding and explaining the importance of each safety rule. • Consistently apply safety instructions. • Cutting jelutong or other harder wood with a coping saw or a tenon saw in small groups. • Cutting in a back-and-forth sawing motion where appropriate. • In supervised groups, using hot glue guns safely. • Recognising that hot glue is useful for joining materials that need a strong bond that sets quickly.
	Evaluate	• Assessing their designs against a more complex set of design criteria that includes functionality, aesthetics, user experience, sustainability and cost. • Providing feedback that is helpful, specific and encouraging. • Incorporating feedback from peers or users to improve their product further, explaining the changes they made and the impact they had.
Knowledge	Technical	• To know that the mechanism in an automata uses a system of cams, axles and followers. • To know that different shaped cams produce different outputs. • To know which mechanisms are working together to make a mechanical system. • To know that there are different directions of movement. • To know that mechanisms can change one type of movement to another.
	Additional	• To know that an automata is a hand powered mechanical toy. • To know that a cross-sectional diagram shows the inner workings of a product.

		Year 3/4 cycle B	
		Electric poster	Torches
Skills	Design	• Carry out research based on a given topic (e.g. The Romans) to develop a range of initial ideas. • Generate a final design for the electric poster with consideration to the client's needs and design criteria. • Design an electric poster that fits the requirements of a given brief. • Plan the positioning of the bulb (circuit component) and its purpose.	• Designing a torch, giving consideration to the target audience and creating both design and success criteria focusing on features of individual design ideas.
	Make	• Create a final design for the electric poster. • Mount the poster onto corrugated card to improve its strength and allow it to withstand the weight of the circuit on the rear. • Measure and mark materials out using a template or ruler. • Fit an electrical component (bulb). • Learn ways to give the final product a higher quality finish (e.g. framing to conceal a roughly cut edge).	• Making a torch with a working electrical circuit and switch. • Using appropriate equipment to cut and attach materials. • Assembling a torch according to the design and success criteria.
	Evaluate	• Learning to give and accept constructive criticism on own work and the work of others. • Testing the success of initial ideas against the design criteria and justifying opinions. • Revisiting the requirements of the client to review developing design ideas and check that they fulfil their needs.	• Evaluating electrical products. • Testing and evaluating the success of a final product.
Knowledge	Technical	• To understand that an electrical system is a group of parts (components) that work together to transport electricity around a circuit. • To understand common features of an electric product (switch, battery or plug, dials, buttons etc.). • To list examples of common electric products (kettle, remote control etc.). • To understand that an electric product uses an electrical system to work (function). • To know the name and appearance of a bulb, battery, battery holder and crocodile wire to build simple circuits.	• To understand that electrical conductors are materials which electricity can pass through. • To understand that electrical insulators are materials which electricity cannot pass through. • To know that a battery contains stored electricity that can be used to power products. • To know that an electrical circuit must be complete for electricity to flow. • To know that a switch can be used to complete and break an electrical circuit.
	Additional	• To understand the importance and purpose of information design. • To understand how material choices (such as mounting paper to corrugated card) can improve a product to serve its purpose (remain rigid without bending when the electrical circuit is attached).	• To know the features of a torch: case, contacts, batteries, switch, reflector, lamp, lens. • To know facts from the history and invention of the electric light bulb(s) - by Sir Joseph Swan and Thomas Edison.

Year 5/6 cycle A		
Option 1: Wobble bots		
Skills	Design	• Creating more complex design criteria that require considering detailed user needs, environmental impact, materials and cost. • Developing more independence in generating ideas. • Coming up with a broader range of ideas and deeper innovation, requiring pupils to think critically about their ideas' practicality and originality. • Using a series of prototypes to refine and improve their designs.
	Make	• Producing lists of equipment, materials and tools that they need for a task. • Creating a step-by-step plan for making. • Selecting materials, components or ingredients based on research or user needs. • Explaining their choices, referring to their research. • Understanding and explaining the importance of each safety rule. • Consistently apply safety instructions. • Balancing aesthetics and functionality when creating parts of a design. • Considering when best to apply finishing effects.
	Evaluate	• Reflecting on the usability, aesthetics, innovation and sustainability of products and discussing how design choices impact these aspects. • Assessing their designs against a more complex set of design criteria that includes functionality, aesthetics, user experience, sustainability and cost. • Considering alternative materials, tools or techniques that could enhance the product. • Providing feedback that is helpful, specific, and encouraging. • Incorporating feedback from peers or users improve their product further, explaining the changes they made and the impact they had.
Knowledge	Technical	• Beginning to understand that electricity flows around a circuit. • Using different components to produce different results from electrical systems. • Creating working electrical circuits with a wider variety of electrical components. • Deconstructing electrical systems to understand how they work.
	Additional	• To know environmental impact is how the product and making the product might affect the environment. • To know original and innovative ideas are different from what has been made before. • To know annotations are detailed labels and comments on diagrams. • To know improving on prototypes can help to improve the final design. • To know materials and equipment lists help to plan better. • To know research can help decide which materials are best for both aesthetics and functional properties. • To know some equipment can work well with other equipment. • To know risks are things that might go wrong. • To know the shape of an object can affect both its aesthetics and function. • To know sustainability means thinking about the materials that were used to make a product and how the product was made. • To know looking at other designers work can help inform designs. • To know their final product can still be improved by using different materials or techniques. • To know evaluating their designs in detail will help them understand its successful and less successful parts. • To know feedback should be positive, helpful and specific. • To know explaining how they used feedback to improve their design can help them create better products in the future. • To know an electric motor converts electricity into rotational movement. • To know a motorised product is one which uses a motor to function. • To know the names of components that can form an electrical system.

		Year 5/6 cycle A
		Option 2: Doodlers
Skills	Design	• Identifying factors that could be changed on existing products and explaining how these would alter the form and function of the product. • Developing design criteria based on findings from investigating existing products. • Developing design criteria that clarifies the target user.
	Make	• Altering a product's form and function by tinkering with its configuration. • Making a functional series circuit, incorporating a motor. • Constructing a product with consideration for the design criteria. • Breaking down the construction process into steps so that others can make the product.
	Evaluate	• Carry out a product analysis to look at the purpose of a product along with its strengths and weaknesses. • Determining which parts of a product affect its function and which parts affect its form. • Analysing whether changes in configuration positively or negatively affect an existing product. • Peer evaluating a set of instructions to build a product.
Knowledge	Technical	• To know that series circuits only have one direction for the electricity to flow. • To know when there is a break in a series circuit, all components turn off. • To know that an electric motor converts electrical energy into rotational movement, causing the motor's axle to spin. • To know a motorised product is one which uses a motor to function.
	Additional	• To know that product analysis is critiquing the strengths and weaknesses of a product. • To know that 'configuration' means how the parts of a product are arranged.

		Year 5/6 cycle B
		<u>Steady hand game</u>
Skills	Design	• Designing a steady hand game - identifying and naming the components required. • Drawing a design from three different perspectives. • Generating ideas through sketching and discussion. • Modelling ideas through prototypes. • Understanding the purpose of products (toys), including what is meant by 'fit for purpose' and 'form over function'.
	Make	• Constructing a stable base for a game. • Accurately cutting, folding and assembling a net. • Decorating the base of the game to a high quality finish. • Making and testing a circuit. • Incorporating a circuit into a base.
	Evaluate	• Testing own and others finished games, identifying what went well and making suggestions for improvement. • Gathering images and information about existing children's toys. • Analysing a selection of existing children's toys.
Knowledge	Technical	• To know that batteries contain acid, which can be dangerous if they leak. • To know the names of the components in a basic series circuit, including a buzzer.
	Additional	• To know that 'form' means the shape and appearance of an object. • To know the difference between 'form' and 'function'. • To understand that 'fit for purpose' means that a product works how it should and is easy to use. • To know that form over purpose means that a product looks good but does not work very well. • To know the importance of 'form follows function' when designing: the product must be designed primarily with the function in mind. • To understand the diagram perspectives 'top view', 'side view' and 'back'.

		EYFS (Reception)	Year 1/2	
		<u>Soup</u>	Cycle A: <u>Smoothies</u>	Cycle B: <u>Balanced diet</u>
Skills	Design	• Designing a soup recipe as a class. • Designing soup packaging.	• Designing smoothie carton packaging by-hand. • Learning where and how fruits and vegetables grow.	• Designing three wrap ideas.
	Make	• Chopping plasticine safely. • Chopping vegetables with support.	• Chopping fruit and vegetables safely to make a smoothie. • Juicing fruits safely to make a smoothie. • Identifying if a food is a fruit.	• Chopping foods safely to make a wrap. • Constructing a wrap that meets a design brief. • Grating foods to make a wrap. • Snipping smaller foods instead of cutting. • Spreading soft foods to make a wrap. • Identifying the five food groups. • Learning about balanced diet.
	Evaluate	• Tasting the soup and giving opinions. • Describing some of the following when tasting food: look, feel, smell and taste. • Choosing their favourite packaging design and explaining why.	• Tasting and evaluating different food combinations. • Describing appearance, smell and taste. • Suggesting information to be included on packaging. • Comparing their own smoothie with someone else's.	• Describing appearance, smell and taste. • Taste and evaluating different food combinations. • Describing the information that should be included on a label.
Knowledge		• To know that soup is ingredients (usually vegetables and liquid) blended together. • To know that vegetables are grown. • To recognise and name some common vegetables. • To know that different vegetables taste different. • To know that eating vegetables is good for us. • To discuss why different packages might be used for different foods.	• To know that a blender is a machine which mixes ingredients together into a smooth liquid. • To know that a fruit has seeds and a vegetable does not. • To know that fruits grow on trees or vines. • To know that vegetables can grow either above or below ground. • To know that vegetables is any edible part of a plant.	• To know that 'diet' means the food and drink that a person or animal usually eats. • To know what makes a balanced diet. • To know that the five main food groups are: Carbohydrates, fruits and vegetables, protein, dairy and foods high in fat and sugar. • To know that I should eat a range of different foods from each food group, and roughly how much of each food group. • To know that 'ingredients' means the items in a mixture or recipe. • To know how to cut, grate, snip and spread to prepare foods. • To know how to review and give a score to evaluate.

		Year 3/4	
		Cycle A: <u>Eating seasonally</u>	Cycle B: <u>Adapting a recipe</u>
Skills	Design	• Describing how climate affects where foods grow.	• Designing a biscuit within a given budget. • Conducting market research.
	Make	• Identifying seasonal ingredients from the UK. • Following the instructions within a recipe. • Tasting seasonal ingredients. • Peeling foods by hand or with a peeler. • Cutting ingredients safely. • Choosing ingredients based on a design brief.	• Following a baking recipe. • Understanding safety and hygiene rules. • Adapting a recipe.
	Evaluate	• Describing the texture and flavour of ingredients. • Describing the benefits of seasonal fruits and vegetables and the impact on the environment.	• Evaluating an adapted recipe. • Evaluating and comparing a range of products. • Suggesting modifications.
Knowledge		• To know that seasonal means foods that grow in a given season in a given country. • To know some seasonal foods that grow in the UK and what season they grow in. • To know that eating seasonal foods can have a positive impact on the environment. • To know how to describe the flavour and texture of foods. • To know how to cut a peel safely. • To know that the appearance of food is as important as taste. • To know that similar coloured fruits and vegetables often have similar nutritional benefits.	• To know that the amount of an ingredient in a recipe is known as the 'quantity.' • To know that safety and hygiene are important when cooking. • To know the following cooking techniques: sieving, measuring, stirring, cutting out and shaping. • To know the importance of budgeting while planning ingredients for a recipe. • To know that products often have a target audience.

		Year 5/6	
		Cycle A: <u>Developing a recipe</u>	Cycle B: <u>Come dine with me</u>
Skills	Design	• Researching existing recipes. • Suggesting alternative ingredients. • Designing a jar label.	• Writing a recipe, explaining the key steps, method and ingredients. • Including facts and drawings from research undertaken.
	Make	• Writing an alternative recipe. • Understanding cross-contamination. • Using preparation skills. • Making a developed recipe.	• Following a recipe, including using the correct quantities of each ingredient. • Adapting a recipe based on research. • Working to a given timescale. • Working safely and hygienically with independence.
	Evaluate	• Explaining the farm to fork process. • Analysing nutritional content.	• Evaluating a recipe, considering: taste, smell, texture and origin of the food group. • Taste testing and scoring final products. • Suggesting and writing up points of improvements when scoring others' dishes, and when evaluating their own throughout the planning, preparation and cooking process. • Evaluating health and safety in production to minimise cross contamination.
Knowledge		• To know that beef comes from cows reared on farms. • To know that recipes can be adapted to suit nutritional needs and dietary requirements. • To know that nutritional information is found on food packaging. • To know that coloured chopping boards can prevent cross-contamination. • To know that food packaging serves many purposes.	• To know that 'flavour' is how a food or drink tastes. • To know that many countries have 'national dishes' which are recipes associated with that country. • To know that 'processed food' means food that has been put through multiple changes in a factory. • To understand that it is important to wash fruit and vegetables before eating to remove any dirt and insecticides. • To understand what happens to a certain food before it appears on the supermarket shelf (Farm to Fork).

		EYFS: Reception
		<u>Bookmarks</u>
Skills	Design	• Discussing what a good design needs. • Designing a simple pattern with paper. • Designing a bookmark. • Choosing from available materials.
	Make	• Developing fine motor/cutting skills with scissors. • Exploring fine motor/threading and weaving (under, over technique) with a variety of materials. • Using a prepared needle and wool to practise threading.
	Evaluate	• Reflecting on a finished product and comparing to their design.
Knowledge		• To know that a design is a way of planning our idea before we start. • To know that threading is putting one material through an object.

Year 1/2 cycle A			
		Option 1: Simple stitches	Option 2: Puppets
Skills	Design	• Stating what they intend to make and why - identifying the purpose. • Talking about ideas, with purpose and user in mind. • Using basic drawing skills to communicate ideas.	• Using a template to create a design for a puppet.
	Make	• Choosing between a small number of materials, ingredients or components. • Explaining their choices based on personal experiences. • Explaining in simple terms why certain tools must be handled carefully. • Following and recalling simple safety instructions. • Using a straightedge to draw a straight line. • Beginning to use objects with a fixed width or length to create even spacing of markings or cuts. (e.g. a lolly stick). • Using a large plastic needle and large-weave embroidery fabric to begin to create a running stitch. • Applying masking tape to fix something in place or join to edges. • Adding texture to create visual interest.	• Cutting fabric neatly with scissors. • Using joining methods to decorate a puppet. • Sequencing the steps taken during construction.
	Evaluate	• Saying what they like about their peers' designs and products. • Accepting feedback and understanding it is meant to improve their work.	• Reflecting on a finished product, explaining likes and dislikes.
	Technical	• Discussing fabric properties. • Threading large needles. • Rehearsing sewing techniques with large needles and thick thread, like wool. • Sewing a running stitch in large-weave embroidery fabric or hessian. • Creating patterns and following them with stitching. • Spacing stitches evenly.	
Knowledge		• To know drawings are a way to explain ideas. • To know that choosing different materials or components will affect what the product does or looks like. • To know the names of common pieces of equipment. • To know that following instructions helps with safety. • To know that spacing cuts or marks evenly can be useful. • To know that texture is how something feels. • To know their ideas or products can be made better. • To know their final product might be different to their original idea. • To know their ideas can make someone else's work better. • To know other people's ideas can help make their work better. • To know evenly spaced stitches help when following a pattern.	• To know that 'joining technique' means connecting two pieces of material together. • To know that there are various temporary methods of joining fabric by using staples, glue or pins. • To understand that different techniques for joining materials can be used for different purposes. • To understand that a template (or fabric pattern) is used to cut out the same shape multiple times. • To know that drawing a design idea is useful to see how an idea will look.

Year 1/2 cycle B		
<u>Pouches</u>		
Skills	Design	• Designing a pouch.
	Make	• Selecting and cutting fabrics for sewing. • Decorating a pouch using fabric glue or running stitch. • Threading a needle. • Sewing running stitch, with evenly spaced, neat, even stitches to join fabric. • Neatly pinning and cutting fabric using a template.
	Evaluate	• Troubleshooting scenarios posed by the teacher. • Evaluating the quality of the stitching on others' work. • Discussing as a class the success of their stitching against the success criteria. • Identifying aspects of their peers' work that they particularly like and explaining why.
	Technical	
Knowledge		• To know that sewing is a method of joining fabric. • To know that different stitches can be used when sewing. • To understand the importance of tying a knot after sewing the final stitch. • To know that a thimble can be used to protect my fingers when sewing.

		Year 3/4	
		Cycle A: Cross-stitch and appliqué <u>Cushions</u> or <u>Egyptian collars</u>	Cycle B: <u>Fastenings</u>
Skills	Design	• Designing and making a template from an existing cushion and applying individual design criteria.	• Writing design criteria for a product, articulating decisions made. • Designing a personalised book sleeve.
	Make	• Following design criteria to create a cushion or Egyptian collar. • Selecting and cutting fabrics with ease using fabric scissors. • Threading needles with greater independence. • Tying knots with greater independence. • Sewing cross stitch to join fabric. • Decorating fabric using appliqué. • Completing design ideas with stuffing and sewing the edges (Cushions) <i>or</i> embellishing the collars based on design ideas (Egyptian collars).	• Making and testing a paper template with accuracy and in keeping with the design criteria. • Measuring, marking and cutting fabric using a paper template. • Selecting a stitch style to join fabric. • Working neatly by sewing small, straight stitches. • Incorporating a fastening to a design.
	Evaluate	• Evaluating an end product and thinking of other ways in which to create similar items.	• Testing and evaluating an end product against the original design criteria. • Deciding how many of the criteria should be met for the product to be considered successful. • Suggesting modifications for improvement. • Articulating the advantages and disadvantages of different fastening types.
Knowledge		• To know that appliqué is a way of mending or decorating a textile by applying smaller pieces of fabric to larger pieces. • To know that when two edges of fabric have been joined together it is called a seam. • To know that it is important to leave space on the fabric for the seam. • To understand that some products are turned inside out after sewing so the stitching is hidden.	• To know that a fastening is something which holds two pieces of material together for example a zipper, toggle, button, press stud and velcro. • To know that different fastening types are useful for different purposes. • To know that creating a mock up (prototype) of their design is useful for checking ideas and proportions.

		Year 5/6 cycle A
		<u>Stuffed toys</u>
Skills	Design	• Designing a stuffed toy, considering the main component shapes required and creating an appropriate template. • Considering the proportions of individual components.
	Make	• Creating a 3D stuffed toy from a 2D design. • Measuring, marking and cutting fabric accurately and independently . • Creating strong and secure blanket stitches when joining fabric. • Threading needles independently. • Using appliqué to attach pieces of fabric decoration. • Sewing blanket stitch to join fabric. • Applying blanket stitch so the spaces between the stitches are even and regular.
	Evaluate	• Testing and evaluating an end product and giving point for further improvements.
Knowledge		• To know that blanket stitch is useful to reinforce the edges of a fabric material or join two pieces of fabric. • To understand that it is easier to finish simpler designs to a high standard. • To know that soft toys are often made by creating appendages separately and then attaching them to the main body. • To know that small, neat stitches which are pulled taut are important to ensure that the soft toy is strong and holds the stuffing securely.

		Year 5/6 cycle B	
		Option 1: Bags	Option 2: Waistcoats
Skills	Design	- Developing annotated sketches to communicate design ideas. - Creating pattern pieces to use in design.	- Designing a waistcoat in accordance to a specification linked to set of design criteria. - Annotating designs, to explain their decisions.
	Make	- Using a ruler to accurately measure and draw lines and marks. - Using nets to create 3D objects.	- Using a template when cutting fabric to ensure they achieve the correct shape. - Using pins effectively to secure a template to fabric without creases or bulges. - Marking and cutting fabric accurately, in accordance with their design. - Sewing a strong running stitch, making small, neat stitches and following the edge. - Tying strong knots. - Decorating a waistcoat, attaching features (such as appliqué) using thread. - Finishing the waistcoat with a secure fastening (such as buttons). - Learning different decorative stitches. - Sewing accurately with evenly spaced, neat stitches.
	Evaluate	- Reflecting on the functionality and aesthetics of products. - Discussing reasons for design choices.	Reflecting on their work continually throughout the design, make and evaluate process.
	Technical	- Using pins effectively to secure a template to fabric without creases or bulges. - Threading needles independently. - Tying knots at the end of thread to secure it. - Selecting textiles and buttons to improve aesthetics and function. - Attaching objects like buttons using thread.	
Knowledge		- To know that nets can be folded to create 3D shapes. - To know that pattern pieces are like nets/templates. - To know how designers use pattern pieces when creating textiles products. - To know that products are sometimes made in parts that are sewn together. - To know that safety pins can hold fabric in place before sewing. - To know that there are different types of stitches. - To know what a running stitch is. - To know that aesthetics is how something looks. - To know that consistently sized stitches improve the aesthetic of a product. - To know that the shape of an object can affect both its aesthetics and function.	- To understand that it is important to design clothing with the client/ target customer in mind. - To know that using a template (or clothing pattern) helps to accurately mark out a design on fabric. - To understand the importance of consistently sized stitches.

		Year 3/4	
		Cycle A: Wearable technology	Cycle B: Mindful moments timer
Skills	Design	• Problem solving by suggesting which features on a micro:bit might be useful and justifying my ideas. • Drawing and manipulating 2D shapes, using computer-aided design, to produce a point of sale badge. • Developing design ideas through annotated sketches to create a product concept. • Developing design criteria to respond to a design brief.	• Writing design criteria for a programmed timer (micro:bit). • Exploring different mindfulness strategies. • Applying the results of my research to further inform my design criteria. • Developing a prototype case for my mindful moment timer. • Using and manipulating shapes and clipart by using computer-aided design (CAD), to produce a logo. • Following a list of design requirements.
	Make	• Following a list of design requirements. • Writing a program to control (button press) and/or monitor (sense light) that will initiate a flashing LED algorithm.	• Developing a prototype case for my mindful moment timer. • Creating 3D structures using modelling materials. • Programming a micro:bit in the Microsoft micro:bit editor, to time a set number of seconds/minutes upon button press.
	Evaluate	• Analysing and evaluating wearable technology. • Using feedback from peers to improve design.	• Investigating and analysing a range of timers by identifying and comparing their advantages and disadvantages. • Evaluating my micro:bit program against points on my design criteria and amending them to include any changes I made. • Documenting and evaluating my project. • Understanding what a logo is and why they are important in the world of design and business. • Testing my program for bugs (errors in the code). • Finding and fixing the bugs (debug) in my code. • Using an exhibition to gather feedback. • Gathering feedback from the user to make suggested improvements to a product.
Knowledge	Technical	• To understand that, in programming, a 'loop' is code that repeats something again and again until stopped. • To know that a micro:bit is a pocket-sized, codeable computer. • To know that a simulator is able to replicate the functions of an existing piece of technology.	• To understand what variables are in programming. • To know some of the features of a micro:bit. • To know that an algorithm is a set of instructions to be followed by the computer. • To know that it is important to check my code for errors (bugs). • To know that a simulator can be used as a way of checking your code works before installing it onto an electronic device.
	Additional	• To know what the 'Digital Revolution' is and features of some of the products that have evolved as a result. • To understand what is meant by 'point of sale display.' • To know that CAD stands for 'Computer-aided design'. • To know what a focus group is by taking part in one.	• To understand the terms 'ergonomic' and 'aesthetic'. • To know that a prototype is a 3D model made out of cheap materials, that allows us to test design ideas and make better decisions about size, shape and materials. • To know that an exhibition is a way for companies to showcase products, meet potential new customers and gather feedback from users.

		Year 5/6	
		Cycle A: Monitoring devices	Cycle B: Navigating the world
Skills	Design	• Researching (books, internet) for a particular (user's) animal's needs. • Developing design criteria based on research. • Generating multiple housing ideas using building bricks. • Understanding what a virtual model is and the pros and cons of traditional and CAD modelling. • Placing and manoeuvring 3D objects, using CAD. • Changing the properties of, or combining one or more 3D objects, using CAD.	• Writing a design brief from information submitted by a client. • Developing design criteria to fulfil the client's request. • Considering and suggesting additional functions for my navigation tool. • Developing a product idea through annotated sketches. • Placing and manoeuvring 3D objects, using CAD. • Changing the properties of, or combining one or more 3D objects, using CAD.
	Make	• Understanding the functional and aesthetic properties of plastics. • Programming to monitor the ambient temperature and coding an (audible or visual) alert when the temperature rises above or falls below a specified range.	• Considering materials and their functional properties, especially those that are sustainable and recyclable (for example, cork and bamboo). • Explaining material choices and why they were chosen as part of a product concept. • Programming an N,E, S, W cardinal compass.
	Evaluate	• Stating an event or fact from the last 100 years of plastic history. • Explaining how plastic is affecting planet Earth and suggesting ways to make more sustainable choices. • Explaining key functions in my program (audible alert, visuals). • Explaining how my product would be useful for an animal carer including programmed features.	• Explaining how my program fits the design criteria and how it would be useful as part of a navigation tool. • Developing an awareness of sustainable design. • Identifying key industries that utilise 3D CAD modelling and explaining why. • Describing how the product concept fits the client's request and how it will benefit the customers. • Explaining the key functions in my program, including any additions. • Explaining how my program fits the design criteria and how it would be useful as part of a navigation tool. • Explaining the key functions and features of my navigation tool to the client as part of a product concept pitch. • Demonstrating a functional program as part of a product concept pitch.
Knowledge	Technical	• To know that a 'device' means equipment created for a certain purpose or job and that monitoring devices observe and record. • To know that a sensor is a tool or device that is designed to monitor, detect and respond to changes for a purpose. • To understand that conditional statements (and, or, if booleans) in programming are a set of rules which are followed if certain conditions are met.	• To know that accelerometers can detect movement. • To understand that sensors can be useful in products as they mean the product can function without human input.
	Additional	• To understand key developments in thermometer history. • To know events or facts that took place over the last 100 years in the history of plastic, and how this is changing our outlook on the future. • To know the 6Rs of sustainability. • To understand what a virtual model is and the pros and cons of traditional vs CAD modelling.	• To know that designers write design briefs and develop design criteria to enable them to fulfil a client's request. • To know that 'multifunctional' means an object or product has more than one function. • To know that magnetometers are devices that measure the Earth's magnetic field to determine which direction you are facing.
