

DEEPDALE COMMUNITY PRIMARY SCHOOL

Our PSHE Curriculum offer

Deepdale PSHE (including HRE) Curriculum

“Respect for All”

Our PSHE Curriculum helps children to understand themselves and respect the lives other people choose to live.

The curriculum aims to prepare our children to move with confidence from childhood into adulthood by supporting them through their physical, emotional and moral development, increasing their cultural capital and equipping them with the skills to make and maintain positive relationships, including those made online.

We develop the children’s communication skills by increasing the vocabulary that they will need outside of school so they have the confidence to say and do what is right, preparing them for success in adult life.

STATUTORY REQUIREMENTS

Relationship Education

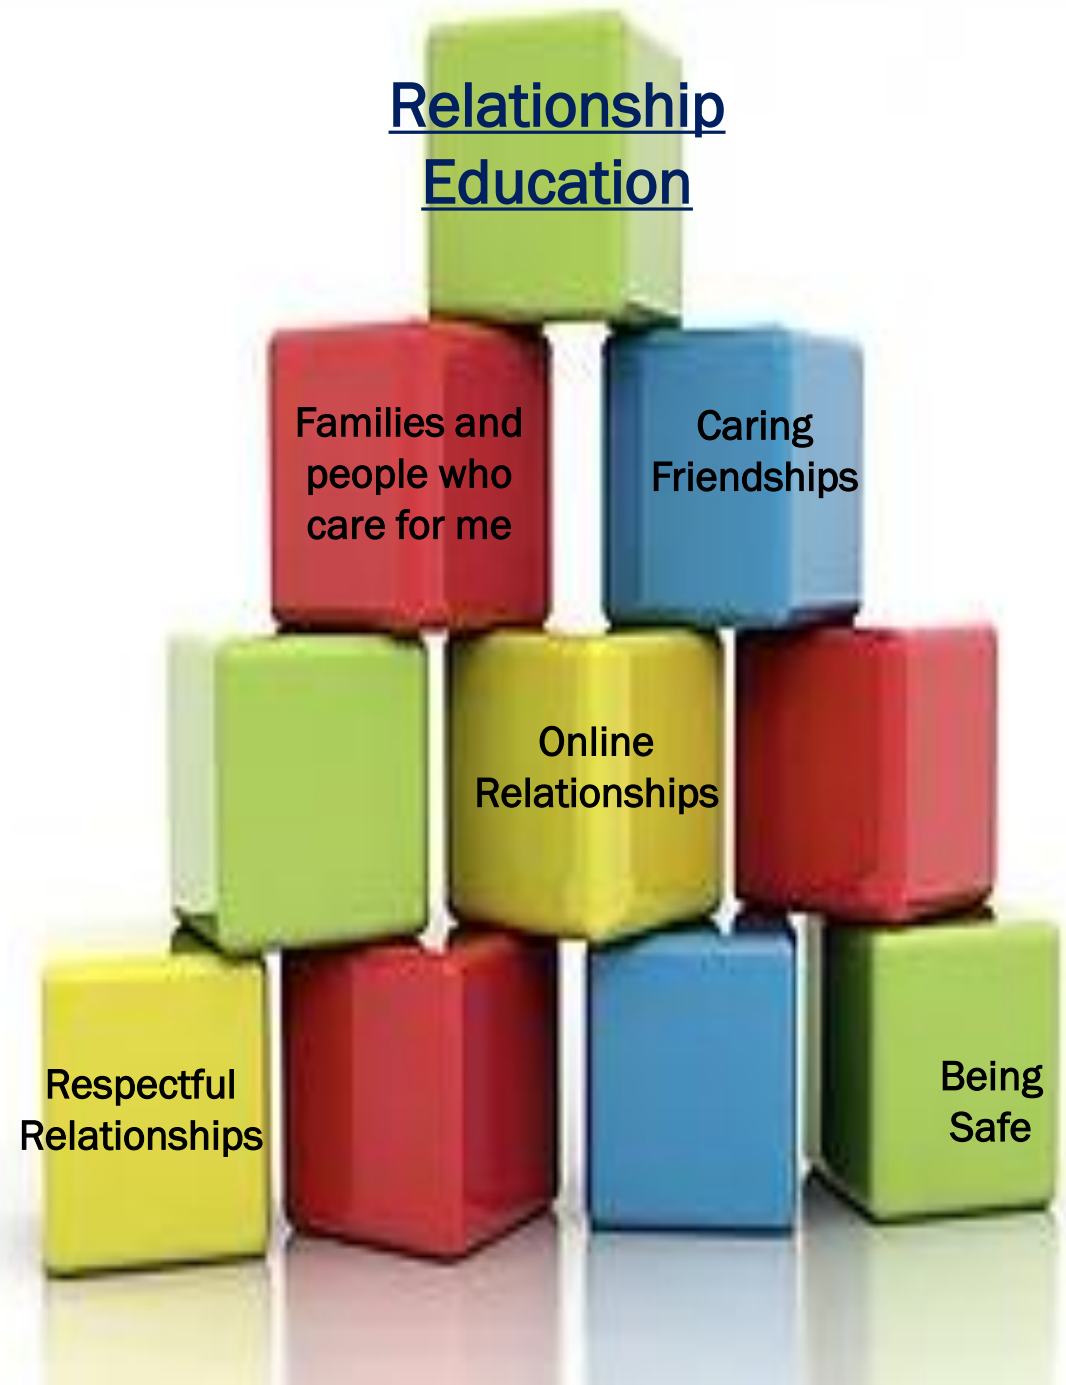

Relationship Education will put in place the building blocks needed for positive and safe relationships, including with family, friends and online.

In an age-appropriate way the curriculum will cover how to treat each other with kindness, consideration and respect.

The children will be taught:

- what a relationship is
- what friendship is
- what family means
- who can support them.

Care is taken to ensure that there is no stigmatization of children based on their home circumstances (families can include single parent families, LGBT parents, families headed by grandparents, adoptive parents, foster parents/carers amongst other structures) along with reflecting sensitively that some children may have a different structure of support around them (for example: looked after children or young carers).

Health Education

Health Education aims to give the children the information they need to make good decisions about

- their own health and wellbeing
- how to recognise issues in themselves and others
- how to seek support as early as possible when issues arise

The statutory Health Education guidance states that by the end of primary school pupils should know:

THE CURRICULUM

Documents

- Statutory Guidance – Relationship Education and Health Education
- PSHE Association Programmes of Study
- PSHE Association ‘Question-Based Model Programme Builder’
- Association of Muslim Schools

We adapted the ‘Question-Based Model’ to create Long Term Plans based on the needs of our school and local community.

Core Themes

The statutory guidance is covered within three core themes

- Relationships
- Health and Wellbeing
- Living in the Wider World

Even though much of 'Living in the Wider World' is NOT included in the statutory requirements we feel that it should remain an important part of our curriculum offer as it closely links to our school's Curriculum Drivers.

SCIENCE CURRICULUM

Science Curriculum

As part of the Science Curriculum, we teach the following **statutory** objectives that build understanding about growth, life-cycles and reproduction:

- In Key Stage 1, children learn that animals, including humans, have offspring that grow into adults.
- In Lower Key Stage 2 (Y3), children explore the life-cycles of flowering plants.
- In Upper Key Stage 2 (Y5/6), children are taught about the life-cycle of a mammal, an amphibian, an insect and a bird and describe the life processes of reproduction in some plants and animals. They also learn about the change that happens in humans from birth to old age. This includes learning about what happens in puberty.
