

MFL Curriculum Overview

Intent

Our intent for the Key Stage 2 Spanish curriculum is to instil a passion for languages, fostering communication skills and cultural awareness among pupils. We aim to develop their ability to understand and use Spanish in various contexts, preparing them for an increasingly interconnected world.

Through engaging and interactive lessons, pupils will explore the rich cultures, histories, and traditions of Spanish-speaking countries. By incorporating diverse activities such as storytelling, music, and role-playing, we encourage learners to express themselves confidently and creatively in Spanish.

Our curriculum focuses on key areas, including speaking, listening, reading, and writing, while integrating vocabulary and grammar in an enjoyable way. We understand the importance of building a solid foundation in language learning, so we ensure that progression is carefully sequenced, allowing pupils to develop their language skills systematically.

Additionally, by promoting an appreciation for other languages and cultures, we equip pupils with the tools to navigate an increasingly globalised society and foster empathy towards others. We strive to create a positive language learning environment where learners feel supported to take risks, celebrate their successes, and embrace the journey of language acquisition.

Implementation and Curriculum Overview

Oak Class – KS2 (This should be read alongside the MFL Progression Document)

Cycles	Autumn	Spring	Summer
Cycle A & C	1. Meet and Greet 2. Christmas	1. The People Around Me 2. Time To Eat	1. My Routine 2. The Wider World
Cycle B & D	1. My Town 2. Exploring a Spanish Town	1. My Body 2. Shopping	1. All About School 2. Tell Me When

Rather than have a 4 year rolling program, as in other subjects, the nature of language learning means that it will be useful to repeat topics but build on the language learnt in the first round when the topic comes around again. Where units are repeated, LKS2 will learn the basic knowledge and UKS2 will be more Advancing and Deep knowledge.
