

Planet Aero

Have you ever wondered what it is like on planet Aero? If so read on.

Planet Aero was made in the Multi-way galaxy. Aero orbits the super nova. It takes 7 years to orbit the super nova.

APPEARANCE AND TERRAIN

Aero is a sphere, which is 61-62 diameters. At night it is purple and day is green. The surface is quite bumpy. At 21:30, if you look east, sometimes you can see 3 volcanos moving like they are going to erupt but they never do.

CLIMATE AND ATMOSPHERE

On planet Aero, the temperature is 159° it is the second planet from the sun the first is planet Murzier. If you look at Aero from space, you will see a massive blue dot the size or planet earth it's a hurricane it's been on for 6 years.

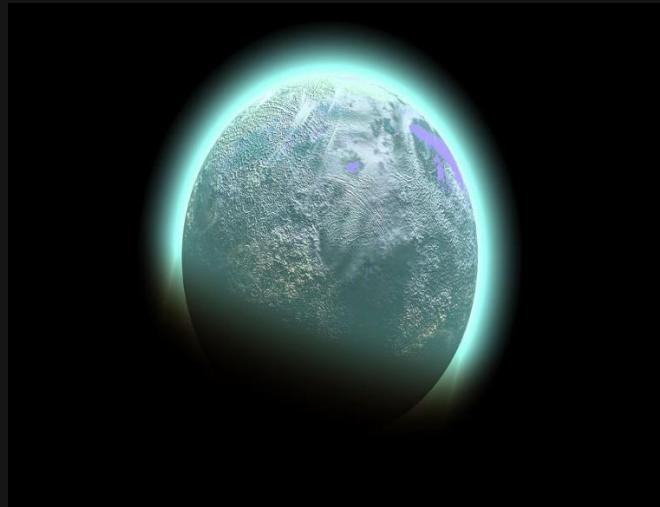

LIFE ON PLANET

Deep down in the creators, there is life called junk, they eat sand, which is made of poisonous gas.

INTERESTING FACTS

- Planet Aero was first discovered in 0001, which was found by x.
- Planer Aero is special cause it never rains.
- In the future I want Aero to be a planet with humans.
