

How will I know how DJCS supports my child?

- Individual Learning Logs are used to give a profile of additional needs.
- Each pupil's learning log will be written jointly by the pupil, parent and SENCO or LSA. The Learning Log will outline specific strategies used by subject teachers to support your child through quality first teaching. Outcomes will be set for your child and recorded here.
- Parents, students and teachers have copies of the Learning Logs which are updated termly in conjunction with all stake holders.
- Interventions are recorded on a whole school provision map which is a document used to track additional support.
- The school has access to specialist support services, and we would work in partnership with you to make a referral if appropriate.
- At the centre of all support is the student who will be consulted about their provision and how best to support them.
