

This subject is great because...

<p>Art</p> <p>Creativity freedom of choice of what you want to explore and study and I was also surprised by how deep and mind broadening the subject is.</p>	<p>Biology</p> <p>Studying biology has an equal balance of theory work and practical work. There are always fun practicals to do and alongside with the theory work it makes understanding the course much better. The best thing about studying biology is learning about the body and other organisms in depth and still having fun</p>	<p>Business</p> <p>I had never taken business before so it was entirely new to me. However, it ended up becoming my favourite subject as I ended up learning the most from it as it is all around us. You notice more things day to day.</p>
<p>Chemistry</p> <p>It is so interesting and the Chemistry department make such a hard and challenging subject become a lot less scary. Practical endorsement means that you are not staying at a desk for every lesson, which makes the subject fun to study.</p>	<p>Computer Science</p> <p>It's challenging but the small class size means that you always have someone you can ask for help when you get stuck. Teamwork is really important.</p>	<p>Economics</p> <p>Economics - satisfying how it all comes together and altogether helps you get a good understanding of a lot of things for later life , also pretty fun and Mr Everett is a good lad</p>
<p>Further Maths</p> <p>Further Maths - it's an extra challenge that lends itself to normal Maths (i.e. it makes normal Maths genuinely easy</p>	<p>Geography</p> <p>I love how the specification gradually builds on GCSE making it a nice subject to study when other subjects are different straight away</p>	<p>German</p> <p>The small class size means it really feels like a team. It's a real step up from GCSE and you get a much deeper understanding of the language and culture.</p>

<p>History</p> <p>It is simply a fascinating yet complex subject. It offers an insight into the time our ancestors have lived, but it also helps us understand the way the world and its surroundings worked. In my opinion history, teaches individuals to learn new things and while learning it teaches us to ask important questions to further our research.</p>	<p>Maths</p> <p>With Maths, the main thrill comes from a question you struggle to answer but ultimately get it right with no help. The feeling of satisfaction is great.</p>	<p>Media Studies</p> <p>Such an interesting subject that is so different to all of the others. So enjoyable but academic at the same time. Allows you to get a good balance between practical and written work.</p>
<p>Music</p> <p>Music - because it goes way more in depth at A level and you learn so many more techniques and appreciate the subject more as a whole.</p>	<p>Philosophy & Ethics</p> <p>A very interesting subject that explores understanding and the fundamental questions under-pinning the human condition.</p>	<p>Physical Education</p> <p>I like how the subject is full of different sub topics with 3 main components to it. It keeps the content fresh and prevents repetition.</p>
<p>Physics</p> <p>The practical part of A-level physics is very interesting and helps visualise a lot of the difficult theories. I am finally getting answers to questions about physics that I have had for years now. That is the best part of A-level physics!</p>	<p>Politics</p> <p>I expected I'd really enjoy this A level, because I knew a lot of it would be about discussing the news. I have politics last thing on a Friday, and I can always look forward to having a chat about the topical issues, which is very important for understanding the wider world for the course!</p>	<p>Psychology</p> <p>There are many different areas of psychology and all different types of things included in the subject for example maths skills, science skills etc. It can be interactive by sometimes working in a group, which I enjoy. Finally, it's a very interesting subject because it relates to everyday life.</p>
<p>Sociology</p> <p>The best part about studying this subject is how much content you can apply to everyday life, it's very easy to incorporate your own personality and experiences into your study and vice versa.</p>	<p>Spanish</p> <p>There's a much bigger focus on the history and culture of Spain making it even more interesting than GCSE.</p>
