

Year 12 and 13

Year 12 should continue to revise AS level topics and also look ahead at topics in the A-Level course to be fully prepared for Y13 – Khan Academy is an excellent resource to do so. Their videos break down topics into small parts with follow up practice and then spaced retrieval testing.

Year 13 should continue to review topics from Year 12 and 13 to ensure you are prepared for University.

Resources

One of the best resources you have been given is the pack of past papers to work through. You should work through them from the start to the end. If you have any questions please contact your teachers.

Another good source for practice are your text books. Specifically the end of chapter assessments.

Year 12 and 13 Revision Links

For resource organised by topic, additional past papers for AS / A-Level Maths and Further Maths, and tutorial videos go to [alevelmathsrevision](https://alevelmathsrevision.com/).

<https://alevelmathsrevision.com/>

Khan Academy is fantastic for maths and further maths. You will be required to sign up for free but is another excellent source of videos and additional practice.
