## INTERNET/ONLINE SAFETY SECTION

### **What parents need to know about Minecraft**

Giving players the freedom to craft entire worlds from an interactive landscape, Minecraft has been described as the ultimate sandbox game (that is, it eschews the usual pre-determined goals or objectives in favour of creativity and exploration). With enthralling gameplay that encourages inventiveness and problem solving.

Although the game itself is mostly child friendly and conflict free, some hazards persist that could upset younger users, including disruptive rival players, contact from strangers and the occasional in-game scare.

Selecting 'Creative' or 'Peaceful' mode allows children to play Minecraft without having to contend with enemies. It's also a great way for you to get used to playing the game with them, with the difficulty level is lower. This allows you to work together on a long-term project, creating something special without the threat of zombies or creepers damaging your building.

Kind regards
