Be safe this summer

Travelling abroad? Stay safe around animals to protect your family from rabies.

What is rabies?

Rabies is a virus that affects mammals, including dogs and people. It is deadly but preventable.

How rabies spreads

Rabies is spread in the saliva of infected animals through:

bites

scratches

licks

How to stay safe

- Don't touch or approach unknown dogs or cats
- Check the rabies risk at your destination and consider pre-travel vaccination
- Never disturb dogs when they are eating, sleeping or with their puppies to reduce the risk of bites
- Avoid dog bites, scratches and licks

If a dog bites you:

- Wash**
Wash the wound with soap and running water for 15 minutes
- Apply**
Apply antiseptic, if available
- Go**
Go to the hospital

Did you know?

Around 59,000 people die from rabies every year worldwide. Children are most at risk.

99% of human rabies cases are linked to contact with infected dogs

While rabies is rare in the UK, it remains a serious risk in many popular holiday destinations. Mission Rabies works around the world to end rabies through dog vaccination and education.
