

My name is Rhyker

Why I'll make a Digital Leader!

I wanted to be a digital leader because I'm very good at computers. I hope that all children are on the right page at the right time and the teachers know what website there on and make sure children are doing the right thing during an ICT lesson and make sure this always happens! They type a word correctly and I hope that this happens the teachers must take care of any viruses in the computers.

Most importantly: I want every child doing the right thing on the computer and every child must tell a adult or a digital leader if they feel unsafe.
