Child privacy & online safety summary

CHILDREN CAN	OTHERS CAN
Children can play and download free games, music, videos, and apps, and make game clips of their best moments.	A child's friends can communicate with them, and see when they're online and available to play.
Children can see other people's profiles, and content they create, but need a parent to add friends.	Microsoft can use the child's video app history to help improve their experiences. Microsoft will store the child's exercise info with their online profiles and keep it private.
