WEEKLY UPDATE

Welcome back! We hope you all had a lovely half term. This week we've waved off our Year 6 children on their residential. They've enjoyed three days packed with activities and new experiences that they will remember for life. It's our privilege to watch them shine and represent our school.

At school, the children have been starting their new learning in DT and Geography, we hope they are sharing their new topics with you at home - keep an eye on 'X' for the latest insight into school life.

We wish you all a fantastic weekend and look forward to seeing you all on Monday.

Giant Hogweed

Know what to look for...

A non-native invasive plant, which can grow to over 8ft tall. Looks like an enormous cow parsley plant.

The sap of giant hogweed can cause burns. It contains furocoumarin, which makes skin extremely sensitive to sunlight.

DO NOT TOUCH

If the sap gets onto your skin and it's then exposed to the sun, your skin can blister badly. Blistering can then recur over months and even years.

The best way to avoid injury is to familiarise yourself with the plant and avoid contact with your skin.

If you do get giant hogweed sap on your skin, be sure to wash the area thoroughly and immediately. Seek medical advice and do not expose the area to sunlight for a few days.
