

Let's have a safer internet.

Sometimes searching the internet can bring your child more than they need. Whilst the internet is full of useful information like cooking recipes, the latest news, online shopping and other amazing things; there are also dangers online for young minds. Remember that the internet is for everyone and not everyone, especially our youth, is equipped to cope with some of the more risky content online. Once they experience something that may upset or worry them, the damage may have already been done.

To reduce the chances of this happening it is not only a good idea not only to talk to your child before they venture into the vastness of the internet, but also equip them with some of the latest tools to keep them safe online.

This is why we recommend using one of the many child-friendly search engines that are available. Below are just a couple of them:

■ **Swiggle** - [swiggle.org.uk](https://www.swiggle.org.uk)

This is a child-friendly search engine from the Online Safety experts at SWGfL.

Searching the internet for images or content can sometimes be a bit hit and miss. It can be hard to find the right content and sometimes you can stumble onto things that might make you feel upset, embarrassed or sad. Swiggle can help you with your first steps on the road to better online searching.

Swiggle uses the very latest search technologies to make your searches more useful. It not only gives you safer access to online content but encourages responsible behaviour too.

★ **KidzSearch** - www.kidzsearch.com

The KidzSearch homepage is your signal that safe internet results will be returned. Further, all our search result pages have a unique branded look which is your cue that the results are being filtered. This allows parents and educators to more easily monitor things from a distance.

KidzSearch provides an easy free solution for safe internet usage when kids access their computer or mobile device from any location. Parents can be given instructions to always have their children use KidzSearch at home. This will ensure that they have a safe internet experience when they do their homework.

Together we can make the internet a safer and more enjoyable place.
