

The English Martyrs Catholic School and Sixth Form College

Year 12 Maths	Module 1	Module 2	Module 3
Topic Theme and Intent	Module 1 focuses on deepening the students' algebraic knowledge as this is an important part of the course.	Students cover the majority of the Statistics Year 1 content in this module.	Students cover the majority of the Mechanics Year 1 content in this module.
Knowledge	<ul style="list-style-type: none"> Recap on the trigonometric ratios and how to apply correctly. Know how to solve problems involving equation of a straight line $x = \frac{-b \pm \sqrt{b^2 - 4ac}}{2a}$ and the uses of the discriminant. Graph transformations and their uses. Know how to expand brackets with a higher power using the Binomial expansion, solve equations/inequalities graphically (and by using their calculator). Study Circle and straight line geometry both algebraically and graphically. Put indices in a specific form which will allow students to differentiate and integrate. 	<ul style="list-style-type: none"> How to calculate, the mean, variance and standard deviation from a set of data. The definitions of qualitative and quantitative data and a knowledge of the sampling methods. The definition of Mutually exclusive events and independent events. Understand when a Binomial distribution is appropriate. Know the difference between $P(X=a)$ and $P(X < a)$. Be able to perform a Hypothesis Testing with the Binomial Distribution. 	<ul style="list-style-type: none"> Use the base SI units most commonly used in Mechanics. Know the difference between a vector and a scalar Know the definitions of distance/displacement/speed/velocity Velocity is the rate of change of displacement Acceleration is the rate of change of velocity SUVAT equations Know that gravity = 9.8 m/s^2 to 1 dp.
Skills	<ul style="list-style-type: none"> How to use a graphical calculator to find roots/intersections etc. How to use their calculator to solve polynomials and inequalities, find the mean and standard deviation, how to solve linear simultaneous equations. 	<ul style="list-style-type: none"> How to use the 'chose' button on the calculator and what this actually gives you. How to use the Distributions key on the 991- the difference between Binomial Probability and Cumulative Distribution. 	<ul style="list-style-type: none"> How to use the calculator to find the area under a curve How to plot a graph on a graphical calculator and use this to find the area underneath
Literacy Links	<p>Reading Skills Always check the question to make sure all solution given are appropriate.</p> <p>Writing Skills Write the Binomial Expansion in ascending power unless told otherwise.</p>	<p>Reading Skills Interpret the information in the text which allows you to form your null and alternative hypothesis</p> <p>Writing Skills Use the correct units when giving the mean and standard deviation</p>	<p>Reading Skills Scan the text for the key information which will allow the SUVAT equations to be used. Select the correct equation from the formula booklet.</p> <p>Writing Skills</p> <ul style="list-style-type: none"> Make sure to give the correct units for acceleration, force, velocity, displacement.
Essential Vocabulary	Base/index, Expression, Equation, Rationalise, Conjugate pairs, Range, Discriminant, Solutions, Translation, Asymptote, Coefficient	Estimate, Mean, Midpoint, Standard deviation, Median, Counter example, Coefficient, Approximation, Region, Resultant	Velocity, Acceleration, Displacement, Distance, Speed, Starting/Final velocity, Units, Vector, Weight, Gravity, Mass, Force, Pulley, Motion
