

## Early Reading & Phonics Vision for Endeavour Academy

At Endeavour Academy, we want all our children to be able to read & understand text all around them. We want children who feel confident to decode & read words to open the world to them. Our priority is for children to want to read and then give them the skills to finesse their reading skills.

Our Phonics curriculum will be relevant, and the structure will quickly allow students to become familiar & confident. They will make quick progress from Nursery to enable them to access both the Reception & KS1 curriculum. Children will be able to apply & practice throughout their learning to embed Phonics, with teacher swift to precisely intervene with students requiring extra support.

We endeavour to foster a love of reading from the very first days of nursery. Books & texts are used to stimulate learning in all subjects, and parents are warmly encouraged to take an active role within their child's acquisition of Phonics.
