Science

Ask a grown up to show you photos of you when you were a baby. Look carefully at them. How are you different now? You are bigger of course! Is anything still the same? Are your eyes the same colour? What else has stayed the same? Has anything changed? Perhaps you have more hair. Now you have lots of teeth.

Look at this activity sheet on Twinkl. Can you put the pictures in the correct order?

(Remember, you can use these resources by making a free account)

If you aren't able to print the sheet, just copy the pictures onto some paper. Remember to draw them in the correct order!
