POLICY

1. Background/Rationale

New technologies have become integral to the lives of children and young people in society, both in school and in their lives outside school.

The Internet and other digital and information technologies are powerful tools, which open new opportunities for everyone. Electronic communication helps teachers and pupils learn from each other. These technologies can stimulate discussion, promote creativity, and increase awareness of context to promote effective learning. Children and young people have an entitlement to safe internet access.

The requirement to ensure that children and young people can use online and related communications technologies appropriately and safely is part of the wider duty of care to which all who work in schools are bound. The school Online Safety Policy and procedures will help to ensure safe and appropriate use, and the development and implementation will involve all stakeholders in a child's education from the Headteacher and Governors to the senior leaders and classroom teachers, support staff, parents, carers, members of the community and the pupils themselves.

The use of these exciting and innovative tools in school and at home has been shown to raise educational standards and promote pupil achievement. However, the use of these new technologies can put young people at risk in and outside of school. Some of the dangers they may face include:

- Access to illegal, harmful, or inappropriate images or other content;
- Unauthorised access to/loss of/sharing of personal information;
- The risk of being subject to grooming by those with whom they make contact on the internet;
- The risk of being targeted by extremists in order to promote and encourage radicalisation;
- The risk of being targeted by those involved in child sexual exploitation;
- The sharing/distribution of personal images without an individual's consent or knowledge;
- Being drawn into taking part in unsuitable online challenges and/or hoaxes;
- Inappropriate communication/contact with others, including strangers;
- Cyberbullying (including prejudiced-based and discriminatory bullying);
- Access to gambling/gaming sites;
- Access to unsuitable video/internet games;
- An inability to evaluate the quality, accuracy, and relevance of information on the Internet;
- Plagiarism and copyright infringement;
- Illegal downloading of music or video files;
- The potential for excessive use which may impact on the social and emotional development and learning of the young person.

Many of these risks reflect situations in the off-line world and it is essential that this Online Safety Policy and procedures is used in conjunction with other school Policies and procedures including the Overarching Safeguarding Statement, Child Protection, Data Protection and Whole School Behaviour.

As with all other risks, it is impossible to eliminate online risks completely. It is therefore essential, through good educational provision to build pupils' resilience to the risks to which they may be exposed, so that they have the confidence and skills to face and deal with these risks.

This school must demonstrate that it has provided the necessary safeguards to help ensure that we have done everything that could reasonably be expected of us to manage and reduce these risks. In the event that one of these risks becomes an issue, the school has pre-determined responses in place to address the issue, as detailed later in this document. The Online Safety Policy and procedures that follows explains how we intend to do this, while also addressing wider educational issues to help young people (and their families) to be responsible users and stay safe while using the Internet and other communications technologies for educational, personal, and recreational use.

2. Definitions

For the purposes of this document a child, young person, pupil, or student is referred to as a 'child' or a 'pupil' and they are normally under 18 years of age.

Wherever the term 'parent' is used this includes any person with parental authority over the child concerned e.g., carers, legal guardians etc.

Wherever the term 'Headteacher' is used this also refers to any Manager with the equivalent responsibility for children.

Wherever the term 'school' is used this also refers to academies and references to Governing Bodies and includes our Wraparound Care.

3. Associated School Policies and procedures

This Policy should be read in conjunction with the following school Policies/procedures and, where they exist, addendums to those Policies and procedures:

- Overarching Safeguarding Statement
- Child Protection Policy and procedures
- Child on Child Abuse Policy
- Data Protection Policy
- Health and Safety Policy and procedures
- Whole School Behaviour Policy and Written Statement
- Procedures for Using Pupils Images
- Whistleblowing procedures
- Code of Conduct for staff and other adults

4. Communication/Monitoring/Review of this Policy and procedures

This Policy and procedures will be communicated to staff, pupils, and the wider community by:

- Posting it on the school website, CPOMS and shared staff drive
- Making a paper copy available on request from the school office
- Discussing school policy and procedures during induction with new staff and other relevant adults
- Discussing the school's Acceptable Use Agreement with pupils at the start of each year

The Online Safety Policy is also referenced in other school Policies and procedures as outlined above.

The review period for this Policy and procedures is determined by the Governing Board and indicated on the front cover.

5. Scope of the Policy

This Policy and procedures apply to all members of the School community (including staff, pupils, volunteers, parents, visitors, community users) who have access to and are users of our ICT systems, both in and out of school.

The Education and Inspections Act 2006 empowers Headteachers, to such extent as is reasonable, to regulate the behaviour of pupils when they are off the school site and empowers members of staff to impose disciplinary penalties for inappropriate behaviour. This includes incidents of cyberbullying, or other online safety related incidents covered by this Policy and procedures, which may take place out of school, but is linked to membership of the school. The 2011 Education Act increased these powers in relation to the searching for, and of, electronic devices and the deletion of data. In the case of both acts, action can only be taken in relation to issues covered by the published Whole School Behaviour Policy and procedures.

The school will deal with such incidents within this Policy and procedures and the Whole School Behaviour Policy which includes anti-bullying procedures and will, where known, inform parents of incidents of inappropriate online safety behaviour that take place out of school.

PROCEDURES

1. Roles and Responsibilities

The following section outlines the roles and responsibilities for online safety of individuals and groups within the school:

1.1 Governors

The role of the Governors/online safety Governor (Mrs. C. Jones) is to:

- ensure a member of the Governing Body is elected to the role of Online Safety/Digital Link Governor who should then lead on relevant governance requirements below;
- ensure an appropriate senior member of staff from the school leadership team is appointed to the role of DSL with lead responsibility for safeguarding and child protection (including online safety and an understanding of the filtering and monitoring systems and processes in place) with the appropriate status, authority, time, funding, training, resources, and support. The DSL or an alternative member of SLT should be given the role of Digital Technology Lead;
- ensure an effective digital technology strategy is in place which is monitored and reviewed annually (see DfE [Digital leadership and governance standards](#));
- ensure other roles and responsibilities are appropriately allocated to staff and third parties, e.g. external service providers in order to meet the DfE [Digital and technology standards](#);
- ensure that systems are in place to meet the requirements of the DfE [Cyber security standards](#). Schools must have a Cyber security and resilience strategy in place which is supported by an appropriate Cyber Response Plan;
- ensure online safety is a running and interrelated theme whilst devising and implementing policies and procedures and to approve the Online Safety Policy and procedures, reviewing its effectiveness e.g., through Governors or a Governor Sub-committee receiving regular information about online safety incidents and monitoring reports and making use of the UK Council for Internet Safety (UKCIS) guide [Online safety in schools and colleges: Questions from the Governing Board](#);
- ensure that appropriate filters and appropriate monitoring systems are in place, but also consider how 'over-blocking' may lead to unreasonable restrictions on what pupils can be taught in relation to online teaching and safeguarding;
- ensure that the SLT and **all** staff have an awareness and understanding of the procedures and processes in place to manage filtering and monitoring and how to escalate concerns when identified;
- ensure all governors and trustees receive appropriate training on online safety which, amongst other things, includes an understanding of the expectations, applicable roles and responsibilities in relation to filtering and monitoring in relation to school owned IT devices;
- ensure that the school follows all current online safety advice (including that for online filtering and monitoring) to keep both pupils and staff safe;
- support the school in encouraging parents and the wider community to become engaged in online safety activities;
- have regular reviews with the Designated Safeguarding Lead (DSL)/Digital Technology Lead (DTL) and incorporate online safety into standing discussions of safeguarding at Governors meetings (including incident logs, adverse monitoring reports, change control logs etc.);
- ensure that where the Digital Technology Lead is not the named DSL or deputy DSL, there is regular review and open communication between these roles and that the DSL's clear overarching responsibility for online safety as a whole is not compromised;
- work with the Data Protection Officer (DPO), DSL and Headteacher to ensure a UK GDPR compliant framework for storing data, helping to ensure that child protection is always at the forefront and data protection processes support careful and legal sharing of information;
- check that school is making good use of information and support (Annex B - Online Safety which forms part of ['Keeping Children Safe in Education'](#));

- ensure that all staff undertake regular updated safeguarding training, including online safety training in line with advice from the Cumberland Safeguarding Children's Partnerships (CSCP), and that it is integrated, aligned, and considered as part of the whole school safeguarding approach and wider staff training and curriculum planning;
- recognise that a one size fits all educational approach may not be appropriate for all children, and a more personalised or contextualised approach for more vulnerable children, victims of abuse and some SEND children might be needed
- ensure pupils are taught how to keep themselves safe, including online as part of providing a broad and balanced curriculum with clear procedures on the use of mobile technology. The safeguarding link governor will also monitor this through pupil voice activity.

1.2 Headteacher

The Headteacher has overall responsibility for online safety provision. The day-to-day responsibility for online safety may be delegated to the Digital Technology Lead (DTL) /Designated Safeguarding Lead (DSL).

The Headteacher will:

- take overall responsibility for data and data security;
- foster a culture of safeguarding where online safety is fully integrated into whole school safeguarding;
- oversee the activities of the DSL/DTL and ensure that the responsibilities listed in the section below are being followed and fully supported;
- ensure that Policies and procedures are followed by all staff and other adults working paid or unpaid in the school;
- undertake training in offline and online safety, in accordance with statutory guidance and relevant Local Safeguarding Partnership recommendations;
- assign a senior leadership team (SLT) member to be responsible for digital technology and take responsibility for liaising with the Governors in order to achieve their obligations in meeting the DfE [digital and technology standards](#), particularly as they relate to [cyber security](#) and [filtering and monitoring](#) and ensuring the Governors are regularly updated on progress towards the standards;
- ensure that online safety is appropriately monitored and reviewed by undertaking an annual review of the school's approach to online safety, supported by an annual review of the [risk assessment](#) that considers and reflects the risks the children face. We will use appropriate tools for this purpose such as the self-review tool [360° safe](#) or LGfL [online safety audit](#).
- liaise with the DSL on all online-safety issues which might arise and receive regular updates on school issues and broader policy and practice information;
- take overall responsibility for data management and information security ensuring the school's provision follows best practice in information handling; work with the DPO, DSL and Governors to ensure a Data Protection Act 2018 (DPA) compliant framework for storing data, but helping to ensure that child protection is always put first, and data-protection processes support careful and legal sharing of information;
- ensure the school implements and makes effective use of appropriate ICT systems and services including school-safe filtering and monitoring, protected email systems and that all technology including cloud systems are implemented according to child-safety first principles;
- be responsible for ensuring that **all staff** receive suitable training on induction to carry out their child protection and online safety roles (which should include the procedures and processes in place to manage filtering and monitoring and how to escalate concerns when identified). UKCIS have published an Online Safety Audit Tool which helps mentors of trainee teachers and early career teachers induct mentees and provide ongoing support, development and monitoring;
- understand and make all staff aware of procedures to be followed in the event of a serious online safeguarding incident involving a pupil or an incident which results in an allegation against a member of staff or other adult (see [flowchart for dealing with online safety incidents](#));
- encourage parents/carers to provide age-appropriate supervision for children in their care using the internet including by the use of internet filters which should be used to block malicious websites (usually

free but often need turned on. Information for parents/carers will be regularly updated and published on the school website and via newsletters and other publications.

- ensure suitable risk assessments are undertaken so the curriculum meets needs of pupils, including the risk of children being radicalised;
- take responsibility for formulating the school's Cybersecurity resilience strategy and Cyber Response Plan in liaison with the Online Safety Governor and other third-party providers.
- ensure Governors are regularly updated on the nature and effectiveness of the school's arrangements for online safety;
- ensure the school website meets statutory requirements (see KAHSC guidance on statutory and desirable website features and content for [maintained](#) or [academy](#) schools).

1.3 Designated Safeguarding Lead (DSL- Mr. J. Gale)/Digital Technology Lead (DTL- Mrs. E. Strickland)

The DSL may delegate certain online safety duties e.g. to the DTL, but not the day-to-day responsibility; this assertion and all quotes below are taken from [Keeping Children Safe in Education](#). Where the Digital Technology Lead is not the named DSL or deputy DSL, he/she must be a member of the Senior Leadership team and there must be a regular review and open communication between these roles to ensure that the DSL's clear overarching responsibility for online safety is not compromised.

The Designated Safeguarding Lead/Digital Technology Lead will:

- have strategic oversight of all digital technology and how it fits with the School Development Plan;
- create and manage the digital technology strategy led by the needs of staff and pupils, not the technology itself;
- help all staff to embed digital technology that meets staff and pupil needs;
- take lead responsibility for safeguarding and child protection (including online safety and understanding the filtering and monitoring systems and processes in place);
- be the first point of contact for any concerns the wider staff and other adults working in the school may have in relation to child protection and online safety harmful behaviour e.g. sharing nude and/or semi-nude images and/or videos/online challenges or hoaxes and refer to the UKCIS guidance [Sharing nudes and semi-nudes: how to respond to an incident](#) and the DfE Guidance [Harmful online challenges and online hoaxes](#);
- ensure an effective digital technology strategy is in place that empowers the school to protect and educate the whole school community in their use of technology and establish mechanisms to identify, intervene in and escalate any incident where appropriate;
- source innovative ways to promote an awareness and commitment to online safety throughout the school community with strong focus on parents, who are often appreciative of school support in this area, but also including 'hard-to-reach' parents;
- liaise with other agencies in line with [Working together to Safeguard Children](#) statutory guidance;
- have an understanding of the unique risks associated with online safety (including an understanding of the filtering and monitoring systems and processes in place in the school) and be confident that they have the relevant knowledge and up to date capability required to keep children safe whilst they are online at school and to support other adults in doing so;
- ensure that online safety education is embedded in line with DfE guidance [Teaching Online Safety in schools](#) across the curriculum (e.g. by use of the UKCIS framework 'Education for a Connected World' and the [ProjectEVOLVE - Education for a Connected World Resources](#)) and beyond, in the wider school community;
- work with the Headteacher, Data Protection Officer, Governors, and the school ICT technical staff to ensure a DPA compliant framework for storing data, helping to ensure that child protection is always at the fore and data protection processes support careful and legal sharing of information;
- keep up-to-date with the latest local and national trends in online safety;
- review and update this Policy and procedures, other online safety documents and the strategy on which they are based (in line with Policies and procedures for behaviour and child protection) and submit for review on a regular basis to the Governors;

- liaise with school technical, pastoral, and support staff as appropriate;
- communicate regularly with SLT and the designated Digital Link Governor to discuss current issues (anonymised), review incident logs and filtering/change control logs;
- ensure that all staff are aware of the procedures that need to be followed in the event of an online safety incident and that these are logged in the same way as any other child protection incident;
- oversee and discuss 'appropriate filtering and monitoring' with Governors in order to meet the DfE [Filtering and monitoring standards](#) (both physical and technical) and ensure staff are aware of its necessity;
- ensure the DfE guidance on sexual violence and sexual harassment (particularly online)(Part five - [Keeping Children Safe in Education](#)) is followed throughout the school and that staff adopt a zero-tolerance approach to this as well as to bullying (in all its forms) generally;
- facilitate training and advice for staff and others working in the school to ensure that:
 - all staff who work directly with children must read and understand [KCSiE Part one \(which includes Annex B\)](#). The DSL, Headteacher, Safeguarding Governor and other members of the SLT must read and understand the whole of [Keeping Children Safe in Education](#)
 - knowledge of risks and opportunities is cascaded throughout the organisation;
 - all volunteers read and understand Annex A of [Keeping Children Safe in Education](#);
 - all staff undertake accredited Online Safety Training annually.
- be aware of emerging online safety issues and legislation, and of the potential for serious child protection issues to arise from:
 - sharing of personal data;
 - access to illegal/inappropriate materials;
 - inappropriate online contact with adults/strangers;
 - potential or actual incidents of grooming;
 - cyberbullying and the use of social media.

1.4 All Staff

It is the responsibility of all staff to:

- understand that online safety is a core part of safeguarding; as such it is part of everyone's role. Never think that 'someone else will pick it up';
- know who the Designated Safeguarding Lead and Digital Technology Lead are;
- read and understand [Part one \(which includes Annex B\)](#) of [Keeping Children Safe in Education](#) unless they **do not** work directly with children when they must read and understand Annex A instead;
- read, understand, and help promote the school's Online Safety Policy and procedures in conjunction with the Child Protection and other related school Policies and procedures;
- read, sign, and follow the staff Code of Conduct (including the Acceptable Use Agreement);
- be aware of online safety issues related to the use of mobile technology e.g., phones, smart watches, cameras and other hand-held devices and follow school procedures in relation to these devices;
- ensure the security of their username and password for the school system, not allow other users to access the systems using their log on details and immediately report any suspicion or evidence that there has been a breach of security. Passwords will be changed on a regular basis and at least every 6 months.
- should understand (via training and other means) the different roles and responsibilities for the filtering and monitoring of online systems and expectations of them in their role, including for their own online activities on any device using the school network or on school-owned devices using any network;
- record online safety incidents via CPOMS in the same way as any child protection incident and report incidents to the DSL/DTL in accordance with school procedures;
- notify the DSL if policy does not reflect practice in the school and follow escalation procedures if concerns are not promptly acted upon;
- educated pupils on online safety (include the awareness of subject specific terminology) whilst identifying opportunities to thread online safety through all school activities, both outside the classroom

- and within the curriculum, supporting curriculum/stage/subject leads, and making the most of unexpected learning opportunities as they arise and report any hoaxes or harmful trends to the DSL;
- whenever overseeing the use of technology (devices, the Internet, new technology such as augmented reality, etc.) in school or setting as homework tasks, encourage sensible use, monitor what pupils are doing and consider potential dangers and the age appropriateness of websites (check what appropriate filtering and monitoring processes are in place);
 - carefully supervise and guide pupils when engaged in learning activities involving online technology, supporting them with search skills, critical thinking (e.g., fake news), age-appropriate materials and signposting, and legal issues such as copyright and data law;
 - prepare and check all online source and resources before using in the classroom;
 - encourage pupils to follow the school's acceptable use agreement, regularly remind them about it and enforce school sanctions where there is a breach of the agreement;
 - notify the DSL/DTL of new trends and issues before they become a problem;
 - take a zero-tolerance approach to bullying and low-level sexual harassment either offline or online;
 - receive and act upon regular updates from the DSL/DTL and have a healthy curiosity for online safety issues;
 - model safe, responsible, and professional behaviours in their own use of technology. This includes outside the school hours and site, and on social media, in all aspects upholding the reputation of the school and the professional reputation of all staff;
 - ensure that any digital communications with pupils are on a professional level and only through school-based systems, never through personal mechanisms, e.g., email, text, mobile phones or social media messaging or posts.

1.5 PSHE/RSHE Lead (Mrs. N. Pammenton, Mrs. C. Sloan & Mrs. L. Barrow)

Responsibilities of PSHE/RSHE Leads include:

- all as listed in the 'all staff' section above;
- ensuring that consent, mental wellbeing, healthy relationships and staying safe online is embedded into the PSHE/Relationships education, relationships, and sex education (RSE) and health education curriculum. This will include being taught what positive, healthy and respectful online relationships look like, the effects of the pupils' online actions on others and knowing how to recognise and display respectful behaviour online. Throughout these subjects, teachers will address online safety and appropriate behaviour in an age-appropriate way that is relevant to their pupils' lives (KCSiE);
- complementing the computing curriculum which covers the principles of online safety at all key stages, with progression in the content to reflect the different and escalating risks that pupils face. This includes how to use technology safely, responsibly, respectfully, and securely, and where to go for help and support when the pupil has concerns about content or contact on the Internet or other online technologies;
- working closely with the DSL/DTL and all other staff to ensure an understanding of the issues, approaches, and messages within PSHE/RSHE.

1.6 Computing/Subject Lead (Mrs. E. Strickland)

Responsibilities of the Computing Lead include:

- all as listed in the 'all staff' section above;
- the overseeing delivery of the online safety element of the Computing curriculum in accordance with the national curriculum;
- working closely with the DSL/DTL and all other staff to ensure an understanding of the issues, approaches, and messages within Computing;
- collaboration with technical staff and others responsible for ICT use in school to ensure a common and consistent approach.

1.7 Network Manager/Technical staff (Cockermouth School IT Team)

Responsibilities of the Network Manager/ICT Technician include:

- all as listed in the 'all staff' section above;
- supporting Governors and SLT in achieving the DfE [digital and technology standards](#);
- supporting SLT in the formulation of a Cyber Security resilience strategy and appropriate Cyber response plan as outlined in the DfE [Cyber security standards](#);
- reporting any online safety related issues that arise through external monitoring reports, to the DSL/DTL in the first instance;
- keeping up to date with the school's Online safety Policy and technical information to effectively carry out their online safety role and to inform and update others as relevant;
- working closely with the DSL/DTL/DPO to ensure that school systems and networks reflect school Policy;
- ensuring that the above stakeholders understand the terms of existing services and how any changes to these systems (especially in terms of access to personal and sensitive records/data and to systems such as YouTube mode, web filtering settings, sharing permissions for files on cloud platforms etc.) might affect the system functions and safety online;
- supporting and providing advice on the implementation of 'appropriate filtering and monitoring' in order to meet the school's obligations outlined in the DfE [Filtering and Monitoring standards](#);
- ensuring that users may only access the school's networks through an authorised and properly enforced password protection procedures, in which passwords are regularly changed;
- ensuring that the school's ICT infrastructure is secure and is not open to misuse or malicious attack e.g., keeping virus protection up to date;
- ensuring that access controls/encryption exist to protect personal and sensitive information held on school-owned devices;
- monitoring the use of the network/Virtual Learning Environment (VLE)/remote access/email and social media presence and that any misuse/attempted misuse is reported to the DSL/DTL in line with school Policy;
- ensuring that appropriate back-up procedures exist so that critical information and systems can be recovered in the event of a cyber-attack or other disaster and to complement the business continuity process and cyber response plan;
- maintaining up-to-date documentation of the school's online security and technical procedures;
- working with the Headteacher to ensure the school website meets statutory DfE requirements;
- reporting online safety issues that come to their attention in line with school Policy.

1.8 Data Protection Officer (DPO- Mr. C. Steele)

The DPO will be familiar with references to the relationship between data protection and safeguarding in key DfE documents '[Keeping Children Safe in Education](#)' and '[Data protection: a toolkit for schools](#)'.

The Data Protection Act 2018 and UK GDPR **do not** prevent, or limit, the sharing of information for the purposes of keeping children safe and promoting their welfare. Information which is sensitive and personal will be treated as 'special category personal data' for the purposes of compliance with DPA 2018. Legal and secure information sharing between schools, Children's Social Care and other local agencies is essential for keeping children safe and ensuring they get the support they need. Information can be shared without consent if to gain consent would place a child at risk. Fears about sharing information **must not** be allowed to stand in the way of the need to safeguard and promote the welfare of children. As with all data sharing, appropriate organisational and technical safeguards will be in place.

Other responsibilities of the DPO include:

- working with the DSL, Headteacher and Governors to ensure frameworks are in place for the protection of data and of safeguarding information sharing as outlined above;
- ensuring that all access to safeguarding data is limited as appropriate, monitored, and audited.

1.9 Volunteers and contractors

The key responsibilities of volunteers and contractors are to:

- read, understand, sign, and adhere to any Acceptable Use Agreement issued by the school;
- report any concerns, no matter how small, to the DSL/DTL without delay;

- maintain an awareness of current online safety issues and guidance;
- model safe, responsible, and professional behaviours in their own use of technology.

1.10 Pupils

Considering their age and level of understanding, the key responsibilities of pupils are to:

- use the school ICT systems in accordance with the school's acceptable use agreement;
- ensure the security of their username and password for the school system, not allow other users to access the systems using their log on details and must immediately report any suspicion or evidence that there has been a breach of security to a trusted adult;
- understand the importance of reporting abuse, misuse or access to inappropriate materials including those involving hoaxes and on-line challenges and know how to do so;
- know what action to take if they or someone they know feels worried or vulnerable when using online technology;
- understand the importance of adopting safe and responsible behaviours and good online safety practice when using digital technologies outside of school and realise that the school's acceptable use agreements cover their actions out of school, including on social media;
- know and understand school procedures on the use of mobile phones, digital cameras, and other digital devices;
- know and understand school procedures on the taking/use of images and on cyberbullying/sharing nude and semi-nude images and/or videos;
- understand that the school is able to, and will, impose filtering rules and will monitor the use of school owned digital devices for inappropriate access to, or downloads from, websites. Breaches may lead to sanctions as described in the School Behaviour Policy and procedures and, in some cases, may involve the Police;
- understand the benefits/opportunities and risks/dangers of the online world and know who their trusted adults are at school, to report concerns to if there are problems.

1.11 Parents

Parents play a crucial role in ensuring that their children understand the need to use the Internet/mobile devices in an appropriate way. Research shows that many parents do not fully understand the issues and are less experienced in the use of ICT than their children. The school will therefore take every opportunity to help parents understand these issues through parents' evenings, Dojo information posts, letters, website and information about national/local online safety campaigns/literature as well as specific information evenings (when appropriate).

The key responsibilities for parents are to:

- support the school in promoting online safety which includes the pupils' use of the Internet and the school's use of photographic and video images;
- work with and support the school when issues or concerns are identified which are as a result of the school's filtering and monitoring procedures and processes;
- read and promote the school's acceptable use agreement and encourage their child to follow it;
- consult with the school if they have any concerns about their child's and others' use of technology;
- promote positive online safety and model safe, responsible, and positive behaviours in their own use of technology (including on social media) by ensuring that they themselves do not use the Internet/social network sites/other forms of technical communication in an inappropriate or defamatory way;
- support the school's approach to online safety by reporting hoaxes and harmful trends and not uploading or posting to the Internet any images or details of others without permission and refraining from posting pictures, video or text that could upset, offend, or threaten the safety of any member of the school community or bring the school into disrepute.

2. Teaching and Learning

The breadth of issues classified within online safety is considerable, but can be categorised into four areas of risk known as the 4Cs:

- **Content:** being exposed to illegal, inappropriate, or harmful content, for example: pornography, fake news, racism, misogyny, self-harm, suicide, anti-Semitism, radicalisation, extremism, misinformation, disinformation (including fake news) and conspiracy theories.
- **Contact:** being subjected to harmful online interaction with other users; for example: child on child pressure, commercial advertising and adults posing as children or young adults with the intention to groom or exploit them for sexual, criminal, financial, or other purposes.
- **Conduct:** personal online behaviour that increases the likelihood of, or causes, harm; for example, making, sending, and receiving explicit images (e.g., consensual and non-consensual sharing of nudes and semi-nudes and/or pornography, sharing other explicit images and online bullying; and
- **Commerce:** risks such as online gambling, inappropriate advertising, phishing and/or financial scams.

Strong links between teaching online safety and the curriculum (see roles above) are the clearest in:

- Personal, Social and Health Education (PSHE)
- Relationships education, relationships, and sex education (RSE) and health
- Computing

It is, however, the role of all staff to identify opportunities to thread online safety through all school activities, both outside the classroom and within the curriculum, supporting subject lead staff and making the most of unexpected learning opportunities as they arise. We will make reference to the DfE guidance '[Teaching online safety in schools](#)' and the UKCIS guidance '[Education for a Connected World](#)'.

Whenever overseeing the use of technology (devices, the Internet, new technology such as augmented reality, etc) in school or setting as homework tasks, all staff will encourage sensible use, monitor (either physically; by the use of internet and web access software or via the use of active/proactive technology monitoring services) what pupils are doing and consider potential dangers and the age appropriateness of websites.

Equally, all staff should carefully supervise and guide pupils when engaged in learning activities involving online technology (including, extra-curricular and extended school activities if relevant), supporting them with search skills, critical thinking (e.g., fake news), age-appropriate materials and signposting, and legal issues such as copyright, plagiarism, and data law.

We recognise that online safety and broader digital resilience must be included throughout the curriculum.

Annual reviews of curriculum plans / schemes of work (including for SEND pupils) are used as an opportunity to assess the key areas of self-image and identity, online relationships, online reputation, online bullying, managing online information, health, wellbeing and lifestyle, privacy and security, and copyright and ownership.

2.1 How internet use enhances learning

This school:

- has a clear, progressive online safety education programme as part of the Computing/PSHE curriculum. This covers the teaching of a range of skills and behaviours which are appropriate to the age and experience of the pupils concerned and include those to:
 - STOP and THINK before they CLICK;
 - develop a range of strategies to evaluate and verify information before accepting its accuracy;
 - be aware that the author of a website/page may have a particular bias or purpose and to develop skills to recognise what that may be;
 - know how to narrow down or refine a search;
 - [for older pupils] understand how search engines work and to understand that this affects the results they see at the top of the listings;

- understand acceptable behaviour when using an online environment/email, i.e., be polite, no bad or abusive language or other inappropriate behaviour; keeping personal information private;
 - understand how photographs can be manipulated and how web content can attract unwanted or inappropriate attention;
 - understand why they should not post or share detailed accounts of their personal lives, contact information, daily routines, location, photographs, and videos and to know how to ensure they have turned-on privacy settings;
 - understand why they must not post pictures or videos of others without their permission;
 - know not to download any files – such as music files – without permission;
 - have strategies for dealing with receipt of inappropriate materials;
 - [for older pupils] understand why and how some people will ‘groom’ young people for sexual or extremist ideology reasons;
 - understand the impact of cyberbullying, sharing inappropriate images and trolling and know how to seek help if they are affected by any form of online bullying;
 - know how to report any abuse including cyberbullying; and how to seek help if they experience problems when using the Internet and related technologies, i.e., parent, teacher or trusted staff member, or an organisation such as ChildLine or the CLICK CEOP button.
- plans internet use carefully to ensure that it is age-appropriate and supports the learning objectives for specific curriculum areas;
 - will remind pupils about their responsibilities through an acceptable use agreement which will be displayed throughout the school with regular reminders;
 - ensures staff model safe and responsible behaviour in their own use of technology during lessons;
 - ensures that when copying materials from the web, staff and pupils understand issues around plagiarism; how to check copyright and know that they must respect and acknowledge copyright/intellectual property rights;
 - ensures that staff and pupils understand the issues around aspects of the commercial use of the internet, as age appropriate. This may include risks in pop-ups; buying online; online gaming/gambling etc.

2.2 Pupils with additional needs

We use a wide range of strategies to support children with additional needs who might need extra support to keep themselves safe, especially online.

- A fundamental part of teaching e-Safety is to check pupil’s understanding and knowledge of general personal safety issues. Some pupils may need additional teaching that includes reminders and explicit prompts to link their existing knowledge of “how to keep safe” to the rules that will apply specifically to, for instance, internet use.
- Rules are very helpful to all pupils and it is important to achieve consistency of how rules can be applied.
- As consistency is so important for these pupils, there is a need to establish E-Safety rules for school that are similar to those for home. Working with parents and sharing information with them would be relevant to all children, but this group especially.
- There will always be exceptions to rules and if this is the case, then these pupils will need to have additional explanations about why rules might change in different situations i.e. why it is ok to give your name and address to an adult if you are lost in town, but not when using the internet.
- Visual support is usually important to help most pupils’ understanding but some areas of this topic are quite abstract in nature and difficult to represent visually i.e.
 - Uncomfortable
 - Smart
 - Stranger
 - Friend
- Visual support can be useful but it is more likely that the pupils will respond to multi-media presentations of the rules such as interactive power-point slides, screensavers, spoken recordings of the main rules or sounds that they can associate with decisions they make while using the internet. The really useful thing about these is the repetition and practice that pupils can have which may not be so easy if spoken language were used.

- If visual prompts are used to help remember the rules, the picture or image support needs to give the pupils some improved understanding of what the rule is about.
- This group of pupils are vulnerable to poor social understanding that may leave them open to risks when using the internet individually, but also when with peers.
- It can be common for peers to set up scenarios or “accidents” regarding what they look for on the internet and then say it was someone else who has done so. Adults need to plan group interactions carefully when raising awareness of internet safety.
- For various reasons, pupils with additional needs may find it difficult to explain or describe events when using the internet.
- Some pupils might find it easier to show adults what they did i.e. replay which will obviously have its own issues for staff regarding repeating access, a minimum of two members of staff should be present if this arises.
- Some pupils are very quick to click with the mouse and may not actually know what they did or how something happened. Gentle investigation will be more productive than asking many questions.
- Some pupils may not be able to ask for help. Staff will need to know specific pupils well so that this can be addressed.
- Pupils may need a system or a help sound set up on computers which will help them to get adult attention. If pupils don’t recognise that they need help, then adult supervision is the safe way to improve their recognition of this.

2.3 Remote Education

While the [remote education temporary continuity direction](#) which required schools to provide remote education to pupils where their attendance would be contrary to government guidance or legislation in force at the time has ended, the DfE expects schools to continue to maintain their capabilities to deliver high quality remote education for the next academic year.

This is because government public health advice locally or nationally may require a class, group, or a small number of pupils to self-isolate, and all such pupils not physically unwell should have access to remote education as soon as reasonably practicable, which may be the next school day.

When this school is required to provide it, remote education should be equivalent in length to the core teaching pupils would receive in school and should include recorded or live direct teaching time, as well as time for pupils to complete tasks and assignments independently. As a minimum we will provide 3 hours/day on average across the cohort in Key Stage 1, with less for younger children, and 4 hours in Key Stage 2.

To ensure business continuity, thorough emergency preparedness, continuity of education and safeguarding arrangements, and to prevent harms, Governors may decide to implement remote learning provision in any kind of local or national emergency situation that prevents pupils or staff attending to statutory schooling.

In developing our remote education provision, we have:

- Selected the Class Dojo digital platform to use consistently across the school to allow interaction, assessment, and feedback with procedures in place to ensure staff are trained and confident in its use. This enables us to provide online video lessons recorded by teaching staff and high-quality lessons developed by external providers as well as monitored methods of communication.
- Identified ways to discover and overcome barriers to digital access for pupils e.g., forms or other survey methods, distributing school-owned laptops, securing appropriate internet connectivity solutions, providing printed resources, such as textbooks and workbooks, to structure learning, supplemented with other forms of communication to keep pupils on track or answer questions about work.
- Ensured that school-owned devices distributed for the purpose of access to remote education will always include appropriate [safeguarding controls and support](#) to help children and families, and staff use them safely, including information about physically healthy computing e.g., posture, the teaching and learning environment, sleep.
- Ensured we can teach a planned and well-sequenced curriculum so that knowledge and skills are built incrementally.

- Published on the school website up-to-date [information](#) about what is intended to be taught and practised in each subject so that pupils can progress through the curriculum.
- Put systems in place for checking, daily, whether pupils are engaging with their work, so we can work with families to rapidly identify effective solutions where engagement is a concern.
- Identified named senior leaders [Mr. C. Steele and Mr. J. Gale], with overarching responsibility for the oversight of the quality, delivery, and safety of remote education.
- Considered issues that specific individuals or groups of pupils may have engaging with remote education due to their age, stage of development, special educational needs, or disability e.g., where this would place significant demands on parents' help or support, ensuring that the teachers best placed to know how the pupil's needs can be most effectively met to ensure they continue to make progress, work with families to deliver an ambitious and appropriate curriculum
- Sought to demonstrate that we understand the requirement for schools under the [Children and Families Act 2014](#) to use our best endeavours to secure the special educational provision called for by the pupils' special educational needs remains in place.
- Identified potential personal, professional, and children's safeguarding issues associated with the provision of remote education; put in place hardware, software, procedures, and training to reduce the risk of harm to the adults, children, and young people exposed to it; and ensured the risks are being addressed in a consistent and ongoing way through the curriculum (see below).
- Reviewed and updated as necessary relevant Policies, procedures, and supporting documents in light of remote education provision to ensure that they remain appropriate and useful for keeping the adults, children, and young people exposed to it safe online.

In the provision of remote education this school undertakes to:

- Set meaningful and ambitious work each day in an appropriate range of subjects
- Transfer into remote education what we already know about effective teaching in live classrooms by:
 - providing frequent, clear explanations of new content, delivered by a teacher or through high-quality curriculum resources
 - providing opportunities for interactivity, including questioning, eliciting and reflective discussion
 - providing scaffolded practice and opportunities to apply new knowledge
 - enabling pupils to receive timely and frequent feedback on how to progress, using digitally facilitated or whole-class feedback where appropriate
 - using assessment to ensure teaching is responsive to pupils' needs and addresses any critical gaps in pupils' knowledge
 - avoiding an over-reliance on long-term projects or internet research activities
- Ensure leaders and teachers are appropriately signposted to the [Get help with technology for remote education](#) support package, relevant peer-to-peer advice and training available through the [EdTech Demonstrator programme](#), and guidance on [supporting pupils and students with SEND](#) to access remote education.
- Notify their social worker (if they have one) when a vulnerable pupil is asked to self-isolate and agree with the social worker the best way to maintain contact and offer support.
- Review and self-assess the our remote education offer regularly using the DfE [review your remote education provision tool](#) or similar.
- Continue to record attendance accurately in the register for pupils who are receiving remote education in line with any [current government guidance](#) on it.
- carry out an annual review of the school's approach to online safety, supported by an [annual risk assessment](#) that considers and reflects the risks the pupils that attend this school face using a tool like the [360° safe website](#).

We recognise that there are additional safeguarding risks to pupils associated with them spending more time online than before the global pandemic, both in their leisure time and to be able to access remote education. There may also be risks from or to the people they live with during live video link work and staff are expected to plan accordingly and seek advice from the DSL/DTL as necessary. The school has communicated clear expected conduct during remote education activities.

We will follow relevant government [online safeguarding guidelines](#) and make use of recommended technical tools and guides signposted there to help us deliver remote education safely.

In addition to the updated codes of conduct, staff, pupils (or due to their age and ability, the adults supporting them), parents, carers, and to some degree, virtual or in-person visitors using online technology for education purposes or school business are expected to:

Check security and privacy settings e.g.

- Adjust privacy and safety settings on all devices, in apps and other online places to control what personal data is shared.
- [Review the security settings](#) on 'smart' devices and [change](#) any default, weak or guessable passwords.
- [Set up two-factor authentication](#) if devices are capable or available.
- [Regularly update devices or apps](#) used for school or work to improve security.
- Think about physical privacy when appearing live online e.g., adult supervision of children at home, appropriate clothing, distractions like noise and interruptions, what other people nearby can hear.

Act regarding unsuitable content e.g.

- Prevent unwanted content from appearing i.e. set filters and [parental controls](#) on home broadband and mobile networks and not disable or bypass them (the [UK Safer Internet Centre has advice](#) on how).
- Block unsuitable contact (with support as necessary)
- Report harmful activity, to the website, platform or app, a trusted adult, and the DSL. [Report Harmful Content](#) to Safer Internet UK if not satisfied with the result of a report to a service provider.

Protect against fraud e.g.

- Beware of fraud and scams online including phishing emails and text messages and use appropriate [cyber security](#) and ["stop, challenge, protect"](#) information to avoid becoming a victim.
- Forward suspicious emails to reportphishing@apwg.org, using the "Forward as attachment" option if possible to enhance tracking to the Anti-Phishing Working Group for analysis.
- Never give out personal information to websites or in response to emails/text messages not recognised or trusted
- Report being scammed, defrauded, or experiencing cyber-crime to [Action Fraud](#), the UK's national reporting centre.

Check the Facts e.g. use the [SHARE checklist](#) to make sure they are not contributing to the spread of harmful content.

Stay physically and mentally healthy online e.g.

- Take regular breaks from online activities and use tools like [Apple's Screen Time](#), [Google's Family link](#), [Xbox One](#), [PlayStation 4](#), [Nintendo Switch](#) if necessary to manage screen time, especially if feeling overwhelmed, or in physical discomfort.
- Take notice of any [guidance](#) school provides on supporting children's mental health and wellbeing or that of staff as well as practical guidance on making the home environment a good and safe one to learn in with school adopting a sensitive appreciation for people's different home circumstances and what is reasonable.

Staff are also expected to:

- Provide information about their temporary home working environment insofar as it might impact on their physical health, or the safeguarding of learners or their own household.
- Act appropriately on feedback and use any necessary online or cyber tools provided.
- Provide information about the technology they use at home to get online i.e., to ensure compatibility with school systems, especially cyber security measures involved in accessing sensitive data like medical, behaviour or performance information on school servers remotely.
- Implement relevant guidance on safe teaching and pastoral care from their home e.g., what is in the background of recorded or live streams, what is visible on shared screens, what can be heard by others in a household etc.
- Pay special attention to how they protect personal data at home.

- Report to their line manager any issues or concerns they may have either about their personal safety or that of a pupil.
- Keep talking about staying safe online, which we can do by:
 - Ensuring staff have the tools to promote a healthy balance between the positive and negative aspects of life online.
 - Signposting parents and carers to tools to explain and reduce risks and help them talk to their child.
 - Reiterating behaviour expectations and ways to handle and report problems, especially encouraging children to speak to a trusted adult if they come across content online that makes them uncomfortable.
 - Supporting critical thinking and promoting resources like [It's not easy being a parent in the digital age | Parent Zone](#) and [Trust Me | Childnet](#) which provide ways parents and carers can help their child develop these skills.

3. Handling online safety concerns and incidents

Our staff recognise that online safety is only one element of the wider safeguarding agenda as well as being a curriculum strand of Computing and PSHE/RSHE.

General concerns will be handled in the same way as any other child protection concern. Early reporting to the DSL/DTL is vital to ensure that the information contributes to the overall picture or highlights what might not yet be a problem.

Procedures for dealing with online safety, concerns and incidents are detailed in the following Policies:

- Child Protection Policy and procedures
- Child on Child Policy and procedures
- Whole School Behaviour Policy and procedures (includes anti-bullying procedures)
- Prevent Risk Assessment
- Data Protection Policy, agreements, and other documentation (e.g., privacy statement, consent forms for data sharing image use etc.)

We are committed to taking all reasonable precautions to ensure online safety but recognise that incidents will occur both inside and outside school. All members of the school community are encouraged to report issues swiftly to school staff so that they can be dealt with quickly and sensitively through the school's escalation processes.

Any suspected online risk or infringement should be reported to the DSL/DTL on the same day wherever possible or, if out of school, the following school day.

Any concern/allegation about misuse by staff or other adult in school will always be referred directly to the Headteacher unless the concern is about the Headteacher, in which case, the complaint will be directed to the Chair of Governors (Mrs. C. Jones). Staff may also use the NSPCC Whistleblowing Helpline. Call 0800 028 0285 or email: help@nspcc.org.uk.

The school will actively seek support from other agencies as needed (i.e. Children's Safeguarding Team, UK Safer Internet Centre's Professionals' Online Safety Helpline (03443814772), NCA CEOP, Cumbria Police Prevent Officer, Cumbria Police, Internet Watch Foundation (IWF)). We will inform parents of online safety incidents involving their child and the Police where staff or pupils engage in or are subject to behaviour which we consider is particularly disturbing or is considered illegal. See Sections below for procedures for dealing with sharing nude and semi-nude images, upskirting and online bullying.

- In this school there is strict monitoring and application of the Online Safety Policy and a differentiated and appropriate range of sanctions.
- All members of the school community will be informed about the procedure for reporting online safety concerns (such as breaches of filtering, cyberbullying, illegal content etc.).
- All reported incidents will be recorded, alongside the actions taken on CPOMS.

- The Designated Safeguarding Lead will be informed of any online safety incidents involving Child Protection concerns, which will then be escalated appropriately– See Child Protection Policy and procedures for dealing with concerns.
- The school will manage Online Safety incidents in accordance with the school Behaviour Policy where appropriate.
- The school will inform parents of any incidents or concerns as and when required.
- After any investigations are completed, the school will debrief, identify lessons learnt and implement any changes required.
- Where there is cause for concern or fear that illegal activity has taken place or is taking place then the school will contact the LA Children's Safeguarding Team and escalate the concern to the Police.
- If the school is unsure how to proceed with any incidents of concern, then the incident may be escalated to the Children's Safeguarding Team directly.

If members of staff suspect that misuse might have taken place, but that the misuse is not illegal (as above) it is essential that correct procedures are used to investigate, preserve evidence, and protect those carrying out the investigation. More than one member of staff should be involved in the investigation.

Incidents will be dealt with as soon as possible in a proportionate manner through normal behaviour/disciplinary procedures. It is important that, where necessary, members of the school community are made aware that incidents have been dealt with.

3.1 Sharing nude and semi-nude images

Where incidents of the sharing of nude and semi-nude images via the internet or mobile phone by those under the age of 18 are discovered, we will refer to the UK Council for (UKCIS) guidance '[Sharing nude and semi-nude images](#)'. A copy of this document is available from the school office and is shared annually with all staff via email. Where one of the parties is over the age of 18, we will refer to it as child sexual abuse.

All staff and other relevant adults have been issued with a copy of the UKCIS overview document ([Sharing nudes and semi-nudes: how to respond to an incident](#)) in recognition of the fact that it is generally someone other than the DSL or DTL who will first become aware of an incident. Staff, other than the DSL, must not attempt to view, share, or delete the image or ask anyone else to do so but must report the incident to the DSL as soon as possible.

It is the responsibility of the DSL to follow the guidance issued by UKCIS, decide on the next steps and whether to involve other agencies as appropriate.

It is important to understand that whilst the sharing of nude and semi-nude images illegal, pupils should be encouraged to discuss with staff situations if they have made a mistake or had a problem with this issue.

The UKCIS advice outlines how to respond to an incident of nudes and semi-nudes being shared including:

- risk assessing situations;
- safeguarding and supporting children and young people;
- handling devices and images;
- recording incidents, including the role of other agencies.
- informing parents and carers

The types of incidents which this advice covers are:

- a person under the age of 18 creates and shares nudes and semi-nudes of themselves with a peer under the age of 18;
- a person under the age of 18 shares nudes and semi-nudes created by another person under the age of 18 with a peer under the age of 18;
- a person under the age of 18 is in possession of nudes and semi-nudes created by another person under the age of 18.

3.2 Upskirting

All staff are aware that 'upskirting' (taking a photo of someone under their clothing) is now a criminal offence, but that pupils should be encouraged to discuss with staff situations if they have made a mistake or had a problem with this issue. If staff or other adults become aware of an incident of 'upskirting', the issue must be reported to the DSL as soon as possible.

3.3 Cyberbullying

Cyberbullying will be treated in the same way as any other form of bullying and the Whole School Behaviour Policy and procedures will be followed in relation to sanctions taken against the bully. It is important not to treat online bullying separately to offline bullying and to recognise that some bullying will have both online and offline elements. Support will be provided to both the victim and the perpetrator. In some cases, it may be necessary to inform or involve the Police.

Many young people and adults find that using the internet and mobile phones is a positive and creative part of their everyday life. Unfortunately, technologies can also be used negatively. When children are the target of bullying via mobile phones, gaming, or the internet, they can often feel very alone, particularly if the adults around them do not understand cyberbullying and its effects. A once previously safe and enjoyable environment or activity can become threatening, harmful and a source of anxiety. It is essential that young people, school staff and parents understand how cyberbullying is different from other forms of bullying, how it can affect people and how to respond and combat misuse. Promoting a culture of confident users will support innovation and safety.

There are several statutory obligations on schools in relation to behaviour which establish clear responsibilities to respond to bullying. In particular, section 89 of the Education and Inspections Act 2006:

- every school must have measures to encourage good behaviour and prevent all forms of bullying amongst pupils. These measures should be part of the school's Behaviour Policy which must be communicated to all pupils, school staff and parents;
- gives Headteachers the ability to ensure that pupils behave when they are not on school premises or under the lawful control of school staff.

Where bullying outside school (such as online or via text) is reported to the school, it will be investigated and acted on.

Although bullying in itself is not a specific criminal offence in the UK, it is important to bear in mind that some types of harassing or threatening behaviour or communications could be a criminal offence, for example under the Protection from Harassment Act 1997, the Malicious Communications Act 1988, the Communications Act 2003, and the Public Order Act 1986. If school staff feels that an offence may have been committed, they should seek assistance from the Police.

All staff have a role in implementing our Behaviour Policy and our procedures for tackling cyberbullying as follows, and are encouraged to use [Resources | Childnet](#) which offers guidance and practical advice (select the topic online bullying):

- Cyberbullying (along with all other forms of bullying) of any member of the school community will not be tolerated. Full details are set out in the Whole School Behaviour Policy and procedures.
- There are clear procedures in place to support anyone in the school community affected by cyberbullying.
- All incidents of cyberbullying reported to the school will be recorded via CPOMS.
- There will be clear procedures in place to investigate incidents or allegations of cyberbullying.
- Pupils, staff, and parents will be advised to keep a record of the bullying as evidence.
- The school will take steps to identify the bully, where possible and appropriate. This may include examining school system logs, identifying and interviewing possible witnesses, and contacting the service provider and the police, if necessary.
- Pupils, staff, and parents will be required to work with the school to support the approach to cyberbullying and the school's online safety ethos.
- Sanctions for those involved in cyberbullying may include:

- The bully will be asked to remove any material deemed to be inappropriate or offensive.
- A service provider may be contacted to remove content if the bully refuses or is unable to delete content.
- Internet access may be suspended at school for the user for a period of time but this will not be to the detriment of their ability to meet curriculum requirements. Other sanctions for pupils and staff may also be used in accordance with the Whole School Behaviour Policy.
- Parents of pupils will be informed.
- The Police will be contacted if a criminal offence is suspected.

3.4 Harmful online challenges or hoaxes

An online challenge will generally involve users recording themselves taking a challenge and then distributing the resulting video through social media sites, often inspiring or daring others to repeat the challenge. Whilst many will be safe and fun, others can be potentially harmful and even life threatening.

If staff are confident children and young people are aware of, and engaged in, a real challenge that may be putting them at risk of harm, then it would be appropriate for this to be directly addressed by either the DSL or a senior leader in school. Careful consideration will be given on how best to do this, and it may be appropriate to offer focussed support to a particular age group or individual children at risk. We will take account of the fact that even with real challenges, many children and young people may not have seen it and may not be aware of it and will carefully weigh up the benefits of institution-wide highlighting of the potential harms related to a challenge against needlessly increasing children and young people's exposure to it.

Where staff become aware of a potentially harmful online hoax or challenge, they will immediately inform the Designated Safeguarding Lead who will take the appropriate action either with the child concerned or with the wider group where the incident involves more than one child.

Where the DSL considers it necessary to directly address an issue, this can be achieved without exposing children and young people to scary or distressing content. In the response, we will consider the following questions:

- is it factual?
- is it proportional to the actual (or perceived) risk?
- is it helpful?
- is it age and stage of development appropriate?
- is it supportive?

A hoax is a deliberate lie designed to seem truthful. The internet and social media provide a perfect platform for hoaxes, especially hoaxes about challenges or trends that are said to be harmful to children and young people to be spread quickly.

We will carefully consider if a challenge or scare story is a hoax. Generally speaking, naming an online hoax, and providing direct warnings is not helpful. Concerns are often fuelled by unhelpful publicity, usually generated on social media, and may not be based on confirmed or factual occurrences or any real risk to children and young people. There have been examples of hoaxes where much of the content was created by those responding to the story being reported, needlessly increasing children and young people's exposure to distressing content.

Evidence from Childline shows that, following viral online hoaxes, children and young people often seek support after witnessing harmful and distressing content that has been highlighted, or directly shown to them (often with the best of intentions), by parents, carers, schools, and other bodies. In this respect, staff will be mindful of the advice provided by the UK Safer Internet Centre which provides guidance on [dealing with online hoaxes or challenges](#).

In any response, reference will be made to the DfE guidance '[Harmful online challenges and online hoaxes](#)'.

3.5 Sexual violence and harassment

DfE guidance on sexual violence and harassment is referenced in Part five of '[Keeping Children Safe in Education](#)'. All staff are aware of this guidance.

We take all forms of sexual violence and harassment seriously and will act appropriately on information which suggests inappropriate behaviour regardless of the considered seriousness. Any incident of sexual harassment or violence (online or offline) must be reported to the DSL at the earliest opportunity. The DSL will follow the guidance as outlined in the Child Protection Policy and procedures. Sanctions will be applied in line with our Behaviour Policy and procedures.

3.6 Misuse of school technology (devices, systems, networks, or platforms)

Clear and well communicated rules and procedures are essential to govern pupil and adult use of school networks, connections, internet connectivity and devices, cloud platforms and social media (both when on school site and outside of school). We have a separate agreement (and associated procedures) in place on the use of personal Mobile phones and devices in school.

Where pupils contravene these rules, the Whole School Behaviour Policy and procedures will be applied; where staff contravene these rules, action will be taken as outlined in the staff Code of Conduct and, where necessary, the school disciplinary procedures.

The school reserves the right to withdraw, temporarily or permanently, any or all access to such technology or the right to bring mobile technology devices onto school property.

3.7 Social media incidents

See also Section 9 below. Social media incidents are dealt with in line with the Whole School Behaviour Policy, and procedures (for pupils) and the staff Code of Conduct/Disciplinary procedures (for staff and other adults).

Where an incident relates to an inappropriate, upsetting, violent or abusive social media post by an identifiable member of the school community, we will request that the post be deleted and will expect this to be actioned promptly.

Where an offending post has been made by a third party or is anonymous, the school may report it to the hosting platform, the Police or may contact the [Professionals' Online Safety Helpline](#) (UK Safer Internet Centre) for support or assistance in accelerating the process of removal.

4. Data protection and data security

All pupils, staff, Governors, parents/ carers, and other adults working in or visiting school are bound by the school's Data Protection Policy and procedures a copy of which is available from the school office.

There are references to the relationship between data protection and safeguarding in key DfE documents i.e. [Keeping Children Safe in Education](#) and [Data protection: a toolkit for schools](#) which the DPO and DSL will seek to apply.

The Headteacher, DPO and Governors work together to ensure a DPA compliant framework for storing data, but which ensures that child protection is always the primary consideration and data protection processes support careful and legal sharing of information. The Data Protection Act 2018 does not prevent, or limit, the sharing of information for the purposes of keeping children safe. Information which is sensitive and personal will be treated as 'special category personal data' for the purposes of compliance with the DPA. Legal and secure information sharing between schools, Children's Social Care and other local agencies is essential for keeping children safe and ensuring they get the support they need. Information can be shared without consent if to gain consent would place a child at risk. Fears about sharing information **must not** be allowed to stand in the way of promoting the welfare and protecting the safety of children. As with all data sharing, appropriate organisational and technical safeguards will be in place.

All pupils, staff, Governors, volunteers, contractors, and parents/carers are bound by the school's Data Protection Policy and procedures.

4.1 Maintaining Information Systems Security

Local Area Network (LAN) security issues include:

- Users must act reasonably e.g., the downloading of large files or viewing sporting events during the working day will affect the service that others receive.
- Users must take responsibility for their network use.
- Workstations should be secured against user mistakes and deliberate actions.
- Servers will be located securely and physical access restricted.
- The server operating system is secured and kept up-to-date.
- Virus protection for the whole network is installed and current.
- Access by wireless devices will be proactively managed and secured with a minimum of WPA2 encryption.

Wide Area Network (WAN) security issues include:

- Broadband firewalls and local CPEs (Customer Premises Equipment) are configured to prevent unauthorised access between schools.
- Decisions on WAN security are made in partnership between school and our network provider.

The following statements apply in our school:

- The security of the school information systems and users will be reviewed regularly.
- Virus protection will be updated regularly.
- Personal data sent over the internet or taken off site will be encrypted.
- Portable media may not be used without specific permission followed by an anti-virus/malware scan.
- Unapproved software will not be allowed in work areas or attached to email.
- Files held on the school's network will be regularly checked.
- The ICT coordinator/network manager will review system capacity regularly.
- Use of user logins and passwords to access the school network will be enforced – see Section 6.2 below.

The school broadband and online suppliers are Cockermouth School IT Team and Cumbria ICT (filtering).

The Headteacher, Data Protection Officer and Governors work together to ensure a DPA compliant framework for storing data, but which ensures that child protection is always put first, and data protection processes support careful and legal sharing of information.

4.2 Password Security

We will ensure that the school network is as safe and secure as is reasonably possible and that users can only access data to which they have right of access; no user is able to access another's files without permission (or as allowed for monitoring purposes within the school's procedures); access to personal data is securely controlled in line with the school's personal data procedures; logs are maintained of access by users and of their actions while users of the system.

All users (adults and young people) will have responsibility for the security of their username and password, must not allow other users to access the systems using their log on details and must immediately report any suspicion or evidence that there has been a breach of security.

Passwords for new users, and replacement passwords for existing users can be allocated by Mr. C. Steele. Any changes carried out must be notified to the member of staff responsible for issuing and coordinating password security (above).

Training/Awareness:

It is essential that users are made aware of the need to keep passwords secure, and the risks attached to unauthorised access/data loss. This will apply to even the youngest of users, even if class log-ons are being used.

Members of staff will be made aware of the school's password security procedures:

- at induction;
- through the school's Online Safety Policy and procedures;
- through the acceptable use agreement.

Pupils will be made aware of the school's password security procedures:

- in Computing/ICT and/or Online Safety lessons;
- through the school's acceptable use agreement.

The following rules apply to the use of passwords:

- passwords must be changed regularly but no longer than 6-monthly;
- the last four passwords cannot be re-used;
- the password will be a minimum of 8 characters long and must include three of – uppercase character, lowercase character, number, special character;
- the account should be “locked out” following six successive incorrect log-on attempts;
- temporary passwords e.g., used with new user accounts or when users have forgotten their passwords, shall be enforced to change immediately upon the next account log-on;
- passwords shall not be displayed on screen, and shall be securely hashed (use of one-way encryption);
- requests for password changes should be authenticated by Mrs. E. Strickland to ensure that the new password can only be passed to the genuine user.

The “master/administrator” passwords for the school ICT system, used by the Network Manager (or other person) are made available to the Headteacher or other nominated senior leader and kept in a secure place.

Audit/Monitoring/Reporting/Review:

The responsible person Mr. C. Steele will ensure that full records are kept of:

- User Ids and requests for password changes;
- User log-ons;
- Security incidents related to this Policy and procedures.

In the event of a serious security incident, the Police may request and will be allowed access to passwords used for encryption. Local Authority Auditors also have the right of access to passwords for audit investigation purposes.

User lists, IDs and other security related information must be given the highest security classification and stored in a secure manner. These records will be reviewed by (Digital Technology Lead/Digital Link Governor) at regular intervals.

5. Electronic Communications

5.1 Managing Email

Our general principles for email use are as follows:

- Pupils may only use approved email accounts for school purposes.
- Pupils must immediately tell a designated member of staff if they receive an offensive email or one which upsets or worries them.
- Pupils must not reveal personal details of themselves or others in email communication or arrange to meet anyone without specific permission from an adult.
- Whole-class or group email addresses will be used in primary schools for communication outside of the school.
- All pupils are provided with individual school email addresses for educational use.
- Staff will only use official school provided email accounts to communicate with pupils and parents, as approved by the Senior Leadership Team. Any deviation from this must be agreed with the DSL/Headteacher.
- Any digital communication between staff and pupils or parents (email, Dojo message, etc.) must be professional in tone and content. These communications may only take place on official (monitored) school systems. Personal email addresses, text messaging or public chat/social networking programmes must not be used for these communications. Any unauthorised attempt to use a different system may

be a safeguarding concern or disciplinary matter and should be notified to the DSL (if by a child) or to the Headteacher (if by a staff member).

- Staff are not permitted to use personal email accounts during school hours or for professional purposes.
- Pupils and staff are not permitted to use the school email system for personal use and should be aware that all use is monitored, their emails may be read, and the same rules of appropriate behaviour apply at all times. Emails using inappropriate language, images, malware or to adult sites may be blocked and not arrive at their intended destination.
- Appropriate behaviour is expected at all times, and the system should not be used to send inappropriate materials or language which is or could be construed as bullying, aggressive, rude, insulting, illegal or otherwise inappropriate, or which (for staff) might bring the school into disrepute or compromise the professionalism of staff.
- Users must immediately report to the DSL the receipt of any email that makes them feel uncomfortable, is offensive, threatening or bullying in nature and must not respond to any such email.
- Pupils will be taught about email safety issues, such as the risks attached to the use of personal details. They will also be taught strategies to deal with inappropriate emails and be reminded of the need to write emails clearly and correctly and not include any unsuitable or abusive material.
- Personal information must not be posted on the school website and only official email addresses will be used to identify members of staff.
- Spam, phishing, and virus attachments can make email dangerous. The school ICT provider ensures mail is virus checked (ingoing and outgoing), includes spam filtering and backs emails up daily.

5.2 Emailing personal, sensitive, confidential, or classified information

Staff or pupil personal data should never be sent/shared/stored in emails and any data must be encrypted prior to being sent.

- Assess whether the information can be transmitted by other secure means before using email - emailing confidential data is not recommended and should be avoided where possible;
- The use of Hotmail, BTInternet, G-mail or any other internet-based webmail service for sending email containing sensitive information is not permitted;
- Where your conclusion is that email must be used to transmit such data:
 - Obtain express consent from your manager to provide the information by email;
 - Exercise caution when sending the email and always follow these checks before releasing the email:
 - Verify the details, including accurate email address, of any intended recipient of the information;
 - Verify (by phoning) the details of a requestor before responding to email requests for information;
 - Do not copy or forward the email to any more recipients than is necessary.
 - Do not send the information to any person whose details you have been unable to separately verify (usually by phone);
 - Send the information as an encrypted document **attached** to an email;
 - Provide the encryption key or password by a **separate** contact with the recipient(s) e.g., by telephone or in writing;
 - Do not identify such information in the subject line of any email;
 - Request confirmation of safe receipt.

5.3 Zombie accounts

Zombie accounts refer to accounts belonging to users who have left the school and therefore no longer have authorised access to the school's systems. Such Zombie accounts when left active can cause a security threat by allowing unauthorised access.

- Ensure that all user accounts are disabled once the member of the school has left;
- Prompt action on disabling accounts will prevent unauthorised access;
- Regularly change generic passwords to avoid unauthorised access.

Staff will refer to further advice available at [IT Governance](#) as necessary.

6. School Website

The school website is a key public-facing information portal for the school community (both existing and prospective stakeholders) with a key reputational value. Mr. J. Gale and Mr. C. Steele have day to day editorial responsibility for online content published by the school on the school website and will ensure that content published is accurate and appropriate. The school website is managed by/hosted by Schudio.

The DfE has determined information which must be available on a school website: '[What academies and FE colleges must or should publish online](#)'.

Where other staff submit information for the website, they are asked to consider the following principles:

- The contact details on the website are the school address, email, and telephone number. Staff, Governors, or pupils' personal information are not published.
- Email addresses will be published carefully online, to avoid being harvested for spam (e.g., by replacing '@' with 'AT').
- The school website will comply with the school's guidelines for publications including respect for intellectual property rights, privacy procedures and copyright.
- Where pupil work, images or videos are published on the website, their identities are protected, and full names are not published (remember also not to save images with a filename that includes a pupil's full name).

7. Use of digital and video images

The development of digital imaging technologies has created significant benefits to learning, allowing staff and pupils instant use of images that they have recorded themselves or downloaded from the internet. However, staff, pupils and parents need to be aware of the risks associated with sharing images and with posting digital images on the Internet. Those images may remain available on the Internet forever and may cause harm or embarrassment to individuals in the short or longer term. There are many reported incidents of employers carrying out internet searches for information about potential and existing employees. The school will inform and educate users about these risks and will implement procedures to reduce the likelihood of the potential for harm:

- We gain parental permission for the use of digital photographs or video involving their child as part of the school agreement form when their child joins the school. This is a once in a school lifetime consent. Parents are required to inform the school if their consent changes.
- When we publish images or video, we will inform pupils and parents before publishing, so they have a chance to object as is their legal right under DPA 2018.
- We do not identify pupils in online photographic materials or include the full names of pupils in the credits of any published school produced digital materials. Photo file names/tags do not include full names to avoid accidentally sharing them.
- When using digital images, staff will inform and educate pupils about the risks associated with the taking, use, sharing, publication and distribution of images. Pupils are advised to be very careful about placing any personal photos on any 'social' online network space. They are taught to understand the need to maintain privacy settings so as not to make public, personal information.
- Staff are governed by their contract of employment and the staff Code of Conduct, which includes a clause on the use of mobile phones/personal equipment for taking pictures of pupils.
- The school blocks/filter access to social networking sites or newsgroups unless there is a specific approved educational purpose.
- Staff are permitted to take digital/video images to support educational aims, but must follow school procedures concerning the sharing, distribution, and publication of those images. Those images will, wherever possible only be taken on school equipment. In the event of using a personal device to take photographs of pupils, staff should seek the permission of a senior manager and delete the images from their personal device at the earliest opportunity.

- Staff will ensure that when taking digital/video images that pupils are appropriately dressed and are not participating in activities that might bring the individuals or the school into disrepute.
- Digital images/videos are stored on the school network in line with the retention schedule of the school Data Protection Policy.
- Pupils are taught about how images can be manipulated in their online safety education programme and are taught to consider how to publish for a wide range of audiences which might include Governors, parents, or younger children as part of their ICT scheme of work;
- Pupils are taught that they should not post images or videos of others without their consent. We teach them about the risks associated with providing information with images (including the name of the file), that reveals the identity of others and their location, such as house number, street name or school. We teach them about the need to keep their data secure and what to do if they or a friend are subject to bullying or abuse.
- Staff and parents are regularly reminded about the importance of not sharing without consent, due to child protection concerns (e.g., children looked-after often have restrictions for their own protection) data protection, religious or cultural reasons or simply for reasons of personal privacy.
- If specific pupil photos (not group photos) are used on the school web site, in the prospectus or in other high-profile publications, the school will obtain individual parental or pupil consent for its long-term use. (for more information see [KAHSC Safety Series: General G21 – The Use of Images when Working with Children](#) and the [KAHSC Model Consent Form - trips images and pain relief](#)).
- A pupil's work can only be published with the consent of the pupil and parents. We will seek the consent of the pupil first and then, if necessary, the parents.

8. Cloud Platforms

This school adheres to the principles of the DfE documents '[Cloud computing services: guidance for school leaders, school staff and governing bodies](#)' [Meeting digital and technology standards in schools \(Cloud solution standards for schools and colleges\)](#). Our Data Protection Policy and procedures includes the use of Cloud services.

For online safety, basic rules of good password management, expert administration and training is used to keep staff and pupils safe and to avoid incidents. The DPO and network manager will analyse and document systems and procedures before they are implemented and regularly review them.

The following principles apply:

- Privacy statements inform parents and children when and what type of data is stored in the cloud.
- The DPO approves new cloud systems, what may or may not be stored in them and by whom on the basis of a data protection impact assessment (DPIA).
- Regular training ensures all staff understand sharing functionality and this is audited to ensure that pupil data is not shared by mistake. Open access or widely shared folders are clearly marked as such.
- Pupils and staff are only given access and/or sharing rights when they can demonstrate an understanding of what data may be stored and how it can be seen.
- Two-factor authentication is used for access to staff or pupil data (in some systems).
- Pupil images/videos are only made public with parental consent.
- Only school-approved platforms are used by students or staff to store pupil work.

9. Social Media

9.1 Managing social networking, social media, and personal publishing sites

This school operates on the principle that if we don't manage our social media reputation, someone else will. Online reputation management is about understanding and managing our digital footprint (everything that can be seen or read about the school online). Negative coverage almost always causes some level of disruption and can result in distress to individuals.

We therefore manage our social media footprint carefully to know what is being said about the school and

in order to respond to criticism and praise in a fair, responsible manner.

The school has an official Facebook and Instagram account which is managed by the school and will respond to general enquiries about the school, but we ask parents not to use these channels to communicate about their children or other personal matters.

Email and Class Dojo are the official electronic communication channels between parents and the school. While we welcome communication about and with us from within and outside our school community online using our social media accounts they **must never** be used to communicate with us about personal or private matters, including over any private messaging service operated by such social media providers.

Staff, pupils', and parents' Social Media presence:

Social media is a fact of modern life and, as a school, we accept that many parents, staff, and pupils will use it. However, as stated in our Whole School Behaviour Policy and procedures we expect everybody to behave in a positive manner, engaging respectfully with the school and each other on social media, in the same way as they would face-to-face.

This positive behaviour can be summarised as not making any posts which are, or could be construed as bullying, aggressive, rude, insulting, illegal or otherwise derogatory or inappropriate or which might bring the school, student body or teaching profession into disrepute. This applies to both public pages and to private posts e.g., parent chats, pages, or groups.

If parents have a concern about the school, we urge them to contact us directly and in private to resolve the matter. If an issue cannot be resolved in this way, the school complaints procedure (available via the school website) should be followed. Sharing complaints on social media is unlikely to help resolve the matter but can cause upset to staff, pupils, and parents, also undermining staff morale and the reputation of the school.

Many social media platforms have a minimum age of 13 but the school regularly deals with issues arising on social media with pupils under the age of 13. We ask parents to respect age ratings on social media platforms wherever possible and not encourage or condone underage use. However, the school accept that there is a balance between not encouraging underage use whilst at the same time needing to acknowledge reality in order to best help our pupils to avoid or cope with issues if they arise. Online safety lessons will look at social media and other online behaviour, how to be a good friend online and how to report bullying, misuse, intimidation, or abuse or exploitation. However, children will often learn most from the models of behaviour they see and experience. Parents can best support this by talking to their children about the apps, sites, and games they use, with whom, for how long, and when (late at night is not helpful for a good night's sleep and productive teaching and learning at school the next day).

Pupils are not allowed¹ to be 'friends' with or make a 'friend request'² to any staff, Governors, volunteers or regular school contractors or otherwise communicate via social media. Pupils are discouraged from 'following' staff, Governors, volunteers, or regular school contractors public accounts (e.g., following a staff member with a public Instagram account). However, we accept that this can be difficult to control. This, however, highlights the need for staff to remain professional in their private lives. Conversely staff must not follow public pupil accounts.

Staff are reminded that they should not bring the school or profession into disrepute and the best way to avoid this is to have the strictest privacy settings and avoid inappropriate sharing and oversharing online. Staff must never discuss the school or its stakeholders on social media and ensure that their personal opinions are not attributed to the school.

The following principles apply:

- This school will take steps to control access to social media and social networking sites over school networks, on school-owned devices, and on social media or other online accounts we control.

¹ Exceptions may be made, e.g. for pre-existing family links, but these must be approved by the Headteacher and should be declared upon entry of the pupil or staff member to the school.

² Any attempt to do so may be a safeguarding concern or disciplinary matter and should be notified to the DSL (if by a child) or to the Headteacher (if by a staff member).

- Appropriate guidance or signposting will be provided for pupils, parents, governors, staff, and volunteers about [Social Media and how to use it safely - NCSC.GOV.UK](#), [Social Media - UK Safer Internet Centre](#), and [Social media and online safety | NSPCC Learning](#).
- Pupils will be advised never to give out personal details of any kind which may identify them and / or their location. Examples would include real name, address, mobile or landline phone numbers, school attended, IM and email addresses, full names of friends/family, specific interests, and clubs etc.
- Staff wishing to use Social Media tools with pupils as part of the curriculum will risk assess the sites before use and check the sites terms and conditions to ensure the site is age appropriate. Staff will obtain documented consent from the Senior Leadership Team before using Social Media tools in the classroom.
- Personal publishing will be taught via age-appropriate sites that are suitable for educational purposes. They will be moderated by the school where possible.
- Pupils will be advised on security and privacy online and will be encouraged to set passwords, deny access to unknown individuals and to block unwanted communications.
- Pupils will be encouraged to approve and invite known friends only on social networking sites and to deny access to others by making profiles private.
- All members of the school community are advised not to publish specific and detailed private thoughts, especially those that may be considered threatening, hurtful, or defamatory.
- Steps will be taken in line with guidance on [How schools and parents can spot and tackle online abuse of teachers - The Education Hub \(blog.gov.uk\)](#)
- Newsgroups will be blocked unless a specific use is approved.
- Concerns regarding a pupil's use of social networking, social media, and personal publishing sites (in or out of school) will be raised with their parents, particularly when concerning the underage use of sites.
- Staff personal use of social networking, social media and personal publishing sites will be discussed as part of staff induction and outlined in the Code of Conduct.

Personal devices and bring your own device (BOYD) procedures:

We recognise the widespread use of personal devices makes it essential that schools take steps to ensure mobile phones and devices, including wearable or "smart" technologies like health or fitness trackers, are used responsibly at school and it is essential that pupil use of their devices does not impede teaching, learning and good order in classrooms. Staff will be given clear boundaries on professional use.

Mobile devices can present a number of problems when not used appropriately:

- They are valuable items which may be stolen or damaged;
- Their use can render pupils or staff subject to cyberbullying;
- Apps or mobile devices which broadcast location data can make staff or pupils vulnerable to behaviours like stalking and can provide perpetrators with information to take cyberbullying into the real world.
- Internet access on phones and personal devices can allow pupils to bypass school security settings and filtering;
- They can undermine classroom discipline as they can be used on "silent" mode;
- Mobile phones with integrated cameras could lead to child protection, bullying and data protection issues in relation to inappropriate capture, use or distribution of images of pupils or staff;

Permitted use of mobile phones and personal devices is a school decision and the following will apply:

- The use of mobile phones and other personal devices by pupils and staff in school will be decided by the school (for pupils, their mobile phones will be switched off and handed to their Class teacher to be stored securely in the class safe throughout the day).
- The sending of abusive or inappropriate messages or content via mobile phones or personal devices is forbidden by any member of the school community and any breaches will be dealt with as part of the school discipline/Behaviour Policy.
- The school reserves the right to search the content of any mobile or handheld devices on the school premises where there is a reasonable suspicion that it may contain undesirable materials, including those which promote pornography, violence, or bullying. Staff mobiles or hand-held devices may be searched at any time as part of routine monitoring.

- School staff may confiscate a phone or device if they believe it is being used to contravene the school's Behaviour Policy or bullying procedures.
- If there is suspicion that the material on the mobile may provide evidence relating to a criminal offence the phone will be handed over to the Police for further investigation.
- Mobile phones and personal devices will not be used during lessons or formal school time. They should be switched off (not placed on silent) and stored out of sight on arrival at school. Staff members may use their phones during school break times. All visitors are requested to keep their phones on silent whilst in the school.
- The recording, taking, and sharing of images, video and audio on any mobile phone is to be avoided, except where it has been explicitly agreed otherwise by the Headteacher. Such authorised use is to be monitored and recorded. All mobile phone use is to be open to scrutiny and the Headteacher is authorised to withdraw or restrict authorisation for use at any time if it is deemed necessary. Where permission is given by the Headteacher, no images or videos are to be taken on mobile phones or personally owned mobile devices without the prior consent of the person or people in the image.
- The Bluetooth function of a mobile phone should always be switched off or hidden and not be used to send images or files to other mobile phones.
- Electronic devices of all kinds that are brought into school are the responsibility of the user. The school accepts no responsibility for the loss, theft, or damage of such items. Nor will the school accept responsibility for any adverse health effects caused by any such devices either potential or actual.
- Where parents or pupils need to contact each other during the school day, they should do so only through the school's telephone. Staff may use their phones during break times. If a staff member is expecting a personal call, they must seek specific permissions to use their phone at other than their break time.
- Mobile phones and personal devices are not permitted to be used in certain areas within the school site such as changing rooms, toilets, and swimming pools.

Pupil use of personal devices:

- The school strongly advise that pupil mobile phones should not be brought into school. However, the school accepts that there may be circumstances in which a parent wishes their child to have a mobile phone for their own safety. If this is the case, the circumstances should be discussed with the class teacher and the normal rules regarding use during the school day will apply.
- If a pupil breaches the school procedures, then the phone or device will be confiscated and will be held in a secure place in the Headteacher's or Head of School's office. Mobile phones and devices will be released to parents in accordance with the school procedures.
- Pupils should protect their phone numbers by only giving them to trusted friends and family members.
- Pupils will be instructed in safe and appropriate use of mobile phones and personal devices and will be made aware of boundaries and consequences.
- Pupils will be provided with school hand-held personal devices to use in specific learning activities under the supervision of a member of staff. Such devices will be set-up so that only those features required for the activity will be enabled.

Staff use of personal devices:

- Staff are not permitted to use their own personal phones or devices for contacting children, young people, and their families within or outside of the setting in a professional capacity, unless permission has been granted by the headteacher.
- Staff will be issued with a school phone where contact with pupils or parents is required.
- Mobile phones and personally owned devices will be switched off or switched to 'silent' mode; Bluetooth communication should be "hidden" or switched off, location data switched off unless being used only for the duration of a specific task like route directions on a school trip, and mobile phones or personally owned devices will not be used during teaching periods unless permission has been given by a member of Senior Leadership Team for emergency circumstances.
- If members of staff have an educational reason to allow children to use mobile phones or personal devices as part of an educational activity, then it will only take place when approved by the SLT.
- Staff should not take images of children using personal equipment unless it is agreed by a senior manager.

- Where members of staff are required to use a mobile phone for school duties, for instance in case of emergency during off-site activities, or for contacting pupils or parents, then a school mobile phone will be provided and used where appropriate. In an emergency where a staff member does not have access to a school-owned device, they should use their own device and hide their own mobile number for confidentiality purposes.
- If a member of staff breaches the school Policy and procedures, then disciplinary action may be taken.

Parents are asked to keep phones out of sight whilst on the school premises. They must ask permission before taking any photos e.g., of displays in corridors or classrooms and avoid capturing other children. Parents are asked not to call pupils on their mobile phones during the school day; urgent messages can be passed via the school office/ Class Dojo.

Network/internet access on school devices

Pupils are not allowed networked file access via personal devices. However, they are permitted to access the school wireless internet network for school-related internet use.

Searching, Screening and Confiscation

In line with the DfE guidance 'Searching, screening and confiscation: advice for schools', the Headteacher and staff authorised by them have a statutory power to search pupils/property on school premises. This includes the content of mobile phones and other devices, for example as a result of a reasonable suspicion that a device contains illegal or undesirable material, including but not exclusive to sexual images, pornography, up-skirting, violence or bullying. Further details are available in the Whole School Behaviour Policy and procedures and the Child Protection Policy.

10. Managing filtering and monitoring

Whilst considering our responsibility to safeguard and promote the welfare of children and provide them with a safe environment in which to learn we (the Governors, SLT and staff) will do all we reasonably can to limit children's exposure to online safety risks from the school's IT system. As part of this process, we will ensure that the school has appropriate filtering (Cumbria ICT Service) and monitoring systems (SENSO) in place and will regularly review their effectiveness.

By making use of an appropriate [risk assessment](#), the school will work towards meeting the obligations set out in the DfE [filtering and monitoring standards](#) which set out that schools should:

- identify and assign roles and responsibilities to manage filtering and monitoring systems.
- review filtering and monitoring provision at least annually.
- block harmful and inappropriate content without unreasonably impacting teaching and learning.
- have effective monitoring strategies in place that meet their safeguarding needs.
- use the DfE's '[plan technology for your school service](#)' to self-assess against the filtering and monitoring standards and receive personalised recommendations on how to meet them.

The Governors will review the standards and discuss with IT staff and service providers what more needs to be done to support the school in meeting the standards.

The following issues will be addressed in relation to the management of filtering:

- The school's broadband access will include filtering appropriate to the age and maturity of pupils.
- The school will work with the School's Broadband team Cockermouth School IT Team to ensure that filtering procedures are continually reviewed.
- The school will have a clear procedure for reporting breaches of filtering. All members of the school community (all staff and all pupils) will be aware of this procedure.
- If staff or pupils discover unsuitable sites, the URL will be reported to the DSL/DTL who will then record the incident and escalate the concern as appropriate.
- The school filtering system will block all sites on the [Internet Watch Foundation](#) (IWF) list.
- Changes to the school filtering procedures will be risk assessed by staff with educational and technical experience prior to any changes and where appropriate with consent from the Senior Leadership Team.

- The School Senior Leadership Team will ensure that regular checks are made to ensure that the filtering methods selected are effective.
- Any material that the school believes is illegal will be reported to appropriate agencies such as [IWF](#), the Police or [CEOP](#).
- The school's access strategy will be designed by educators to suit the age and curriculum requirements of the pupils, with advice from network managers.

Filtering on school networks must not be tested by searching for content that is known to be filtered because it is harmful. The school use South West Grid for Learning ([swgfl.org.uk- a tool](http://swgfl.org.uk-a-tool)) to check whether the school's filtering provider is signed up to relevant lists (CSA content, Sexual Content, Terrorist content Your Internet Connection Blocks Child Abuse & Terrorist Content). This is checked on a half-termly basis.

11. Managing emerging technologies

Many emerging communications technologies offer the potential to develop new teaching and learning tools, including mobile communications, internet access, collaboration, and multimedia tools. We will undertake a risk assessment on each new technology for effective and safe practice in classroom use to be developed. The safest approach is to deny access until a risk assessment has been completed and safe practice has been established.

Virtual online classrooms and communities widen the geographical boundaries of learning. Approaches such as mentoring, online learning and parental access are becoming embedded within school systems. Online communities can also be one way of encouraging a disaffected pupil to keep in touch.

The safety and effectiveness of virtual communities depends on users being trusted and identifiable. This may not be easy, as authentication beyond the school may be difficult as demonstrated by social networking sites and other online tools such as Instagram, Facebook, YouTube, Skype, and X and Tik Tok. The registering of individuals to establish and maintain validated electronic identities is essential for safe communication but is often not possible. Video conferencing introduces new dimensions; webcams are increasingly inexpensive and, with faster internet access, enable video to be exchanged across the Internet. The availability of live video can sometimes increase safety - you can see who you are talking to - but if inappropriately used, a video link could reveal security details.

New applications are continually being developed based on the internet, the mobile phone network, wireless, Bluetooth or infrared connections. Users can be mobile using a phone, games console or personal digital assistant with wireless internet access. This can offer immense opportunities for learning as well as dangers such as a pupil using a phone to video a teacher's reaction in a difficult situation.

We will take steps to keep updated on new technologies, including those relating to mobile phones and handheld devices, and be ready to develop appropriate strategies.

The inclusion of inappropriate language or images is difficult for staff to detect. Pupils may need reminding that such use is inappropriate and conflicts with school Policy and procedures. Abusive messages should be dealt with under the Whole School Behaviour Policy and procedures.

- Emerging technologies will be examined for educational benefit and a risk assessment will be carried out before use in school is allowed.
- Pupils will be instructed about safe and appropriate use of personal devices both on and off site.

12. Cyber security and resilience

It is vital that we understand our vulnerabilities in relation to potential cyber-attacks and breaches, regularly review our existing defences and take the necessary steps to protect our networks. As well as having a current and cohesive Cyber Response Plan in place, there are several measures that we can implement to help to improve our IT security and mitigate the risk of a cyber-attack. These measures fall under the 'Identify, Protect and Detect' pillars of effective cyber resilience and are outlined in our cyber security and resilience strategy. We make use of the DfE '[Cyber security standards for schools](#)' to assist us to improve our

resilience against cyber-attacks. A copy of our cyber security strategy is available on request from the school office.

13. Policy Decisions

13.1 Authorising internet access

The school will allocate internet access to staff and pupils based on educational need. It will be clear who has internet access and who has not. Normally, most pupils will be granted internet access. We will not prevent pupils from accessing the internet unless the parents have specifically denied permission, or the child is subject to a sanction as part of the Whole School Behaviour Policy and procedures.

- The school will maintain a current record of all staff and pupils who are granted access to the school's electronic communications.
- All staff will read the Staff Acceptable Use Agreement before using any school ICT resources.
- Parents will be informed that pupils will be provided with supervised internet access appropriate to their age and ability.
- When considering access for vulnerable members of the school community (such as with children with special education needs) the school will make decisions based on the specific needs and understanding of the pupil(s).

According to Setting Type:

- At EYFS and Key Stage 1 pupils' access to the Internet will be by adult demonstration with occasional directly supervised access to specific and approved online materials.
- At Key Stage 2 pupils will be supervised. Pupils will use age-appropriate search engines and online tools and online activities will be teacher-directed where necessary.

13.2 Assessing risks

As the quantity and breadth of information available through the internet continues to grow, it is not possible to guard against every undesirable situation. The school will need to address the fact that it is not possible to completely remove the risk that pupils might access unsuitable materials via the school system.

Risks can be considerably greater where tools are used which are beyond the school's control such as most popular social media sites.

- The school will take all reasonable precautions to ensure that users access only appropriate material. However, due to the global and connected nature of internet content, it is not possible to guarantee that access to unsuitable material will never occur via a school computer. Neither the school nor the Trust can accept liability for the material accessed, or any consequences resulting from internet use.
- The school will audit ICT use to establish if the Online Safety Policy and procedures is adequate and that the implementation of the Online Safety Policy is appropriate- see [LGfL Online Safety Audit](#).
- The use of computer systems without permission or for inappropriate purposes could constitute a criminal offence under the Computer Misuse Act 1990 and breaches will be reported to the Police using 101 or the appropriate online report from available from our local Constabulary website.
- Methods to identify, assess and minimise risks will be reviewed regularly.

13.3 Responding to incidents of concern

Refer to Section 3 above.

14. Communicating Policy and procedures

14.1 Introducing the Policy and procedures to pupils

Many pupils are very familiar with the culture of mobile and internet use, so we try to involve them in the development of the School Online Safety Policy, through "pupil voice" activities like the School Council. As

pupils' perceptions of the risks will vary, the online safety rules will be explained or discussed in an age-appropriate manner.

Online safety pupil and parental engagement programmes we can use include:

[Think U Know](#) (now part of CEOP)
[Childnet](#)

Pupil induction and ongoing training and education will include:

- Informing all users that network and internet use will be monitored.
- Establishing an online safety training programme across the school to raise the awareness and highlight the importance of safe and responsible internet use.
- Pupil instruction regarding responsible and safe use *before* internet access is given.
- An online safety module in the PSHE, Citizenship and/or ICT programmes covering both safe school and home use.
- Online safety training as part of the transition programme across the Key Stages and when moving between schools or other educational or training settings.
- Accessible Online Safety rules including posters in all rooms with computers/internet access.
- Regular reinforcement of safe and responsible use of the Internet and technology across the curriculum, in all subject areas, and extended schools or extra-curricular activities.
- Particular attention paid to Online Safety education where pupils are considered to be vulnerable.

14.2 Discussing the Policy and procedures with Staff

It is important that all staff feel confident meeting the demands of using ICT appropriately in teaching, administration, and all other aspects of their school and personal life and the School Online Safety Policy and procedures will only be effective if all staff subscribe to its values and methods.

Staff will be given opportunities to discuss the issues and develop appropriate teaching or other work strategies. It would be unreasonable, for instance, if cover or supply staff were asked to take charge of an internet activity without preparation.

Any member of staff who has concerns about any aspect of their own or anyone else's ICT or internet use either on or off site, they should discuss this with their line manager. Where concerns are related to children's safeguarding, they should also be reported to the DSL who should follow the Child Protection Policy and procedure for recording and reporting allegations that meet the harm threshold and recording (and in some case reporting i.e., to a contractor's employer) low level concerns that do not.

Consideration is given when members of staff are provided with devices by the school which may be accessed outside of the school network. Staff are made aware of their responsibility to maintain the security and confidentiality of school information.

All staff have a universal duty to understand harms and protect children from them, including online. ICT use is widespread and all staff including administration, midday supervisors, facilities staff, Governors, and volunteers who use it or work with children who use it are included in awareness raising and training.

Induction of all new staff will include:

- A copy of the Online Safety Policy and procedures and a scheduled opportunity to discuss them.
- That internet traffic can be monitored and traced to the individual user, and the importance of having high professional standards and always following current policies and procedures.
- Up-to-date and appropriate staff training in safe and responsible internet use, both professionally and personally.
- Requirement to read, understand and sign relevant Acceptable Use Agreements.
- For staff who manage filtering systems or monitor ICT use: that they will be supervised by the Senior Leadership Team and what the procedures for reporting issues are.
- How the school will promote online tools which staff should use for work purposes, especially with children, and the procedure staff should go through if there is a new tool they want to use.

- That their online conduct out of school could have an impact on their role and reputation in school. Civil, legal, or disciplinary action could be taken if they are found to bring the profession or institution into disrepute, or if something is felt to have undermined confidence in their professional abilities.

Volunteers will receive an online safety induction based on what staff receive but suitable for the role they have been asked to fulfil.

When we employ an Early Career Teacher (ECT replacing newly qualified teacher or NQT) or work with trainee teachers the DTL will ensure use of the [UKCIS Online Safety Audit Tool](#) or similar self-assessment with them to help them better understand their role in keeping children safe online and our policy and practice.

14.3 Enlisting Parents' Support

Internet use in pupils' homes is increasingly widespread. Unless parents are aware of the dangers, pupils may have unrestricted and unsupervised access to the Internet in the home. The school may be able to help parents plan appropriate, supervised use of the Internet at home and educate them about the risks.

To engage with parents and carers we will:

- draw attention to our Online Safety Policy and procedures via Class Dojo and on the school website;
- Advise parents on the details of the school procedure on the use of mobile phones by pupils whilst on school premises and educate pupils about the risks associated with the use of mobile phones both in school and more broadly, and the benefits of a mobile phone-free school environment;
- encourage a partnership approach to online safety at home and at school which may include demonstration evenings, regular suggestions for safe home internet use, promoting educational online safety activities for families, or highlighting online safety issues at other attended events e.g., parent evenings and welcome talks.
- ask parents and carers to read the school Acceptable Use Agreement for younger pupils and discuss its implications with their children and offer support to do this if required;
- provide information and guidance for families about on online safety in a variety of formats;
- provide advice on useful resources and websites, filtering systems and educational and leisure activities which include responsible use of the Internet;
- refer interested parents to organisations listed in the "[Online safety Links](#)".

Complaints

The school will take all reasonable precautions to ensure online safety. However, owing to the international scale and linked nature of internet content, the availability of mobile technologies and speed of change, it is not possible to guarantee that unsuitable materials will never appear on a school computer or mobile device. Neither the school staff nor the Governing Body/Board of Directors can accept liability for material accessed, or any consequences of internet access.

- Complaints about the misuse of on-line systems will be dealt with under the school's Complaints procedure.
- Complaints about cyberbullying are dealt with in accordance with our Anti-bullying procedures which form part of our Whole School Behaviour Policy and procedures.
- Complaints related to child protection are dealt with in accordance with school Child Protection Policy and procedures.
- Any complaints about staff misuse will be referred to the Headteacher.
- All online safety complaints and incidents will be recorded by the school including any actions taken making use of the '[Response to online safety incidents or concerns](#)' flowchart.

Staff and pupils are given information about infringements in use and possible sanctions. Sanctions available include:

- interview by class teacher/Headteacher/ Head of School/ Digital Technology Lead
- informing parents;

- removal of internet or computer access for a period, which could ultimately prevent access to files held on the system;
- referral to the Police.

PUPIL ICT ACCEPTABLE USE AGREEMENT

These rules will help us to be fair to others and keep everyone safe.

- ★ I will only use Information and Communication Technologies (ICT) in school for school purposes.
- ★ I will only use my class email address or my own school email address when emailing.
- ★ I will only open email attachments from people I know, or who my teacher has approved.
- ★ I will not give my username and passwords to anyone else but my parents.
- ★ If I think someone has learned my password, then I will tell my teacher.
- ★ I will only open/delete my own files.
- ★ I will 'log-off' when I leave a computer.
- ★ I will make sure that all ICT contact with other children and adults is responsible, polite, and sensible.
- ★ I will not deliberately look for, save, or send anything that could be unpleasant or nasty. If I accidentally find anything like this, I will tell my teacher immediately.
- ★ I will not give out or share my own/or others details such as name, phone number or home address.
- ★ I will be aware of 'stranger danger' when I am communicating online and will not arrange to meet someone unless this is part of a school project approved by my teacher and a responsible adult comes with me.
- ★ I will be responsible for my behaviour when using ICT because I know that these rules are to keep me safe.
- ★ I will immediately report any unpleasant or inappropriate material or messages or anything that makes me feel uncomfortable when I see it online and will not show it to other pupils.
- ★ I will support the school approach to online safety and not deliberately upload or add any images, video, sounds or text that could upset any member of the school community.
- ★ I know that my use of the school ICT systems and email can be checked, and my parent contacted if a member of school staff is concerned about my safety.
- ★ I will not sign up for any online service unless this is an agreed part of a school project approved by my teacher.

Pupil ICT Acceptable Use – Pupil and Parent Agreement

Dear Parent,

ICT including the internet, email, and mobile technologies has become an important part of learning in our school. We expect all children to be safe and responsible when using any ICT.

Please read and discuss these online safety rules with your child. If you have any concerns or would like anything in the agreement explained, please contact Mr. C. Steele, Mr. J. Gale and/or Mrs. E. Strickland.

Please take care to ensure that appropriate systems are in place at home to protect and support your child/ren.

Thank you for your continued support,

Mr. J. Gale.

STAFF / VOLUNTEER ICT ACCEPTABLE USE AGREEMENT

The use of Information and Communication technologies (ICT and personal data) such as email, the Internet, and mobile devices are an expected part of daily working life in school. This Agreement is designed to ensure that all staff and volunteers are aware of their responsibilities when using any form of ICT. It applies to any ICT used in school, the use of school ICT systems and equipment out of school and the use of personal equipment in school or in situations related to their employment by the school. All staff and volunteers (where they are using technology in school or in connection with the work of school) are expected to read this Agreement and always adhere to its content. Any concerns or clarification should be discussed with Mr. C. Steele or Mr. J. Gale.

This Acceptable Use Agreement is intended to ensure that:

- staff and volunteers are responsible users and stay safe while using technologies for educational, personal, and recreational use;
- school ICT systems and users are protected from accidental or deliberate misuse that could put the security of the systems and users at risk;
- staff are protected from potential risk from the use of ICT in their everyday work and work to ensure that the children or young people in their care are safe users.

Acceptable Use Agreement

I understand that I must use school ICT systems in a responsible way, to ensure that there is no risk to my safety or to the safety and security of the ICT systems and other users.

Keeping Safe

- ★ I understand that all my use of the Internet and other related technologies can be monitored and logged and made available, on request, to my Line Manager or Headteacher.
- ★ I will only use my own usernames and passwords which I will choose carefully so they cannot be guessed easily. I will also change the passwords on a monthly basis.
- ★ I will not use any other person's username and password.
- ★ I will not give out my own personal details, such as mobile phone number, personal email address, personal Twitter account, or any other social media link, to pupils.
- ★ I will ensure that my data is regularly backed up.
- ★ I will ensure that I 'log off' after my network session has finished.
- ★ If I find an unattended machine logged on under another user's username, I will **not** continue using the machine – I will 'log off' immediately.
- ★ I will ensure that my online activity, both in school and outside school, will not bring my professional role or the school into disrepute.
- ★ I will not accept invitations from school pupils to add me as a friend to their social networking sites, nor will I invite them to be friends on mine.

As damage to professional reputations can inadvertently be caused by quite innocent postings or images, I will also be careful with who has access to my pages through friends and friends of friends, especially with those connected with my responsibilities as a Governor at the school, such as parents and their children.

- ★ I understand that data protection requires that any personal data that I have access to must be kept private and confidential, except when it is deemed necessary that I am required by law or by school procedures to disclose it an appropriate authority.
- ★ I will only transport, hold, disclose or share personal information about myself or others as outlined in the school personal data guidelines. I will not send personal information by email as it is not secure.
- ★ Where personal data is transferred outside the secure school network, it must be encrypted. Personal data can only be taken out of school or accessed remotely when authorised, in advance, by the Headteacher or Governing Body. Personal or sensitive data taken off site in an electronic format must be encrypted, e.g., on a password secured laptop or memory stick. Staff leading a trip are expected to take relevant pupil information with them, but this must always be held securely.

- ★ I will ensure that any private social networking sites/blogs etc. that I create, or actively contribute to:
 - do not reveal confidential information about the way the school operates;
 - are not confused with my school responsibilities in any way;
 - do not include inappropriate or defamatory comments about individuals connected with the school community;
 - support the school's approach to online safety which includes not uploading or posting to the Internet any pictures, video or text that could upset, offend, or threaten the safety of any member of the school community or bring the school into disrepute;
- ★ I will not try to bypass the filtering and security systems in place.
- ★ I will only use my personal ICT in school for permissible activities and I will follow the rules set out in this agreement. I will ensure that any such devices are protected by up-to-date anti-virus software and are free from viruses.

Promoting Safe Use by Learners

- ★ I will support and promote the school's Online Safety, Data Protection and Behaviour Policies and help pupils to be safe and responsible in their use of ICT and related technologies.
- ★ I will model safe use of the Internet in school.
- ★ I will educate young people on how to use technologies safely according to the school teaching programme.
- ★ I will take immediate action in line with school procedures if an issue arises in school that might compromise a learner, user, or school safety or if a pupil reports any concerns.

Communication

- ★ I will only use the school's email/Internet/Intranet/Learning Platform and any related technologies for professional purposes or for uses deemed 'acceptable' by the Headteacher or Governing Board.
- ★ I will communicate on-line in a professional manner and tone; I will not use aggressive or inappropriate language and I appreciate that others may have different opinions. Anonymous messages are not permitted.
- ★ I will not engage in any on-line activity that may compromise my professional responsibilities.
- ★ I will not use language that could be calculated to incite hatred against any ethnic, religious, or other minority group.
- ★ I will only communicate with pupils and parents using the school's approved, secure email system(s). Any such communication will be professional in tone and manner.
- ★ I am aware that any communication could be forwarded to an employer or Governors.
- ★ I will only use chat and social networking sites that are approved by the school.
- ★ I will not use personal email addresses on the school ICT systems unless I have permission to do so.

Research and Recreation

- ★ I will not browse, upload, download, distribute or otherwise access any materials which are illegal, discriminatory, or inappropriate or may cause harm or distress to others.
- ★ I will not (unless I have permission) make large downloads or uploads that might take up internet capacity.
- ★ I know that all school ICT is primarily intended for educational use, and I will only use the systems for personal or recreational use if this is allowed by the school.

Sharing

- ★ I will not access, copy, remove or otherwise alter any other user's file, without their permission.
- ★ I will always respect the privacy and ownership of others' work online and will not access, copy, remove or otherwise alter any other user's files without the owner's knowledge and permission, and will credit them if I use it.
- ★ Where work is protected by copyright, I will not download or distribute copies (including music and videos). If I am unsure about this, I will seek advice.
- ★ Images of pupils and/or staff will only be taken, stored, and used for professional purposes using school equipment in line with school procedures.

Appendix B

- ★ I will only take images/video of pupils and staff where it relates to agreed learning and teaching activities and will ensure I have parent/staff permission before I take them.
- ★ If images are to be published online or in the media, I will ensure that parental/staff permission allows this.
- ★ I will not use my personal equipment to record images/video unless I have permission to do so from the Headteacher or other Senior Manager.
- ★ I will not keep images and/or videos of pupils stored on my personal equipment unless I have permission to do so. If this is the case, I will ensure that these images cannot be accessed or copied by anyone else or used for any purpose other than that for which I have permission.
- ★ Where these images are published (e.g., on the school website/prospectus), I will ensure that it is not possible to identify the people who are featured by name or other personal information.
- ★ I will support the school approach to online safety and not deliberately upload or add any images, video, sounds or text that could upset or offend any member of the school community.

Buying/Selling/Gaming

- ★ I will not use school equipment for on-line purchasing, selling, or gaming unless I have permission to do so.

Problems

- ★ I will immediately report any illegal, inappropriate, or harmful material or incident I become aware of, to the Online Safety Coordinator or Headteacher.
- ★ I will not install any hardware or software on a computer or other device without permission of the Network Manager.
- ★ I will not try to alter computer settings without the permission of the Network Manager.
- ★ I will not cause damage to ICT equipment in school.
- ★ I will immediately report any damage or faults involving equipment or software; however, this may have happened.
- ★ I will not open any attachments to emails, unless the source is known and trusted, due to the risk of the attachment containing viruses or other harmful programmes.
- ★ I understand this forms part of the terms and conditions set out in my contract of employment.
- ★ I understand that if I fail to comply with this Acceptable Use Agreement, I could be subject to disciplinary action. This could include a warning, a suspension, referral to Governors / Directors and / or the Local Authority and in the event of illegal activities the involvement of the police.

Fairfield Primary School - Online Safety - Filtering and Monitoring Arrangements

1. Introduction

The Department for Education's (DfE) statutory guidance '[Keeping Children Safe in Education](#)' obliges schools in England to "ensure appropriate filters and appropriate monitoring systems are in place and regularly review their effectiveness" and they "should be doing all that they reasonably can to limit children's exposure to risks from the school's IT system" however, we will "be careful that "over blocking" does not lead to unreasonable restrictions as to what children can be taught with regards to online teaching and safeguarding."

To further support schools to meet digital and technology standards, the DfE have published [Filtering and Monitoring Standards](#). (See 2. Below). In addition to aspects of both filtering and monitoring systems, these standards detail the allocation of roles and responsibilities, and that schools should be checking their filtering and monitoring provision at least annually. Given the extent of personal data involved with some monitoring solutions, we will consider undertaking a [data protection impact assessment](#) and ensure that the adopted monitoring strategy is integrated within our policies and alongside relevant data sharing agreements.

'[Keeping Children Safe in Education](#)' also requires that **all** staff should receive, at induction, appropriate safeguarding and child protection training (including online safety which, amongst other things, includes an understanding of the expectations, applicable roles and responsibilities in relation to filtering and monitoring). The training will be regularly updated. In addition, all staff receive safeguarding and child protection (including online safety) updates (for example, via email, e-bulletins, and staff meetings), as required, and at least annually, to continue to provide them with relevant skills and knowledge to safeguard children effectively.

It is essential that children are safeguarded from potentially harmful and inappropriate online material. An effective whole school approach to online safety, including arrangements for filtering and monitoring, empowers the school to protect and educate pupils, and staff in their use of technology and establishes mechanisms to identify, intervene in, and escalate any concerns where appropriate.

The breadth of issues classified within online safety is considerable and ever evolving, but can be categorised into four areas of risk:

content: being exposed to illegal, inappropriate, or harmful content, for example: pornography, racism, misogyny, self-harm, suicide, anti-Semitism, radicalisation, extremism, misinformation, disinformation (including fake news) and conspiracy theories.

contact: being subjected to harmful online interaction with other users; for example: peer to peer pressure, commercial advertising and adults posing as children or young adults with the intention to groom or exploit them for sexual, criminal, financial or other purposes.

conduct: online behaviour that increases the likelihood of, or causes, harm; for example, making, sending and receiving explicit images (e.g. consensual and nonconsensual sharing of nudes and semi-nudes and/or pornography, sharing other explicit images and online bullying, and

commerce: risks such as online gambling, inappropriate advertising, phishing and or financial scams. If we feel our pupils, students or staff are at risk, we will report incidents to the Anti-Phishing Working Group (<https://apwg.org/>).

Filtering and monitoring systems are used to keep pupils safe when using the school's IT system. Filtering systems block access to harmful sites and content. Monitoring systems identify when a user accesses or searches for certain types of harmful content on school devices (it doesn't stop someone accessing it). The school is then alerted to any concerning content so that appropriate interventions and ultimate responses can be made.

All staff and others who can access school devices will be provided with a copy of the Trust's Code of Conduct on induction which sets out information in relation to the acceptable behaviour standards, including those for use of school devices (either in school or off-site).

2. DfE Filtering and monitoring standards

The DfE published updated guidance in March 2025 which sets out standards that schools should meet in relation to filtering and monitoring. The school will comply with the requirements set out in DfE guidance relating to 'filtering and monitoring standards for schools and colleges', which are summarised in figure 1 below:

Required Outcome	Responsibility	Named responsible individual(s)
Identify and assign a member of the Senior Leadership Team (SLT) to be responsible for ensuring that the standards are met.	Governors	Mr. J. Gale & Mr. C. Steele
Identify and assign a Governor to be responsible for ensuring that the standards are met.	Governors	Mrs. C. Jones
Identify and assign the roles and responsibilities of staff (e.g. school Digital Technology Lead, Designated Safeguarding Lead) and third parties (e.g. external service providers).	Governors	DSL: Mr. J. Gale DTL: Mrs. E. Strickland IT: Cockermouth School IT Team
Document decisions about what is blocked or allowed and why.	SLT	Mr. J. Gale & Mr. C. Steele
Review the effectiveness of our provision (and provide evidence e.g. communication between technical staff and Designated Safeguarding Leads (DSLs)).	SLT	Mr. J. Gale & Mr. C. Steele
Oversee reports.	SLT	Mr. J. Gale & Mr. C. Steele
Ensuring all staff have received appropriate and up to date training, follow Policies, procedures and processes around online safety and filtering and monitoring.	SLT	
Ensuring all staff act on reports and concerns.	SLT	
Oversee and act on filtering and monitoring reports.	DSL	Mr. J. Gale
Oversee and act on safeguarding concerns.	DSL	Mr. J. Gale
Oversee and act on checks to monitoring systems.	DSL	Mr. J. Gale
Maintain filtering and monitoring systems.	IT service provider	Cockermouth School IT Team
Provide filtering and monitoring reports.	IT service provider	Cockermouth School IT Team
Complete actions following concerns or checks to systems.	IT service provider	Cockermouth School IT Team
Carry out reviews of the filtering and monitoring provision at least annually.	JOINT (Govs, Senior Leaders, DSL, and IT provider)	
Carry out checks which are informed by the review to ensure systems are working as intended.	JOINT (Govs, Senior Leaders, DSL, and IT provider)	

Figure 1: Filtering and monitoring standards – summary of requirements.

In order to meet these requirements we will ensure that the following arrangements are in place at the outset.

We will identify and assign roles and responsibilities to manage our filtering and monitoring systems as follows and outlined above:

- A Senior Lead and a Governor will be responsible for ensuring the standards are met.
- The roles and responsibilities of individual staff members (e.g. pastoral leads, Digital technology lead, DSL) and third parties (e.g. external service providers such as IT providers) will be clearly identified.
- The school's access strategy will be designed by educators to suit the age and curriculum requirements of the pupils, with advice from network managers. All decisions regarding what content is blocked or allowed, and why, will be documented.
- All staff will be given awareness training at induction outlining how our filtering and monitoring systems work. This training will also be included in the annual safeguarding training.

Day to day management of filtering and monitoring systems requires the specialist knowledge of both safeguarding and IT staff to be effective. The Headteacher/DSL works closely together with IT service providers to meet the needs of our setting.

The Headteacher/DSL takes lead responsibility for safeguarding and online safety, in the following areas:

- filtering and monitoring reports;
- safeguarding concerns;
- checks to filtering and monitoring systems.

The Headteacher/IT service provider has technical responsibility for:

- maintaining filtering and monitoring systems;
- providing filtering and monitoring reports;
- completing actions following concerns or checks to systems.

The Headteacher and IT service provider work to:

- procure systems
- identify risk
- carry out reviews
- carry out checks

3. Blocking harmful and inappropriate content

No filtering system can be 100% effective and we understand the coverage of our filtering system, any limitations it has, and take mitigating measures accordingly to minimise harm and to meet our statutory duties outlined in [Keeping Children Safe in Education](#) and the Home Office [Prevent Duty](#).

We will ensure that our filtering system blocks harmful and inappropriate content, including all sites on the [Internet Watch Foundation \(IWF\) list](#), without unreasonably impacting teaching and learning or restricting students from learning how to assess and manage risk themselves. As a minimum we will ensure that our filtering system manages the following content (and web search)

Content	Explanatory notes – content that:
Discrimination	Promotes the unjust or prejudicial treatment of people with protected characteristics of the Equality Act 2010.
Drugs / Substance abuse	Displays or promotes the illegal use of drugs or substances.
Extremism	Promotes terrorism and terrorist ideologies, violence or intolerance.
Gambling	Enables gambling.
Malware / Hacking	Promotes the compromising of systems including anonymous browsing and other filter bypass tools as well as sites hosting malicious content.
Pornography	Displays sexual acts or explicit images.
Piracy and copyright theft	Includes illegal provision of copyrighted material.

Self-Harm	Promotes or displays deliberate self-harm (including suicide and eating disorders).
Violence	Displays or promotes the use of physical force intended to hurt or kill.

Figure 2: Filtering systems - inappropriate online content (reproduced from UKSIC guidance)

In order to ensure that our filtering system blocks harmful and inappropriate content the following arrangements will apply:

- the Governing Body will support Senior Leaders to procure and set up systems which meet this standard and the risk profile of the school;
- we will follow the guidance set out for schools by the UK Safer Internet Centre (UKSIC) on [‘Appropriate Filtering for Education Settings’](#) to inform our approach to establishing appropriate levels of filtering;
- we will ensure that our filtering provider is a member of the [Internet Watch Foundation](#); is signed up to the Counter-Terrorism Internet Referral Unit list (CTIRU) and blocks access to illegal content including child sexual abuse material (CSAM);
- we will ensure that our filtering system is operational, up to date and applied to all users (including guest user accounts); school owned devices and devices using the school broadband connection;
- our filtering provider will be asked for system specific training and support for the DSL and IT staff as required;
- we will regularly check that our filtering system remains current by using the [internet filter test tool](#) created and hosted by South West Grid for Learning ([swgfl.org.uk](#)).

4. Filtering

For filtering to be effective, it should meet the needs of both pupils and staff and reflect specific use of technology whilst minimising potential harms. An active and well managed filtering system is an important part of providing a safe environment for pupils to learn.

Our filtering system:

- filters all internet feeds, including any backup connections;
- is age and ability appropriate for the users, and is suitable for our setting;
- handles multilingual web content, images, common misspellings and abbreviations;
- identifies technologies and techniques that allow users to get around the filtering such as VPNs and proxy services and blocks them;
- provides alerts when any web content has been blocked;

It is important to be able to identify individuals who might be trying to access unsuitable or illegal material so they can be supported by appropriate staff, such as a member of SLT and/or the DSL.

Our filtering systems allow us to identify the:

- device name or ID, IP address, and where possible, the individual
- time and date of attempted access
- search term or content being blocked

The school has a clear procedure for reporting breaches of filtering. All members of the school community (all staff and all pupils) will be made aware of this procedure. If staff or pupils discover unsuitable sites, the URL will be reported to the school Digital technology lead who will then record the incident and escalate the concern as appropriate. Any material that the school believes is illegal will be reported to appropriate agencies such as [IWF](#), the Police or [CEOP](#).

5. Monitoring

We will employ effective monitoring strategies that meet the safeguarding needs of our school. Whilst we recognise that no monitoring can be 100% effective, we will ensure that, as a minimum, our monitoring system covers the following content:

Content	Explanatory notes – content or communications that:
Illegal	Is illegal (e.g. Child abuse images and terrorist content). It is important that safeguards for illegal content cannot be disabled by the user.
Bullying	Involve the repeated use of force, threat or coercion to abuse, intimidate or aggressively dominate others.
Child Sexual Exploitation	Is encouraging the child into a coercive/manipulative sexual relationship. This may include encouragement to meet.
Discrimination	Promotes the unjust or prejudicial treatment of people with protected characteristics of the Equality Act 2010.
Drugs/Substance abuse	Displays or promotes the illegal use of drugs or substances.
Extremism	Promotes terrorism and terrorist ideologies, violence or intolerance.
Gambling	Enables gambling.
Pornography	Displays sexual acts or explicit images.
Self-Harm	Promotes or displays deliberate self-harm (including suicide and eating disorders).
Violence	Displays or promotes the use of physical force intended to hurt or kill.
Suicide/self-harm	Suggest the user is considering suicide or self-harming.

Figure 3: Monitoring systems - inappropriate content (reproduced from UKSIC guidance)

In order to achieve this, the following arrangements will apply.

- We will follow the guidance set out for schools by the UK Safer Internet Centre on '[Appropriate Monitoring for Schools](#)' to inform our monitoring strategy.
- The Governing Body will support the Senior Leaders to make sure effective device monitoring is in place which meets this standard and the risk profile of the school.
- The DSL will take lead responsibility for any safeguarding and child protection matters that are picked up through monitoring.
- Training will be provided to ensure that the specialist knowledge of both safeguarding and IT staff remains current.
- Staff will provide effective supervision, take steps to maintain awareness of how devices are being used by pupils/others and report any safeguarding concerns to the Headteacher/DSL.

Monitoring user activity on school devices is an important part of providing a safe environment for children and staff. Unlike filtering, it does not prevent users from accessing material through internet searches or software.

Monitoring allows the school to review user activity on our devices. For monitoring to be effective it must pick up incidents urgently, usually through alerts or observations, allowing us to take prompt action and record the outcome.

Our monitoring strategy is informed by the filtering and monitoring review. A variety of monitoring strategies are required to minimise safeguarding risks on internet connected devices and include:

- physically monitoring by staff watching screens of users;
- live supervision by staff on a console with device management software;
- network monitoring using log files of internet traffic and web access;
- individual device monitoring through software or third-party services.

The Governing Board/Board of Trustees support Senior Leaders to review the effectiveness of our monitoring strategies and reporting process. We will always make sure that incidents are urgently picked up, acted on and outcomes are recorded. Incidents could be of a malicious, technical, or safeguarding nature. It is clear to all staff how to deal with these incidents and who should lead on any actions.

Device monitoring is managed by the Headteacher/DSL and Cockermouth School IT Team, they will:

- ensure monitoring systems are working as expected;
- provide reporting on pupil device activity at intervals to be determined by the school;
- receive safeguarding training including online safety;
- record and report safeguarding concerns to the DSL;

Those involved will also ensure that:

- monitoring data is received in a format that staff can understand;
- users are identifiable to the school, so concerns can be traced back to an individual, including guest accounts.

Our monitoring system will alert us to behaviours associated with the 4c's as outlined in Section 1 – Introduction – above.

6. Review of filtering and monitoring

The Governing Board/Trustees have overall strategic responsibility for meeting the standard which relates to the review of filtering and monitoring. They should make sure that filtering and monitoring provision is reviewed at least annually and may form part of a wider online safety review. Tools such as the [SWGfL 360 degree safe](#) self-review tool or the [LGFL Online Safety Audit](#), will help to ensure that filtering and monitoring are working as expected across all devices, including mobile devices.

Reviews of filtering and monitoring are carried out to identify our current provision, any gaps, and the specific needs of any pupils and staff.

Prior to undertaking the review, we will consider the following:

- the risk profile of our pupils, including their age range, pupils with special educational needs and disability (SEND), pupils with English as an additional language (EAL);
- what our filtering system currently blocks or allows and why;
- any outside safeguarding influences, such as county lines;
- any relevant safeguarding reports;
- the digital resilience of our pupils;
- teaching requirements, for example, our RHSE and PSHE curriculum;
- the specific use of our chosen technologies, including Bring Your Own Device (BYOD);
- the related safeguarding or technology Policies we already have in place;
- the checks that are currently taking place and how resulting actions are handled.

As a result, and to ensure it remains effective, our review of filtering and monitoring will inform:

- related safeguarding or technology policies and procedures;
- roles and responsibilities;
- any gaps in training for staff;
- curriculum and learning opportunities;
- procurement decisions;
- how often and what is checked;
- monitoring strategies.

Although the DfE standards recommended that the review of the filtering and monitoring systems is undertaken at least annually, we will also consider a review when:

- a safeguarding risk is identified;
- there is a change in working practice, like remote access or BOYD;
- new technology is introduced.

As part of the review process, there are a number of external tools which can be used to support the school:

- [SWGfL 360 degree safe toolkit](#)
- [LGFL Online Safety Audit](#)
- UKCIS (UK Centre for Internet Safety) [‘Questions from the governing board’](#)
- UKCIS [Online Safety Audit Tool for trainee and early career teachers](#)

- UKCIS '[External visitors guidance](#)'

The review is conducted by the Headteacher/DSL and the IT service provider and, where necessary the responsible governor will be involved. The results of the online safety review will be recorded on the [SWGFL Filtering and Monitoring Checklist Register](#) (or similar), actioned and shared with staff as appropriate and made available to those entitled to inspect that information.

Reviews may be conducted more frequently if a safeguarding risk is identified (as outlined above), or there is a change in working practice (e.g. remote access or BOYD) or if new technology is introduced. Changes to the school filtering procedures will be [risk assessed](#) by staff with educational and technical experience prior to any changes and where appropriate with consent from the Senior Leaders. The outcomes from all filtering and monitoring reviews will be recorded.

We will undertake checks of our filtering provision the regularity of which will be based on the context, the risks highlighted in the filtering and monitoring review and any other risk assessments. Any checks will be undertaken from both a safeguarding and IT perspective. We can also make use of the [South West Grid for Learning \(SWGfL\) filtering testing tool](#) which checks that our filtering system is blocking access to illegal child sexual abuse material; unlawful terrorist content; and adult content.

When checking our filtering and monitoring systems, we will ensure that the system setup has not changed or been deactivated and the checks will include a range of:

- school owned devices and services (for both pupils and staff), including those used off site;
- implications in relation to geographical areas across the school site;
- user groups, e.g. teachers, pupils and guests.

Records will be held in the form of a [System filtering and monitoring checks record/log](#) so that they can be reviewed. Our record/log will include:

- when the checks took place;
- who did the check;
- what they tested or checked;
- resulting actions.

Checks (termly) might include any or all of the following:

- settings and updates on for example Microsoft systems;
- all in-school staff device password and log-on checks, including those which are used in the home environment;
- pupil and staff account compliance checks;
- maintenance of subscriptions and licences;
- revision and review of policies and procedures.

7. Reporting safeguarding and technical concerns

All staff are aware of the reporting mechanisms in place for reporting concerns about safeguarding and technical issues. Staff are advised to report if:

- they witness or suspect unsuitable material has been accessed;
- they can access unsuitable material;
- they are teaching topics which could create unusual activity on the filtering logs;
- there is failure in the software or abuse of the system;
- there are perceived unreasonable restrictions that affect teaching and learning or administrative tasks;
- they notice abbreviations or misspellings that allow access to restricted material.
