1

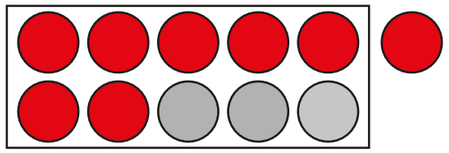

How shall I add?

4 + 1, 6 + 3, 10 + 4
Number facts
Single digit numbers
Doubles
Ten and single digits

I just knew it!

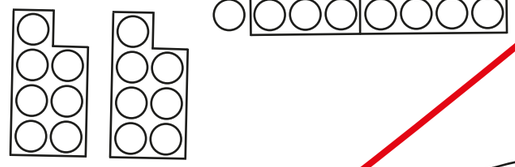

3 + 7
Use known addition facts

If I know 3 + 7 = 10
then I know
3 + 8 = 11
because it is 1 more

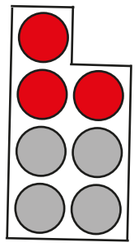

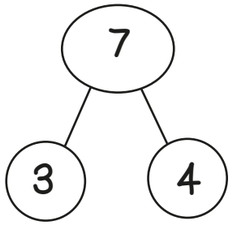

7 + 8
Use near doubles

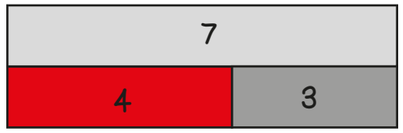

If I know 7 + 7 = 14
then I know
7 + 8 = 15
because it is 1 more

7 = 3 + 4
Secure addition bonds of single digits and ten

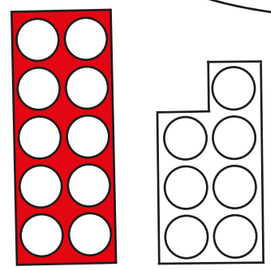

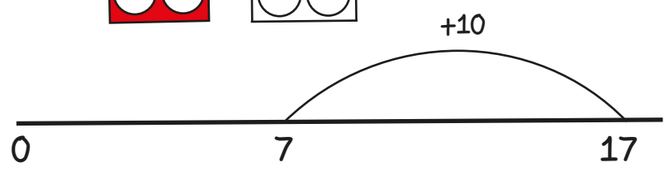

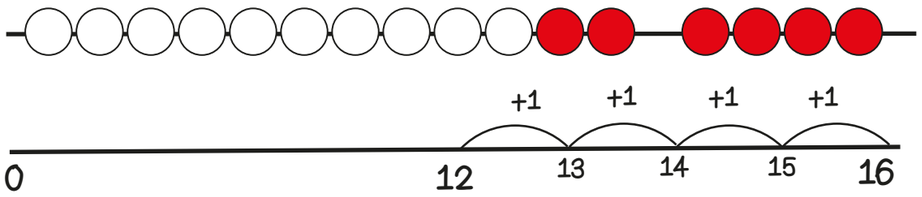

7 + 10
Add ten

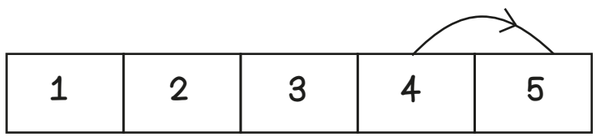

12 + 4
Counting on in 1s

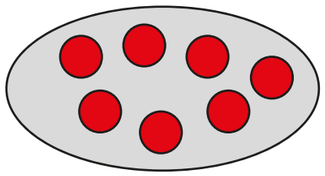

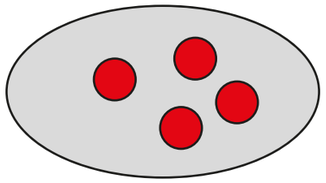

Notice the relationships

24 + 1
Find one more

1 more than 4 is 5
1 more than 14 is 15
1 more than 24 is 25

7 + 4
Count all

Can Do Maths

© Liz Hopkins

1

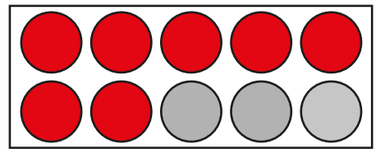

How shall I subtract?

5 - 1, 7 - 3, 10 - 6
Number facts
Single digit numbers
Teens subtract single digits

I just knew it!

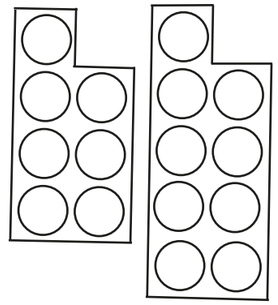

3 + 7
Use known addition facts to derive subtraction facts

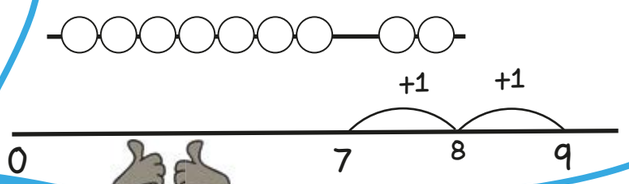

If I know 3 + 7 = 10
then I know
10 - 3 = 7

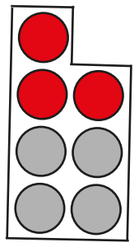

9 - 7
Find the difference between two numbers

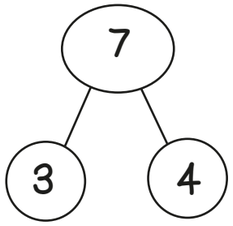

9 is 2 more than 7
7 is 2 less than 9 so
the difference
between 7 and 9 is 2

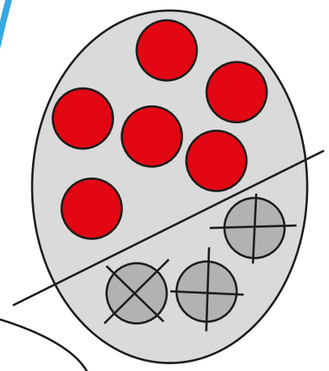

7 - 3 = 4
Secure subtraction facts of single digits and ten

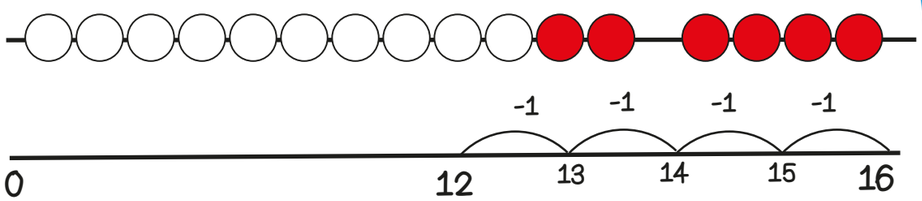

7	
4	3

9 - 3
Take away

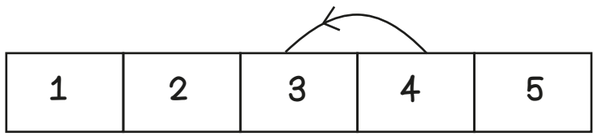

16 - 4
Counting back in 1s

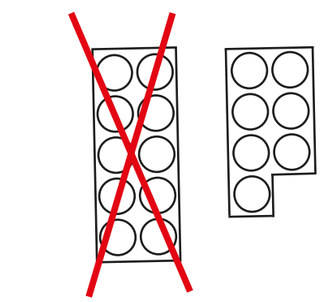

Notice the relationships

23 - 1
Find one less

1 less than 4 is 3
1 less than 14 is 13
1 less than 24 is 23

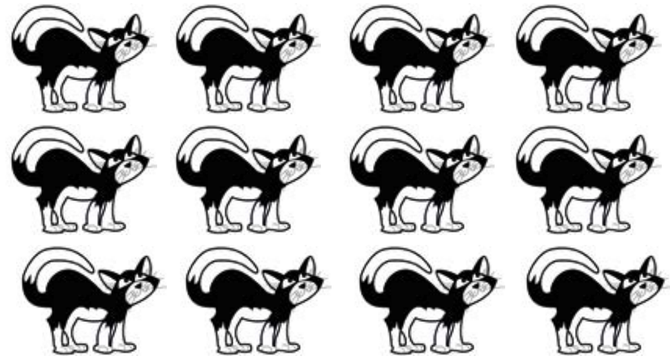

17 - 10
Take away ten

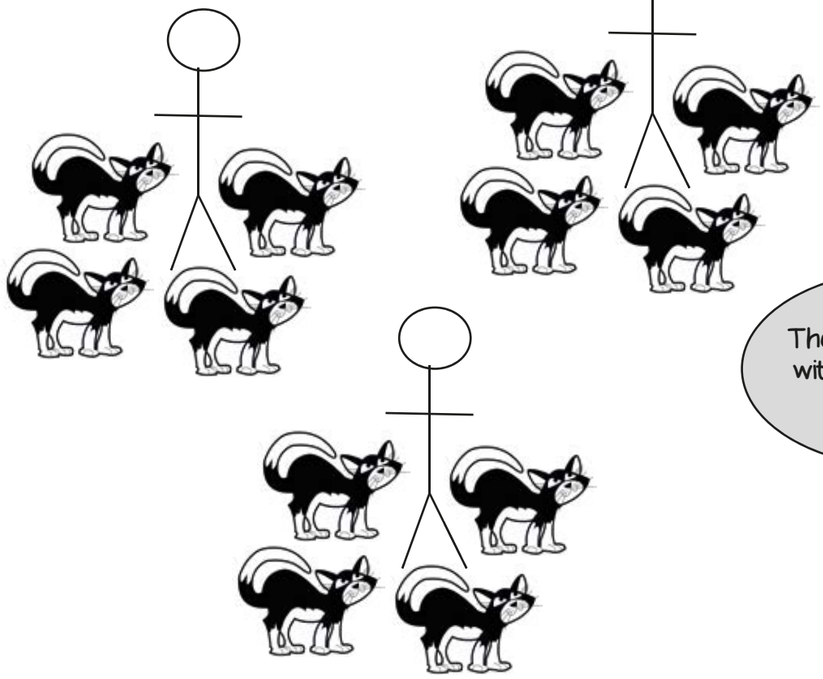

For use exclusively in the Purchasing Institution

© Liz Hopkins

3 people each have 4 cats.
How many cats are there in total?

There are 3 groups with 4 cats in each group

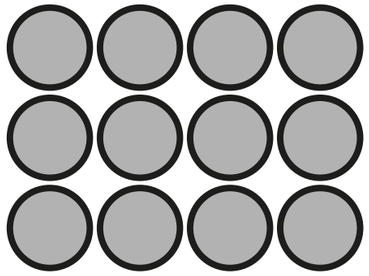

How shall I multiply?

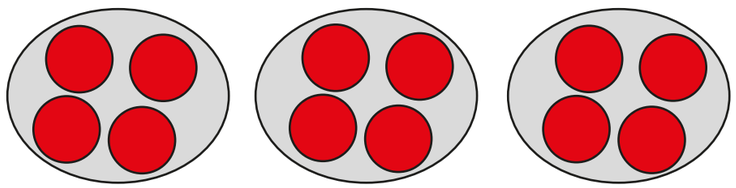

Equal groups

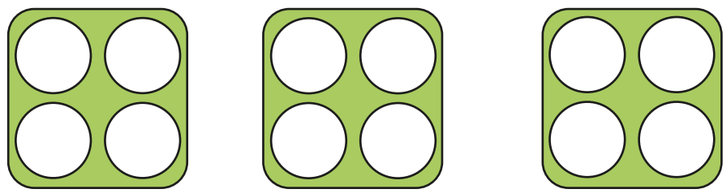

Arrays

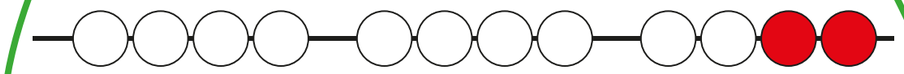

Count in ones

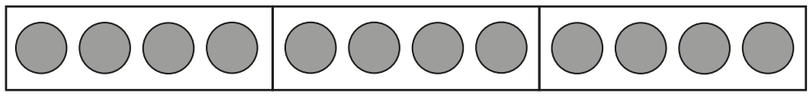

1,2,3,**4**,5,6,7,**8**,9,10,11,**12**

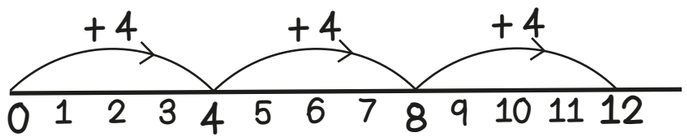

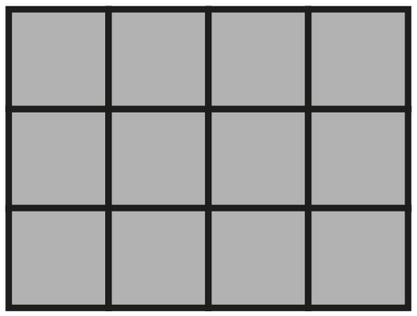

Repeated addition

$4 + 4 + 4 = 12$

Can Do Maths

For use exclusively in the Purchasing Institution

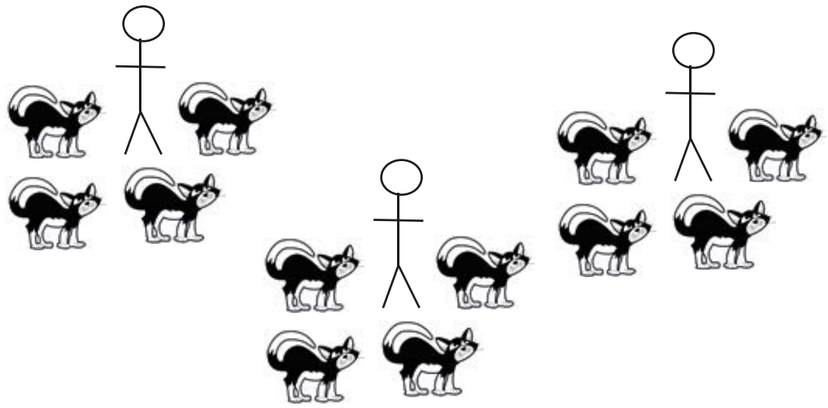

© Liz Hopkins

$12 \div 3 = 4$

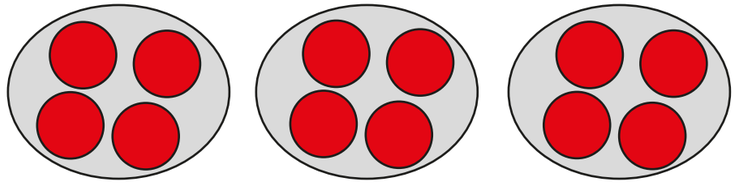

Sharing

12 shared into 3 equal groups

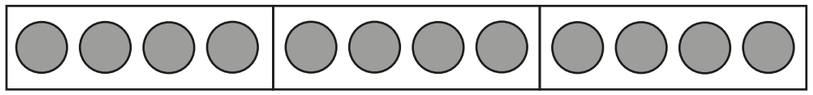

There are 12 cats.
Three people each have the same number of cats.
How many do they have each?

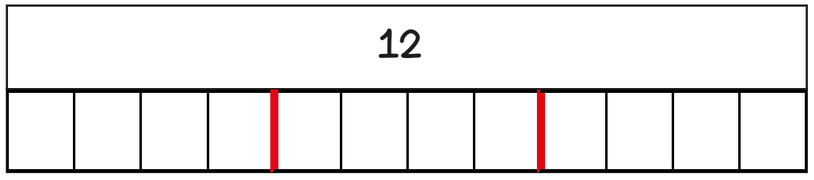

1 for you, 1 for you, 1 for you...

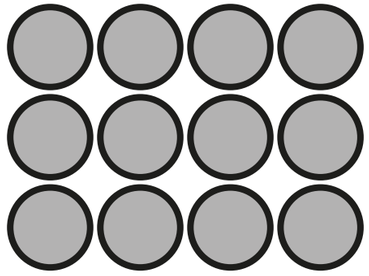

Bar model

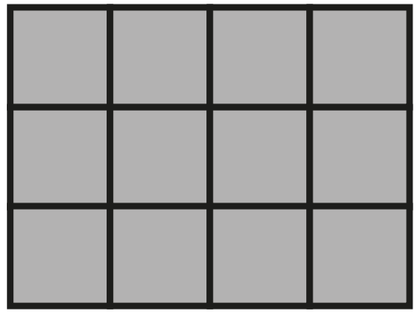

How shall I divide?

12 can be described as
3 columns of 4
or 4 rows of three

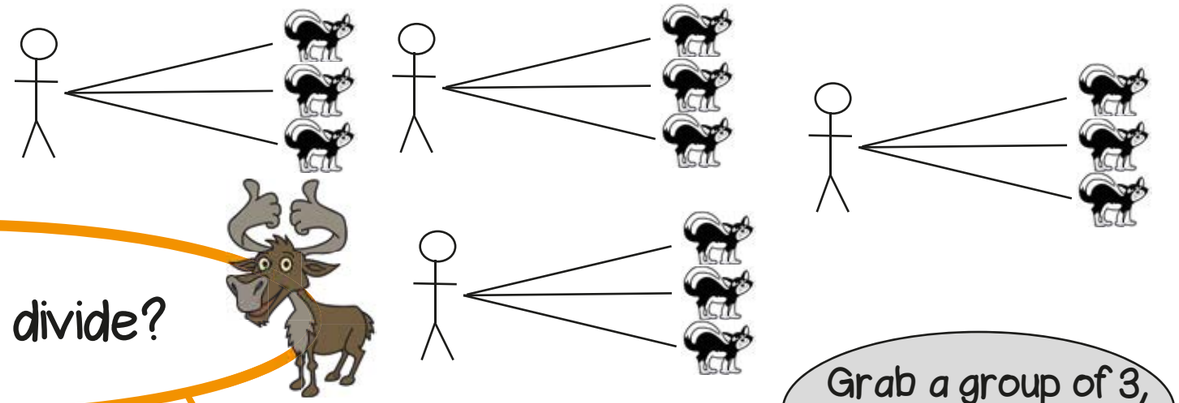

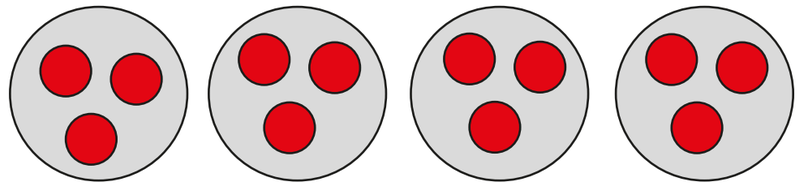

Grouping

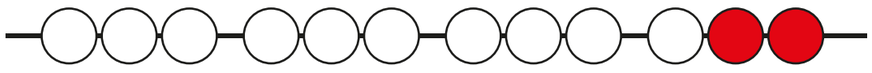

How many groups of 3 are there in 12?

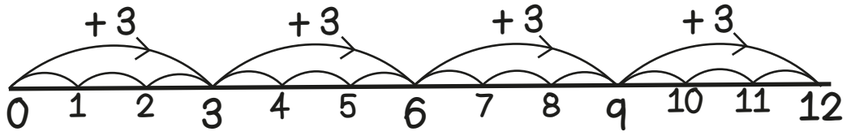

There are 12 cats.
Each person owns 3 cats.
How many people are there?

Grab a group of 3, grab a group of 3...

Can Do Maths

For use exclusively in the Purchasing Institution

© Liz Hopkins

How shall I add?

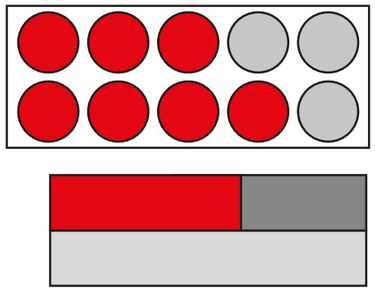

8 + 7, 9 + 9, 14 + 3
Number facts
Single digit numbers
Doubles
Teens and single digits

I just knew it!

13 + 17
Use known facts
30 + 70

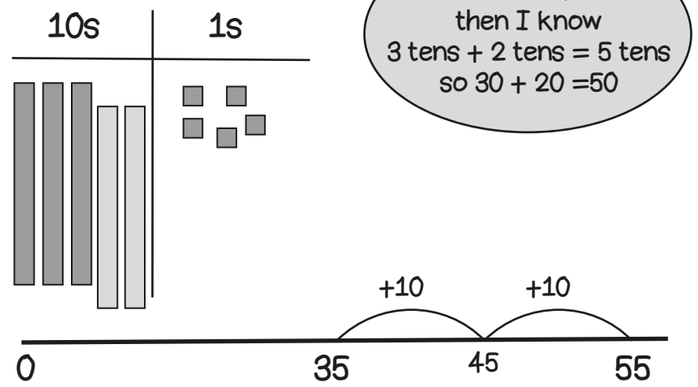

If I know 3 + 7 = 10
then I know
3 tens + 7 tens = 10 tens

If I know 3 + 7 = 10
then I know
13 + 17 is 2 tens more

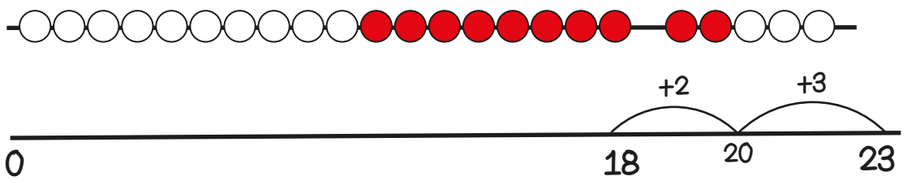

35 + 20
Add multiples of ten

If I know 3 + 2 = 5
then I know
3 tens + 2 tens = 5 tens
so 30 + 20 =50

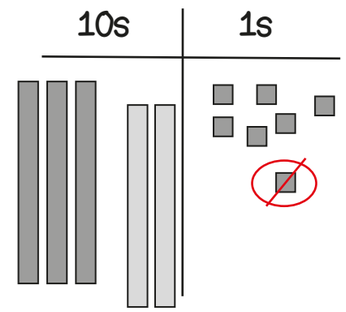

5 + 18
Greatest number first
then bridge

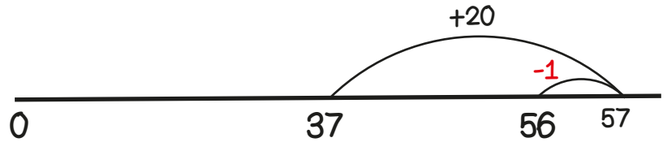

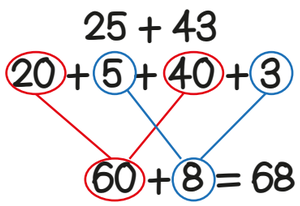

37 + 19
Round then adjust

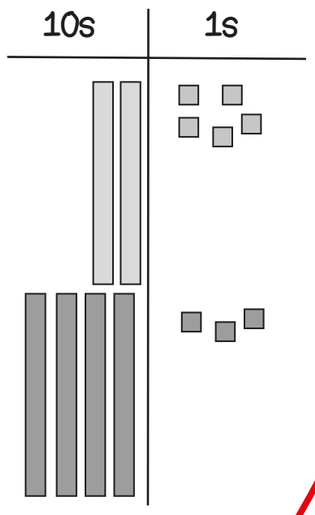

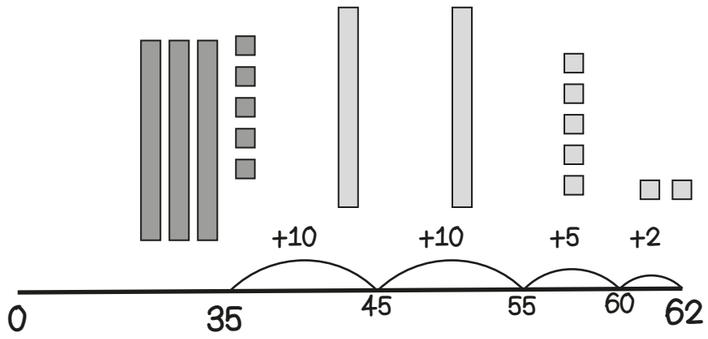

Add 20 then subtract 1

25 + 43
Partition and recombine

35 + 27
Count on in tens then ones

For use exclusively in the Purchasing Institution

© Liz Hopkins

2

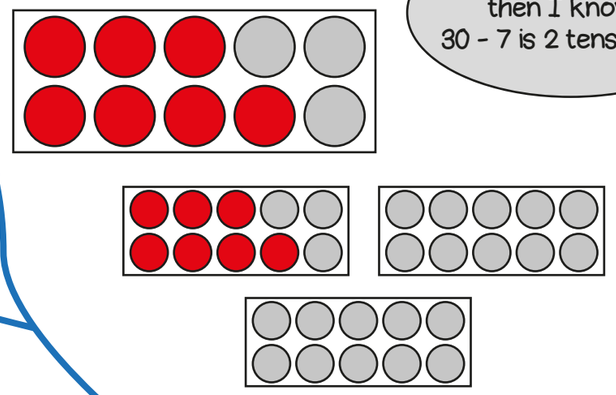

How shall I subtract?

9 - 4, 13 - 5, 18 - 9
Number facts
Single digit numbers
Halves
Teens and single digits

I just knew it!

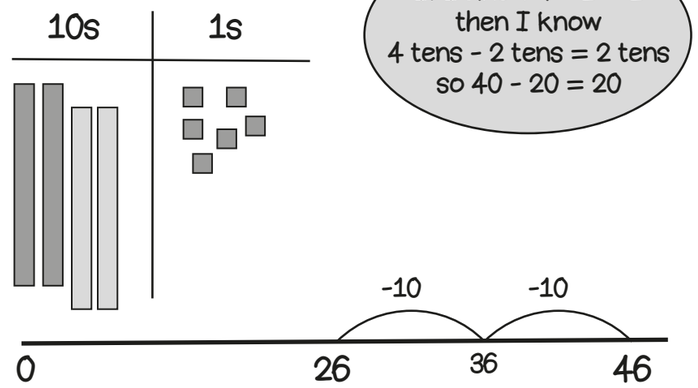

30 - 7
Use known facts
100 - 70

If I know 10 - 7 = 3
then I know
30 - 7 is 2 tens and 3

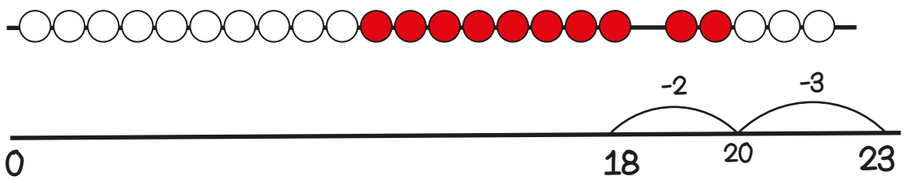

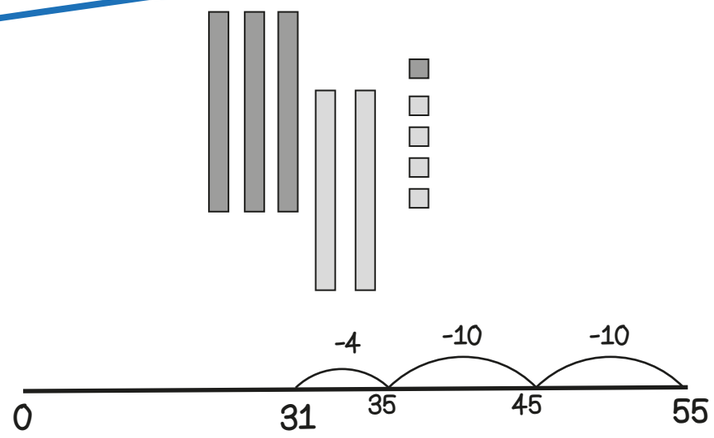

46 - 20
Count back: multiples of ten

If I know 4 - 2 = 2
then I know
4 tens - 2 tens = 2 tens
so 40 - 20 = 20

23 - 5
Count back: bridge through a multiple of ten

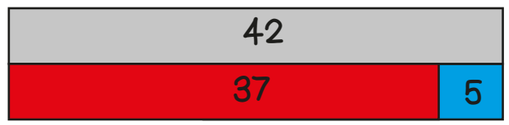

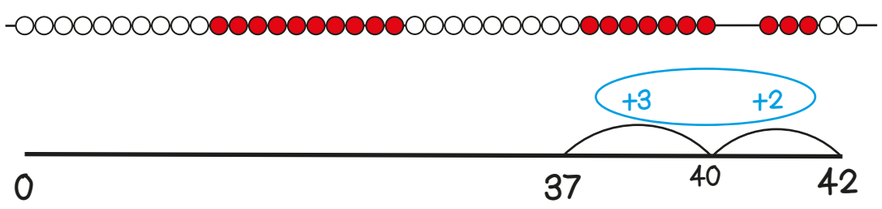

55 - 24
Count back in tens then ones

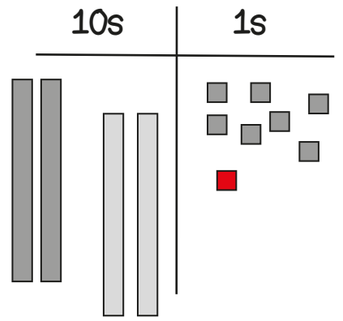

42 is 5 more than 37,
37 is 5 less than 42 so
the difference between
37 and 42 is 5

42 - 37
Find the difference between two numbers

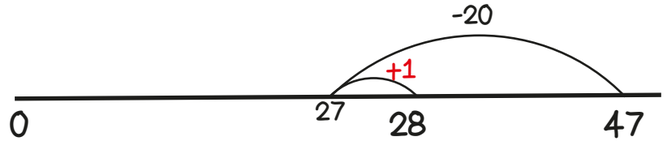

47 - 19
Round then adjust

Take away 20 then add 1

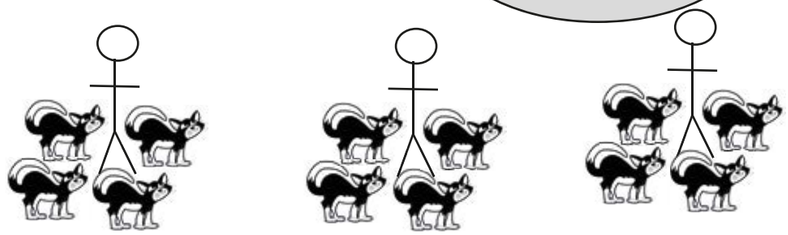

Can Do Maths
For use exclusively in the Purchasing Institution

3 people each have 4 cats. How many cats are there in total?

Equal groups

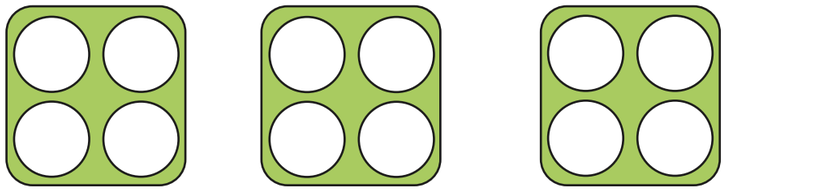

There are 3 groups with 4 cats in each group

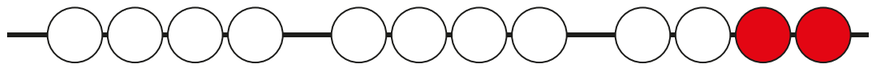

Four cats, multiplied by 3

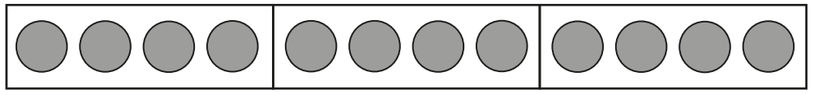

4 x 3 = 12

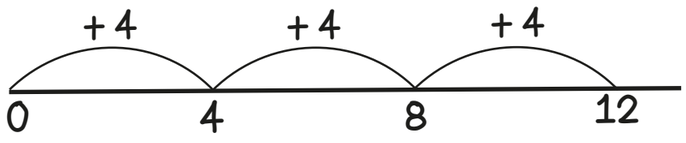

Repeated addition

4	4	4

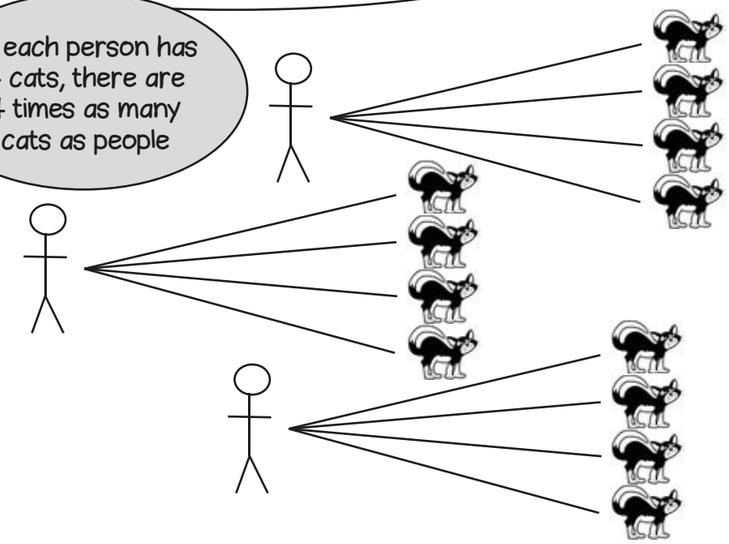

4 + 4 + 4 = 12

Recall of 2x, 5x and 10x tables

People	Cats
1	4
2	8
3	12

One to many correspondence

If each person has 4 cats, there are 4 times as many cats as people

How shall I multiply?

Count in ones

1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12

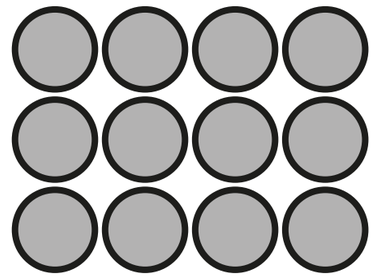

Count in twos

2, 4, 6, 8, 10,12

Use a known fact

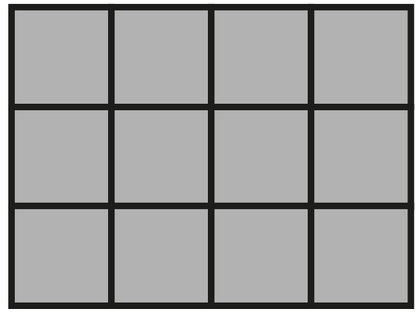

If 2 x 3 is 6, then
4 x 3 is double 6.

Arrays

4 x 3 = 12

3 x 4 = 4 x 3

Can Do Maths

For use exclusively in the Purchasing Institution

© Liz Hopkins

How shall I divide?

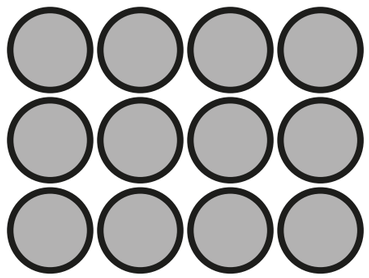

$12 \div 3 = 4$

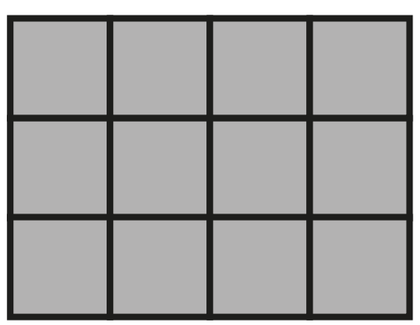

Recall and use 2x, 5x and 10x tables

1 for you, 1 for you, 1 for you...

Grab a group of 3, grab a group of 3...

12 can be described as
3 columns of 4
or 4 rows of three

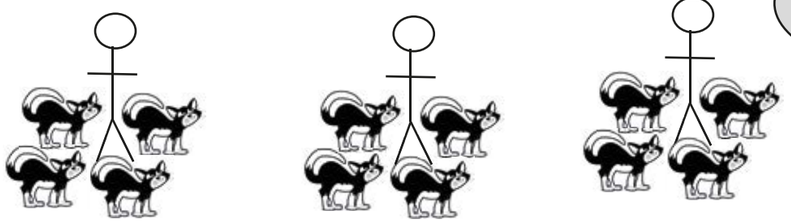

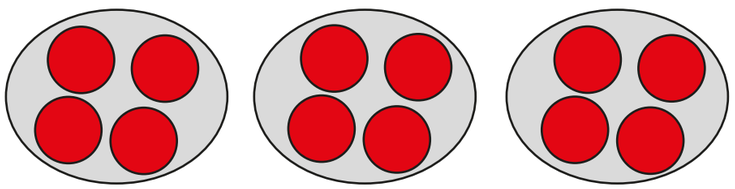

Sharing

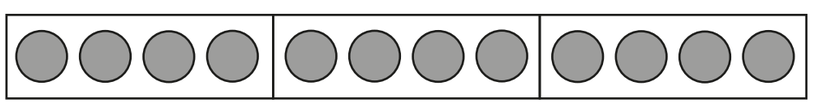

12 shared into 3 equal groups

There are 12 cats.
Three people each have the same number of cats.
How many do they have each?

Bar model

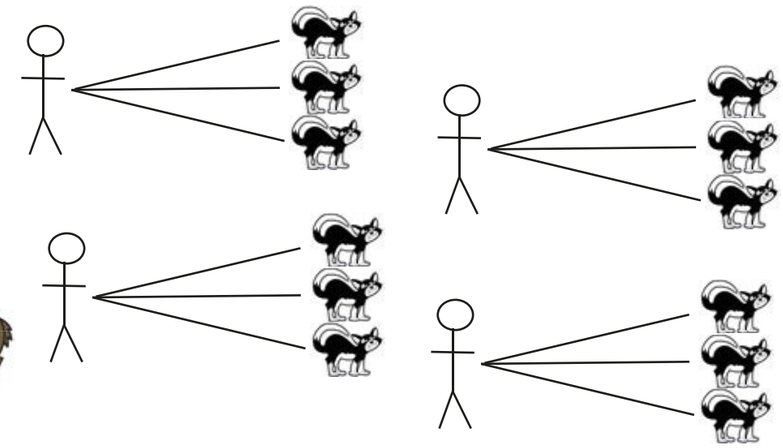

12		
4	4	4

Link to fractions.
One third of 12 is 4

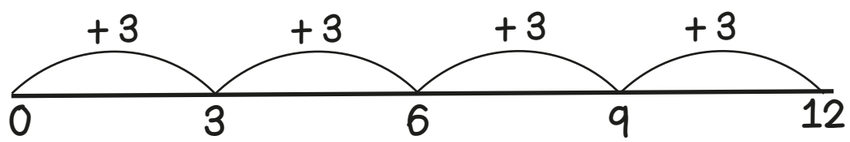

Grouping

How many groups of 3 are there in 12?

There are 12 cats.
Each person owns 3 cats.
How many people are there?

If I know $3 \times 4 = 12$
then I know $12 \div 3 = 4$

Can Do Maths

3

How shall I add?

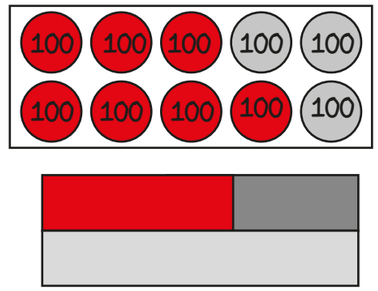

8 + 7, 9 + 9, 14 + 3
Number facts
Single digit numbers
Doubles
Tens to make 100

I just knew it!

243 + 7
Use known facts
300 + 700

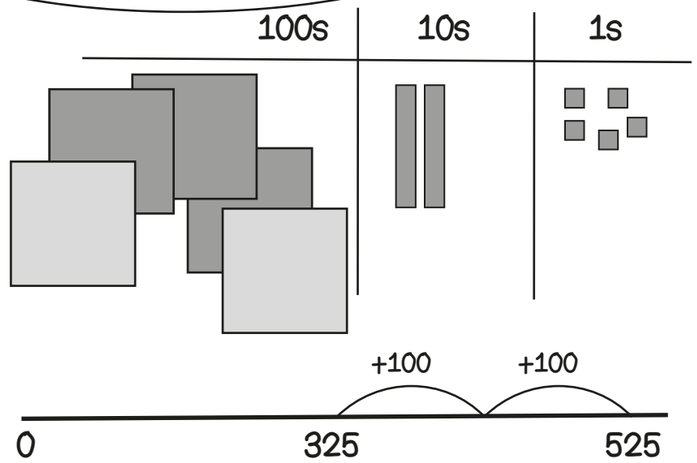

If I know 3 + 7 = 10
then I know
3 hundreds + 7 hundreds
= 10 hundreds

If I know 3 + 7 = 10
then I know
243 + 7 makes the
next multiple of 10

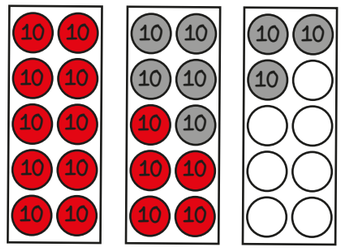

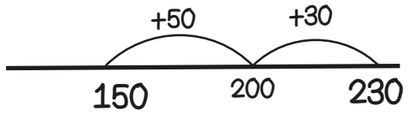

325 + 200
Add multiples of ten and hundred

If I know 3 + 2 = 5
then I know
3 hundreds + 2 hundreds
= 5 hundreds

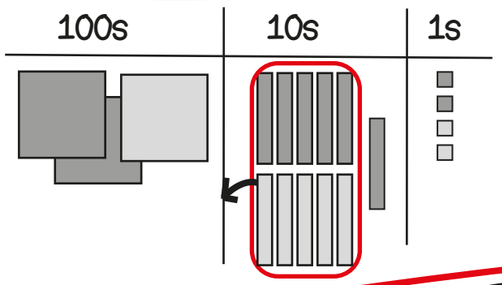

150 + 80
Bridging boundaries

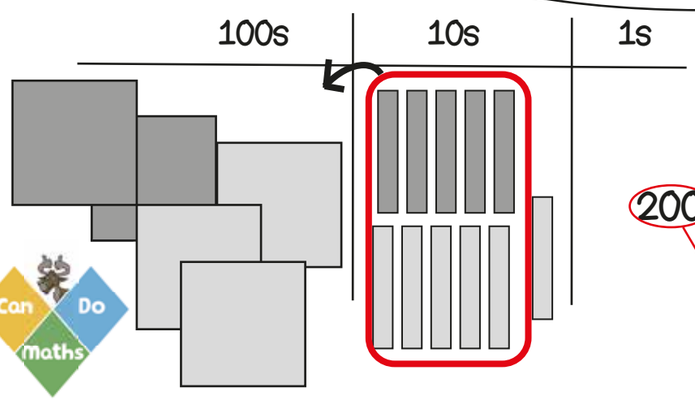

262 + 152
Formal written method

6 tens add 5 tens
= 11 tens or 110

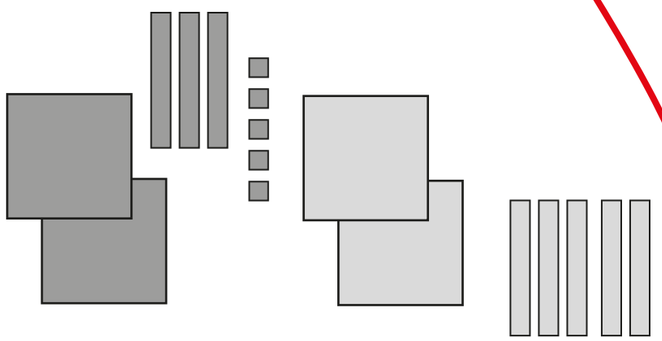

$$\begin{array}{r} 262 \\ +\,152 \\ \hline 414 \\ \hline 1 \end{array}$$

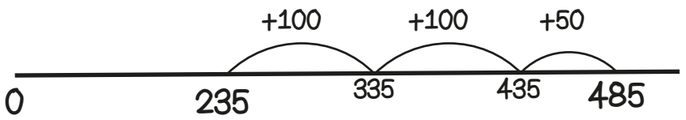

250 + 360
Partition and recombine

200 + 50 + 300 + 60

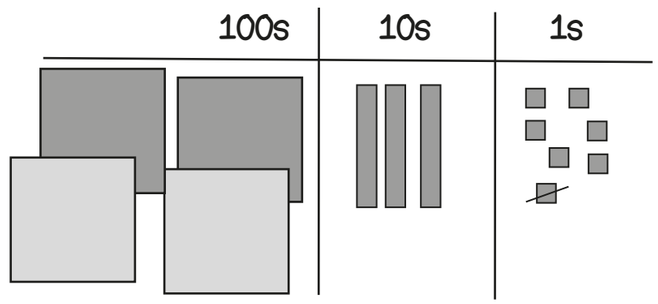

500 + 110 = 610

235 + 250
Count on in hundreds then tens

237 + 199
Round then adjust

Add 200 then subtract 1

For use exclusively in the Purchasing Institution

© Liz Hopkins

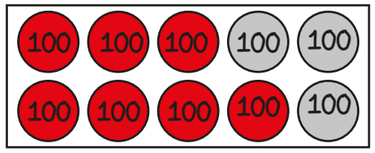

How shall I subtract?

15 - 8, 18 - 5
Number facts
Single digit numbers
Teens and single digits

I just knew it!

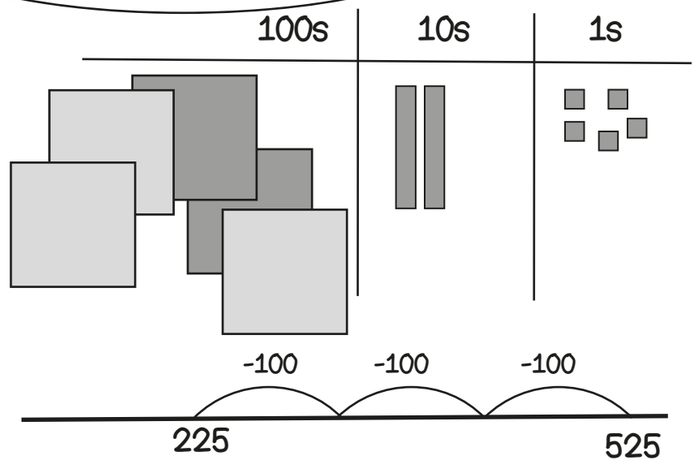

240 - 7
Use known facts
1000 - 700

If I know 10 - 7 = 3
then I know
10 hundreds - 7 hundreds
= 3 hundreds

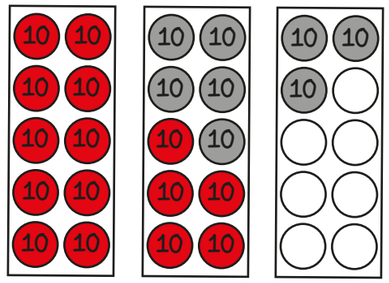

525 - 300
Take away multiples of ten and a hundred

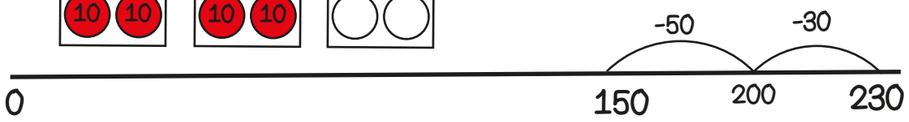

If I know 5 - 3 = 2
then I know
5 hundreds - 3 hundreds
= 2 hundreds

230 - 80
Bridging boundaries
by counting back in efficient steps

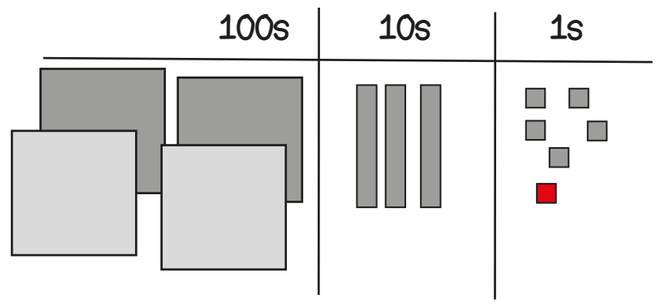

230 - 30 - 50 = 150

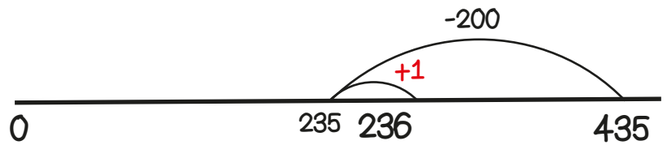

0 - 7 = 3

If I know 10 - 7 = 3
then I know
any multiple of 10,
take away 7 leaves
3 in the ones.

435 - 199
Round then adjust

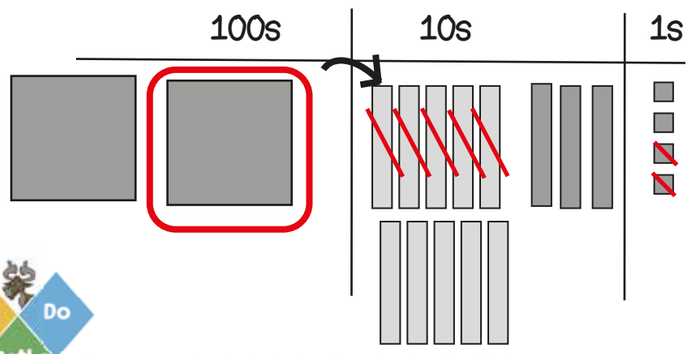

Take away 200 then add 1

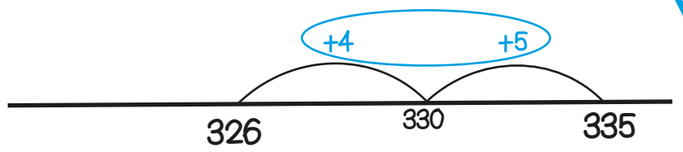

234 - 152
Formal written method

$$\begin{array}{r} {}^{1}\not{2}{}^{1}34 \\ -\,152 \\ \hline 82 \end{array}$$

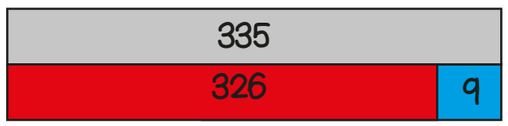

234 = 100 + 130 + 4

335 - 326
Find the difference between two numbers

335 is 9 more than 326
326 is 9 less than 335
so the difference between them is 9

Can Do Maths
For use exclusively in the Purchasing Institution

How shall I divide?

Known facts:
Use 2x, 5x, 10x (year 2)
3x, 4x, 8x (year 3)
multiplication tables to derive division facts

24 ÷ 4
Use known facts and place value

240 is ten times greater than 24

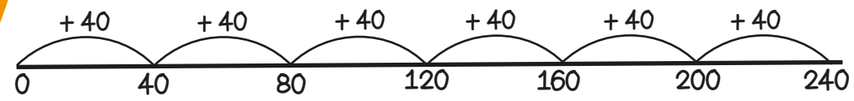

24 ÷ 4 = 6
240 ÷ 40 = 6
240 ÷ 4 = 60

24 biscuits shared between 4 people means they will get 6 biscuits each.
If there are 10 times as many people and 10 times as many biscuits, how many biscuits each now?

240 ÷ 40
Repeated addition

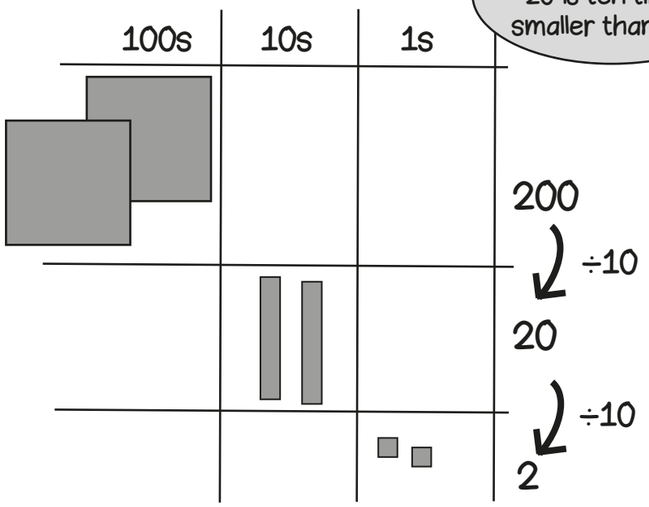

How many 40s are there in 240?

240 ÷ 40 = 6
How many steps of 40 make 240?

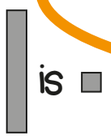

200 ÷ 10
Divide by 10

200 ÷ 10 = 20 so 20 is ten times smaller than 200

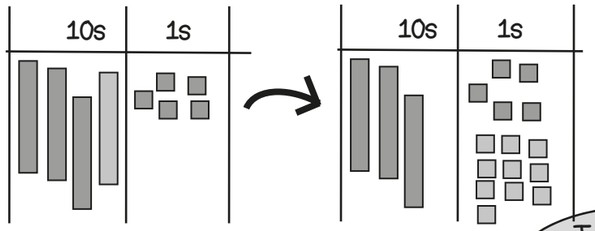

A tenth of is

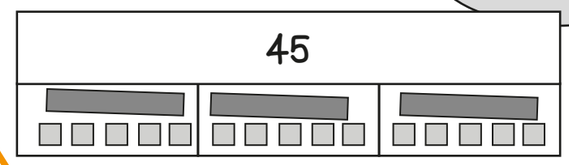

A tenth of 1 is 1 tenth
so $1 \div 10 = \frac{1}{10}$

45 ÷ 3
Sharing equally

Ten for you, ten for you, ten for you...

52 ÷ 4
Partition and recombine

ten lots and the rest

52 ÷ 4
40 12
÷ 4 ÷ 4
10 + 3 = 13

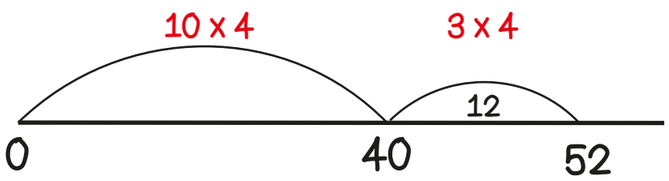

42 ÷ 6
Double and halve

If there are half as many biscuits and half as many people...

42 ÷ 6 = 21 ÷ 3

42

4

How shall I add?

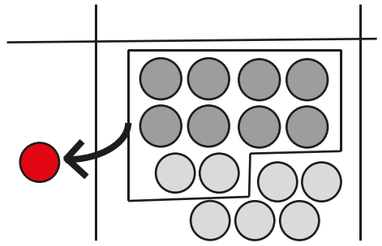

0.9 + 0.9, 74 + 26
Number facts
Single digit decimals
Doubles
Bonds of 100

I just knew it!

7 + 8
Use known facts

If I know 7 + 8 = 15
then I know
0.7 + 0.8 = 1.5

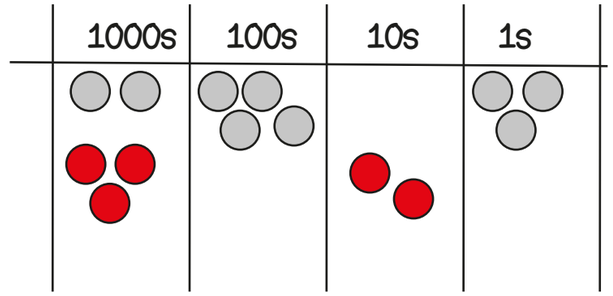

70 + 80 = 150
700 + 800 = 1,500

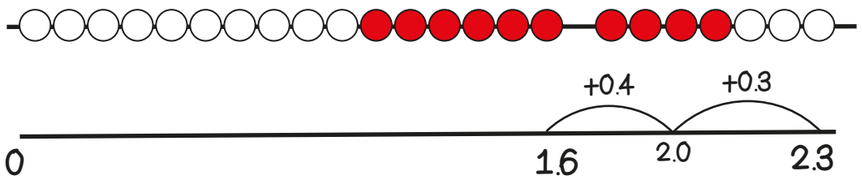

2,403 + 3,020
Use place value to add

If I know 2 + 3 = 5
then I know
2000 + 3000 = 5 000

I have noticed, one number has no hundreds or ones, the other has no tens.

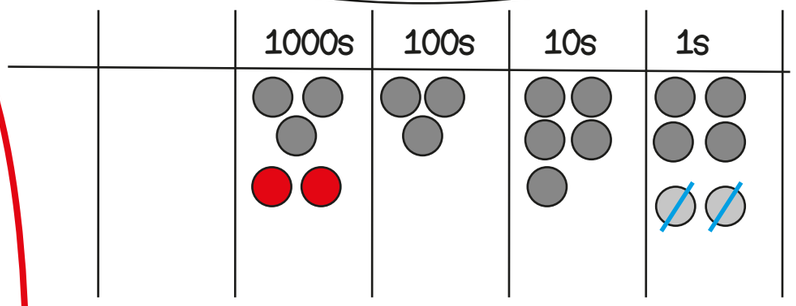

1.6 + 0.7
Bridge through boundaries
by counting in efficient steps

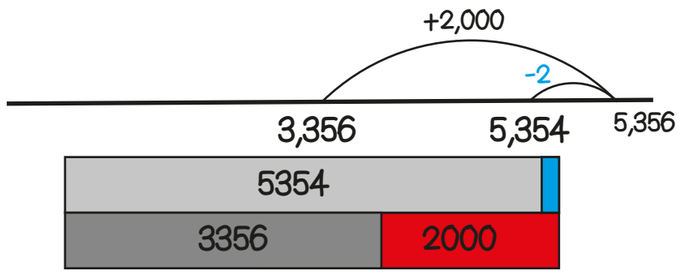

3,356 + 1,998
Round then adjust

Add 2,000 then take away 2

5,748 + 3,374
Formal written method

Exchange ten of these for one of those!

Regroup and rename

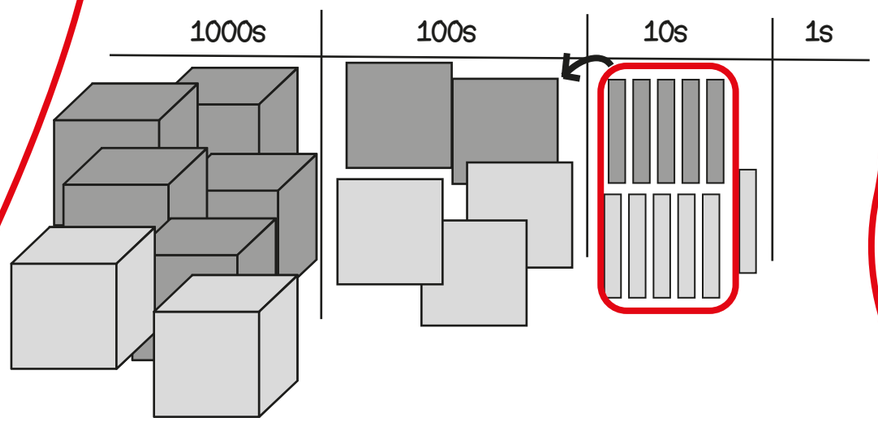

$$\begin{array}{r} 5{,}748 \\ +\ 3{,}374 \\ \hline 9{,}122 \\ \hline 1\ 1\ 1 \end{array}$$

1000s	100s	10s	1s

5,250 + 2,360
Partition and recombine

5000 + 200 + 50 + 2000 + 300 + 60

7000 + 500 + 110 = 7610

How shall I multiply?

Known facts:
Rapid recall of all multiplication tables up to 12 x 12

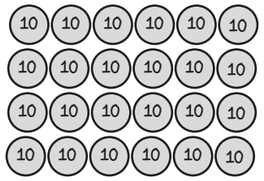

6 x 4
Use known facts and place value

40 is ten times greater than 4

6 x 4 = 24
60 x 4 = 240
60 x 40 = 2400

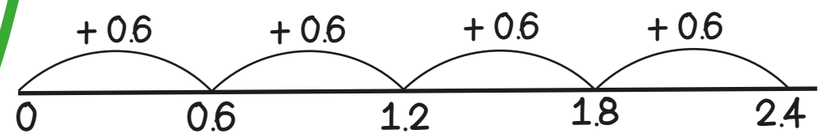

6 x 10 x 4 x 10
= 24 x 100

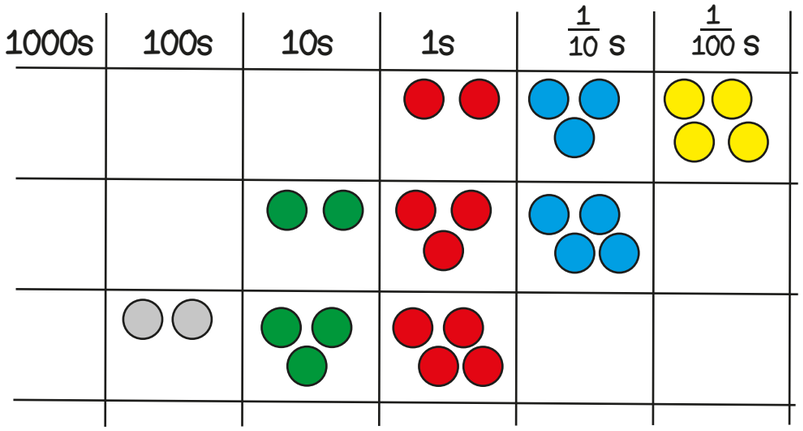

6 x 4
Use known facts and place value

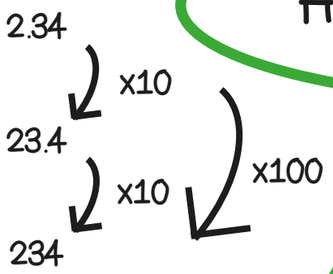

0.6 is ten times smaller than 6

0.6 x 4 = 2.4
4 jumps of 0.6

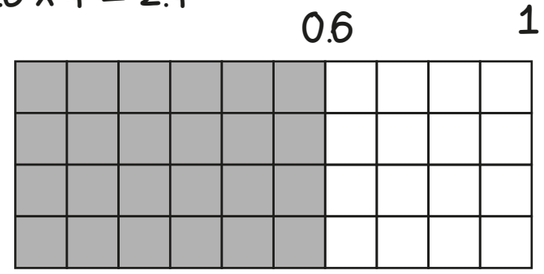

2.34 x 100
Multiply by 10, 100

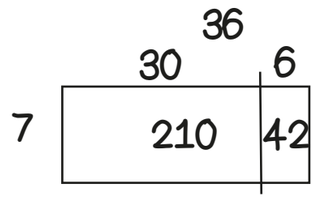

0.6 x 4 = 24 tenths
0.6 x 4 = 2.4

7 x 36
Use the distributive law

7 x 36
= 7 x 30 + 7 x 6
= 210 + 42
= 252

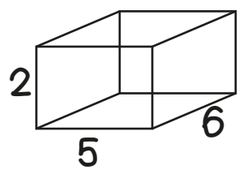

36 x 7
Formal written method

	30	6
7	210	42

36
x 7
252
4

45 x 6
Use factors and commutativity

2 x (5 x 6) = (2 x 5) x 6
2 x 30 = 10 x 6

Write as factors then re-order

45 x 6
= 5 x 9 x 6
= 5 x 6 x 9
= 30 x 9
= 270

236 x 7

200	30	6
x7	x7	x7

1400 + 210 + 42 = 1652

5

How shall I add?

0.8 + 0.7, 45 + 45
Number facts
Single digit decimals
Doubles
Bonds of 1 and 100

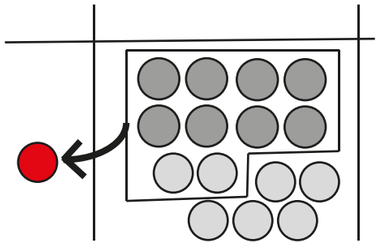

I just knew it!

Rapid fluency of
2 digit add 2 digit numbers

7 + 8
Use known facts

If I know 7 + 8 = 15
then I know
0.7 + 0.8 = 1.5

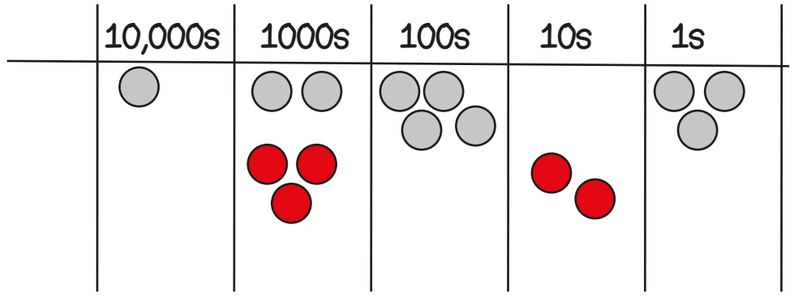

7,000 + 8,000 = 15,000
70,000 + 80,000 = 150,000
700,000 + 800,000 = 1,500,000

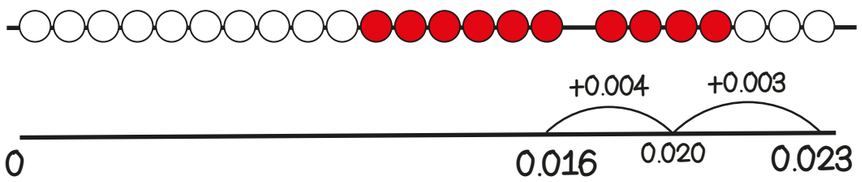

12,403 + 3,020
Use place value to add

If I know 2 + 3 = 5
then I know
2000 + 3000 = 5 000

I have noticed,
one number has no
hundreds or ones, the
other has no tens

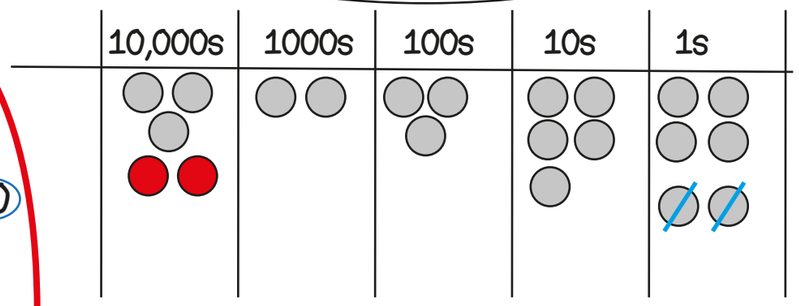

0.016 + 0.007
Bridge through boundaries
by counting in efficient steps

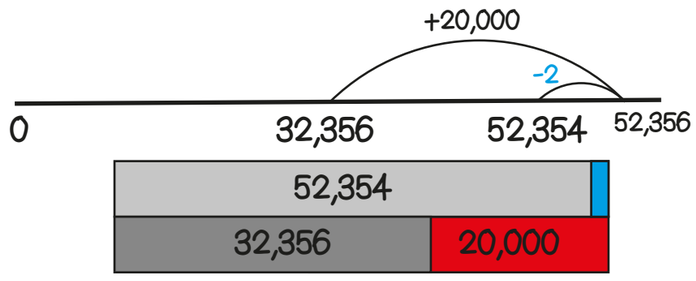

32,356 + 19,998
Round then adjust

Add 20,000 then subtract 2

25,748 + 46,374
Formal written method

Exchange ten of
these for one of
those!

Regroup and rename

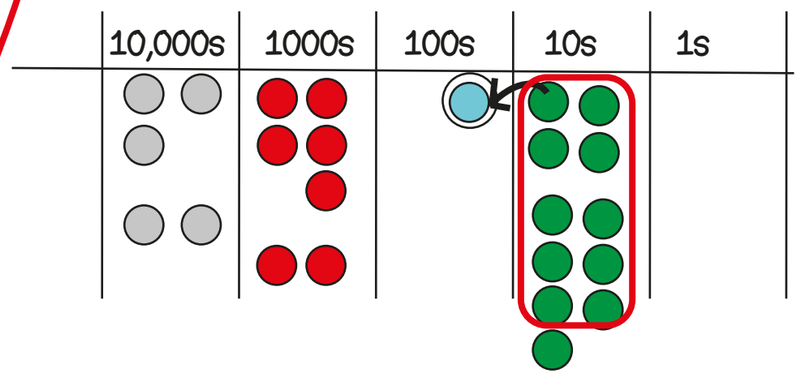

```
  25,748
+ 46,374
  72,122
  1 1 1 1
```

10,000s	1000s	100s	10s	1s

35,040 + 22,070
Partition and recombine

30,000 + 5,000 + 40 + 20,000 + 2,000 + 70

50,000 + 7,000 + 110 = 57,110

For use exclusively in the Purchasing Institution

5

How shall I subtract?

9 - 4, 13 - 5, 18 - 9
Number facts
Single digit decimals
Halves
Subtract from 1 and 100

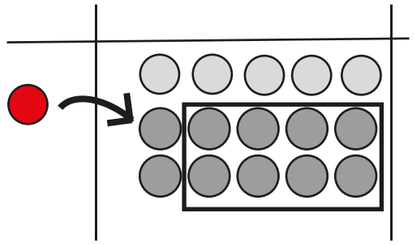

I just knew it!

Rapid fluency of
2 digit subtract
2 digit numbers

15 - 8 = 7
Use known facts

If I know 15 - 8 = 7
then I know
1.5 - 0.8 = 0.7

15,000 - 8,000 = 7,000
150,000 - 80,000 = 70,000
1,500,000 - 800,000 = 700,000

40,012 - 3,005
Use place value to subtract

5 less than 12 is 7
Now it is easy to
take away 3000

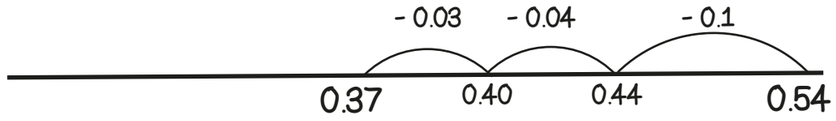

If I know 40 - 3 = 37
then I know that
40 thousand take away
3 thousand is 37 thousand

40,000 = 4 tens of thousands or 40 thousands
12 = 1 ten and 2 ones or 12 ones

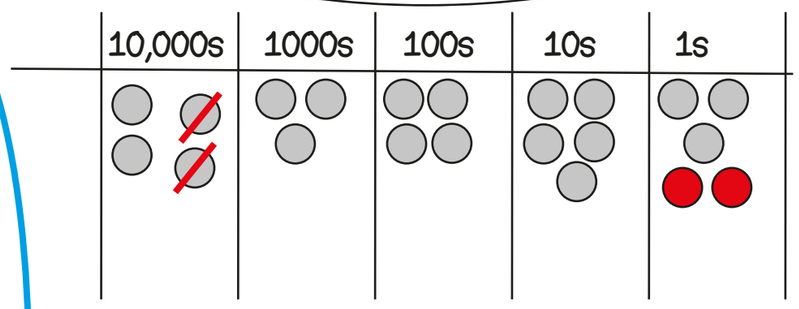

40,012 = 40 thousands and 12 ones
take away 3 thousands and 5 ones
equals 37 thousands and 7 ones.

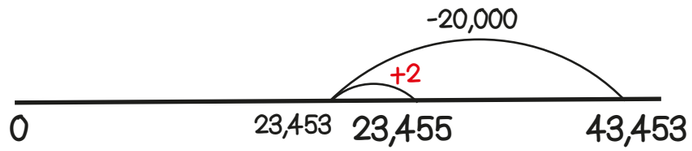

0.54 - 0.17
Bridge through boundaries
by counting in efficient steps

43,453 - 19,998
Round then adjust

Take away 20,000 then add 2

45,748 - 26,374
Formal written method

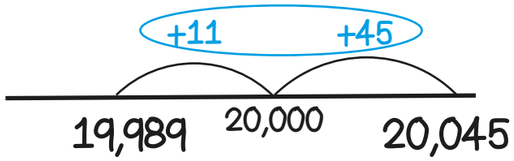

Exchange ten of these for one of those!

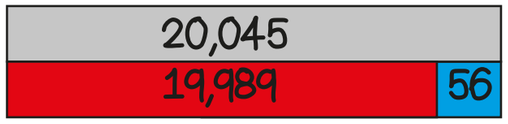

Regroup and rename

$$\begin{array}{r} {}^{3}\cancel{4}\,{}^{1}5,{}^{1}\cancel{7}48 \\ -\ 26,374 \\ \hline 19,374 \end{array}$$

+ 246,374
  572,122
    1 1 1 1
```

100,000s	10,000s	1000s	100s	10s	1s

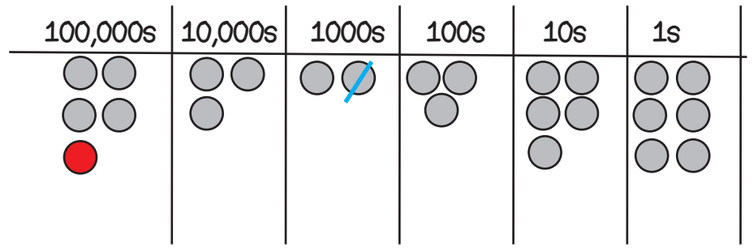

307,040 + 206,070
Partition and recombine

300,000 + 7,000 + 40 + 200,000 + 6,000 + 70

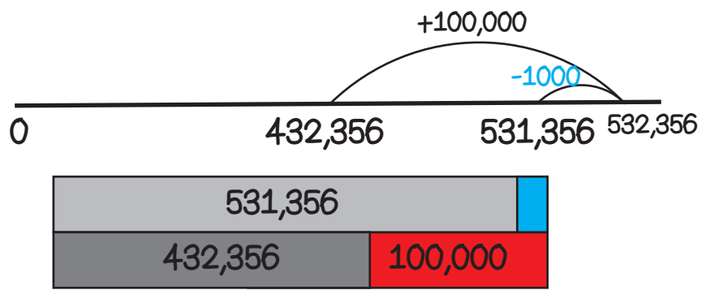

500,000 + 13,000 + 110 = 513,110

432,356 + 99,000
Round then adjust

Add 100,000 then take away 1,000

How shall I subtract?

0.9 - 0.4, 100 - 65
Number facts
Single digit decimals
Halves
Bonds of 1 and 100

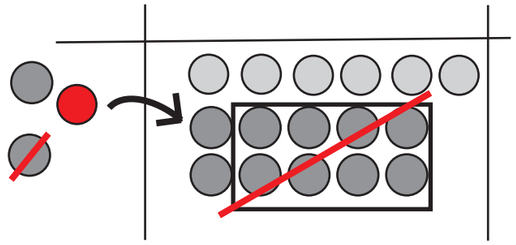

I just knew it!

Rapid fluency of
2 digit subtract
2 digit numbers

36 - 18 = 18
Use known facts

If I know 36 - 18 = 18
then I know
3.6 - 1.8 = 1.8

36,000 - 18,000 = 18,000
360,000 - 180,000 = 180,000
3,600,000 - 1,800,000 = 1,800,000

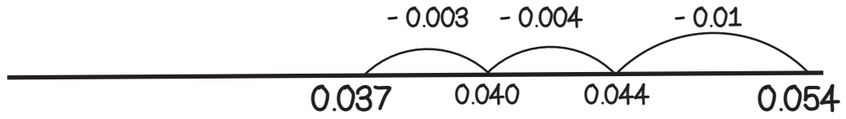

400,032 - 30,005
Use place value to subtract

5 less than 32 is 27

400,000 = 4 hundreds of thousands
or 400 thousands
400 - 30 = 370 so 400,000 - 30,000 = 370,000

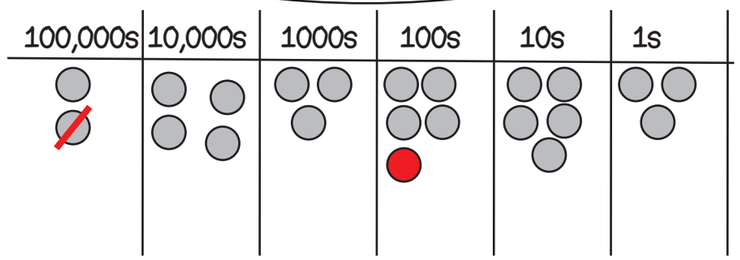

400,032 = 400 thousands and 32 ones
take away 30 thousands and 5 ones
= 370,027

0.054 - 0.017
Bridge through boundaries
by counting in efficient steps

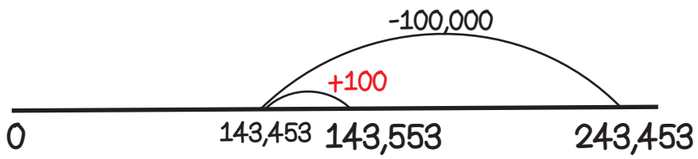

243,453 - 99,900
Round then adjust

Take away 100,000 then add 100

445,748 - 126,374
Formal written method

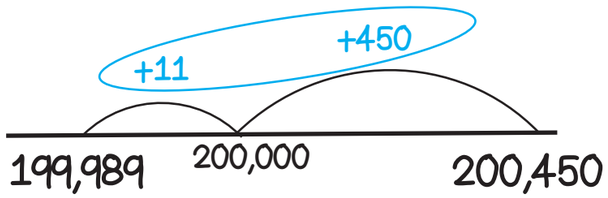

Exchange ten of these for one of those!

Regroup and rename

$$\begin{array}{r} {}^{3}\cancel{4}\,{}^{1}5\,{}^{6}\cancel{7}\,{}^{1}4\,8 \\ -\ 1\,2\,6\,3\,7\,4 \\ \hline 3\,1\,9\,3\,7\,4 \end{array}$$

100,000s	10,000s	1000s	100s	10s	1s

200,450 - 199,989
Find the difference between two numbers

How shall I multiply?

Known facts:
Rapid recall of all multiplication tables up to 12 x 12

6 x 4
Use known facts and place value

40 is ten times greater than 4

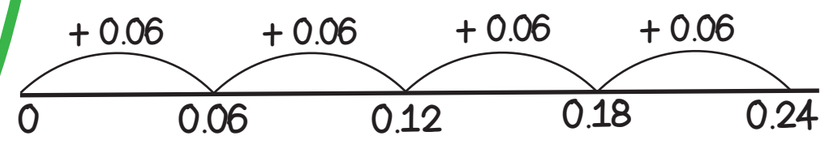

60 x 40 = 2400
600 x 400 = 240,000
6000 x 4000 = 24,000,000

6 x 10 x 4 x 10
= 24 x 100

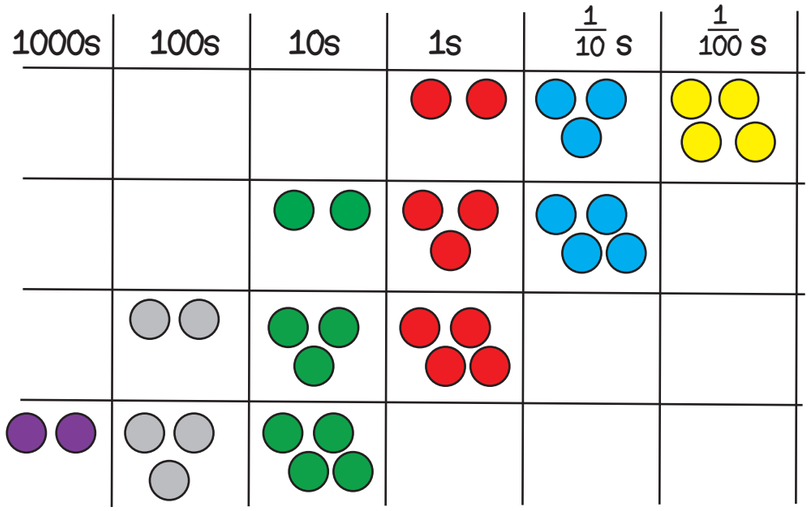

6 x 4
Use known facts and place value

0.6 is ten times smaller than 6

0.06 x 4 = 0.24
4 jumps of 0.06

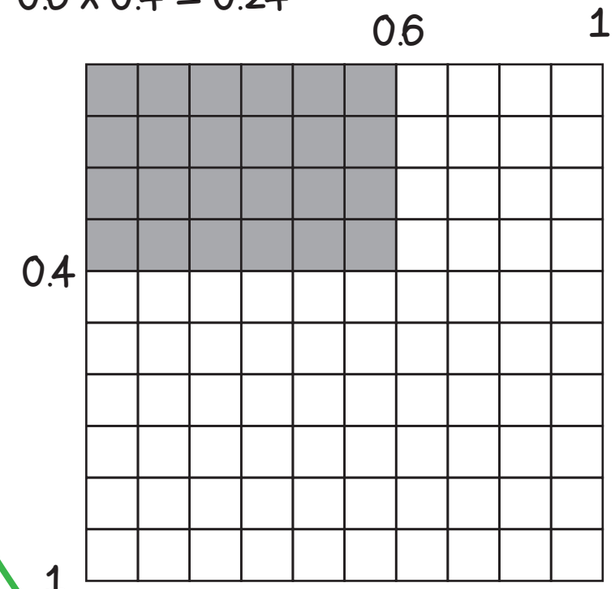

2.34 x 1000
Multiply by 10, 100, 1000

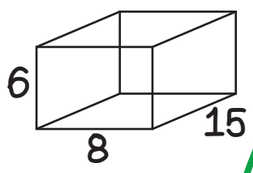

2.34
x10
23.4
x10
234
x10
2340
x100

0.6 x 0.4 = 24 hundredths
0.6 x 0.4 = 0.24

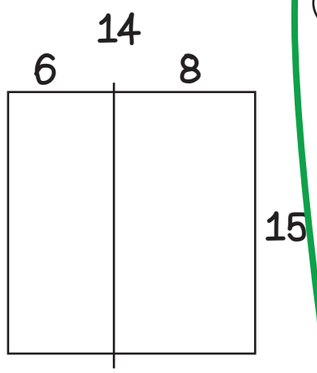

15 x 42
Using factors and distributive law

15 x 48
Factor pair
= 15 x 6 x 8
= 90 x 8
= 720

15 x 14
= 15 x 6 + 15 x 8
= 90 + 120
= 210

4203 x 4
Partition and recombine

4203 x 4
4000 x4 = 16,000
200 x4 = 800
3 x4 = 12
16,000 + 800 + 12 = 16,812

2427 x 38
Formal written method

2427
x 38
19416
72810
92226

How shall I divide?

Known facts:
Use recall of all multiplication tables up to 12 x 12 to derive division facts

Include calcuations where remainders occur

24 ÷ 4
Use known facts and place value

240 is ten times greater than 24

240 ÷ 40 = 6
2400 ÷ 400 = 6
24,000 ÷ 4000 = 6
240,000 ÷ 40,000 = 6
2,400,000 ÷ 400,000 = 6

24 biscuits shared between 4 people means they will get 6 biscuits each.
If there are 10 times as many people and 10 times as many biscuits, how many biscuits each now?

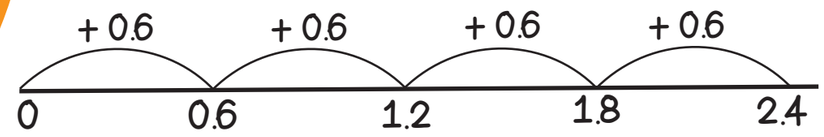

$$240{,}000 \div 400 = \frac{24 \times 10{,}000}{4 \times 100}$$

$$\frac{2400}{4} = 600$$

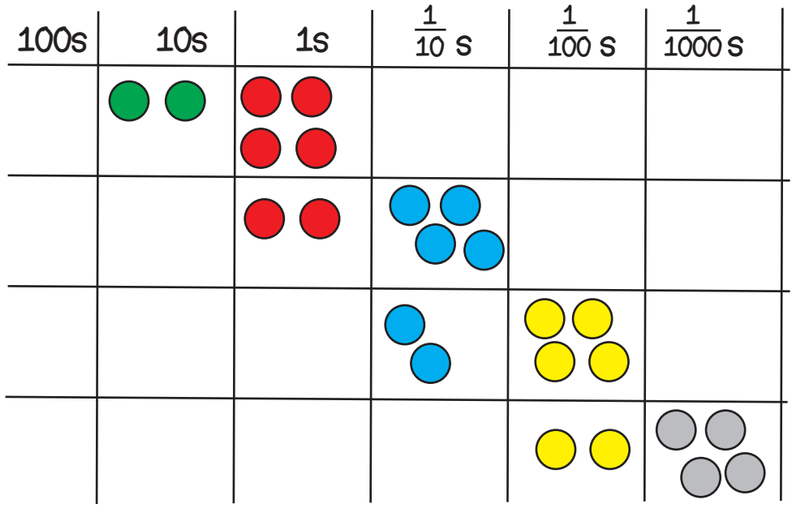

2.4 ÷ 0.6
Use known facts and place value

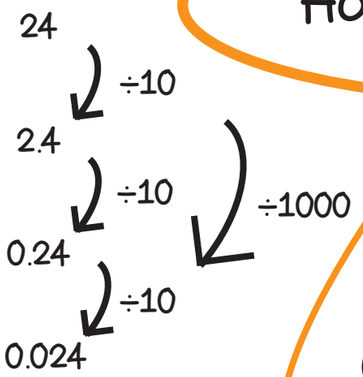

0.6 is ten times smaller than 6

2.4 ÷ 0.6 = 4
How many steps of 0.6 make 2.4?

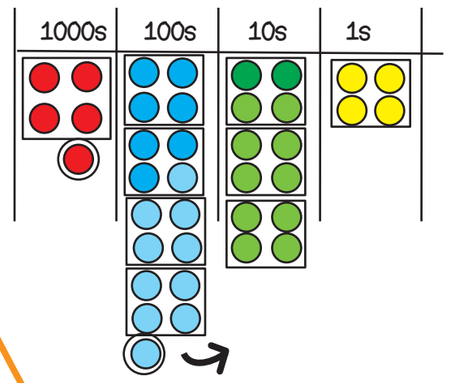

24 ÷ 1000
Divide by 10, 100, 1000

7182 ÷ 21
Formal written method

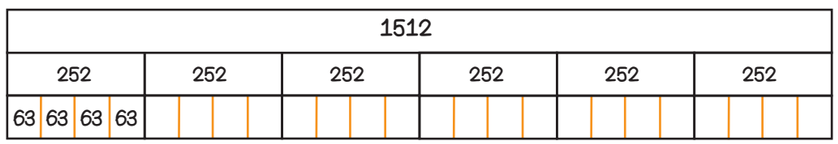

$$\begin{array}{r} 342 \\ 21\overline{)7182} \\ 63 \\ \hline 88 \\ 84 \\ \hline 42 \\ 42 \\ \hline 0 \end{array}$$

$$\begin{array}{r} 1431 \\ 4\overline{)5^{1}7^{1}24} \end{array}$$

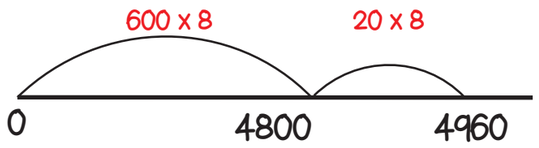

1512 ÷ 24
Using factors

1512 ÷ 6 ÷ 4

4960 ÷ 8
Partition and recombine

4960 ÷ 8
4800 160
÷ 8 ÷ 8
600 + 20 = 620
