

FCAT

Coronavirus (COVID-19) Implementing protective measures within FCAT

COVID-19 Risk Assessment

Academy	GARSTANG COMMUNITY ACADEMY
Activity / Procedure	Full opening of schools - managing the risk and rate of transmission of coronavirus (COVID-19)
Assessment date	17 th November 2020
Review date	To be reviewed and updated frequently in light of any updates to existing government guidance or any new guidance.

Identified groups at risk	
Employees	YES
Children	YES
Visitors	YES
Contractors	YES

This risk assessment does not supersede any legal obligations relating to health and safety, employment or equalities.

This risk assessment is completed based on the guidance and information available on the 05th November 2020 and the 13th November 2020 and will be updated to reflect any changes in published guidance.

[Guidance for full opening: schools - GOV.UK](#) (Updated 05th November 2020)

<https://www.gov.uk/guidance/education-and-childcare-settings-new-national-restrictions-from-5-november-2020#schools> (Updated 5th November 2020)

[Safe working in education, childcare and children's social care](#) (updated 13th November 2020)

FCAT

System of controls

This is the set of actions schools must take. They are grouped into 'prevention' and 'response to any infection' and are outlined in more detail within the guidance: [Guidance for full opening: schools - GOV.UK](#)

Prevention

- 1) Minimise contact with individuals who are unwell by ensuring that those who have coronavirus (COVID-19) symptoms, or who have someone in their household who does, do not attend school.
- 2) Where recommended, the use of face coverings in schools.
- 3) Clean hands thoroughly more often than usual.
- 4) Ensure good respiratory hygiene by promoting the 'catch it, bin it, kill it' approach.
- 5) Introduce enhanced cleaning, including cleaning frequently touched surfaces often, using standard products such as detergents.
- 6) Minimise contact between individuals and maintain social distancing wherever possible.
- 7) Where necessary, wear appropriate personal protective equipment (PPE).
- 8) Always keeping occupied spaces well ventilated.

Numbers 1 to 5, and number 8, must be in place in all schools, all the time.

Number 6 must be properly considered and schools must put in place measures that suit their particular circumstances.

Number 7 applies in specific circumstances.

Response to any infection

- 9) Engage with the NHS Test and Trace process.
- 10) Manage confirmed cases of coronavirus (COVID-19) amongst the school community.
- 11) Contain any outbreak by following local health protection team advice.

Numbers 9 to 11 must be followed in every case where they are relevant.

FCAT

PROTECTIVE MEASURES AND CONTROLS

This outlines the key protective measures the academy will take to deliver the essential controls identified 22nd October 2020

Further controls are set out in this risk assessment.

No.	Control	Actions
1	Minimise contact with individuals who are unwell by ensuring that those who have coronavirus (COVID-19) symptoms, or who have someone in their household who does, do not attend academy.	<ul style="list-style-type: none">• Ensuring that pupils, staff and other adults do not come into the school if they have coronavirus (COVID-19) symptoms or have tested positive in at least the last 10 days and ensuring anyone developing those symptoms during the school day is sent home, are essential actions to reduce the risk in schools and further drive down transmission of coronavirus (COVID-19).• All schools must follow this process and ensure all staff are aware of it.• If anyone in the school becomes unwell with a new and persistent cough or a high temperature, or has a loss of or change in, their normal sense of taste or smell (anosmia), they must be sent home and advised to follow guidance for households with possible or confirmed coronavirus (COVID-19) infection, which sets out that they should self-isolate for at least 10 days and should arrange to have a test to see if they have coronavirus (COVID-19).• Other members of their household (including any siblings) should self-isolate for 14 days from when the symptomatic person first had symptoms.• If a child is awaiting collection, they should be moved, if possible, to a room where they can be isolated behind a closed door, depending on the age and needs of the child, with appropriate adult supervision if required. Ideally, a window should be opened for ventilation. If it is not possible to isolate them, move them to an area which is at least 2 metres away from other people.• If they need to go to the bathroom while waiting to be collected, they should use a separate bathroom if possible. The bathroom must be cleaned and disinfected using standard cleaning products before being used by anyone else.• PPE must be worn by staff caring for the child while they await collection if a distance of 2 metres cannot be maintained (such as for a very young child or a child with complex needs). More information on PPE use can be found in the safe working in education, childcare and

FCAT

		<p>children's social care settings, including the use of personal protective equipment (PPE) guidance.</p> <ul style="list-style-type: none"> • As is usual practice, in an emergency, call 999 if someone is seriously ill or injured or their life is at risk. Anyone with coronavirus (COVID-19) symptoms should not otherwise visit the GP, pharmacy, urgent care centre or a hospital. • Any member of staff who has provided close contact care to someone with symptoms, even while wearing PPE, and all other members of staff or pupils who have been in close contact with that person with symptoms, even if wearing a face covering, do not need to go home to self-isolate unless: <ul style="list-style-type: none"> ○ the symptomatic person subsequently tests positive ○ they develop symptoms themselves (in which case, they should arrange to have a test) ○ the symptomatic person subsequently tests positive ○ they are requested to do so by NHS Test and Trace or the PHE advice service (or PHE local health protection team if escalated) • Everyone must wash their hands thoroughly for 20 seconds with soap and running water or use hand sanitiser after any contact with someone who is unwell. The area around the person with symptoms must be cleaned after they have left to reduce the risk of passing the infection on to other people. See the COVID-19: cleaning of non-healthcare settings guidance. • Public Health England has good evidence that routinely taking the temperature of pupils is not recommended as this is an unreliable method for identifying coronavirus (COVID-19).
2	<p>Where recommended, use of face coverings in schools</p>	<ul style="list-style-type: none"> • The government is not recommending universal use of face coverings in all schools. Schools that teach children in years 7 and above and which are not under specific local restriction measures will have the discretion to require face coverings for pupils, staff and visitors in indoor areas outside the classroom where social distancing cannot easily be maintained, such as corridors and communal areas and it has been deemed appropriate in those circumstances. Primary school children will not need to wear a face covering. • In particular, schools that teach years 7 and above may decide to recommend the wearing of face coverings for pupils, staff or visitors in communal areas outside the classroom where the layout of the schools makes it difficult to maintain social distancing when staff and pupils are moving around the premises, for example, corridors. • In primary schools where social distancing is not possible in indoor areas outside of classrooms between members of staff or visitors, for example in staff rooms, headteachers will have the discretion to decide whether to ask staff or visitors to wear, or agree to them wearing face coverings in these circumstances. • Based on current evidence and the measures that schools are already putting in place, such as the system of controls and consistent bubbles, face coverings will not be necessary in the classroom even where social distancing is not possible. Face coverings could have a negative impact on teaching and their use in the classroom should be avoided.

FCAT

		<p>Where local restrictions apply</p> <ul style="list-style-type: none"> When an area moves to Local COVID Alert Level: high or very high, in settings where pupils in year 7 and above are educated, face coverings should be worn by adults and pupils when moving around the premises, outside of classrooms, such as in corridors and communal areas where social distancing cannot easily be maintained. This does not apply to younger children in primary schools and in early years settings. In the event of new local restrictions being agreed, schools will need to communicate quickly and clearly to staff, parents and pupils that the new arrangements require the use of face coverings in certain circumstances. <p>Exemptions Some individuals are exempt from wearing face coverings. This applies to those who:</p> <p>cannot put on, wear or remove a face covering because of a physical or mental illness or impairment or disability speak to or provide assistance to someone who relies on lip reading, clear sound or facial expression to communicate. The same exemptions will apply in education settings, and we would expect teachers and other staff to be sensitive to those needs</p>
3	<p>Clean hands thoroughly more often than usual.</p>	<ul style="list-style-type: none"> All students and staff will sanitise hands on entering and leaving the academy and before and after each lesson. Sanitiser dispensers will be located at the entrance of the academy and of each classroom. All students and staff will be reminded to wash hands before and after visiting the toilet, coughing/sneezing and having a meal. All students will receive regular reminders on effective hand washing routines. The Estates Team will schedule checks during each day on stocks of hand sanitiser, soap and paper towels to check there is adequate supply. (Cleaning schedules and rotas).
4	<p>Ensure good respiratory hygiene by promoting the ‘catch it, bin it, kill it’ approach.</p>	<ul style="list-style-type: none"> The academy will deploy posters that remind pupils and staff about the importance of catching a cough or sneeze in tissue, disposing of the tissue and washing hands and by washbasins/toilets and at entry/exit points. All classrooms, social spaces and corridors will have adequate bins. There will be an enhanced schedule for bins to be emptied and disinfected.
5	<p>Introduce enhanced cleaning, including cleaning frequently touched surfaces often, using standard products such as disinfectants / detergents</p>	<ul style="list-style-type: none"> All classrooms will be provided with disinfectant wipes for teachers and staff to use on the keyboard, screen and mouse before and after each lesson. Such wipes will also be provided to each specialist room for use by students to wipe down their chair, workspace and specialist equipment (in addition to the disinfection carried out by cleaners). All specialist rooms will be disinfected by cleaners between lessons (where students from a different bubble are using the room). All clearers will be trained and regularly reminded of the protocols for disinfecting surfaces.

FCAT

		<ul style="list-style-type: none"> • There will be an enhanced cleaning schedule throughout the day. • (Cleaning Schedules , Rotas and Cleaning Risk Assessment).
6	<p>Minimise contact between individuals and maintain social distancing wherever possible.</p>	<ul style="list-style-type: none"> • All staff to socially distance 2m. • Each bubble will have a designated set of classrooms (i.e. homebase) for all of their lessons, in which no other year group students are permitted. This will minimise movement around the academy and mitigate crowding on corridors and contact with students of other year groups. Staff will move between bubbles and will be required to socially distance from students at all times. • Each bubble will have a designated venue for break time, lunchtime, assembly and when needing the toilet. These venues will be disinfected before and after another bubble is able to make use of them. • Each bubble will have a designated time for arrival, break, lunch and finish. These staggered times will ensure there is minimal contact between students of different bubbles. • When using specialist rooms: - Disinfect teacher and student workspaces before and after lesson. - Students sanitise before and after the lesson. - The class waits in their bubble and their movement to and from their specialist venue is managed by their teacher and school staff to avoid crowding on corridors. • Students and staff will be prohibited from sharing any belongings, including stationery. There will be a stock of new stationery available for students who forget. • Staff will not touch any student belongings. • When giving out resources in lessons (e.g. textbooks, exam papers, table tennis bat), these may be shared within the bubble (ideally, within the class itself). However, such resources may not be shared with students in other year groups until and unless they are disinfected or they are left for a period of 48 hours (72 hours for plastic). • Latest Government guidance will be followed 21st October 2020 https://www.gov.uk/government/publications/actions-for-schools-during-the-coronavirus-outbreak/guidance-for-full-opening-sc
7	<p>Where necessary, wear appropriate personal protective equipment (PPE)</p>	<ul style="list-style-type: none"> • The academy will maintain stocks of PPE and deploy them around the academy. • See FCAT Face coverings policy (Appendix 1) Safe working in education, childcare and children's social care

FCAT

8	<p>Keeping occupied spaces well ventilated</p>	<p>The Academy will ensure it is well ventilated and a comfortable teaching environment is maintained.</p> <p>This will be achieved by a variety of measures including:</p> <p>mechanical ventilation systems – these should be adjusted to increase the ventilation rate wherever possible, and checked to confirm that normal operation meets current guidance (if possible, systems should be adjusted to full fresh air or, if not, then systems should be operated as normal as long as they are within a single room and supplemented by an outdoor air supply)</p> <p>natural ventilation – opening windows (in cooler weather windows should be opened just enough to provide constant background ventilation, and opened more fully during breaks to purge the air in the space). Opening internal doors can also assist with creating a throughput of air</p> <p>natural ventilation – if necessary external opening doors may also be used (as long as they are not fire doors and where safe to do so)</p> <p>Further advice on this can be found in Health and Safety Executive guidance on air conditioning and ventilation during the coronavirus outbreak and CIBSE coronavirus (COVID-19) advice.</p> <p>To balance the need for increased ventilation while maintaining a comfortable temperature, the following measures should also be used as appropriate:</p> <p>opening high level windows in preference to low level to reduce draughts</p> <p>increasing the ventilation while spaces are unoccupied (e.g. between classes, during break and lunch, when a room is unused)</p> <p>providing flexibility to allow additional, suitable indoor clothing. For more information see School uniform</p> <p>rearranging furniture where possible to avoid direct drafts</p> <p>Heating should be used as necessary to ensure comfort levels are maintained particularly in occupied spaces.</p>
9	<p>Engage with the NHS Test and Trace process</p>	<p>Schools must ensure they understand the NHS Test and Trace process. Schools must ensure that staff members and parents/carers understand that they will need to be ready and willing to:</p> <p>book a test if they or their child are displaying symptoms. The main symptoms are a high temperature, a new continuous cough and/or a loss or change to your sense of smell or taste. Staff and pupils must not come into the school if they have symptoms and must be sent home to self-isolate if they develop them in school. All children can be tested if they have symptoms, including children under 5, but children aged 11 and under will need to be helped by their parents or carers if using a home testing kit</p> <p>provide details of anyone they or their child have been in close contact with if they were to test positive for coronavirus (COVID-19) or if asked by NHS Test and Trace</p> <p>self-isolate if they have been in close contact with someone who tests positive for coronavirus (COVID-19), or if anyone in their household develops symptoms of coronavirus (COVID-19)</p> <p>Anyone who displays symptoms of coronavirus (COVID-19) can and should get a test. Tests can be booked online through the NHS testing and tracing for coronavirus website, or ordered by telephone via NHS</p>

FCAT

119 for those without access to the internet. Essential workers, which includes anyone involved in education or childcare, have priority access to testing.

The government will ensure that it is as easy as possible to get a test through a wide range of routes that are locally accessible, fast and convenient. We will release more details on new testing avenues as and when they become available and will work with schools so they understand the quickest and easiest way to get a test.

All schools have been sent an initial supply of 10 home test kits and information about how to replenish this supply when they are running out. Schools should call the Test and Trace helpdesk on 119 if these have not arrived.

Having a test at a testing site will deliver the fastest results. The test kits sent to schools are provided to be used in the exceptional circumstance that an individual becomes symptomatic and schools believe they may have barriers to accessing testing elsewhere. It is for schools to determine how to prioritise the distribution of their test kits in order to minimise the impact of the virus on the education of their pupils.

These kits can be given directly to staff or parents and carers collecting a child who has developed symptoms at school. In particular, these tests kits will also help ensure that symptomatic staff can also get a test and if they test negative, can return to work as soon as they no longer have symptoms of coronavirus (COVID-19). Further information is provided in our guidance Coronavirus (COVID-19): test kits for schools and FE providers.

Schools should ask parents and staff to inform them immediately of the results of a test and follow this guidance.

If someone with symptoms tests negative for coronavirus (COVID-19), then they should stay at home until they are recovered as usual from their illness but can safely return thereafter. The only exception to return following a negative test result is where an individual is separately identified as a close contact of a confirmed case, when they will need to self-isolate for 14 days from the date of that contact.

If someone with symptoms tests positive, they should follow the guidance for households with possible or confirmed coronavirus (COVID-19) infection and must continue to self-isolate for at least 10 days from the onset of their symptoms and then return to school only if they do not have symptoms other than cough or loss of sense of smell/taste. This is because a cough or anosmia can last for several weeks once the infection has gone. The 10-day period starts from the day when they first became ill. If they still have a high temperature, they should continue to self-isolate until their temperature returns to normal. Other members of their household should all self-isolate for the full 14 days.

NHS COVID-19 app

The app is available to anyone aged 16 or over to download if they choose. For some young people, particularly some with special educational needs and disabilities (SEND), parents will need to decide whether or not their use of the app is appropriate.

FCAT

		<p>This will mean that some students in year 11, and the majority of students in years 12 and above will be eligible to use the app and benefit from its features. Staff members will also be able to use the app. The guidance for schools and further education colleges in England is intended to provide information to senior leaders in education settings about the app and how it works, and to set out guidance for its use within schools in England.</p>
<p>10</p>	<p>Manage confirmed cases of coronavirus (COVID-19) amongst the school community</p>	<p>Schools must take swift action when they become aware that someone who has attended has tested positive for coronavirus (COVID-19). Schools can contact the dedicated advice service introduced by Public Health England (PHE) and delivered by the NHS Business Services Authority. This can be reached by calling the DfE Helpline on 0800 046 8687 and selecting option 1 for advice on the action to take in response to a positive case. Schools will be put through to a team of advisers who will inform them of what action is needed based on the latest public health advice.</p> <p>The advice service will carry out a rapid risk assessment to confirm who has been in close contact with the person during the period that they were infectious, and ensure they are asked to self-isolate. If, following triage, further expert advice is required the adviser will escalate the school's call to the PHE local health protection team.</p> <p>The advice service (or PHE local health protection team if escalated) will work with schools to guide them through the actions they need to take. Based on their advice, schools must send home those people who have been in close contact with the person who has tested positive, advising them to self-isolate for 14 days since they were last in close contact with that person when they were infectious. Close contact means:</p> <p>direct close contacts - face to face contact with an infected individual for any length of time, within 1 metre, including being coughed on, a face to face conversation, or unprotected physical contact (skin-to-skin) proximity contacts - extended close contact (within 1 to 2 metres for more than 15 minutes) with an infected individual travelling in a small vehicle, like a car, with an infected person</p> <p>The advice service (or PHE local health protection team if escalated) will provide definitive advice on who must be sent home. To support them in doing so, we recommend schools keep a record of pupils and staff in each group, and any close contact that takes places between children and staff in different groups (see section 6 of the system of control for more on grouping pupils). This should be a proportionate recording process. Schools do not need to ask pupils to record everyone they have spent time with each day or ask staff to keep definitive records in a way that is overly burdensome.</p> <p>A template letter will be provided to schools, on the advice of the health protection team, to send to parents and staff if needed. Schools must not share the names or details of people with coronavirus (COVID-19) unless essential to protect others.</p> <p>Household members of those contacts who are sent home do not need to self-isolate themselves unless the child, young person or staff member who is self-isolating subsequently develops symptoms. If someone in a class or group that has been asked to self-isolate develops symptoms themselves within their 14-day isolation period they should follow guidance for households with possible or confirmed</p>

FCAT

		<p>coronavirus (COVID-19) infection. They should get a test, and:</p> <p>if someone who is self-isolating because they have been in close contact with someone who has tested positive for coronavirus (COVID-19) starts to feel unwell and gets a test for coronavirus themselves, and the test delivers a negative result, they must remain in isolation for the remainder of the 14-day isolation period. This is because they could still develop coronavirus (COVID-19) within the remaining days.</p> <p>if the test result is positive, they should inform their setting immediately, and should isolate for at least 10 days from the onset of their symptoms (which could mean the self-isolation ends before or after the original 14-day isolation period). Their household should self-isolate for at least 14 days from when the symptomatic person first had symptoms, following guidance for households with possible or confirmed coronavirus (COVID-19) infection</p> <p>Schools should not request evidence of negative test results or other medical evidence before admitting children or welcoming them back after a period of self-isolation.</p> <p>In the majority of cases, schools and parents will be in agreement that a child with symptoms should not attend school, given the potential risk to others. In the event that a parent or guardian insists on a child attending school, schools can take the decision to refuse the child if in their reasonable judgement it is necessary to protect their pupils and staff from possible infection with coronavirus (COVID-19). Any such decision would need to be carefully considered in light of all the circumstances and the current public health advice.</p> <p>The PHE local health protection team will also contact schools directly if they become aware that someone who has tested positive for coronavirus (COVID-19) attended the school - as identified by NHS Test and Trace.</p> <p>Further guidance is available on testing and tracing for coronavirus (COVID-19).</p>
11	<p>Contain any outbreak by following local health protection team advice</p>	<p>If schools have two or more confirmed cases within 14 days, or an overall rise in sickness absence where coronavirus (COVID-19) is suspected, they may have an outbreak and must continue to work with their local health protection team who will be able to advise if additional action is required.</p> <p>In some cases, health protection teams may recommend that a larger number of other pupils self-isolate at home as a precautionary measure – perhaps the whole site or year group. If schools are implementing controls from this list, addressing the risks they have identified and therefore reducing transmission risks, whole school closure based on cases within the school will not generally be necessary, and should not be considered except on the advice of health protection teams.</p> <p>In consultation with the local Director of Public Health, where an outbreak in a school is confirmed, a mobile testing unit may be dispatched to test others who may have been in contact with the person who has tested positive. Testing will first focus on the person's class, followed by their year group, then the whole school if necessary, in line with routine public health outbreak control practice.</p>

FCAT

Issue that could cause harm:	Lack of Social Distancing in the learning environment (classroom/ workshop/ hall/ outdoors) which could increase the risk and rate of transmission of coronavirus (COVID-19)		
Existing level of risk:			
HIGH	MEDIUM	LOW	NEGLIGIBLE
How to manage it (control measures)	List your control measures required to reduce risk – add appropriate detail about the type and location of controls		
<ol style="list-style-type: none"> 1. Year group bubbles to be utilised which will use the same rooms throughout the day with their own toilet(s) and own identified open air space. 2. Staff to maintain 2 metre social distancing between adults and between children wherever possible and to ensure the time spent near pupils is minimised if this is not possible or has a specific RA if 1:1 support is required. 3. Any rooms that are shared (e.g. Dining rooms) to be cleaned between bubble changes. 4. Any specialist rooms used by a bubble would be used for a week before being changed to a different bubble and cleaned in-between. 5. Maximise the usage of the same staff within the same bubble to reduce cross contamination between bubbles as far as possible, recognising for secondary settings there will be some subject specialist rotation of staff. GCA are aiming for a majority of staff to only be in a maximum of 2 bubbles and for no staff to be in more than 3 bubbles. 6. Changing the assignment of staff to each group of children/young people should be a last resort but may be necessary for example due to staff absence. 7. Maximise the number of learning environments used including outdoor space as much as possible to more easily allow for distance between children and staff. GCA intending to use six rooms in each bubble, with specific allocated toilets, outdoor spaces and access, as well as the bookable specialist facilities. 8. GCA has identified specific access routes for the start of the day, and throughout the day. 9. Ensure that wherever possible children use the same classroom or area of a setting throughout the day to minimise movement around school. 10. When movement around school is required, this should in all cases, other than emergencies, be during lesson time so that corridors and outside spaces are clear. 11. Remove excess furniture to increase space if able to do so. 12. Personal property of children should be kept to a minimum e.g. bags, coats, lunchboxes. If these are brought into school, they should be kept with children and stored under the students' allocated desk when in classrooms. 13. Lockers are not to be used as the locations of the lockers are diverse and requirements reduced. 14. Children should arrive in PE kit when undertaking PE that day to not require the use of shared bubble use of changing rooms 15. Staff members to keep a minimum 2 metre distance from each other and children in the learning environment. Teacher only zones will be clearly marked on the floor. 16. Mark out a 2 metre area e.g. with tape/paint for the member(s) of staff to be able to maintain social distancing from children and other staff in classrooms and outside duties in bubbles. 17. Display signage in the learning environment regarding social distancing, hand washing/sanitising and being symptom free to reinforce, encourage and promote this for staff and children. 			

FCAT

18. If students need to wait outside classrooms, they must queue against a wall and leave a 2m passage for adults. In most cases, students will enter classroom immediately and go straight to desk/work area. Students and staff must remain at 2m social distancing at all times if possible. Students must wait for permission to move from their allocated area when exiting the classroom. Student's may only use the toilet that is allocated to their bubble. Students will only use the toilets at break time and lunch unless a medical note is provided. For children, procedures revisited and managed in line with academy behaviour policy.
19. Any technical support staff required to enter a learning environment due to urgent operational requirements (e.g. IT Technician) will maintain a minimum 2 metre social distance, may wear PPE and the Class Teacher will ensure that children follow social distancing to enable the technical staff to work at a social distance.

Remaining level of risk		Consider the level of risk following use of the above control measures	
HIGH	MEDIUM	LOW	NEGLIGIBLE

Issue that could cause harm:	Lack of Social Distancing when using toilets and poor hygiene which could increase the risk and rate of transmission of coronavirus (COVID-19)		
-------------------------------------	---	--	--

Existing level of risk:			
HIGH	MEDIUM	LOW	NEGLIGIBLE

How to manage it (control measures)	List your control measures required to reduce risk – add appropriate detail about the type and location of controls		
--	---	--	--

1. Specific toilets will be allocated to staff. Only one member of staff to enter toilets at once. Staff to queue outside at 2m interval if necessary.
2. Ensuring that toilets do not become crowded by limiting the number of children who use the toilet facilities at one time. Outside doors to be removed, and regular monitoring and communication of expectations.
3. Specific toilets to be used by students from a specific bubble.
4. Staff and children asked to clean hands before and after using the toilet - wash hands thoroughly for 20 seconds with running water and soap and dry them thoroughly or use alcohol hand rub or sanitiser ensuring that all parts of the hands are covered.
5. Ensure that help is available for children who have trouble cleaning their hands independently.
6. Display signage in the toilets regarding handwashing to reinforce, encourage and promote this for staff and children.
7. Prop doors open, where safe to do so (bearing in mind fire safety and safeguarding), to limit use of door handles and aid ventilation.
8. Full stock of soap and sanitiser to be maintained in the toilets at all times.
9. All toilet will be cleaned at the end of the day and checked by cleaning staff every morning. Toilets will be cleaned by cleaning staff after break and lunch times.

Remaining level of risk		Consider level of risk following use of control measures	
HIGH	MEDIUM	LOW	NEGLIGIBLE

FCAT

Issue that could cause harm:	Lack of social distancing and poor hygiene upon arrival and exit from school which could increase the risk and rate of transmission of coronavirus (COVID-19)		
Existing level of risk:			
HIGH	MEDIUM	LOW	NEGLIGIBLE
How to manage it (control measures)	List your control measures required to reduce risk – add appropriate detail about the type and location of controls		
<ol style="list-style-type: none"> 1. Tell staff, children, young people, parents, carers or any visitors, such as suppliers, not to enter the education or childcare setting if they are displaying any signs or symptoms of coronavirus. 2. Staff will go straight to reception through the main entrance and sign in with fob instead of touching screen. Two-meter intervals will be marked clearly on the floor to ensure social distancing in the event of staff needing to queue to sign in. Hand sanitiser is available at reception for staff to use. Staff proceed to allocated work area or outdoor duty position and not to congregate with other staff. 3. Installation of hand sanitiser stations at staff entrances/exits to building. 4. Staff to sanitise hands on each and every entry and exit from the buildings and classrooms. 5. Pupils to enter site and head straight to their outdoor area. Use of dining area before school to be limited and socially distanced for all. 6. Prop doors open, where safe to do so (bearing in mind fire safety and safeguarding), to limit use of door handles and aid ventilation. 7. Staff occupying Main Reception is kept to a maximum number of three people. Work areas within reception are clearly marked out and allocated to staff. Markings/signage and an acrylic screen at the reception desk to ensure reception staff are able to maintain social distancing from staff, parents, carers, visitors and children. Use of hand sanitiser for all visitors upon entry/exit. Visitors cannot enter the site unless they have a pre-arranged appointment. 8. Make clear to parents and carers that they cannot gather at entrance gates or doors, or enter the site (unless they have a pre-arranged appointment, which should be conducted safely). Communication can be done via email or phone. 9. Advise visitors that they cannot enter the site unless they have a pre-arranged appointment, which should be conducted safely. 10. School start times temporarily altered – no children on site before 8.15 as there will be no supervision before this, and school starts at 8.50 to allow a steady arrival with reduced bulges. 11. Clear signage to encourage parents/carers not to congregate outside the school. 12. No parents allowed on site without a prearranged appointment. 13. All external doors used by students are propped open to limit use of door handles. 14. Use of hand sanitiser upon entering and exiting classrooms. Each classroom in use will have sanitiser near door for use. 15. Implement staggered pick up times for different groups of children. As far as possible within the restrictions of bus transport. Year group bubbles will be released over a 15 minute period to allow a steady departure/bus embarkation. 16. Tell parents that if their child needs to be accompanied to the education or childcare setting, only one parent should attend. 17. Staff supervision throughout drop off/pick up to encourage and insist on social distancing. 18. Display signage outside and inside the building regarding social distancing and good hygiene to reinforce, encourage and promote this for staff, parents, carers and children. 19. Everyone should use a tissue or elbow to cough or sneeze and use bins for tissue waste ('catch it, bin it, kill it'). 			

FCAT

20. Face masks (not scarves, buffs, bandanas etc) must be worn by all pupils and staff in indoor areas where social distancing is more difficult. These include but are not limited to: -
- o Corridors before lessons, at lesson change over and when inside at break/lunchtime.
 - o Canteens (when students/staff are not eating) – including queuing, and if remaining inside after eating.
 - o Staff rooms and kitchens – where social distancing is difficult to achieve.

--	---	--	--

1. Stagger break and lunch times, so that all children are not moving around the school at the same time and that that any corridors or circulation routes used have a limited number of children or young people using them at any time.
2. Each bubble to have their own designated outside space and dining area.
3. Dining areas to be cleaned between each bubble use.
4. Having distinct bubble spaces around the school site reduces the requirement for one way systems.
5. Access rooms directly from outside where possible to reduce mixing of groups.
6. Ensure that children and young people are in the same groups at all times each day, and different bubbles are not mixed during the day, or on subsequent days.
7. Ensure that the same staff are assigned to each bubble of children and, as far as possible, these stay the same during the day and on subsequent days (see above)
8. Children and young people should clean their hands before and after eating and enter in the bubbles they are already in. If such measures are not possible, children should be brought their lunch in their classrooms
9. Prop doors open, where safe to do so (bearing in mind fire safety and safeguarding), to limit use of door handles and aid ventilation.
10. Where possible, all spaces should be well ventilated using natural ventilation (opening windows) or ventilation units.
11. Display signage outside and inside the building regarding social distancing and good hygiene to reinforce, encourage and promote this for staff and children.
12. Use markers e.g. paint/tape outside school and inside school at 2 metre intervals to encourage and maintain social distancing for children and adults.
13. Children and young people should clean their hands after sneezing or coughing, should be encouraged not to touch their mouth, eyes and nose, should use a tissue or elbow to cough or sneeze and use bins for tissue waste ('catch it, bin it, kill it').
14. Ensure that sufficient handwashing facilities are available. Where a sink is not nearby, provide hand sanitiser in play/break time and lunchtime areas
15. Staff supervision throughout break/play and lunchtimes to actively encourage and insist on social distancing.
16. Face masks (not scarves, buffs, bandanas etc) must be worn by all pupils and staff in indoor areas where social distancing is more difficult. These include but are not limited to: -
 - o Corridors before lessons, at lesson change over and when inside at break/lunchtime.

HIGH	MEDIUM	LOW	NEGLIGIBLE

Issue that could cause harm:		Risk of COVID-19 illness to extremely clinically vulnerable and clinically vulnerable children staff and family members.	
Existing level of risk			
HIGH	MEDIUM	LOW	NEGLIGIBLE
How to manage it (control measures)		List your control measures required to reduce risk – add appropriate detail about the type and location of controls	
<p>Where a pupil is unable to attend school because they are complying with clinical and/or public health advice, school will immediately offer them access to remote education. Schools should monitor engagement with this activity.</p> <p>Where children are not able to attend school as parents are following clinical and/or public health advice, absence will not be penalised. All other pupils must attend school</p> <p>Shielding advice for all adults and children will pause on 1 August, subject to a continued decline in the rates of community transmission of coronavirus (COVID-19). This means that even the small number of pupils who will remain on the shielded patient list can also return to school, as can those who have family members who are shielding. If rates of the disease rise children (or family members) may be advised to shield during the period where rates remain high and therefore they may be temporarily absent. In this event remote learning provision will be activated immediately.</p> <p>Parents of pupils and staff with significant risk factors should discuss their concerns with pastoral staff and senior leaders respectively.</p>			

FCAT

It is anticipated that fewer young people will be advised to shield and that the majority of pupils will be able to return to school. Some pupils no longer required to shield but who generally remain under the care of a specialist health professional may need to discuss their care with their health professional before returning to school (usually at their next planned clinical appointment).

Following the reduction in the prevalence of coronavirus (COVID-19) and relaxation of shielding measures from 1 August, we expect that most staff will attend school.

It remains the case that wider government policy advises those who can work from home to do so. We recognise this will not be applicable to most school staff, but where a role may be conducive to home working, for example some administrative roles, school leaders should consider what is feasible and appropriate.

Individuals who were considered to be clinically extremely vulnerable and received a letter advising them to shield are now advised that they can return to work from 1 August as long as they maintain social distancing.

School leaders should be flexible in how those members of staff are deployed to enable them to work remotely where possible or in roles in school where it is possible to maintain social distancing.

People who live with those who are clinically extremely vulnerable or clinically vulnerable can attend the workplace.

Staff who are clinically vulnerable or extremely clinically vulnerable

The measures outlined in the DfE guidance for full opening of schools (page 1 of this risk assessment) will be applied and will mitigate risks significantly for staff, including those who are extremely clinically vulnerable and clinically vulnerable. This will allow most staff to return to the workplace, although we advise those in the most at risk categories to take particular care while community transmission rates continue to fall.

Parents of pupils and staff with significant risk factors should discuss their concerns with pastoral staff and senior leaders.

FCAT still wishes to support staff in continuing to work from home, if able to do so, balancing this with increasing operational requirements.

1. Staff who are extremely clinically vulnerable (those who have received a letter from Government or clinician advising them to shield) will be advised that they can return to work from 1 August as long as they maintain social distancing and the workplace is COVID secure..
2. Staff who are clinically vulnerable should return to work where possible. Government advice is available for colleagues in these categories and those who are pregnant. Education and childcare settings should endeavour to support flexible deployment where possible.
3. The government is currently undertaking an official review of whether factors including ethnicity can affect people's vulnerability to COVID-19. The government has said this is because a disproportionately higher number of people have died from COVID-19 from black, Asian and minority ethnic (BAME) backgrounds. As such the trust will undertake individual risk assessments for any staff who are within the high risk category and/or BAME background.
4. Staff and children living with those that are extremely clinically vulnerable/clinically vulnerable can attend school and work with children or adults adhering to this risk assessment.

Issue that could cause harm:		Travel to and from work/school for staff/children which could increase the risk and rate of transmission of coronavirus (COVID-19).		
Existing level of risk				
HIGH		MEDIUM	LOW	NEGLIGIBLE
How to manage it (control measures)		List your control measures required to reduce risk – add appropriate detail about the type and location of controls		
<ol style="list-style-type: none"> 1. Encouraging parents and children and young people to walk or cycle to their education setting where possible and are aware of the <u>Coronavirus (COVID-19): safer travel guidance for passengers</u> when planning their travel 2. LCC Bus Transport operators are being instructed to tape off the seats on their services to allow social distance spacing between bus users. Users must get on and off one at a time under the supervision of the driver and follow all school rules regarding staying in that spaced seat at all times during the journey. (Double decker buses will have a maximum of 15 seats available and single just 10. Smaller coaches will be spaced accordingly and numbers reduced to fit spacing needs.) Jacqueline Day at LCC has verified that these are the instructions which operators must adhere to under LCC control. GCA will work with stagecoach for the 46X private hire to implement the same controls on that service. GCA will alert parents to these measures via PMX to ask students to be aware and follow these rules, which GCA staff will also reinforce at the Academy. We have audited the student numbers for each service and LCC will allocate suitable size vehicles to meet the distancing requirements. These measures, followed correctly, will ensure social distancing can be observed in transporting children to and from the site. 3. Taking appropriate actions to reduce risk if hygiene rules and social distancing is not possible, for example when transporting children and young people with complex needs who need support to access the vehicle or fasten seatbelts. 4. Encouraging staff to travel to work by personal vehicle, walk or cycle instead of using public transport. 5. Advise staff not to car share. 6. Encourage staff to follow social distancing in the staff car park.

How to manage it (control measures)	List your control measures required to reduce risk – add appropriate detail about the type and location of controls		
<ol style="list-style-type: none"> 1. Tell parents that if their child needs to be accompanied to the education or childcare setting, only one parent should attend. 2. Tell parents and young people their allocated drop off and collection times and the process for doing so, including protocols for minimising adult to adult contact (for example, which entrance to use) 3. Make clear to parents that they cannot gather at entrance gates or doors, or enter the site (unless they have a pre-arranged appointment, which should be conducted safely). 4. Advise visitors that they cannot enter the site unless they have a pre-arranged appointment, which should be conducted safely. 5. Ensure parents and young people are aware of recommendations on transport to and from education or childcare setting (including avoiding peak times). Read the Coronavirus (COVID-19): safer travel guidance for passengers. 6. Talk to staff about the plans (for example, safety measures, timetable changes and staggered arrival and departure times), including discussing whether training would be helpful. 7. Communicate early with contractors and suppliers that will need to prepare to support your plans for opening for example, cleaning, catering, food supplies, and hygiene suppliers. 8. Discuss with cleaning contractors or staff the additional cleaning requirements and agree additional hours to allow for this. 9. Communicate early with contractors and suppliers that will need to prepare to support your plans for opening for example, cleaning, catering, food supplies, and hygiene suppliers. Share academy risk assessment. 10. Discuss with cleaning contractors or staff the additional cleaning requirements and agree additional hours to allow for this. Share academy risk assessment. (Cleaning RA. All cleaning operatives will have completed a training session) 11. A tight window of arrival and departure will be maintained. 12. Communications on social distancing arrangements take place regularly to reinforce key messages

How to manage it (control measures)		List your control measures required to reduce risk – add appropriate detail about the type and location of controls	
<ol style="list-style-type: none"> Home visits should be a last resort and alternative measures implemented firstly. Where a home visit is absolutely essential this must be agreed by the Headteacher and the member of staff must undertake the home visit on a volunteer basis only. No member of staff should be forced to undertake a home visit. A time for home visit should be pre-arranged between the school and the parent/carer. The member of staff should maintain a distance of 2 metres from any adult or child and must not enter the home. The member of staff should drive to the home, knock on the door, leave the food parcel and return to their vehicle, locking the doors and drive away. Lone working arrangements should be implemented between the member of staff and a member of SLT (e.g. agreed appointment time for the visit, member of staff to call SLT to confirm they have safely completed the home visit). The member of staff must have business insurance for their personal vehicle.
