

FCAT

Coronavirus (COVID-19) Implementing protective measures within FCAT

COVID-19 Risk Assessment

Academy	WESTCLIFF
Activity / Procedure	Full opening of schools - managing the risk and rate of transmission of coronavirus (COVID-19) and variants Inc Lockdown, Closure KVV and staff.
Assessment date	13th January 2021
Review date	To be reviewed and updated frequently in light of any updates to existing government guidance or any new guidance.

Identified groups at risk	
Employees	YES
Children	YES
Visitors	YES
Contractors	YES

This risk assessment does not supersede any legal obligations relating to health and safety, employment or equalities.

This risk assessment is completed based on the guidance and information available on the 13th January 2021 and contains further controls due to Lockdown announced on the 4th January 2021. This Risk assessment will be updated to reflect any changes in published guidance.

[Guidance for full opening: schools - GOV.UK](#) (Updated 7th January 2021)

FCAT

System of controls

This is the set of actions schools must take. They are grouped into 'prevention' and 'response to any infection' and are outlined in more detail within the guidance: [Guidance for full opening: schools - GOV.UK](#)

Prevention

- 1) Minimise contact with individuals who are unwell by ensuring that those who have coronavirus (COVID-19) symptoms, or who have someone in their household who does, do not attend school.
- 2) Where recommended, the use of face coverings in schools.
- 3) Clean hands thoroughly more often than usual.
- 4) Ensure good respiratory hygiene by promoting the 'catch it, bin it, kill it' approach.
- 5) Introduce enhanced cleaning, including cleaning frequently touched surfaces often, using standard products such as detergents.
- 6) Minimise contact between individuals and maintain social distancing wherever possible.
- 7) Where necessary, wear appropriate personal protective equipment (PPE).
- 8) Always keeping occupied spaces well ventilated.

Numbers 1 to 5, and number 8, must be in place in all schools, all the time.

Number 6 must be properly considered and schools must put in place measures that suit their particular circumstances.

Number 7 applies in specific circumstances.

Response to any infection

- 9) Engage with the NHS Test and Trace process.
- 10) Manage confirmed cases of coronavirus (COVID-19) amongst the school community.
- 11) Contain any outbreak by following local health protection team advice.

Numbers 9 to 11 must be followed in every case where they are relevant.

FCAT

PROTECTIVE MEASURES AND CONTROLS

This outlines the key protective measures the academy will take to deliver the essential controls identified 30th December 2020

Further controls are set out in this risk assessment.

No.	Control	Actions
1	Minimise contact with individuals who are unwell by ensuring that those who have coronavirus (COVID-19) symptoms, or who have someone in their household who does, do not attend academy.	<ul style="list-style-type: none">• Ensuring that pupils, staff and other adults do not come into the school if they have coronavirus (COVID-19) symptoms or have tested positive in at least the last 10 days and ensuring anyone developing those symptoms during the school day is sent home, are essential actions to reduce the risk in schools and further drive down transmission of coronavirus (COVID-19).• All schools must follow this process and ensure all staff are aware of it. If anyone in the school becomes unwell with a new and persistent cough or a high temperature, or has a loss of or change in, their normal sense of taste or smell (anosmia), they must be sent home and advised to follow guidance for households with possible or confirmed coronavirus (COVID-19) infection, which sets out that they should self-isolate for at least 10 days and should arrange to have a test to see if they have coronavirus (COVID-19).• Other members of their household (including any siblings) should self-isolate for 10 days from when the symptomatic person first had symptoms.• If a child is awaiting collection, they should be moved, if possible, to a room where they can be isolated behind a closed door, depending on the age and needs of the child, with appropriate adult supervision if required. Ideally, a window should be opened for ventilation. If it is not possible to isolate them, move them to an area which is at least 2 metres away from other people.• If they need to go to the bathroom while waiting to be collected, they should use a separate bathroom if possible. The bathroom must be cleaned and disinfected using standard cleaning products before being used by anyone else. (Notify CR or SLT).• PPE must be worn by staff caring for the child while they await collection if a distance of 2 metres cannot be maintained (such as for a very young child or a child with complex needs). More information on PPE use can be found in the safe working in education, childcare and children's social care settings, including the use of personal protective equipment (PPE) guidance.• As is usual practice, in an emergency, call 999 if someone is seriously ill or injured or their life is at risk. Anyone with coronavirus (COVID-19) symptoms should not otherwise visit the GP, pharmacy, urgent care centre or a hospital.• Any member of staff who has provided close contact care to someone with symptoms, even while wearing PPE, and all other members of staff or pupils who have been in close contact with that person with symptoms, even if wearing a face covering, do not need to go home to self-isolate unless:<ul style="list-style-type: none">• the symptomatic person subsequently tests positive• they develop symptoms themselves (in which case, they should arrange to have a test)• they are requested to do so by NHS Test and Trace or the PHE advice service (or PHE local health protection team if escalated)• Everyone must wash their hands thoroughly for 20 seconds with soap and running water or use hand sanitiser after any contact with someone who is unwell. The area around the person with symptoms must be cleaned after they have left to reduce the

FCAT

		<p>risk of passing the infection on to other people. See the COVID-19: cleaning of non-healthcare settings guidance.</p> <ul style="list-style-type: none"> Public Health England has good evidence that routinely taking the temperature of pupils is not recommended as this is an unreliable method for identifying coronavirus (COVID-19).
2	<p>Where recommended, use of face coverings in schools</p>	<p>Under national lockdown, in settings where pupils in year 7 and above are educated, face coverings should be worn by adults and pupils when moving around the premises, outside of classrooms, such as in corridors and communal areas where social distancing cannot easily be maintained. This does not apply to younger children in primary schools and in early years settings.</p> <p>Schools will need to communicate quickly and clearly to staff, parents and pupils that the new arrangements require the use of face coverings in certain circumstances.</p> <p>Some individuals are exempt from wearing face coverings. This applies to those who:</p> <ul style="list-style-type: none"> cannot put on, wear or remove a face covering because of a physical or mental illness or impairment or disability speak to or provide assistance to someone who relies on lip reading, clear sound or facial expression to communicate <p>The same exemptions will apply in education settings, and we would expect teachers and other staff to be sensitive to those needs.</p> <p>However, where anybody is struggling to access a face covering, or where they are unable to use their face covering due to having forgotten it, or it having become soiled or unsafe, education settings should take steps to have a small contingency supply available to meet such needs.</p> <p>No one should be excluded from education on the grounds that they are not wearing a face covering. Schools should have a process for managing face coverings in school.</p> <p>This process should be communicated clearly to pupils and staff.</p> <p>Safe wearing of face coverings requires cleaning of hands before and after touching – including to remove or put them on – and the safe storage of them in individual, sealable plastic bags between use. Where a face covering becomes damp, it should not be worn and the face covering should be replaced carefully. Pupils must be instructed not to touch the front of their face covering during use or when removing it and they must dispose of temporary face coverings in a ‘black bag’ waste bin (not recycling bin) or place reusable face coverings in a plastic bag they can take home with them, and then wash their hands again.</p>
3	<p>Clean hands thoroughly more often than usual.</p>	<ul style="list-style-type: none"> All students and staff will sanitise hands on entering and leaving the academy and before and after each lesson. Sanitiser dispensers will be located at the entrance of the academy and in each classroom. Build routines into school culture, supported by behaviour expectations, and helping ensure younger children, and those with complex needs, understand the need to follow them All students and staff will be reminded to wash hands before and after visiting the toilet, coughing/sneezing and having a meal. All students will receive regular reminders on effective hand washing routines. The Estates Team will schedule checks during each day on stocks of hand sanitiser, soap and paper towels to check there is adequate supply. (Cleaning schedules and rotas). <p>Coronavirus (COVID-19) is an easy virus to remove when it is on skin. This remains true for the new variant. This can be done with soap and running water or hand sanitiser.</p> <p>Schools must ensure that pupils clean their hands regularly, including when they arrive at school, when they return from breaks, when they change rooms and before and after eating.</p>

FCAT

		<p>Regular and thorough hand cleaning is going to be needed for the foreseeable future.</p> <p>Points to consider and implement:</p> <ul style="list-style-type: none"> • whether the school has enough hand washing or hand sanitiser ‘stations’ available so that all pupils and staff can clean their hands regularly • supervision of hand sanitiser use given risks around ingestion. Small children and pupils with complex needs should continue to be helped to clean their hands properly. Skin friendly skin cleaning wipes can be used as an alternative <ul style="list-style-type: none"> • building these routines into school culture, supported by behaviour expectations, and helping ensure younger children, and those with complex needs, understand the need to follow them
4	Ensure good respiratory hygiene by promoting the ‘catch it, bin it, kill it’ approach.	<ul style="list-style-type: none"> • The academy will deploy posters that remind pupils and staff about the importance of catching a cough or sneeze in tissue, disposing of the tissue and washing hands and by washbasins/toilets and at entry/exit points. • All classrooms, social spaces and corridors will have adequate bins. • There will be an enhanced schedule for bins to be emptied and disinfected.
5	Introduce enhanced cleaning, including cleaning frequently touched surfaces often, using standard products such as disinfectants / detergents	<ul style="list-style-type: none"> • All classrooms will be provided with disinfectant wipes for teachers and staff to use on the keyboard, screen and mouse before and after each lesson. • Such wipes will also be provided to each specialist room for use by students to wipe down their chair, workspace and specialist equipment (in addition to the disinfection carried out by cleaners). • All specialist rooms will be disinfected by cleaners between lessons (where students from a different bubble are using the room). • All clearers will be trained and regularly reminded of the protocols for disinfecting surfaces. • There will be an enhanced cleaning schedule throughout the day. • (Cleaning Schedules , Rotas and Cleaning Risk Assessment).
6	Minimise contact between individuals and maintain social distancing wherever possible.	<p>Minimising contacts and mixing between people reduces transmission of coronavirus (COVID-19). This is important in all contexts and schools must consider how to implement this. Schools must do everything possible to minimise contacts and mixing while delivering a broad and balanced curriculum.</p> <p>The overarching principle to apply is reducing the number of contacts between children and staff. This can be achieved through keeping groups separate (in ‘bubbles’) and through maintaining the distance between individuals. Whilst schools are attended by vulnerable children and the children of critical workers only, where possible schools should keep group sizes small. For children old enough, they should also be supported to maintain distance and not touch staff where possible. Any additional space available where there are lower numbers of pupils attending, should be used wherever possible to maximise the distance between pupils and between staff and other people.</p> <p>The points to consider and implement are set out in the following sections.</p> <p>a. How to group children</p> <p>Consistent groups reduce the risk of transmission by limiting the number of pupils and staff in contact with each other to only those within the group. They have been used to date in recognition that children, especially the youngest children, cannot socially distance from staff or from each other and this provides an additional protective measure. Maintaining distinct groups or ‘bubbles’ that do not mix makes it quicker and easier in the event of a positive case to identify those who may need to self-isolate and keep that number as small as possible.</p> <p>Each group should be kept apart from other groups where possible and older children should</p>

FCAT

be encouraged to keep their distance within groups. Schools with the capability to do it should take steps to limit interaction and the sharing of rooms and social spaces between groups as much as possible. We recognise that younger children will not be able to maintain social distancing and it is acceptable for them not to distance within their group.

Both the approaches of separating groups and maintaining distance are not 'all-or nothing' options and will still bring benefits even if implemented partially. Siblings may also be in different groups. Endeavouring to keep these groups at least partially separate and minimising contacts between children will still offer public health benefits as it reduces the network of possible direct transmission.

All teachers and other staff can operate across different groups. Where staff need to move between groups, they should try and keep their distance from pupils and other staff as much as they can, ideally 2 metres from other adults. Again, we recognise this is not likely to be possible with younger children and teachers in primary schools can still work across groups if that is needed.

b. Measures within the classroom

Maintaining a distance between people while inside and reducing the amount of time they are in face to face contact lowers the risk of transmission. There is strong public health advice that staff in secondary schools maintain distance from their pupils, staying at the front of the class, and away from their colleagues where possible. Ideally, adults should maintain 2 metre distance from each other and from children. We know that this is not always possible, particularly when working with younger children, but if adults can do this when circumstances allow that will help. In particular, they should avoid close face to face contact and minimise time spent within 1 metre of anyone. Similarly, it will not be possible when working with many pupils who have complex needs or who need close contact care. These pupils' educational and care support should be provided as normal.

For children old enough, they should also be supported to maintain distance and not touch staff and their peers where possible. This will not be possible for the youngest children and some children with complex needs and it is not feasible in some schools where space does not allow. Schools doing this where they can, and even doing this some of the time, will help.

When staff or children cannot maintain distancing, particularly with younger children in primary schools, the risk can also be reduced by keeping pupils in smaller groups.

Schools should make small adaptations to the classroom to support distancing where possible. That should include seating pupils side by side and facing forwards, rather than face to face or side on, and might include moving unnecessary furniture out of classrooms to make more space.

c. Measures elsewhere

Groups should be kept apart, meaning that schools should avoid gatherings such as assemblies or collective worship with more than one group.

Groups should be kept apart and movement around the school site kept to a minimum. While passing briefly in the corridor or playground is low risk, schools should avoid creating busy corridors, entrances and exits. Schools should also consider staggered break times and lunch times (and time for cleaning surfaces in the dining hall between groups).

Schools should also plan how shared staff spaces are set up and used to help staff to distance from each other. Use of staff rooms should be minimised, although staff must still have a break of a reasonable length during the day.

d. Other considerations Some pupils with Special Educational Needs and Disabilities (SEND) (whether with education, health and care plans or on SEN support) will continue to need

FCAT

specific help with the changes to routines they are experiencing, so teachers and special educational needs coordinators should plan to meet these needs, for example using social stories.

Schools, local authorities, health professionals, regional schools commissioners and other services should work together to ensure that children with medical conditions are fully supported, including through the use of individual healthcare plans, so that they may receive an education in line with their peers. In some cases, the pupil's medical needs will mean this is not possible, and educational support will require flexibility. Our guidance on supporting pupils at school with medical conditions remains in place.

Supply teachers, peripatetic teachers and other temporary staff can move between schools. They should ensure they minimise contact and maintain as much distance as possible from other staff. They should also participate in schools' rapid testing programmes where these have been established. Specialists, therapists, clinicians and other support staff for pupils with SEND should provide interventions as usual.

Schools should consider how to manage other visitors to the site, such as contractors, and ensure that the risks associated with managing contractors, visitors, catering staff and deliveries, as well as cleaning staff on site who may be working throughout the school and across different groups, are addressed. This will require close cooperation between both schools and the other relevant employers. Schools should have discussions with key contractors about the school's control measures and ways of working. Schools should ensure site guidance on physical distancing and hygiene is explained to visitors on or before arrival. Where visits can happen outside of school hours, they should. A record should be kept of all visitors with sufficient detail to support contact tracing if required by NHS Test and Trace.

Where a child routinely attends more than one setting on a part time basis, for example, because they are dual registered at a mainstream school and an alternative provision setting or special school, schools should work through the system of controls 18 collaboratively, enabling them to address any risks identified and allowing them to jointly deliver a broad and balanced curriculum for the child.

Equipment and resources are integral to education in schools. For individual and very frequently used equipment, such as pencils and pens, it is recommended that staff and pupils have their own items that are not shared. Classroom based resources, such as books and games, can be used and shared within the group; these should be cleaned regularly, along with all frequently touched surfaces. Resources that are shared between groups, such as sports, art and science equipment should be cleaned frequently and meticulously and always between groups, or rotated to allow them to be left unused and out of reach for a period of 48 hours (72 hours for plastics) between use by different bubbles.

Outdoor playground equipment should be more frequently cleaned. This would also apply to resources used inside and outside by wraparound care providers. It is still recommended that pupils limit the amount of equipment they bring into school each day, to essentials such as lunch boxes, hats, coats, books, stationery and mobile phones. Bags are allowed. Pupils and teachers can take books and other shared resources home, although unnecessary sharing should be avoided, especially where this does not contribute to pupil education and development. Similar rules on hand cleaning, cleaning of the resources and rotation should apply to these resources.

<p>8</p>	<p>Keeping occupied spaces well ventilated</p>	<p>Once the school is in operation, it is important to ensure it is well ventilated and a comfortable teaching environment is maintained. This can be achieved by a variety of measures including:</p> <ul style="list-style-type: none"> • mechanical ventilation systems – these should be adjusted to increase the ventilation rate wherever possible, and checked to confirm that normal operation meets current guidance (if possible, systems should be adjusted to full fresh air or, if not, then systems should be operated as normal as long as they are within a single room and supplemented by an outdoor air supply) • natural ventilation – opening windows (in cooler weather windows should be opened just enough to provide constant background ventilation, and opened more fully during breaks to purge the air in the space). Opening internal doors can also assist with creating a throughput of air • natural ventilation – if necessary external opening doors may also be used (as long as they are not fire doors and where safe to do so) Further advice on this can be found in Health and Safety Executive (HSE) guidance on air conditioning and ventilation during the coronavirus outbreak and CIBSE coronavirus (COVID-19) advice. <p>To balance the need for increased ventilation while maintaining a comfortable temperature, the following measures should also be used as appropriate:</p> <ul style="list-style-type: none"> • opening high level windows in preference to low level to reduce draughts • increasing the ventilation while spaces are unoccupied (for examples, between classes, during break and lunch, when a room is unused) • providing flexibility to allow additional, suitable indoor clothing. • rearranging furniture where possible to avoid direct drafts Heating should be used as necessary to ensure comfort levels are maintained particularly in occupied spaces.
<p>9</p>	<p>Engage with the NHS Test and Trace process</p>	<p>Once the school is in operation, it is important to ensure it is well ventilated and a comfortable teaching environment is maintained. This can be achieved by a variety of measures including:</p> <ul style="list-style-type: none"> • mechanical ventilation systems – these should be adjusted to increase the ventilation rate wherever possible, and checked to confirm that normal operation meets current guidance (if possible, systems should be adjusted to full fresh air or, if not, then systems should be operated as normal as long as they are within a single room and supplemented by an outdoor air supply) • natural ventilation – opening windows (in cooler weather windows should be opened just enough to provide constant background ventilation, and opened more fully during breaks to purge the air in the space). If a pupil who has attended school, or a staff member, receives a positive PCR test having developed symptoms, schools should follow the guidance below. Schools participating in the rapid asymptomatic testing programme should follow the Mass asymptomatic testing: schools and colleges guidance for handling any positive tests as a</p>

FCAT

		<p>result of that programme.</p> <p>Schools must ensure they understand the NHS Test and Trace process. Schools must also ensure that staff members and parents/carers understand that they will need to be ready and willing to:</p> <ul style="list-style-type: none"> -book a PCR test if they or their child are displaying symptoms. The main symptoms are a high temperature, a new continuous cough and/or a loss or change to your sense of smell or taste. Staff and pupils must not come into the school if they have symptoms and must be sent home to self-isolate if they develop them in school. All children can be tested if they have symptoms, including children under 5, but children aged 11 and under will need to be helped by their parents or carers if using a home testing kit • provide details of anyone they or their child have been in close contact with if they were to test positive for coronavirus (COVID-19) or if asked by NHS Test and Trace • self-isolate if they have been in close contact with someone who tests positive for coronavirus (COVID-19), or if anyone in their household develops symptoms of coronavirus (COVID-19), or if they are required to do so having recently travelled from certain other countries. <p>Anyone who displays symptoms of coronavirus (COVID-19) can and should get a PCR test. PCR tests can be booked online through the NHS testing and tracing for coronavirus website, or ordered by telephone via NHS 119 for those without access to the internet. Essential workers, which includes anyone involved in education or childcare, have priority access to PCR testing. The government will ensure that it is as easy as possible to get a PCR test through a wide range of routes that are locally accessible, fast and convenient. We will release more details on new PCR testing avenues as and when they become available and will work with schools so they understand the quickest and easiest way to get a PCR test.</p> <p>The PCR test kits sent to schools are provided to be used in the exceptional circumstance that an individual becomes symptomatic and schools believe they may have barriers to accessing testing elsewhere. It is for schools to determine how to prioritise the distribution of their test kits in order to minimise the impact of the virus on the education of their pupils.</p> <p>These kits can be given directly to staff or parents and carers collecting a child who has developed symptoms at school. In particular, these test kits will also help ensure that 21 symptomatic staff can also get a test and if they test negative, can return to work as soon as they no longer have symptoms of coronavirus (COVID-19).</p> <p>Schools should ask parents of children attending school and staff to inform them immediately of the results of any tests taken outside school and follow this guidance.</p> <p>NHS COVID-19 app The app is available to anyone aged 16 or over to download if they choose. For some young people, particularly some with special educational needs and disabilities (SEND), parents will need to decide whether or not their use of the app is appropriate. This will mean that some students in year 11, and the majority of students in years 12 and above will be eligible to use the app and benefit from its features. Staff members will also be able to use the app. The guidance for schools and further education colleges in England is intended to provide information to senior leaders in education settings about the app and how it works, and to set out guidance for its use within schools in England.</p> <p>Rapid testing in schools and colleges Secondary schools participating in the rapid asymptomatic testing programme should follow the</p> <p>Mass asymptomatic testing: schools and colleges - GOV.UK</p>
10	Manage confirmed cases	<p>Schools must take swift action when they become aware that someone who has attended has tested positive for coronavirus (COVID-19) having developed symptoms and taken a</p>

FCAT

of coronavirus (COVID-19) amongst the school community

PCR test outside of school. Secondary schools participating in the rapid asymptomatic testing programme should follow the Mass asymptomatic testing: schools and colleges guidance to ensure contacts of the positive case are tested.

Primary schools and any secondary schools not participating in the rapid asymptomatic testing programme must follow the advice below.

If schools would like support on the action they should take to respond to a positive case, they can contact the dedicated advice service introduced by Public Health England (PHE) and delivered by the NHS Business Services Authority. This can be reached by calling the DfE Helpline on 0800 046 8687 and selecting option 1 for advice on the action to take in response to a positive case.

Schools will be put through to a team of advisers who will inform them of what action is needed based on the latest public health advice. The advice service (or PHE local health protection team if escalated) will work with schools to guide them through the actions they need to take. Based on their advice, schools must send home those people who have been in close contact with the person who has tested positive, advising them to self-isolate for 10 days from the day after contact with the individual tested positive.

Close contact means:

direct close contacts - face to face contact with an infected individual for any length of time, within 1 metre, including being coughed on, a face to face conversation, or unprotected physical contact (skin-to-skin)

- proximity contacts - extended close contact (within 1 to 2 metres for more than 15 minutes) with an infected individual
- travelling in a small vehicle, like a car, with an infected person

The advice service (or PHE local health protection team if escalated) will provide advice on who must be sent home. To support them in doing so, we recommend schools keep a record of pupils and staff in each group, and any close contact that takes place between children and staff in different groups (see section 6 of the system of control for more on grouping pupils). This should be a proportionate recording process. Schools do not need to ask pupils to record everyone they have spent time with each day or ask staff to keep definitive records in a way that is overly burdensome

Where individuals who are self-isolating and are within our definition of vulnerable, it is important that schools put systems in place to keep in contact with them, offer pastoral support, and check they are able to access education support.

A template letter will be provided to schools, on the advice of the health protection team, to send to parents and staff if needed. Schools must not share the names or details of people with coronavirus (COVID-19) unless essential to protect others. Household members of those contacts who are sent home do not need to self-isolate themselves unless the child, young person or staff member who is self-isolating subsequently develops symptoms. If someone in a class or group that has been asked to self-isolate develops symptoms themselves within the 10-days from the day after contact with the individual tested positive should follow guidance for households with possible or confirmed coronavirus (COVID-19) infection. They should get a test, and:

- if someone who is self-isolating because they have been in close contact with someone who has tested positive for coronavirus (COVID-19) starts to feel unwell and gets a test for coronavirus themselves, and the test delivers a negative result, they must remain in isolation for the remainder of the 10-day isolation period. This is because they could still develop coronavirus (COVID-19) within the remaining days.
- if the test result is positive, they should inform their setting immediately, and should isolate for at least 10 days from the onset of their symptoms (which could mean the self-isolation ends before or after the original 10-day isolation period). Their household should self-isolate for at least 10 days from when the

FCAT

		<p>symptomatic person first had symptoms, following guidance for households with possible or confirmed coronavirus (COVID-19) infection</p> <p>Schools should not request evidence of negative test results or other medical evidence before admitting children or welcoming them back after a period of self-isolation.</p> <p>In the majority of cases, schools and parents will be in agreement that a child with symptoms should not attend school, given the potential risk to others. In the event that a parent or guardian insists on a child attending school, schools can take the decision to refuse the child if in their reasonable judgement it is necessary to protect their pupils and staff from possible infection with coronavirus (COVID-19). Any such decision would need to be carefully considered in light of all the circumstances and the current public health advice.</p> <p>Further guidance is available on testing and tracing for coronavirus (COVID-19). This process will look different for secondary schools once they have commenced lateral flow testing of close contacts of confirmed cases. The advice will be update shortly to reflect this.</p>
11	<p>Contain any outbreak by following local health protection team advice</p>	<p>Schools participating in the rapid asymptomatic testing programme should refer to the guidance for asymptomatic testing in schools and colleges to ensure contacts of the positive case are tested. (Westcliff Primary Academy are taking part in this testing). Any schools not participating in the rapid asymptomatic testing programme must follow the advice below.</p> <p>If schools have two or more confirmed cases within 10 days, or an overall rise in sickness absence where coronavirus (COVID-19) is suspected, they may have an outbreak and must continue to work with their local health protection team who will be able to advise if additional action is required. In some cases, health protection teams may recommend that a larger number of other pupils self-isolate at home as a precautionary measure – perhaps the whole site or year group.</p> <p>If schools are implementing controls from this list, addressing the risks they have identified and therefore reducing transmission risks, whole school closure based on cases within the school will not generally be necessary, and should not be considered except on the advice of health protection teams.</p> <p>In consultation with the local Director of Public Health, where an outbreak in a school is confirmed, a mobile testing unit may be dispatched to test others who may have been in contact with the person who has tested positive. Testing will first focus on the person’s class, followed by their year group, then the whole school if necessary, in line with routine public health outbreak control practice.</p>

Further Controls ref Government announcement on 4th January 2020 Lockdown

FCAT

Issue:	Infection transmission rates are high due to the new Covid variant. Further operational controls / actions / required for key worker / vulnerable students and staff during lockdown.		
Existing level of risk			
HIGH	<u>MEDIUM</u>	<u>LOW</u>	<u>NEGLIGIBLE</u>
How to manage it (control measures)	List your control measures required to reduce risk – add appropriate detail about the type and location of controls		
<ul style="list-style-type: none"> Follow Government guidance on further control measures.(When available). Key worker and vulnerable student classes to be kept at a minimum due to higher transmission rates. Specific max numbers of KVV and staff will depend on the size and type of classrooms & workplaces. Social distancing to be maintained at 2 meters where possible. When staff or children cannot maintain distance, particularly with younger children in primary schools, the pupils will be kept in smaller, class-sized groups where possible. Wearing of masks. Please see FCAT Mask Policy. This position on the wearing of masks will be under constant review both at Trust level and nationally. Some individuals are exempt from wearing face coverings who: cannot put on, wear or remove a face covering because of a physical or mental illness or impairment or disability. Rooms must be well ventilated (with outside air) with extra heaters provided if necessary. Cleaning & hygiene protocols must be reviewed.(Updated cleaning protocols from site management). All operational guidance and controls are contained within this RA. <p>All symptoms of Control are being followed.Guidance for full opening: schools - GOV.UK</p>

<u>HIGH</u>	<u>MEDIUM</u>	<u>LOW</u>	<u>NEGLIGIBLE</u>

Updates to be considered in your RA (These are in the latest Gov guidelines)

- (CEV or shielding list) was published on 13 October.

The guidance provides advice on what additional measures individuals in this group can take tailored to each Local COVID Alert Level. The UK Chief Medical Officers have issued a statement on schools and childcare reopening which states that there is a very low rate of severe disease in children from COVID-19 and far fewer children should remain in this group in the future following their routine discussions with their clinician.

All pupils, including those who are clinically extremely vulnerable, can continue to attend school at all Local COVID Alert Levels unless they are one of the very small number of pupils or students under paediatric care (such as recent transplant or very immunosuppressed children) and have been advised specifically by their GP or clinician not to attend school.

Where a pupil is unable to attend school because they are complying with clinical or public health advice, we expect schools to be able to immediately offer them access to remote education. Schools should keep a record of, and monitor engagement with this activity as set out but this does not need to be formally recorded in the action for all schools and local authorities sections. attendance register.

Where children are not able to attend school as parents and carers they are following clinical or public health advice, for example, self-isolation or family isolation, related to coronavirus (COVID-19), the absence will not be penalised.

Where face-to-face meetings are arranged, schools should make clear to candidates that they must adhere to the system of controls that schools have in place. Schools will also have the discretion to require face coverings for visitors where social distancing cannot be managed safely.

Designated safeguarding leads will be best placed to co-ordinate multi-agency working within a school, including communication with school nurses.

Schools should consult the health and safety guidance on educational visits when considering visits and make sure that the appropriate insurance arrangements are in place.

FCAT

The Association of British Insurers (ABI) has produced information on travel insurance implications following the coronavirus (COVID-19) outbreak. If schools have any further questions about their cover or would like further reassurance, they should contact their travel insurance provider.

Increased ventilation may make school buildings cooler than usual over the winter months. While schools will want to maintain the benefits of their uniform, they may wish to consider allowing additional, suitable indoor items of clothing to be worn during the winter period in addition to the school's current uniform. Where this occurs, schools should ensure that no extra financial pressure is placed on parents.

Issue that could cause harm:	Lack of Social Distancing in the learning environment (classroom/ workshop/ hall/ outdoors) which could increase the risk and rate of transmission of coronavirus (COVID-19)		
Existing level of risk:			
HIGH	MEDIUM	LOW	NEGLIGIBLE
How to manage it (control measures)	List your control measures required to reduce risk – add appropriate detail about the type and location of controls		
<ol style="list-style-type: none"> 1. Staggered arrival/ exit/play/lunch times will be in place in Autumn term (communicated to parents on 10th July 2020) for the whole school. 2. All pupils can attend the academy each day. To enable social distancing there will be no more than 33 children per group. In breakfast / after school club, children will be in groups of no more than 15 children, with one adult. This will be so that only 2 year groups 'mix'. The early years group will have no more than 8 children. 3. Defined members of staff are recommended to be with each small group of children. For pre-school children in early years settings, the staff to child ratios within <u>Early Years Foundation Stage (EYFS)</u> continue to apply and these are recommended to group children. 4. Ensure that children are in the same small groups at all times each day, and different groups are not mixed during the day, or on subsequent days, wherever this is possible. 5. Where possible, practical PE will take place outdoors. 6. No assemblies will be scheduled. Picture News / Jigsaw Assemblies will be delivered by the class teachers. 7. Cleaning rotas will be updated in line with the timetables for Autumn 2020. 8. Classrooms will be arranged so that desks are forward facing where possible in Key Stage 2. 9. Classrooms will have a defined teacher area to support social distancing. 10. Ensure that the same staff are assigned to each group of children and, as far as possible, these stay the same during the day and on subsequent days. Changing the assignment of staff to each group of children/young people should be a last resort but may be necessary for example due to staff absence. 11. Maximise the number of learning environments used including outdoor space as much as possible to more easily allow for distance between children and staff. Water and sand trays will be used by infant children outdoors. Water will have soap, and sand will be sprayed with dettol at the end of the day. 12. Access rooms directly from outside where possible to reduce mixing of groups. Nursery, Reception, Y1, 2, 5 and 6 can access outside directly from classrooms. 13. Ensure that wherever possible children use the same classroom or area of a setting throughout the day to minimise movement around school. Phonics groups may need to move to a different area, depending on assessments in September. 14. Remove excess furniture to increase space if able to do so. 15. Desks should be spaced as far apart as possible. 16. In primary, unlike older children and adults, early years and primary age children cannot be expected to remain 2 metres apart from each other and staff. Children will be reminded not to enter the teacher's zone. 17. Children keep to their desks when in the learning environment. 18. Where possible seat children at the same desk each day. 19. Personal property of children should be kept to a minimum e.g. bags, lunchboxes. If these are brought into school they should be stored under the pupil's table. Coats will be hung on the cloakroom pegs as normal. 20. Staff members keep a minimum 1 metre distance from each other in the learning environment. 			

FCAT

21. Mark out a 1 metre plus area e.g. with tape for the member(s) for staff to be able to maintain social distancing from children and other staff.
22. Display signage in the learning environment regarding social distancing to reinforce, encourage and promote this for staff and children.
23. Academy SLT to create academy social distancing procedures for staff and children specific to the academy environment (include instructions how to enter and exit the learning environment, use of toilet, moving around the classroom, how to maintain social distancing whilst teaching etc.) See Social Distancing Procedures (SDP) document.
24. Toilets will be used by class bubble: Early Years: Nursery, Year 1: Infant girls, Year 2: infant boys, Year 3&5: Junior boys, Year 4 & 6: Junior girls. These will be cleaned in addition to the daily schedule, mid morning and mid afternoon between toilet breaks (see cleaning schedule).
25. For children, procedures revisited and managed in line with the academy behaviour policy, updated in light of the coronavirus pandemic.
26. Off site visits will resume with additional protective measures under FCAT policy guidance, with full and thorough additional risk assessments for every visit.
27. Senior leaders monitor areas where there are breaches of social distancing measures and arrangements are reviewed.
28. Intensive monitoring of the compliance with safety arrangements will avoid the need for quality assurance walk through classroom visits at this time.

Remaining level of risk		Consider the level of risk following use of the above control measures	
HIGH	MEDIUM	LOW	NEGLIGIBLE

Issue that could cause harm:	Lack of Social Distancing when using toilets and poor hygiene which could increase the risk and rate of transmission of coronavirus (COVID-19)		
-------------------------------------	---	--	--

Existing level of risk:			
HIGH	MEDIUM	LOW	NEGLIGIBLE

How to manage it (control measures)	List your control measures required to reduce risk – add appropriate detail about the type and location of controls
--	---

1. Academy SLT to create social distancing procedures for staff use of staff toilets specific to the academy environment (e.g. how many staff may enter the toilets at one time, queue system etc.). See SDP
2. **Ensuring that toilets do not become crowded by limiting the number of children who use the toilet facilities at one time.** See re-opening document.
3. Allocated toilets for different groups of children and staff to enable toilet facilities to be used by the same groups of staff and children as far as possible.
4. **Staff and children asked to clean hands after using the toilet - wash hands thoroughly for 20 seconds with running water and soap and dry them thoroughly or use alcohol hand rub or sanitiser ensuring that all parts of the hands are covered.**
5. **Ensure help is available for children who have trouble cleaning their hands independently.** Ensure supervision of hand sanitizer use given risks around ingestion. Small children and pupils with complex needs should continue to be helped to clean their hands properly, Skin friendly cleaning wipes can be used as an alternative.
6. Display signage in the toilets regarding hand washing to reinforce, encourage and promote this for staff and children.
7. **Prop doors open, where safe to do so (bearing in mind fire safety and safeguarding), to limit use of door handles and aid ventilation.**
8. Full stock of soap and sanitiser to be maintained in the toilets at all times.
9. Academy SLT agreed with the Site Supervisor cleaning schedule and frequency for staff and children's toilets in line with operational requirements. This will be at the start and end of each day as well as mid morning, lunchtime and mid afternoon. **Protocol from FCAT Premises to be issued to assist with this.**

FCAT

Lack of space in corridors will mean that children may pass each other on route to/from toilets.

Issue that could cause harm:

Lack of social distancing and poor hygiene upon arrival and exit from school which could increase the risk and rate of transmission of coronavirus (COVID-19)

Existing level of risk:

HIGH

MEDIUM

LOW

NEGLIGIBLE

How to manage it (control measures)

List your control measures required to reduce risk – add appropriate detail about the type and location of controls

1. Tell staff, children, young people, parents, carers or any visitors, such as suppliers, not to enter the education or childcare setting if they are displaying any symptoms of coronavirus.
2. Non-Contact Infrared Thermometer with LCD Display will be available.
3. Staff will arrive through the main reception, activate their fob, sanitise hands and pick up any PPE (cleaning staff). They will then proceed directly to work locations and will not congregate in groups of staff. Any staff briefing will be done virtually. Staff are required to maintain 1 metre plus social distancing wherever possible. Staff should not make stops to collect drinks etc on arrival and should where possible bring their own cutlery and utensils for personal use during the day.
4. The academy has staggered arrival and departure times of children, parents and children will be expected to maintain social distancing at all times – floor markings will indicate the distance required to be maintained. As far as possible each year group will use separate entrances in order to reduce the build up of parents and children. Parents will be required to line up to collect children and children will be brought to them in turn.
5. Hand sanitiser stations will be at staff entrances/exits to building, in all classrooms and along corridors.
6. Staff to sanitise hands on each and every entry and exit from the building.
7. Prop doors open, where safe to do so (bearing in mind fire safety and safeguarding), to limit use of door handles and aid ventilation.
8. No more than 2 people will be allowed in the reception area of the academy. A glass screen is in place at the main reception window and this will remain closed at all times. No visitors will be admitted unless by appointment or in an emergency. Staff will be required to contact the office through phone or email rather than in person and no more than 2 people should be in the reception area at any one time. Where children arrive at front reception, they will be marshalled through the area in a socially distanced, self contained bubble by supervising staff.
9. As far as possible visitors to site will be limited and where possible no visitors will be allowed on site or face to face meetings undertaken, where an emergency or safeguarding need means a face to face meeting is necessary to safeguard a child, this will take place in the pentagon meeting room, chairs will be removed to that social distancing is observed. Full PPE (including visors) is also available.
10. Make clear to parents and carers that they cannot gather at entrance gates or doors, or enter the site (unless they have a pre-arranged appointment, which should be conducted safely). Communication can be done via email or phone.
11. Visitors will be advised that they cannot enter the site unless they have a pre-arranged appointment, which should be conducted safely. Contact details of all visitors will be taken in line with Test and Trace protocols.

FCAT

12. If it is agreed that a visitor does need to enter the school, they should give their details to the Receptionist – name, company, car registration, arrival time and who they are visiting, these details should be recorded on a daily sheet attached to a clipboard by the employee on Reception, which can then be taken outside in the event of a fire alarm. Neither visitors nor staff should use the touch screen or sign in themselves using a pen to avoid sharing equipment.
13. Visitors must be accompanied at all times for safeguarding reasons but also to ensure they do not access areas of the school that are not being used or may not be on the cleaning schedule.
14. The visitors should be given a disposable visitor badge (a stick on label). The Receptionist will enter the time of leaving on the sheet and the badge should be placed in a lidded bin by the visitor.
15. The academy has staggered arrival and departure times of children, parents and children will be expected to maintain social distancing at all times – floor markings will indicate the distance required to be maintained. As far as possible each year group will use separate entrances in order to reduce the build-up of parents and children. Parents will be required to line up to collect children and children will be brought to them in turn. All external doors (which can be opened in line with fire regulations) will be opened and all staff/children will be expected to sanitise or wash hands upon entry and exit of any building or room.
16. Academy SLT to create arrival and exit procedures for parents, carers and children specific to the academy environment and to communicate these (e.g. drop off and collection times, markers outside/inside school at 2 metre intervals to encourage and maintain social distancing for children and adults when waiting outside school, children are queuing and walking in/out of school, allocated times and points of entry/exit for specific groups of children, prop open external doors to limit use of door handles, use of hand sanitiser upon each and every entry/exit etc.).
17. Implement staggered drop off and pick up times for different groups of children.
18. Tell parents that if their child needs to be accompanied to the education or childcare setting, only one parent should attend.
19. Staff supervision throughout drop off/pick up to encourage and insist on social distancing.
20. Display signage outside and inside the building regarding social distancing and good hygiene to reinforce, encourage and promote this for staff, parents, carers and children.
21. Everyone should use a tissue or elbow to cough or sneeze and use bins for tissue waste ('catch it, bin it, kill it').
22. There are lidded bins for tissues and these are emptied throughout the day.

Existing level of risk:			
HIGH	MEDIUM	LOW	NEGLIGIBLE
How to manage it (control measures)	List your control measures required to reduce risk – add appropriate detail about the type and location of controls		
<ol style="list-style-type: none"> 1. Stagger break times (including lunch), so that all children are not moving around the school at the same time and that any corridors or circulation routes used have a limited number of children or young people using them at any time. 2. Consider using one-way circulation, or place a divider down the middle of the corridor to keep groups apart as they move through the setting where spaces are accessed by corridors. A one way system is in place where possible - (hall, PE corridor and library corridor). 3. Access rooms directly from outside where possible to reduce mixing of groups. 4. Ensure that children and young people are in the same small groups at all times each day, and different groups are not mixed during the day, or on subsequent days. 5. Ensure that the same staff are assigned to each group of children and, as far as possible, these stay the same during the day and on subsequent days, recognising for secondary settings there will be some subject specialist rotation of staff. Changing the assignment of staff to each group of children should be a last resort but may be necessary for example due to staff absence. 6. There will be allocated different areas for different groups of children and staff. Movement will be managed to minimise proximity of groups. 7. Children and young people should clean their hands regularly including when they arrive at school, when they return from breaks, when they change rooms and before and after eating. Groups should be kept apart as much as possible and tables should be cleaned between each group. If such measures are not possible, children should be brought their lunch in their classrooms. (Children on packed lunches will eat in classrooms). 8. Prop doors open, where safe to do so (bearing in mind fire safety and safeguarding), to limit use of door handles and aid ventilation. 9. Where possible, all spaces should be well ventilated using natural ventilation (opening windows) or ventilation units. 10. Display signage outside and inside the building regarding social distancing and good hygiene to reinforce, encourage and promote this for staff and children. 11. Use markers e.g. paint/tape outside school and inside school at 1 metre plus intervals to encourage and maintain social distancing for children and adults. 12. Children and young people should clean their hands after sneezing or coughing, should be encouraged not to touch their mouth, eyes and nose, should use a tissue or elbow to cough or sneeze and use bins for tissue waste ('catch it, bin it, kill it'). This will be enforced and reminded by staff. 13. Ensure there are lidded bins in break/playtime and lunchtime areas for tissues and these are emptied throughout the day. 			

FCAT

14. Ensure that sufficient handwashing facilities are available. Where a sink is not nearby, provide hand sanitiser in play/break time and lunchtime areas.
15. Reduce break/playtime equipment. Remove soft furnishings, soft toys and toys that are hard to clean (such as those with intricate parts). Consider how play equipment is used ensuring it is appropriately cleaned between groups of children using it, and that multiple groups do not use it simultaneously.
16. Games discussed which encourage social distancing e.g. football passing. Any sports or other equipment shared between bubbles or classes e.g. sports, art, science will be cleaned frequently and meticulously between use by other groups of children.
17. Staff supervision throughout break/play and lunchtimes to actively encourage and insist on social distancing.

Issue that could cause harm:		First Aid/Accident/Administering medicines/EHP/Personal Care which could increase the risk and rate of transmission of coronavirus (COVID-19)	
Existing level of risk:			
HIGH	MEDIUM	LOW	NEGLIGIBLE
How to manage it (control measures)		List your control measures required to reduce risk – add appropriate detail about the type and location of controls	
<ol style="list-style-type: none"> 1. Ensure there is a member of First Aid trained staff on site and only trained staff carry out First Aid (for primary requires Paediatric First Aid). 2. Ensure full and complete first aid stock on site at all times. 3. Ensure FCAT First Aid, Accident Administering medicines and EHP Policies are followed. 4. Staff should wear PPE including visor if a child or young person becomes unwell with symptoms of coronavirus while in their setting and needs direct personal care until they can return home. A fluid-resistant surgical face mask should be worn by the supervising adult if a distance of 1 metre cannot be maintained. If contact with the child or young person is necessary, then disposable gloves, a disposable apron and a fluid-resistant surgical face mask should be worn by the supervising adult. If a risk assessment determines that there is a risk of splashing to the eyes, for example from coughing, spitting, or vomiting, then eye protection should also be worn. 5. Staff should wear PPE for children, young people and students whose care routinely already involves the use of PPE due to their intimate care needs. They should continue to receive their care in the same way. 6. Some pupils with complex needs will struggle to maintain as good respiratory hygiene as their peers, for example those who spit uncontrollably or use saliva as a sensory stimulant. Staff should wear PPE when supporting pupils with complex needs as outlined above. 7. Full and complete stock of PPE on site at all times.

FCAT

Issue that could cause harm:	Risk of COVID-19 illness to extremely clinically vulnerable and clinically vulnerable children staff and family members.			
Existing level of risk				
HIGH	MEDIUM	LOW	NEGLIGIBLE	
How to manage it (control measures)	List your control measures required to reduce risk – add appropriate detail about the type and location of controls			
<ol style="list-style-type: none"> 1. Where a pupil is unable to attend school because they are complying with clinical and/or public health advice, school will immediately offer them access to remote education. Schools should monitor engagement with this activity. 2. Where children are not able to attend school as parents are following clinical and/or public health advice, absence will not be penalised. All other pupils must attend school 3. Shielding advice for all adults and children will pause on 1 August, subject to a continued decline in the rates of community transmission of coronavirus (COVID-19). This means that even the small number of pupils who will remain on the shielded patient list can also return to school, as can those who have family members who are shielding. If rates of the disease rise, children (or family members) may be advised to shield during the period where rates remain high and therefore they may be temporarily absent. In this event remote learning provision will be activated immediately. 4. Parents of pupils and staff with significant risk factors should discuss their concerns with pastoral staff and senior leaders respectively. 5. It is anticipated that fewer young people will be advised to shield and that the majority of pupils will be able to return to school. some pupils no longer required to shield but who generally remain under the care of a specialist health professional may need to discuss their care with their health professional before returning to school (usually at their next planned clinical appointment). 6. Following the reduction in the prevalence of coronavirus (COVID-19) and relaxation of shielding measures from 1 August, we expect that most staff will attend school. 7. It remains the case that wider government policy advises those who can work from home to do so. We recognise this will not be applicable to most school staff, but where a role may be conducive to home working, for example some administrative roles, school leaders should consider what is feasible and appropriate. 8. Individuals who were considered to be clinically extremely vulnerable and received a letter advising them to shield are now advised that they can return to work from 1 August as long as they maintain social distancing. 9. School leaders should be flexible in how those members of staff are deployed to enable them to work remotely where possible or in roles in school where it is possible to maintain social distancing. 10. People who live with those who are clinically extremely vulnerable or clinically vulnerable can attend the workplace. <p>Staff who are clinically vulnerable or extremely clinically vulnerable</p> <p>The measures outlined in the DfE guidance for full opening of schools (page 1 of this risk assessment) will be applied and will mitigate risks significantly for staff, including those who are extremely clinically vulnerable and clinically vulnerable. This will allow most staff to return to the workplace, although we advise those in the most at risk categories to take particular care while community transmission rates continue to fall.</p> <ol style="list-style-type: none"> 11. Parents of pupils and staff with significant risk factors should discuss their concerns with pastoral staff and senior leaders. 12. FCAT still wishes to support staff in continuing to work from home, if able to do so, balancing this with increasing operational requirements. 13. Staff who are extremely clinically vulnerable (those who have received a letter from Government or clinician advising them to shield) will be advised that they can return to work from 1 August as long as they maintain social distancing. 14. Staff who are clinically vulnerable should return to work where possible. Government advice is available for colleagues in these categories and those who are pregnant. Education and childcare settings should endeavour to support flexible deployment where possible. 15. The government is currently undertaking an official review of whether factors including ethnicity can affect people's vulnerability to COVID-19. The government has said this is because a disproportionately higher number of people have died from COVID-19 from black, Asian and minority ethnic (BAME) backgrounds. As such the trust will undertake individual risk assessments for any staff who are within the high risk category and/or BAME background as outlined in bullet point 6 above. 16. Staff and children living with those that are clinically vulnerable can attend school and work with children or adults adhering to this risk assessment.

<ol style="list-style-type: none"> Staff offices to be properly cleaned at the start and end of each day and surfaces (e.g. desks, door and window handles, light switches etc.) cleaned more regularly than normal throughout the day. Cleaning protocol from FCAT Premises to assist with this. Staff who are office based and can undertake their job role at home, should continue to work from home. Limit the number of people in office at any one time. Ensure a 1 metre distance between staff work spaces. Use markers e.g. paint/tape in the office at 2 metre intervals to encourage and maintain social distancing. Use back-to-back or side-to-side working (rather than face-to-face) whenever possible. Reducing the number of people each person has contact with by using 'fixed teams or partnering' (so each person works with only a few others). Provide hand sanitiser in offices and meeting rooms. Staff asked to clean hands upon arrival and exit from the office and regularly throughout the day - wash hands thoroughly for 20 seconds with running water and soap and dry them thoroughly or use alcohol hand rub or sanitiser ensuring that all parts of the hands are covered Prop doors open, where safe to do so (bearing in mind fire safety and safeguarding), to limit use of door handles and aid ventilation. Where possible, all spaces should be well ventilated using natural ventilation (opening windows) or ventilation units Display signage in offices regarding social distancing and good hygiene to reinforce, encourage and promote this for staff. Avoiding use of hot desks and spaces and, where not possible, for example, call centres or training facilities, cleaning and sanitising workstations between different occupants including shared equipment. Use remote working tools to avoid in-person meetings. Only absolutely necessary participants should attend meetings and should maintain 2m separation throughout. Avoiding transmission during meetings, for example avoiding sharing pens and other objects. Hold meetings outdoors or in well-ventilated rooms whenever possible.

Existing level of risk			
HIGH	MEDIUM	LOW	NEGLIGIBLE
How to manage it (control measures)		List your control measures required to reduce risk – add appropriate detail about the type and location of controls	
<ol style="list-style-type: none"> 1. Tell staff, children, young people, parents, carers or any visitors, such as suppliers, not to enter the education or childcare setting if they are displaying any symptoms of coronavirus (following the COVID-19: guidance for households with possible coronavirus infection). 2. If anyone becomes unwell with a new, continuous cough or a high temperature in an education or childcare setting, they must be sent home and advised to follow the COVID-19: guidance for households with possible coronavirus infection guidance. 3. Test and trace protocols will be applied in full. 4. Proper cleaning of the area where anyone has become unwell with symptoms of COVID-19 should take place. 5. If a child is awaiting collection, they should be moved, if possible, to a room where they can be isolated behind a closed door, depending on the age of the child and with appropriate adult supervision if required. Ideally, a window should be opened for ventilation. If it is not possible to isolate them, move them to an area which is at least 1 metre away from other people. 6. If they need to go to the bathroom while waiting to be collected, they should use a separate bathroom if possible. The bathroom should be cleaned and disinfected using standard cleaning products before being used by anyone else. 7. PPE should be worn by staff caring for the child while they await collection if a distance of 1 metre cannot be maintained (such as for a very young child or a child with complex needs). A fluid-resistant surgical face mask should be worn by the supervising adult if a distance of 1 metre cannot be maintained. If contact with the child or young person is necessary, then disposable gloves, a disposable apron and a fluid-resistant surgical face mask should be worn by the supervising adult. If a risk assessment determines that there is a risk of splashing to the eyes, for example from coughing, spitting, or vomiting, then eye protection should also be worn. 8. Everyone must wash their hands thoroughly for 20 seconds with soap and running water or use hand sanitiser after any contact with someone who is unwell. 9. Staff and parents/carers should be advised about testing for COVID-19 for children in school. 10. Academy SLT should ensure any confirmed cases of COVID-19 following a positive test result should be notified 			

FCAT

to Jane McCumiskey (FCAT COO) to ensure that the FCAT procedure in the event of this can be followed.

11. If anyone becomes unwell with a new continuous cough, or a high temperature, or has a loss/change in their normal sense of smell or taste (anosmia), they must be sent home to self-isolate for 7 days and arrange to have a test. Other members of their household must isolate for 14 days from when the symptomatic person first had symptoms.
12. When the child, young person or staff member tests negative, they can return to their setting and the fellow household members can end their self-isolation.
13. Where a child, young person or staff member tests positive, the academy will contact the local health protection team who will investigate and provide further guidance
14. The academy will maintain records of pupils and staff in each group and further close contacts
15. Where the child, young person or staff member tests positive, the rest of their class or group within their childcare or education setting should be sent home and advised to self-isolate for 14 days. The other household members of that wider class or group do not need to self-isolate unless the child, young person or staff member they live with in that group subsequently develops symptoms.
16. All children and staff working with the group of children which contains an individual with a positive test must self-isolate at home for 14 days from the last close contact with the person testing positive. Household members do not need to self-isolate unless there is a subsequent positive test or their family member develops symptoms.
17. If a subsequent test shows a negative result, the household should remain in self-isolation for 14 days.
18. If testing positive, a person must continue to self-isolate for at least 7 days from the onset of their symptoms and other members of the household must continue self-isolating for the full 14 days from when the symptomatic person first had symptoms.
19. As part of the national test and trace programme, if other cases are detected within the cohort or in the wider setting, Public Health England's local health protection teams will conduct a rapid investigation and will advise schools and other settings on the most appropriate action to take. In some cases a larger number of other children, young people may be asked to self-isolate at home as a precautionary measure – perhaps the whole class, site or year group. Where settings are observing guidance on infection prevention and control, which will reduce risk of transmission, closure of the whole setting will not generally be necessary.

<p>https://www.gov.uk/government/publications/actions-for-schools-during-the-coronavirus-outbreak/guidance-for-full-opening-schools#educational-visitsWe continue to advise against domestic (UK) overnight and overseas educational visits. This advice remains under review. In the autumn term, schools can resume non-overnight domestic educational visits. These trips should include any trips for pupils with SEND connected with their preparation for adulthood (for example, workplace visits or travel training). This should be done in line with protective measures, such as keeping children within their consistent group, and the COVID-secure measures in place at the destination. Schools should also make use of outdoor spaces in the local area to support the delivery of the curriculum. As normal, schools should undertake full and thorough risk assessments in relation to all educational visits to ensure they can be done safely. As part of this risk assessment, schools will need to consider what control measures need to be used and ensure they are aware of wider advice on visiting indoor and outdoor venues. Schools should consult the health and safety guidance on educational visits when considering visits. The Association of British Insurers (ABI) has produced information on travel insurance implications following the coronavirus (COVID-19) outbreak. If you have any further questions about your cover or would like further reassurance, you should contact your travel insurance provider.</p>
