Coronavirus (COVID-19) Implementing protective measures within FCAT

COVID-19 Risk Assessment

Academy	Gateway Academy
Activity / Procedure	Full opening of schools - managing the risk and rate of transmission of coronavirus (COVID-19) and variants Inc Lockdown, Closure, KVV and staff.
Assessment date	3rd February 2021
Review date	To be reviewed and updated frequently in light of any updates to existing government guidance or any new guidance.

Identified groups at risk	
Employees	YES
Children	YES
Visitors	YES
Contractors	YES

This risk assessment does not supersede any legal obligations relating to health and safety, employment or equalities.

This risk assessment is completed based on the guidance and information available on the 3rd February 2021 and contains further controls due to Lockdown announced on the 4th January 2021. This Risk assessment will be updated to reflect any changes in published guidance.

[Restricting attendance during the national lockdown: schools](#) (updated 02nd February 2021)

[Stay at Home - GOV.UK](#) (Updated 01st February 2021)

FCAT

System Of Controls

This is the set of actions schools must take. They are grouped into 'prevention' and 'response to any infection' and are outlined in more detail within the guidance: [Actions for schools during the coronavirus outbreak](#)

Prevention

- 1) Minimise contact with individuals who are unwell by ensuring that those who are required to stay at home and not attend school.
- 2) Where recommended, the use of face coverings in schools.
- 3) Clean hands thoroughly more often than usual.
- 4) Ensure good respiratory hygiene by promoting the 'catch it, bin it, kill it' approach.
- 5) Introduce enhanced cleaning, including cleaning frequently touched surfaces often, using standard products such as detergents.
- 6) Minimise contact between individuals and maintain social distancing wherever possible.
- 7) Always keeping occupied spaces well ventilated.
- 8) Where necessary, wear appropriate personal protective equipment (PPE).

Numbers 1 to 5, and number 7, must be in place in all schools, all the time.

Number 6 must be properly considered and schools must put in place measures that suit their particular circumstances.

Number 8 applies in specific circumstances.

Response to any infection

- 9) Engage with the NHS Test and Trace process.
- 10) Manage confirmed cases of coronavirus (COVID-19) amongst the school community.
- 11) Contain any outbreak by following local health protection team advice.

Numbers 9 to 11 must be followed in every case where they are relevant.

PROTECTIVE MEASURES AND CONTROLS

FCAT

This outlines the key protective measures the academy will take to deliver the essential controls identified 3rd February 2021

Further controls are set out in this risk assessment.

Further controls are set out in this risk assessment.

No.	Control	Actions
1	Minimise contact with individuals who are unwell by ensuring that those who have coronavirus (COVID-19) symptoms, or who have someone in their household who does, do not attend school.	<p>Ensuring that pupils, staff and other adults do not come into the school if they have coronavirus (COVID-19) symptoms or have tested positive in at least the last 10 days and ensuring anyone developing those symptoms during the school day is sent home, are essential actions to reduce the risk in schools and further drive down transmission of coronavirus (COVID-19).</p> <p>All schools must follow this process and ensure all staff are aware of it. If anyone in the school becomes unwell with a new and persistent cough or a high temperature, or has a loss of or change in, their normal sense of taste or smell (anosmia), they must be sent home and advised to follow guidance for households with possible or confirmed coronavirus (COVID-19) infection, which sets out that they should self-isolate for at least 10 days and should arrange to have a test to see if they have coronavirus (COVID-19).</p> <p>Other members of their household (including any siblings) should self-isolate for 10 days from the day after the individual tested positive.</p> <p>If a child is awaiting collection, they should be moved, if possible, to a room where they can be isolated behind a closed door, depending on the age and needs of the child, with appropriate adult supervision if required. Ideally, a window should be opened for ventilation. If it is not possible to isolate them, move them to an area which is at least 2 metres away from other people.</p> <p>If they need to go to the bathroom while waiting to be collected, they should use a separate bathroom if possible. The bathroom must be cleaned and disinfected using standard cleaning products before being used by anyone else.</p> <p>PPE must be worn by staff caring for the child while they await collection if a distance of 2 metres cannot be maintained (such as for a very young child or a child with complex needs). More information on PPE use can be found in the safe working in education, childcare and children's social care settings, including the use of personal protective equipment (PPE) guidance.</p> <p>If a child in a boarding school shows symptoms, they should initially self-isolate in their boarding house (or the accommodation they stay in while at school). Most children will benefit from self-isolating in their boarding house so that their usual support can continue. Others will benefit more from self-isolating in their home.</p> <p>As is usual practice, in an emergency, call 999 if someone is seriously ill or injured or their life is at risk. Anyone with coronavirus (COVID-19) symptoms should not otherwise visit the GP, pharmacy, urgent care centre or a hospital.</p> <p>Any member of staff who has provided close contact care to someone with symptoms, even while wearing PPE, and all other members of staff or pupils who have been in close contact with that person with symptoms, even if wearing a face covering, do not need to go home to self-isolate unless</p> <ul style="list-style-type: none"> • the symptomatic person subsequently tests positive • they develop symptoms themselves (in which case, they should arrange to have a test) • they are requested to do so by NHS Test and Trace or the PHE advice service (or

FCAT

		<p>PHE local health protection team if escalated)</p> <p>Everyone must wash their hands thoroughly for 20 seconds with soap and running water or use hand sanitiser after any contact with someone who is unwell. The area around the person with symptoms must be cleaned after they have left to reduce the risk of passing the infection on to other people. See the COVID-19: cleaning of non-healthcare settings guidance.</p> <p>Public Health England has good evidence that routinely taking the temperature of pupils is not recommended as this is an unreliable method for identifying coronavirus (COVID19). 2. Where recommended, use of face coverings in schools Under national lockdown, in settings where pupils in year 7 and above are educat</p>
2	Where recommended, use of face coverings in schools	<p>Under national lockdown, in settings where pupils in year 7 and above are educated, face coverings should be worn by adults and pupils when moving around the premises, outside of classrooms, such as in corridors and communal areas where social distancing cannot easily be maintained. This does not apply to younger children in primary schools and in early years settings.</p> <p>In primary schools where social distancing is not possible in indoor areas outside of classrooms between members of staff or visitors (for example, in staff rooms), head teachers will have the discretion to decide whether to ask staff or visitors to wear, or agree to them wearing face coverings in these circumstances. But children in primary school do not need to wear a face covering.</p> <p>Schools will need to communicate quickly and clearly to staff, parents and pupils that the new arrangements require the use of face coverings in certain circumstances.</p> <p>Further guidance on face coverings</p> <ul style="list-style-type: none"> • Safe working in education, childcare and children's social care provides • Face coverings in education settings
3	Clean hands thoroughly more often than usual.	<p>Coronavirus (COVID-19) is an easy virus to remove when it is on skin. This remains true for the new variant. This can be done with soap and running water or hand sanitiser. Schools must ensure that pupils clean their hands regularly, including when they arrive at school, when they return from breaks, when they change rooms and before and after eating. Regular and thorough hand cleaning is going to be needed for the foreseeable future. Points to consider and implement:</p> <ul style="list-style-type: none"> • whether the school has enough hand washing or hand sanitiser 'stations' available so that all pupils and staff can clean their hands regularly • supervision of hand sanitiser use given risks around ingestion. Small children and pupils with complex needs should continue to be helped to clean their hands properly. Skin friendly skin cleaning wipes can be used as an alternative • building these routines into school culture, supported by behaviour expectations, and helping ensure younger children, and those with complex needs, understand the need to follow them
4	Ensure good respiratory hygiene by promoting the 'catch it, bin it, kill it' approach.	<p>The 'catch it, bin it, kill it' approach continues to be very important, so schools must ensure that they have enough tissues and bins available in the school to support pupils and staff to follow this routine. As with hand cleaning, schools must ensure younger children and those with complex needs are helped to get this right and all pupils understand that this is now part of how the school operates. The e-Bug coronavirus (COVID-19) website contains free resources for schools, including materials to encourage good hand and respiratory hygiene. Some pupils with complex needs will struggle to maintain as good respiratory hygiene as their peers, for example, those who spit uncontrollably or use saliva as a sensory stimulant. This should be considered in risk assessments in order to support these pupils and the staff working with them and is not a reason to deny these pupils face to face</p>

FCAT

		education.
5	Introduce enhanced cleaning, including cleaning frequently touched surfaces often, using standard products such as disinfectants / detergents	<p>Points to consider and implement:</p> <ul style="list-style-type: none"> • putting in place a cleaning schedule that ensures cleaning is generally enhanced and includes: • more frequent cleaning of rooms and shared areas that are used by different groups • frequently touched surfaces being cleaned more often than normal • toilets will need to be cleaned regularly and pupils must be encouraged to clean their hands thoroughly after using the toilet - different groups being allocated their own toilet blocks could be considered but is not a requirement if the site does not allow for it <p>PHE has published revised guidance for cleaning non-healthcare settings to advise on general cleaning required in addition to the existing advice on cleaning those settings when there is a suspected case.</p>
6	Minimise contact between individuals and maintain social distancing wherever possible.	<p>Minimising contacts and mixing between people reduces transmission of coronavirus (COVID-19). This is important in all contexts and schools must consider how to implement this. Schools must do everything possible to minimise contacts and mixing while delivering a broad and balanced curriculum</p> <p>The overarching principle to apply is reducing the number of contacts between children and staff. This can be achieved through keeping groups separate (in 'bubbles') and through maintaining the distance between individuals. Whilst schools are attended by vulnerable children and the children of critical workers only, where possible schools should keep group sizes small. For children old enough, they should also be supported to maintain distance and not touch staff where possible. Any additional space available where there are lower numbers of pupils attending, should be used wherever possible to maximise the distance between pupils and between staff and other people.</p> <p>The points to consider and implement are set out in the following sections.</p> <p>a. How to group children</p> <p>Consistent groups reduce the risk of transmission by limiting the number of pupils and staff in contact with each other to only those within the group. They have been used to date in recognition that children, especially the youngest children, cannot socially distance from staff or from each other and this provides an additional protective measure. Maintaining distinct groups or 'bubbles' that do not mix makes it quicker and easier in the event of a positive case to identify those who may need to self-isolate and keep that number as small as possible.</p> <p>Each group should be kept apart from other groups where possible and older children should be encouraged to keep their distance within groups. Schools with the capability to do it should take steps to limit interaction and the sharing of rooms and social spaces between groups as much as possible. We recognise that younger children will not be able to maintain social distancing and it is acceptable for them not to distance within their group.</p> <p>Both the approaches of separating groups and maintaining distance are not 'all-or-nothing' options and will still bring benefits even if implemented partially. Siblings may also be in different groups. Endeavouring to keep these groups at least partially separate 16 and minimising contacts between children will still offer public health benefits as it reduces the network of possible direct transmission.</p> <p>All teachers and other staff can operate across different groups. Where staff need to move between groups, they should try and keep their distance from pupils and other staff as much as they can, ideally 2 metres from other adults. Again, we recognise this is not likely to be possible with younger children and teachers in primary schools can still work across groups if that is needed.</p>

FCAT

b. Measures within the classroom

Maintaining a distance between people while inside and reducing the amount of time they are in face to face contact lowers the risk of transmission. There is strong public health advice that staff in secondary schools maintain distance from their pupils, staying at the front of the class, and away from their colleagues where possible. Ideally, adults should maintain 2 metre distance from each other and from children. We know that this is not always possible, particularly when working with younger children, but if adults can do this when circumstances allow that will help. In particular, they should avoid close face to face contact and minimise time spent within 1 metre of anyone. Similarly, it will not be possible when working with many pupils who have complex needs or who need close contact care. These pupils' educational and care support should be provided as normal.

For children old enough, they should also be supported to maintain distance and not touch staff and their peers where possible. This will not be possible for the youngest children and some children with complex needs and it is not feasible in some schools where space does not allow. Schools doing this where they can, and even doing this some of the time, will help.

When staff or children cannot maintain distancing, particularly with younger children in primary schools, the risk can also be reduced by keeping pupils in smaller groups.

Schools should make small adaptations to the classroom to support distancing where possible. That should include seating pupils side by side and facing forwards, rather than face to face or side on, and might include moving unnecessary furniture out of classrooms to make more space.

c. Measures elsewhere

Groups should be kept apart, meaning that schools should avoid gatherings such as assemblies or collective worship with more than one group.

Groups should be kept apart and movement around the school site kept to a minimum. While passing briefly in the corridor or playground is low risk, schools should avoid creating busy corridors, entrances and exits. Schools should also consider staggered break times and lunch times (and time for cleaning surfaces in the dining hall between groups).

Schools should also plan how shared staff spaces are set up and used to help staff to distance from each other. Use of staff rooms should be minimised, although staff must still have a break of a reasonable length during the day.

d. Other considerations Some pupils with Special Educational Needs and Disabilities (SEND) (whether with education, health and care plans or on SEN support) will continue to need specific help with the changes to routines they are experiencing, so teachers and special educational needs coordinators should plan to meet these needs, for example using social stories.

Schools, local authorities, health professionals, regional schools commissioners and other services should work together to ensure that children with medical conditions are fully supported, including through the use of individual healthcare plans, so that they may receive an education in line with their peers. In some cases, the pupil's medical needs will mean this is not possible, and educational support will require flexibility. Our guidance on supporting pupils at school with medical conditions remains in place.

FCAT

		<p>Supply teachers, peripatetic teachers and other temporary staff can move between schools. They should ensure they minimise contact and maintain as much distance as possible from other staff. They should also participate in schools' rapid testing programmes where these have been established. Specialists, therapists, clinicians and other support staff for pupils with SEND should provide interventions as usual.</p> <p>Schools should consider how to manage other visitors to the site, such as contractors, and ensure that the risks associated with managing contractors, visitors, catering staff and deliveries, as well as cleaning staff on site who may be working throughout the school and across different groups, are addressed. This will require close cooperation between both schools and the other relevant employers. Schools should have discussions with key contractors about the school's control measures and ways of working. Schools should ensure site guidance on physical distancing and hygiene is explained to visitors on or before arrival. Where visits can happen outside of school hours, they should. A record should be kept of all visitors with sufficient detail to support contact tracing if required by NHS Test and Trace.</p> <p>Where a child routinely attends more than one setting on a part time basis, for example, because they are dual registered at a mainstream school and an alternative provision setting or special school, schools should work through the system of controls collaboratively, enabling them to address any risks identified and allowing them to jointly deliver a broad and balanced curriculum for the child.</p> <p>Equipment and resources are integral to education in schools. For individual and very frequently used equipment, such as pencils and pens, it is recommended that staff and pupils have their own items that are not shared. Classroom based resources, such as books and games, can be used and shared within the group; these should be cleaned regularly, along with all frequently touched surfaces. Resources that are shared between groups, such as sports, art and science equipment should be cleaned frequently and meticulously and always between groups, or rotated to allow them to be left unused and out of reach for a period of 48 hours (72 hours for plastics) between use by different bubbles.</p> <p>Outdoor playground equipment should be more frequently cleaned. This would also apply to resources used inside and outside by wraparound care providers. It is still recommended that pupils limit the amount of equipment they bring into school each day, to essentials such as lunch boxes, hats, coats, books, stationary and mobile phones. Bags are allowed. Pupils and teachers can take books and other shared resources home, although unnecessary sharing should be avoided, especially where this does not contribute to pupil education and development. Similar rules on hand cleaning, cleaning of the resources and rotation should apply to these resources.</p> <ul style="list-style-type: none"> • https://www.gov.uk/government/publications/actions-for-schools-during-the-coronavirus-outbreak/guidance-for-full-opening-sc
7	Keeping occupied spaces well ventilated	<p>Once the school is in operation, it is important to ensure it is well ventilated and a comfortable teaching environment is maintained.</p> <p>This can be achieved by a variety of measures including:</p> <ul style="list-style-type: none"> • mechanical ventilation systems – these should be adjusted to increase the ventilation rate wherever possible, and checked to confirm that normal operation meets current guidance (if possible, systems should be adjusted to full fresh air or, if not, then systems should be operated as normal as long as they are within a single room and supplemented by an outdoor air supply) • natural ventilation – opening windows (in cooler weather windows should be opened just enough to provide constant background ventilation, and opened more fully during breaks to purge the air in the space). Opening internal doors can also assist with creating a throughput of air

FCAT

		<ul style="list-style-type: none"> • natural ventilation – if necessary external opening doors may also be used (as long as they are not fire doors and where safe to do so) Further advice on this can be found in Health and Safety Executive (HSE) guidance on air conditioning and ventilation during the coronavirus outbreak and CIBSE coronavirus (COVID-19) advice. <p>To balance the need for increased ventilation while maintaining a comfortable temperature, the following measures should also be used as appropriate:</p> <ul style="list-style-type: none"> • opening high level windows in preference to low level to reduce draughts • increasing the ventilation while spaces are unoccupied (for examples, between classes, during break and lunch, when a room is unused) • providing flexibility to allow additional, suitable indoor clothing. • rearranging furniture where possible to avoid direct drafts Heating should be used as necessary to ensure comfort levels are maintained particularly in occupied spaces
8	Where necessary, wear appropriate personal protective equipment (PPE)	<p>The majority of staff in education settings will not require PPE beyond what they would normally need for their work. PPE is only needed in a very small number of cases, including:</p> <ul style="list-style-type: none"> • where an individual child or young person becomes ill with coronavirus (COVID 19) symptoms while at schools, and only then if a distance of 2 metres cannot be maintained • where a child or young person already has routine intimate care needs that involve the use of PPE, in which case the same PPE should continue to be used <p>Read the guidance on safe working in education, childcare and children's social care for more information about preventing and controlling infection, including when, how PPE should be used, what type of PPE to use, and how to source it.</p>
9	Engage with the NHS Test and Trace process	<p>All school staff and pupils can access The NHS Test and Trace testing system, used to test symptomatic people (using a 'polymerase chain reaction (PCR) test'). If a pupil who has attended school, or a staff member, receives a positive PCR test having developed symptoms, schools should follow the guidance below.</p> <p>In addition to PCR testing, the use of rapid lateral flow tests allows the identification of some individuals with coronavirus who do not have symptoms, which make up around a third of all cases. Lateral flow devices are being provided to all schools and colleges so that they can offer their workforce (who are on-site) access to two tests every week. Testing is not mandatory for staff and they do not need to provide proof of a negative test result to attend school or college in person, although participation in testing is strongly encouraged. Secondary schools participating in the rapid asymptomatic testing programme should follow the Coronavirus (COVID-19) asymptomatic testing in schools and colleges guidance for handling any positive tests as a result of that programme. Primary schools should follow the Rapid asymptomatic coronavirus (COVID-19) testing for staff in primary schools, school-based nurseries and maintained nursery schools guidance.</p> <p>Schools must ensure they understand the NHS Test and Trace process.</p> <p>Schools must also ensure that staff members and parents/carers understand that they will need to be ready and willing to:</p> <ul style="list-style-type: none"> • book a PCR test if they or their child are displaying symptoms. The main symptoms are a high temperature, a new continuous cough and/or a loss or change to your sense of smell or taste. Staff and pupils must not come into the school if they have symptoms and must be sent home to self-isolate if they develop them in school. All children can be tested if they have symptoms, including children under 5,

FCAT

	<p>but children aged 11 and under will need to be helped by their parents or carers if using a home testing kit</p> <ul style="list-style-type: none"> • provide details of anyone they or their child have been in close contact with if they were to test positive for coronavirus (COVID-19) or if asked by NHS Test and Trace • self-isolate if they have been in close contact with someone who tests positive for coronavirus (COVID-19), or if anyone in their household develops symptoms of coronavirus (COVID-19), or if they are required to do so having recently travelled from certain other countries. Secondary schools participating in the rapid asymptomatic testing should follow the Mass asymptomatic testing: schools and colleges guidance. <p>Anyone who displays symptoms of coronavirus (COVID-19) can and should get a PCR test (symptomatic testing). PCR tests can be booked online through the NHS testing and tracing for coronavirus website, or ordered by telephone via NHS 119 for those without access to the internet. Essential workers, who include anyone involved in education or childcare, have priority access to PCR testing as well as regular asymptomatic LFD testing. The government will ensure that it is as easy as possible to get a PCR test through a wide range of routes that are locally accessible, fast and convenient. We will release more details on new PCR testing avenues as and when they become available and will work with schools so they understand the quickest and easiest way to get a PCR test.</p> <p>The PCR test kits sent to schools are provided to be used in the exceptional circumstance that an individual becomes symptomatic and schools believe they may have barriers to accessing testing elsewhere. It is for schools to determine how to prioritise the distribution of their test kits in order to minimise the impact of the virus on the education of their pupils.</p> <p>These kits can be given directly to staff or parents and carers collecting a child who has developed symptoms at school. In particular, these test kits will also help ensure that symptomatic staff can also get a test and if they test negative, can return to work as soon as they no longer have symptoms of coronavirus (COVID-19). Further information is provided in our guidance Coronavirus (COVID-19): test kits for schools and FE providers.</p> <p>Schools should ask parents of children attending school and staff to inform them immediately of the results of any tests taken outside school and follow this guidance</p> <ol style="list-style-type: none"> 1. If someone with symptoms tests negative for coronavirus (COVID-19), then they should stay at home until they are recovered as usual from their illness but can safely return thereafter. The only exception to return following a negative test result is where an individual is separately identified as a close contact of a confirmed case, when they will need to self-isolate for 10 full days from the date of that contact. 2. If someone with symptoms tests positive, they should follow the guidance for households with possible or confirmed coronavirus (COVID-19) infection and must continue to self-isolate at least from the day of onset of their symptoms and for the following 10 full days and then return to school only if they do not have symptoms other than cough or loss of sense of smell/taste. This is because a cough or anosmia can last for several weeks once the infection has gone. 3. The period of isolation starts from the day when they first became symptomatic and the following 10 full days. If they still have a high temperature, they should continue to self-isolate until their temperature returns to normal. Other members of their household should all self-isolate starting from the day the individual's symptoms started and the next 10 full days. <p>NHS COVID-19 app The app is available to anyone aged 16 or over to download if they choose. For some young people, particularly some with special educational</p>
--	--

FCAT

		<p>needs and disabilities (SEND), parents will need to decide whether or not their use of the app is appropriate. This will mean that some students in year 11, and the majority of students in years 12 and above will be eligible to use the app and benefit from its features. Staff members will also be able to use the app. The guidance for schools and further education colleges in England is intended to provide information to senior leaders in education settings about the app and how it works, and to set out guidance for its use within schools in England.</p>
10	<p>Manage confirmed cases of coronavirus (COVID-19) amongst the school community</p>	<p>Schools must take swift action when they become aware that someone who has attended has tested positive for coronavirus (COVID-19) having developed symptoms and taken a PCR test outside of school.</p> <p>If schools would like support on the action they should take to respond to a positive case, they can contact the dedicated advice service introduced by Public Health England (PHE) and delivered by the NHS Business Services Authority. This can be reached by 24 calling the DfE Helpline on 0800 046 8687 and selecting option 1 for advice on the action to take in response to a positive case. Schools will be put through to a team of advisers who will inform them of what action is needed based on the latest public health advice</p> <p>The advice service (or PHE local health protection team if escalated) will work with schools to guide them through the actions they need to take. Based on their advice, schools must send home those people who have been in close contact with the person who has tested positive, advising them to self-isolate for 10 days from the day after contact with the individual who tested positive.</p> <p>Close contact means: • anyone who lives in the same household as someone with coronavirus (COVID19) symptoms or who has tested positive for coronavirus (COVID-19) • anyone who has had any of the following types of contact with someone who has tested positive for coronavirus (COVID-19) with a PCR or LFD test: • face-to-face contact including being coughed on or having a face-to-face conversation within one metre • been within one metre for one minute or longer without face-to-face contact • sexual contacts • been within 2 metres of someone for more than 15 minutes (either as a one-off contact, or added up together over one day) • travelled in the same vehicle or a plane</p> <p>The advice service (or PHE local health protection team if escalated) will provide advice on who must be sent home. To support them in doing so, we recommend schools keep a record of pupils and staff in each group, and any close contact that takes places between children and staff in different groups (see section 6 of the system of control for more on grouping pupils). This should be a proportionate recording process.</p> <p>Schools do not need to ask pupils to record everyone they have spent time with each day or ask staff to keep definitive records in a way that is overly burdensome. Where individuals are self-isolating and are within our definition of vulnerable, it is important that schools put systems in place to keep in contact with them, offer pastoral support, and check they are able to access education support.</p> <p>A template letter will be provided to schools, on the advice of the health protection team, to send to parents and staff if needed. Schools must not share the names or details of people with coronavirus (COVID-19) unless essential to protect others. Household members of those contacts who are sent home do not need to self-isolate themselves unless the child, young person or staff member who is self-isolating subsequently develops symptoms. If someone in a class or group that has been asked to self-isolate develops symptoms themselves within the 10-days from the day after contact with the individual tested positive should follow guidance for households with possible or confirmed coronavirus (COVID-19) infection. They</p>

FCAT

	<p>should get a test, and:</p> <ul style="list-style-type: none">• if someone who is self-isolating because they have been in close contact with someone who has tested positive for coronavirus (COVID-19) starts to feel unwell and gets a test for coronavirus themselves, and the test delivers a negative result, they must remain in isolation for the remainder of the 10-day isolation period. This is because they could still develop coronavirus (COVID-19) within the remaining days.• if the test result is positive, they should inform their setting immediately, and should isolate for at least 10 days from the onset of their symptoms (which could mean the self-isolation ends before or after the original 10-day isolation period). Their household should self-isolate for at least 10 days from when the symptomatic person first had symptoms, following guidance for households with possible or confirmed coronavirus (COVID-19) infection <p>Schools should not request evidence of negative test results or other medical evidence before admitting children or welcoming them back after a period of self-isolation.</p> <p>In the majority of cases, schools and parents will be in agreement that a child with symptoms should not attend school, given the potential risk to others. In the event that a parent or guardian insists on a child attending school, schools can take the decision to refuse the child if in their reasonable judgement it is necessary to protect their pupils and staff from possible infection with coronavirus (COVID-19). Any such decision would need to be carefully considered in light of all the circumstances and the current public health advice.</p> <p>Based on advice from Public Health England (PHE) and NHS Test and Trace, the testing programme initially included offering those who came into close contact with a positive case in colleges the option of 7 days of daily contact testing (with self isolation if a subsequent test was positive) as an alternative to self-isolation. PHE and NHS Test and Trace have now reviewed their initial advice in light of the higher prevalence and rates of transmission of the new variant. They have concluded that these changes in the virus warrant further evaluation work and that daily contact testing in place of self-isolation should be paused until this evaluation has taken place. We will update this guidance once this evaluation is complete. Further guidance is available on testing and tracing for coronavirus (COVID-19).</p> <p>Test and Trace Support Payments</p> <p>There may be individuals working in schools, such as supply staff, where when asked to self-isolate, are unable to work from home and will lose income as a result of self isolating</p> <p>These individuals may be entitled to a Test and Trace Support Payment of £500, payable as a lump sum from local authorities, to ensure they are able to play their part in controlling the virus by isolating at home.</p> <p>We anticipate that schools' permanent staff will either be working from home, or they will continue to be paid during periods of self-isolation following an outbreak in the school setting. Schools can help temporary staff to work from home if they choose, and in those cases will be continuing to pay them. This support is only for the temporary staff who schools decide not to engage in home working and who are not being paid during self isolation</p> <p>To be eligible for a Test and Trace Support Payment, the individual must be living in England, meet the eligibility criteria and be formally advised to self-isolate by NHS Test and Trace, who will provide the individual with an NHS Test and Trace Account ID.</p> <p>Where individuals have been asked to self-isolate by the school they are currently working in, the school should provide the individual's personal details to NHS Test</p>
--	--

FCAT

		<p>and Trace to allow them to provide the individual with an NHS Test and Trace Account ID, which will allow them to apply for a Test and Trace Support Payment from their Local Authority. To support this, the Department for Health and Social Care has launched the Selfisolation Service Hub (020 3743 6715), a phone line open 7 days a week, 8am to 8pm, allowing a school to provide contact details of those individuals who has been asked to self-isolate.</p> <p>The process is as follows:</p> <ol style="list-style-type: none"> 1. The school learns of a positive test for an individual within the school. 2. A staff member at the school should speak with the person(s) who have received a positive test and note their NHS Test and Trace Account Number. 3. The school determines which staff should self-isolate and inform the individuals. 4. The school should collate the contact details of these individuals. 5. A staff member at the school contacts the self-isolation hub on 020 3743 6715 and provide the hub with <ol style="list-style-type: none"> a. The NHS Test and Trace Account ID of the individual who has tested positive for COVID-19 b. The contact details of the individuals who have been asked to self-isolate. 6. NHS Test and Trace will then contact the individuals to formally advise them of their need to self-isolate and provide them with an NHS Test and Trace Account ID. 7. Individuals who are not able to work from home and who are not being paid may claim for a self-isolation payment through their local authority.
11	Contain any outbreak by following local health protection team advice	<p>If schools have two or more confirmed cases within 10 days, or an overall rise in sickness absence where coronavirus (COVID-19) is suspected, they may have an outbreak and should call the dedicated advice service, who will escalate the issue to the PHE local health protection team where necessary and advise if additional action is required.</p> <p>In some cases, health protection teams may recommend that a larger number of other pupils self-isolate at home as a precautionary measure – perhaps the whole site or year group. If schools are implementing controls from this list, addressing the risks they have identified and therefore reducing transmission risks, whole school closure based on cases within the school will not generally be necessary, and should not be considered except on the advice of health protection teams.</p> <p>In consultation with the local Director of Public Health, where an outbreak in a school is confirmed, a mobile testing unit may be dispatched to test others who may have been in contact with the person who has tested positive. Testing will first focus on the person's class, followed by their year group, then the whole school if necessary, in line with routine public health outbreak control practice.</p>

How to manage it (control measures)	List your control measures required to reduce risk – add appropriate detail about the type and location of controls		
--	---	--	--

The health status and availability of every member of staff is known and is regularly updated so that deployment can be planned.

1. Full use is made of those staff who are self-isolating but who are well enough to teach lessons online.
2. Flexible and responsive use of teaching assistants and pastoral staff to supervise classes is in place.
3. Full use is made of testing to inform staff deployment.
4. A blended model of home learning and attendance at school is planned for and utilised as necessary.

Remaining level of risk		Consider level of risk following use of control measures	
HIGH	MEDIUM	LOW	NEGLIGIBLE

Issue that could cause harm: 3	Lack of Social Distancing in the learning environment (classroom/ workshop/ hall/ outdoors) which could increase the risk and rate of transmission of coronavirus (COVID-19)

FCAT

1. A one way system requiring social distancing queuing is in place to beyond the perimeter of the school gates and on the playground. Adults are asked to keep moving on the playground and collect and drop off children swiftly.
2. Defined members of staff only are recommended to be with each small group of children. For pre-school children in early years settings, the staff to child ratios within Early Years Foundation Stage (EYFS) continue to apply and these are recommended to group children.
3. Ensure that children are in the same year group bubbles at all times each day, and different groups are not mixed during the day, or on subsequent days.
4. Ensure that the same staff are assigned to each group of children and, as far as possible, these stay the same during the day and on subsequent days. Changing the assignment of staff to each group of children/young people should be a last resort but may be necessary for example due to staff absence or redeployment of secondary staff to primary who then may need to return to secondary.
5. Maximise the number of learning environments used including outdoor space as much as possible to more easily allow for distance between children and staff.
6. Access rooms directly from outside where possible to reduce mixing of groups. All classrooms used for EY, Year 1 and 2 pupils can be directly accessed from outside.
7. Ensure that wherever possible children use the same classroom or area of a setting throughout the day to minimise movement around school.
8. Remove excess furniture to increase space if able to do so. All excess furniture has been removed and stored in one location. Children have a personal box and shared items are minimised wherever possible.
9. Desks should be spaced as far apart as possible.
10. In primary, unlike older children and adults, early years and primary age children cannot be expected to remain 2 metres apart from each other and staff. Children should be spaced as far apart as possible, aim for 2 metres but accept this may not always be possible.
11. Where possible ideally 2m distancing should be adhered to however 1 meter is acceptable for staff
12. Children keep to their desks when in the learning environment.
13. Where possible seat children at the same desk each day if they attend on consecutive days.
14. Personal property of children should be kept to a minimum e.g. bags, coats, disposable lunch boxes. Children will be advised not to bring unnecessary items. Items that are brought into school should be stored in the lidded plastic box that will be stored under their personal desk space where the children are working.
15. Staff members keep a minimum 2 metre distance from each other in the learning environment. Inductions are in operation for all staff prior to reopening including revised policies and procedures.
16. Identify the 2 metre area e.g. with tape for the member(s) to of staff to be able to maintain social distancing from children and other staff.
17. Where possible practical PE lessons will take place outside.
18. Display signage in the learning environment regarding social distancing to reinforce, encourage and promote this with all staff and children.
19. Blackpool Gateway Academy SLT to create academy social distancing procedures for staff and children specific to the academy environment (including instructions how to enter and exit the learning environment, use of toilet, moving around the classroom, how to maintain social distancing whilst teaching etc.)
20. Children's toilets will be used by children during the day – these will be cleaned throughout the day on a rota whilst children are not in the classroom (see cleaning timetable).
21. Children will not be able to move around the classroom and will remain at their own desk. The teacher will observe a two metre distance when supporting children where possible. With younger children where this is more difficult, a more structured curriculum will be in place which allows for children to remain separated for longer periods of time. Staff will be urged to maintain social distancing where possible but will not work beyond the group of children they are allocated to.
22. For children, procedures have been revisited and managed in line with Academy Behaviour Policy.
23. There will be clear messaging to pupils on the importance and reasons for social distancing will be reinforced throughout the school day by staff and through posters, electronic boards and floor markings. For young children this will be through age-appropriate methods such as stories and games.
24. Assemblies and the coming together of other large groups, both staff and students will be suspended.
25. Off-site visits are not planned as yet however the latest guideline will be implemented as appropriate.
26. Academy behaviour policy has been revised to include compliance with social distancing and this has been communicated to staff, pupils and parents.
27. Senior leaders will monitor areas where there are breaches of social distancing measures and arrangements are reviewed.
28. Staff will be assigned to no more than two group 'bubbles'
29. There will be clear messaging to pupils on the importance and reasons for social distancing is reinforced

FCAT

throughout the school day by staff and through posters, electronic boards, and floor markings. For young children this will be through age-appropriate methods such as stories and games. .

30. Off site visits will resume with additional protective measures under FCAT policy guidance, with full and thorough additional risk assessments for every visit.
31. Academy behaviour policy has been revised and a specific COVID appendix added to include compliance with social distancing and this has been communicated to staff, pupils and parents.
32. Intensive monitoring of the compliance with safety arrangements will avoid the need for quality assurance walk through classroom visits at this time.
33. Any technical support staff required to enter a learning environment due to urgent operational requirements (e.g. IT Technician) will maintain a minimum 1 metre plus distance (ideally 2m) social distance, may wear PPE and the Class Teacher will ensure that children follow social distancing to enable the technical staff to work at a social distance.
34. Maximise the number of learning environments used including outdoor space as much as possible to more easily allow for distance between staff and children

Remaining level of risk		Consider the level of risk following use of the above control measures	
HIGH	MEDIUM	LOW	NEGLIGIBLE

Issue that could cause harm: 4		Lack of Social Distancing when using toilets and poor hygiene which could increase the risk and rate of transmission of coronavirus (COVID-19)	
Existing level of risk:			
HIGH	MEDIUM	LOW	NEGLIGIBLE
How to manage it (control measures)		List your control measures required to reduce risk – add appropriate detail about the type and location of controls	

FCAT

1. Blackpool Gateway academy SLT to create social distancing procedures for all staff for all aspects of safe distancing. Children's toilets will be cleaned throughout the day (see cleaning timetable). Cubicles will be assigned to each bubble.
2. Staff will ensure that toilets do not become crowded by limiting the number of children who use the toilet facilities at one time.
Staff and children will be asked to clean hands after using the toilet - wash hands thoroughly for 20 seconds with running water and soap and dry them thoroughly or use alcohol hand rub or sanitiser ensuring that all parts of the hands are covered.
2. Ensure that help is available for children who have trouble cleaning their hands independently. Ensure supervision of hand sanitizer use given risks around ingestion. Small children and pupils with complex needs should continue to be helped to clean their hands properly, Skin friendly cleaning wipes can be used as an alternative.
3. Display signage in the toilets regarding hand washing to reinforce, encourage and promote this for staff and children.
4. Prop doors open, where safe to do so (bearing in mind fire safety and safeguarding), to limit use of door handles and aid ventilation.
5. Full stock of soap and sanitiser to be maintained in the toilets at all times with a clear list in each bubble of what each product is and used for. A replacement system will allow for replenishing low levels of each item on a daily basis if necessary.
6. Toilets will be cleaned according to the cleaning risk assessment and schedule as a minimum throughout the day. If any toilet needs cleaning urgently, staff should contact the cleaning team via main school reception or radios. **Protocol from FCAT Premises to be issued to assist with this.**
7. Parents will not be allowed on site to use toilets.
8. All hand dryers have been isolated and lidded bins and paper towels are in place.
9. Should a wet or inclement weather day be identified then the hall shall be used for activities for children to access to allow for cleaning of Bubble toilets.

Remaining level of risk		Consider level of risk following use of control measures	
HIGH	MEDIUM	LOW	NEGLIGIBLE

Issue that could cause harm: 5		Lack of social distancing and poor hygiene upon arrival and exit from school which could increase the risk and rate of transmission of coronavirus (COVID-19)	
Existing level of risk:			
HIGH	MEDIUM	LOW	NEGLIGIBLE
How to manage it (control measures)		List your control measures required to reduce risk – add appropriate detail about the type and location of controls	

FCAT

1. Tell staff, children, young people, parents, carers or any visitors, such as suppliers, not to enter the education or childcare setting if they are displaying any symptoms of coronavirus. This will be communicated via text/email/Expressions/website and signage on the front doors.
2. The use of Non-Contact Infrared Thermometer with LCD Display will be available..
3. Blackpool Gateway Academy SLT to create procedures for staff for entry and exit to the academy specific to the academy environment and to communicate these (Clear entrances/exits will be used by which staff, use of hand sanitiser as soon as possible each and every time enter/exit the building, staggered arrival times, sign in with fob instead of touching screen, maintain 2 metre distance, go straight to area of work and not to congregate with other staff etc.) Staff should not make stops to collect drinks etc. on arrival and should where possible bring their own cutlery and utensils for personal use during the day.
4. All adults, parents and children will be expected to maintain social distancing at all times upon arrival – floor markings will indicate the distance required to be maintained. As far as possible, each bubble will use separate entrances in order to reduce the build-up of parents and children.
5. Children will be required to line up on the floor markings (spaced two metres apart) and parents will collect children by passing the line in KS2 or waiting on the same yellow markers for KS1 children and children will be dismissed to them in turn one at a time. Other children will be marshalled to the playground where they will position themselves on one of the markings (spaced one metre ideally two metre apart) at staggered times, to then be sent to a parent as they pass through the playground
6. Installation of hand sanitiser stations at staff entrances/exits to building.
7. Staff to sanitise hands on each and every entry and exit from the building.
8. Prop doors open, where safe to do so (bearing in mind fire safety and safeguarding), to limit use of door handles and aid ventilation.
9. Marshalls will be at walk in bus 'stations', playground entry and exit areas reminding and controlling the flow of students/parents within 2 metre distancing.
10. Blackpool Gateway Academy SLT to create procedures for operations of the Main Reception specific to the academy environment and to communicate these (e.g. keep the number of people in reception to a minimum, who may enter reception and on what basis, mark out a 1 metre (ideally 2 metre) area for the member(s) to of staff to be able to maintain social distancing from staff, parents, carers, visitors and children, advise visitors that they cannot enter the site unless they have a pre-arranged appointment, utilise glass/perspex screens at the reception desk, use of hand sanitiser for all visitors upon entry/exit etc).
11. Wherever possible the roof windows and general windows will be opened to allow for adequate flow of air through school each day.
12. Make clear to parents and carers that they cannot gather at entrance gates or doors, or enter the site (unless they have a pre-arranged appointment, which should be conducted safely). Communication can be done via email or phone.
13. Advise visitors that they cannot enter the site unless they have a pre-arranged appointment, which should be conducted safely.
14. Visitors to school should be kept to an absolute minimum. Advise visitors that they cannot enter the site unless they have a pre-arranged appointment, which should be conducted safely.
15. If it is agreed that a visitor does need to enter the school, they should give their details to the Receptionist – name, company, car registration, arrival time and who they are visiting, these details should be recorded on a daily sheet attached to a clipboard by the employee on Reception, which can then be taken outside in the event of a fire alarm. Neither visitors nor staff should use the touch screen or sign in themselves using a pen to avoid sharing equipment.
16. Visitors must be accompanied at all times for safeguarding reasons but also to ensure they do not access areas of the school that are not being used or may not be on the cleaning schedule.
17. The visitors should be given a disposable visitor badge (either a stick on label or a label in a plastic wallet that can be binned after use). The Receptionist will enter the time of leaving on the sheet and the badge should be placed in a lidded bin by the visitor.
18. Blackpool Gateway Academy SLT to create arrival and exit procedures for parents, carers and children specific to the academy environment and to communicate these (e.g. drop off and collection times, markers outside/inside school at 2 metre intervals to encourage and maintain social distancing for children and adults when waiting outside school, children are queuing and walking in/out of school, allocated times and points of entry/exit for specific groups of children, prop open external doors to limit use of door handles, use of hand sanitiser upon each and every entry/exit etc.).
19. Implemented staggered drop off and pick up times for different groups of children.
20. Tell parents that if their child needs to be accompanied to the education or childcare setting, only one parent should attend.
21. Staff supervision throughout drop off/pick up to encourage and insist on social distancing.

FCAT

22. Display signage outside and inside the building regarding social distancing and good hygiene to reinforce, encourage and promote this for staff, parents, carers and children.
23. Everyone should use a tissue or elbow to cough or sneeze and use bins for tissue waste ('catch it, bin it, kill it').
24. Ensure there are lidded bins for tissues and these are emptied throughout the day.
25. Ensure supervision of hand sanitizer use given risks around ingestion. Small children and pupils with complex needs should continue to be helped to clean their hands properly, Skin friendly cleaning wipes can be used as an alternative.

Issue that could cause harm: 6		Lack of social distancing and poor hygiene during break/ playtimes and lunchtimes which could increase the risk and rate of transmission of coronavirus (COVID-19)	
Existing level of risk:			
HIGH	MEDIUM	LOW	NEGLIGIBLE
How to manage it (control measures)		List your control measures required to reduce risk – add appropriate detail about the type and location of controls	

FCAT

1. Stagger break times (including lunch), so that all children are not moving around the school at the same time and that any corridors or circulation routes used have a limited number of children or young people using them at any time. Should a wet or inclement weather day be identified then the hall shall be used for activities for children to access to allow for cleaning of Bubble toilets.
2. Lunch time will be extended and hot meals will be provided where possible and rotated through the year groups if not possible every day.
3. Consider using one-way circulation, or place a divider down the middle of the corridor to keep groups apart as they move through the setting where spaces are accessed by corridors.
4. Access rooms directly from outside where possible to reduce mixing of groups.
5. Ensure that children and young people are in the same small groups at all times each day, and different groups are not mixed during the day, or on subsequent days.
6. Ensure that the same staff are assigned to each group of children and, as far as possible, these stay the same during the day and on subsequent days. Changing the assignment of staff to each group of children should be a last resort but may be necessary for example due to staff absence or redeployment of secondary staff to primary who then may need to return to secondary.
7. Allocate different areas for different groups of children and staff.
8. Children and young people should clean their hands and wash regularly including when they arrive at school, when they return from breaks, when they change rooms and before and after eating and enter in the groups they are already in, groups should be kept apart as much as possible and tables should be cleaned between each group. If such measures are not possible, children should be brought their lunch to their classrooms
9. Prop doors open, where safe to do so (bearing in mind fire safety and safeguarding), to limit use of door handles and aid ventilation.
10. Where possible, all spaces should be well ventilated using natural ventilation (opening windows) or ventilation units.
11. Display signage outside and inside the building regarding social distancing and good hygiene to reinforce, encourage and promote this for staff and children.
12. Use markers e.g. paint/tape outside school and inside school at 1 metre ideally 2 metre intervals to encourage and maintain social distancing for children and adults.
13. Children and young people should clean their hands after sneezing or coughing, should be encouraged not to touch their mouth, eyes and nose, should use a tissue or elbow to cough or sneeze and use bins for tissue waste ('catch it, bin it, kill it'). This will be enforced and reminded by staff.
14. Ensure there are lidded bins in break/playtime and lunchtime areas for tissues and these are emptied throughout the day.
15. Ensure that sufficient handwashing facilities are available. Where a sink is not nearby, provide hand sanitiser in play/break time and lunchtime areas.
16. Reduce break/playtime equipment. Remove soft furnishings, soft toys and toys that are hard to clean (such as those with intricate parts). Consider how play equipment is used ensuring it is appropriately cleaned between groups of children using it, and that multiple groups do not use it simultaneously.
17. Games discussed which encourage social distancing e.g. football passing and no sharing of equipment for games e.g. do not play catch, cordon off outdoor play equipment.
18. Each Bubble will have its own unique bag of resources for use on the playground and responsibility will be with staff to clean before and after each use.
19. The playground zones will be used and bubbles will maintain this system for lunch and break times.
20. Staff supervision throughout break/play and lunchtimes to actively encourage and insist on social distancing.
21. Commence with lunch in classrooms delivered initially as cold lunch to avoid congestion in hall and phase in an alternative plan based on numbers attending
22. Ensure there is enough time built into the daily timetable to wash hands at regular intervals throughout the day and additional handwashing facilities installed, if required.

1. Ground floor classrooms can access outdoors from the west side so it is unlikely these children will need to travel in the corridor.
2. Staggered break times (including lunch), so that all children are not moving around the school at the same time and that any corridors or circulation routes used have a limited number of children or young people using them at any time.
3. The one -way circulation will be maintained within school by all staff and children.
4. Access rooms directly from outside where possible to reduce mixing of groups.
5. Children and young people should walk single file on the corridor and consider having a member of staff at the front and back of the line to supervise and actively encourage and insist on social distancing.
6. Use markers e.g. paint/tape on corridors at 1 metre ideally two metres metre intervals to encourage and maintain social distancing for children and adults.
7. Prop doors open, where safe to do so (bearing in mind fire safety and safeguarding), to limit use of door handles and aid ventilation.
8. Where possible, all spaces should be well ventilated using natural ventilation (opening windows) or ventilation units.
9. Display signage on corridors regarding social distancing to reinforce, encourage and promote this for children and staff.
10. Staff supervision on corridors to actively encourage and insist on social distancing.
11. Encourage staff communication via the google message doc , phone if necessary but not to disturb lessons , professionally through radios or e-mail to limit unnecessary movement of staff on corridors.
12. Circulation plans have been reviewed.
13. Circulation routes will be clearly marked with appropriate signage.
14. Any pinch-points/bottle necks are managed accordingly.
15. Pupils will remain in classrooms with exceptions of break/lunch times and toilet breaks.
16. Pupils will be briefed regularly regarding observing social distancing guidance whilst circulating.
17. The lift will only be used unless absolutely necessary and will be wiped down before and after use.
18. Where it is safe to do so, additional staff will be in place to supervise movement on corridors.

FCAT

1. Learning environments to be properly cleaned at the start or end of each day and properly cleaned between uses by different groups of children. Blackpool Gateway Academy SLT to agree with the Site Supervisor cleaning schedule and frequency for the academy in line with operational requirements (e.g. what needs to be cleaned, how it should be cleaned and how often (door handles, toilets, canteen tables and bannisters). This should be at the start and end of each day as well as more regularly than normal throughout the day across school. **Cleaning protocol from FCAT Premises to be issued to assist with this.**
2. Clean surfaces that children and young people are touching, such as toys, books, desks, chairs, tables, doors, sinks, toilets, light switches, bannisters, more regularly than normal.
3. Shared materials and surfaces should be cleaned and disinfected more frequently than normal.
4. Ensure that sufficient handwashing facilities are available across the school. Where a sink is not nearby, provide hand sanitiser.
5. Children and staff to wash hands/use sanitiser frequently throughout the day - wash hands thoroughly for 20 seconds with running water and soap and dry them thoroughly or use alcohol hand rub or sanitiser ensuring that all parts of the hands are covered.
6. Children and young people should clean their hands on arrival at the setting, before and after eating, after sneezing or coughing, should be encouraged not to touch their mouth, eyes and nose, should use a tissue or elbow to cough or sneeze and use bins for tissue waste ('catch it, bin it, kill it').
7. Ensure there are lidded bins in break/playtime and lunchtime areas for tissues and these are emptied throughout the day. Lidded bins throughout the Academy.
8. Display signage across school regarding hand washing to reinforce, encourage and promote this for staff and children.
9. Full stock of soap and sanitiser to be maintained in school at all times.
10. Disinfectant trigger spray and PPE in each learning environment (gloves, masks, aprons for use if required).
11. Prop doors open, where safe to do so (bearing in mind fire safety and safeguarding), to limit use of door handles and aid ventilation.
12. Learning planned so resources are individual and not shared – or on white board.
13. Resources on tables ready for learning and not distributed during the learning.
14. Use plastic packets (zippy) bags used for individual resources.
15. Limit the amount of shared resources that are taken home and limit exchange of take-home resources between children, young people and staff. Children cannot bring any resources from home and no resources taken home from school, apart from a reading book to reduce the risk of cross contamination.
16. Seek to prevent the sharing of stationery and other equipment where possible unless cleaned in between.
17. Practical lessons can go ahead if equipment can be cleaned thoroughly and properly cleaned between different groups of children.
18. Children keep to their desks when in the learning environment.
19. Where possible seat children at the same desk each day if they attend on consecutive days.
20. Equipment can be shared within bubbles but must be thoroughly cleaned (or left for 72 hours) if it is to be used in another bubble.

FCAT

1. Follow the COVID-19: cleaning of non-healthcare settings guidance
2. School to be properly cleaned at the start and end of each day and properly cleaned between uses by different groups of children. Blackpool Gateway Academy SLT to agree with the Site Supervisor cleaning schedule and frequency for the academy in line with operational requirements (e.g. what needs to be cleaned, how should it be cleaned and how often). This should be at the start and end of each day as well as more regularly than normal throughout the day across school. **Cleaning protocol from FCAT Premises to be issued to assist with this.**
3. Clean surfaces that children and young people are touching, such as toys, books, desks, chairs, tables, doors, sinks, toilets, light switches, bannisters, more regularly than normal.
4. Shared materials and surfaces should be cleaned and disinfected more frequently than normal.
5. PPE will be worn by all cleaning staff in accordance with COVID-19: cleaning of non-healthcare settings guidance.
6. Remove soft furnishings, soft toys and toys that are hard to clean (such as those with intricate parts). Cleaning schedule / Cleaning RA
7. Deep clean of the academy before wider re-opening.
8. To ensure effective stock control and sufficient stock of cleaning materials, hygiene materials and PPE in line with cleaning schedule.
9. Ensure there are lidded bins across school for tissues and these are emptied throughout the day.
10. All items listed above are within the Cleaning RA.
11. Disinfectant trigger spray and PPE in each learning environment (gloves, masks, aprons for use if required).

Remaining level of risk		Consider level of risk following use of control measures

Ensure full and complete first aid stock on site at all times.</div> <div>3. Ensure FCAT First Aid, Accident Administering medicines and EHP Policies are followed.</div>			

FCAT

4. Staff should wear PPE if a child or young person becomes unwell with symptoms of coronavirus while in their setting and needs direct personal care until they can return home. A fluid-resistant surgical face mask should be worn by the supervising adult if a distance of 1 metres ideally (2metres) cannot be maintained. If contact with the child or young person is necessary, then disposable gloves, a disposable apron and a fluid-resistant surgical face mask should be worn by the supervising adult. If a risk assessment determines that there is a risk of splashing to the eyes, for example from coughing, spitting, or vomiting, then eye protection should also be worn.
5. Staff should wear PPE for children, young people and students whose care routinely already involves the use of PPE due to their intimate care needs. They should continue to receive their care in the same way.
6. Full and complete stock of PPE on site at all times
7. Some pupils with complex needs will struggle to maintain as good respiratory hygiene as their peers, for example those who spit uncontrollably or use saliva as a sensory stimulant. Staff should wear PPE when supporting pupils with complex needs as outlined above.

Remaining level of risk	Consider level of risk following use of control measures

2. At least one SLT member of staff on site every day for staff to share any questions or concerns with
3. Continued access for staff to remote wellbeing support from qualified professionals via Line Manager or **teamfcatawellbeing.fcata.org.uk** monitored by HR daily.
4. Ongoing signposting of staff to online/phone wellbeing support.
5. Ongoing review of COVID-19 risk assessment to ensure control measures are implemented and updated if necessary to maintain a safe working environment.
6. To promote the Team FCAT Work and Wellbeing charter.
7. Set up of trust-wide e-mail address for staff to share/report and health and safety concerns relating to COVID-19.
8. The Headteacher (or delegated senior leader) will operate weekly with school based union representatives in order for any concerns to be addressed.
9. If a member of staff wishes to wear items of PPE out of their own personal preference e.g. a face covering to come into work – we will be supportive of their decision. If a member of staff wishes to wear an item of PPE out of personal choice – the member of staff should provide their own PPE and this should not be provided by school/taken from school supplies

Remaining level of risk		Consider level of risk following use of control measures	
HIGH	MEDIUM	LOW	NEGLIGIBLE

Issue that could cause harm: 16	Risk of COVID-19 illness to extremely clinically vulnerable and clinically vulnerable children staff and family members.
--	---

Existing level of risk			
HIGH	MEDIUM	LOW	NEGLIGIBLE

How to manage it (control measures)	List your control measures required to reduce risk – add appropriate detail about the type and location of controls
--	---

1. Children who are extremely clinically vulnerable should not attend school.
2. Children who live with someone who is extremely clinically vulnerable are advised they only attend an education or childcare setting if stringent social distancing can be adhered to and they are able to understand and follow those instructions.

FCAT

3. Clinically vulnerable (but not clinically extremely vulnerable) people are those considered to be at a higher risk of severe illness from coronavirus (COVID-19). A small minority of children will fall into this category, and parents should follow medical advice if their child is in this category.
4. FCAT still wishes to support staff in continuing to work from home, if able to do so, balancing this with increasing operational requirements.
5. Staff who are extremely clinically vulnerable (those who have received a letter from Government or clinician advising them to shield) will be advised that they should work from home per guidance on 4th January 2021
6. Staff who are clinically vulnerable should return to work where possible. Education and childcare settings should endeavour to support this, for example by asking staff to support remote education, carry out lesson planning or other roles which can be done from home. If clinically vulnerable individuals cannot work from home, they should be offered the safest available on-site roles, staying 2 metres away from others wherever possible, although the individual may choose to take on a role that does not allow for this distance if they prefer to do so. If they have to spend time within 2 metres of other people, settings must carefully assess and discuss with them whether this involves an acceptable level of risk.
7. The government are currently undertaking an official review of whether factors including ethnicity can affect people's vulnerability to COVID-19. The government has said this is because a disproportionately higher number of people have died from COVID-19 from black, Asian and minority ethnic (BAME) backgrounds. As such the trust will undertake individual risk assessments for any staff who are within the high risk category and/or BAME background as outlined in bullet point 6 above.
8. Staff and children living with those that are extremely clinically vulnerable can attend school and work with children or adults adhering to these risk assessments.

Following the reduction in the prevalence of coronavirus (COVID-19) and relaxation of shielding measures from 1 August, we expect that most staff will attend school.

It remains the case that wider government policy advises those who can work from home to do so. We recognise this will not be applicable to most school staff, but where a role may be conducive to home working, for example some administrative roles, school leaders should consider what is feasible and appropriate.

School leaders should be flexible in how those members of staff are deployed to enable them to work remotely where possible or in roles in school where it is possible to maintain social distancing.

People who live with those who are clinically extremely vulnerable or clinically vulnerable can attend the workplace.

Staff who are clinically vulnerable or extremely clinically vulnerable

The measures outlined in the DfE guidance for full opening of schools (page 1 of this risk assessment) will be applied and will mitigate risks significantly for staff, including those who are clinically vulnerable. This will allow most staff to return to the workplace, although we advise those in the most at risk categories to take particular care while community transmission rates continue to fall. Parents of pupils and staff with significant risk factors should discuss their concerns with pastoral staff and senior leaders.

FCAT still wishes to support staff in continuing to work from home, if able to do so, balancing this with increasing operational requirements.

1. Staff who are extremely clinically vulnerable will be advised to work from home following guidance on 4th January 2021.
2. Staff who are clinically vulnerable should return to work where possible. Government advice is available for colleagues in these categories and those who are pregnant. Education and childcare settings should endeavour to support flexible deployment where possible.
3. The government is currently undertaking an official review of whether factors including ethnicity can affect people's vulnerability to COVID-19. The government has said this is because a disproportionately higher number of people have died from COVID-19 from black, Asian and minority ethnic (BAME) backgrounds. As such the trust will undertake individual risk assessments for any staff who are within the high risk category and/or BAME background as outlined in bullet point 6 above.
4. Staff and children living with those that are clinically vulnerable can attend school and work with children or adults adhering to this risk assessment.

Issue that could cause harm: 21		Risk of a person coming into work/school with COVID-19 which could increase the risk and rate of transmission of coronavirus (COVID-19)	
Existing level of risk			
HIGH	MEDIUM	LOW	NEGLIGIBLE
How to manage it (control measures)		List your control measures required to reduce risk – add appropriate detail about the type and location of controls	
<div>1. Tell staff, children, young people, parents, carers or any visitors, such as suppliers, not to enter the education or childcare setting if they are displaying any symptoms of coronavirus (following the COVID-19: guidance for households with possible coronavirus infection).</div> <div>2. If anyone becomes unwell with a new, continuous cough or a high temperature in an education or childcare setting, they must be sent home and advised to follow the COVID-19: guidance for households with possible coronavirus infection guidance.</div> <div>3. Where a child, young person or staff member tests positive, the academy will contact the local health protection team who will investigate and provide further guidance. The health protection team will provide definitive advice on who must be sent home.</div> <div>4. Proper cleaning of the area where anyone has become unwell with symptoms of COVID-19 should take place.</div> <div>5. If a child is awaiting collection, they should be moved, if possible, to a room where they can be isolated behind a closed door, depending on the age of the child and with appropriate adult supervision if required. Ideally, a window should be opened for ventilation. If it is not possible to isolate them, move them to an area which is at least 2 metres away from other people.</div> <div>6. If they need to go to the bathroom while waiting to be collected, they should use a separate bathroom if possible. The bathroom should be cleaned and disinfected using standard cleaning products before being used by anyone else.</div> <div>7. PPE should be worn by staff caring for the child while they await collection if a distance of 2 metres cannot be maintained (such as for a very young child or a child with complex needs). A fluid-resistant surgical face mask should be worn by the supervising adult if a distance of 1 metres (ideally 2m) cannot be maintained. If contact with the child or young person is necessary, then disposable gloves, a disposable apron and a fluid-resistant surgical face mask should be worn by the supervising adult. If a risk assessment determines that there is a risk of splashing to the eyes, for example from coughing, spitting, or vomiting, then eye protection should also be worn.</div> <div>8. Academy SLT should ensure any confirmed cases of COVID-19 following a positive test result should be notified to Jane McCumiskey (FCAT COO) to ensure that the FCAT procedure in the event of this can be followed.</div> <div>9. When the child, young person or staff member tests negative, they can return to their setting and the fellow household members can end their self-isolation.</div>			

FCAT

10. Where the child, young person or staff member tests positive, the rest of their class or group within their childcare or education setting should be sent home and advised to self-isolate for 14 days. The other household members of that wider class or group do not need to self-isolate unless the child, young person or staff member they live with in that group subsequently develops symptoms.
11. As part of the national test and trace programme, if other cases are detected within the cohort or in the wider setting, Public Health England's local health protection teams will conduct a rapid investigation and will advise schools and other settings on the most appropriate action to take. In some cases a larger number of other children, young people may be asked to self-isolate at home as a precautionary measure – perhaps the whole class, site or year group. Where settings are observing guidance on infection prevention and control, which will reduce risk of transmission, closure of the whole setting will not generally be necessary.

FCAT

people outside their household or support bubble, or a 'one metre plus' approach where this is not possible, will not apply from the autumn term on dedicated transport. The approach to dedicated transport should align as far as possible with the principles underpinning the system of controls set out in this document and with the approach being adopted for your school. It is important to consider:

- how pupils are grouped together on transport, where possible this should reflect the bubbles that are adopted within school
- use of hand sanitiser upon boarding and/or disembarking
- additional cleaning of vehicles
- organised queuing and boarding where possible
- distancing within vehicles wherever possible
- the use of face coverings for children over the age of 11, where appropriate, for example, if they are likely to come into very close contact with people outside of their group or who they do not normally meet

<p>'We continue to advise against domestic (UK) overnight and overseas educational visits at this stage see coronavirus: travel guidance for educational settings. In the autumn term, schools can resume non-overnight domestic educational visits. These trips should include any trips for pupils with SEND connected with their preparation for adulthood (for example, workplace visits, travel training etc.). This should be done in line with protective measures, such as keeping children within their consistent group, and the COVID-secure measures in place at the destination. Schools should also make use of outdoor spaces in the local area to support delivery of the curriculum. As normal, schools should undertake full and thorough risk assessments in relation to all educational visits to ensure they can be done safely. As part of this risk assessment, schools will need to consider what control measures need to be used and ensure they are aware of wider advice on visiting indoor and outdoor venues. Schools should consult the health and safety guidance on educational visits when considering visits'.</p> <p>#For any school that uses school buses - Pupils on dedicated school services do not mix with the general public on those journeys and tend to be consistent. This means that the advice for passengers on public transport to adopt a social distance of two metres from people outside their household or support bubble, or a 'one metre plus' approach where this is not possible, will not apply from the autumn term on dedicated transport. The approach to dedicated transport should align as far as possible with the principles underpinning the system of controls set out in this document and with the approach being adopted for your school. It is important to consider:</p> <ol style="list-style-type: none">1. how pupils are grouped together on transport, where possible this should reflect the bubbles that are adopted within school2. use of hand sanitiser upon boarding and/or disembarking3. additional cleaning of vehicles4. organised queuing and boarding where possible			

FCAT

5. distancing within vehicles wherever possible
6. the use of face coverings for children over the age of 11, where appropriate, for example, if they are likely to come into very close contact with people outside of their group or who they do not normally meet
7. Where using transport providers e.g. school buses; Academy SLT to review the transport provider's control measures for the risk of COVID-19 and to confirm if you are satisfied with these if children or your people from the academy will be using the transport. Please discuss any questions or concerns with Gary Fletcher, FCAT Health and Safety Lead.

How to manage it (control measures)		List your control measures required to reduce risk – add appropriate detail about the type and location of controls	
<ul style="list-style-type: none">Schools following government recommended control measures set out in the school’s protective measures risk assessment.At Blackpool Gateway Academy, mass testing of staff will take place twice a week (Wednesday and Sunday evening/Monday morning) and staff will take these tests at home. These tests are to be taken 3-4 days apart.Tests to be taken before staff come into work.Staff results sent to a specific Gateway email and to be recorded on a staff register and recorded by the person online. This will support identifying staff with positive results for contact tracing and managing stock and distribution.Those with symptoms are also expected to order a test online or visit a test site to take a polymerase chain reaction (PCR) test to check if they have the virus. They will then follow the current government guidelines.Testing is not mandatory for staff and staff do not need to provide proof of a negative test result to attend school or nursery in person, although participation in testing is strongly encouraged.The asymptomatic testing programme does not replace the current testing policy for those with symptoms. Anyone with symptoms (even if they recently had a negative LFD test result), should still self-isolate immediately according to government guidelines
