Coronavirus (COVID-19) Implementing protective measures within FCAT

COVID-19 Risk Assessment

Academy	WESTCLIFF
Activity / Procedure	Managing the risk and rate of transmission of coronavirus (COVID-19) and variants Inc Lockdown, Closure, Roadmap of Reopening, KVV, Students, Staff, Visitors and all Stakeholders. Operational Guidance from 10th May 2021
Assessment date	17th May 2021
Review date	To be reviewed and updated frequently in light of any updates to existing government guidance or any new guidance.

Identified groups at risk	
Employees	YES
Children	YES
Visitors	YES
Contractors	YES

This risk assessment does not supersede any legal obligations relating to health and safety, employment or equalities.

This risk assessment is completed based on the guidance and information available on the 10th May 2021. This Risk assessment will be updated to reflect any changes in published guidance.

FCAT

System of controls

This is the set of actions schools must take. They are grouped into 'prevention' and 'response to any infection' and are outlined in more detail within the guidance:

[Schools coronavirus \(COVID-19\) operational guidance](#)

Prevention

You must always:

- 1) Minimise contact with individuals who are required to self-isolate by ensuring they do not attend the school.
- 2) Ensure face coverings are used in recommended circumstances.
- 3) Ensure everyone is advised to clean their hands thoroughly and more often than usual.
- 4) Ensure good respiratory hygiene for everyone by promoting the 'catch it, bin it, kill it' approach.
- 5) Maintain enhanced cleaning, including cleaning frequently touched surfaces often, using standard products such as detergents.
- 6) Consider how to minimise contact across the site and maintain social distancing wherever possible.
- 7) Keep occupied spaces well ventilated.

In specific circumstances:

- 8) Ensure individuals wear the appropriate personal protective equipment (PPE) where necessary.
- 9) Promote and engage in asymptomatic testing, where available.

Response to any infection

You must always:

- 10) Promote and engage with the NHS Test and Trace process.
- 11) Manage and report confirmed cases of coronavirus (COVID-19) amongst the school community.
- 12) Contain any outbreak by following local health protection team advice.

FCAT

PROTECTIVE MEASURES AND CONTROLS

This outlines the key protective measures the academy will take to deliver the essential controls identified 10th May 2021 [Schools coronavirus \(COVID-19\) operational guidance](#)

Further controls are set out in this risk assessment.

No.	Control	Actions
1	<p>Minimise contact with individuals who are required to self-isolate by ensuring they do not attend the school</p>	<p>When an individual develops coronavirus (COVID-19) symptoms or has a positive test Pupils, staff and other adults must not come into the school if:</p> <ul style="list-style-type: none"> • they have one or more coronavirus (COVID-19) symptoms • a member of their household (including someone in their support bubble or childcare bubble if they have one) has coronavirus (COVID-19) symptoms • they are required to quarantine having recently visited countries outside the Common Travel Area • they have had a positive test <p>They must immediately cease to attend and not attend for at least 10 days from the day after:</p> <ul style="list-style-type: none"> • the start of their symptoms • the test date if they did not have any symptoms but have had a positive test (whether this was a Lateral Flow Device (LFD) or Polymerase Chain Reaction (PCR) test) <p>You must follow this process and ensure everyone onsite or visiting is aware of it. Anyone told to isolate by NHS Test and Trace or by their public health protection team has a legal obligation to self-isolate, but you may leave home to avoid injury or illness or to escape risk of harm. More information can be found on NHS Test and Trace: how it works.</p> <p>If anyone in your school develops a new and continuous cough or a high temperature, or has a loss of, or change in, their normal sense of taste or smell (anosmia), you:</p> <ul style="list-style-type: none"> • must send them home to begin isolation - the isolation period includes the day the symptoms started and the next 10 full days • advise them to follow the guidance for households with possible or confirmed coronavirus (COVID-19) infection • advise them to arrange to have a test as soon as possible to see if they have coronavirus (COVID-19) <p>Other members of their household (including any siblings and members of their support or childcare bubble if they have one) should self-isolate. Their isolation period includes the day symptoms started for the first person in their household, or the day their test was taken if they did not have symptoms, whether this was a Lateral Flow Device (LFD) or Polymerase Chain Reaction (PCR) test), and the next 10 full days. If a member of the household starts to display symptoms while self isolating they will need to restart the 10 day isolation period and book a test.</p> <p>If anyone tests positive whilst not experiencing symptoms but develop symptoms during the isolation period, they must restart the 10 day isolation period from the day they developed symptoms.</p> <p>In non-residential schools, if a pupil displays coronavirus (COVID-19) symptoms, or has a positive test, while at their school they should avoid using public transport and, wherever possible, be collected by a member of their family or household.</p> <p>In exceptional circumstances, if parents or carers cannot arrange to have their child collected, if age-appropriate and safe to do so the child should walk, cycle or scoot home following a positive test result. If this is not possible, alternative arrangements may need to be organised by the school. The local authority may be able to help source a suitable vehicle which would provide appropriate protection for the driver, who must be made aware that the individual has tested positive or is displaying symptoms.</p>

FCAT

If a pupil is awaiting collection:

- they should be moved, if possible, to a room where they can be isolated behind a closed door, depending on the age and needs of the pupil, with appropriate adult supervision if required
- a window should be opened for fresh air ventilation if it is safe to do so
- if it is not possible to isolate them, move them to an area which is at least 2 metres away from other people
- if they need to go to the bathroom while waiting to be collected, they should use a separate bathroom if possible - the bathroom must be cleaned and disinfected using standard cleaning products before being used by anyone else

• personal protective equipment (PPE) must be worn by staff caring for the pupil while they await collection if a distance of 2 metres cannot be maintained (such as for a very young child or a child with complex needs) - more information on PPE use can be found in the safe working in education, childcare and children's social care settings guidance

In an emergency, call 999 if someone is seriously ill or injured or their life is at risk. Anyone with coronavirus (COVID-19) symptoms should not visit the GP, pharmacy, urgent care centre or a hospital, unless advised to.

If a pupil in a boarding school shows symptoms, they should initially self-isolate in their residential setting household. Most will benefit from self-isolating in their boarding house so that their usual support can continue. Others will benefit more from self-isolating in their home.

The individual should not use public transport if they are symptomatic. If arranging their return to their family home to isolate, schools should follow advice on transport arrangements in the safe working in education, childcare and children's social care settings guidance.

Public Health England (PHE) has good evidence that routinely taking the temperature of pupils is not recommended as this is an unreliable method for identifying coronavirus (COVID-19).

Further information is available on how to manage and report confirmed cases of coronavirus (COVID-19) amongst the school community.

When an individual has had close contact with someone with coronavirus (COVID-19) symptoms

Any member of staff who has provided close contact care to someone with symptoms, regardless of whether they are wearing PPE, and all other members of staff or pupils who have been in close contact with that person, do not need to go home to self-isolate unless:

- the symptomatic person subsequently tests positive
- they develop symptoms themselves (in which case, they should self-isolate immediately and arrange to have a test)
- they are requested to do so by NHS Test and Trace or the Public Health England (PHE) advice service (or PHE local health protection team if escalated)
- they have tested positive from an LFD test as part of a community or worker programme

Everyone must wash their hands thoroughly for 20 seconds with soap and running water or use hand sanitiser after any contact with someone who is unwell. The area around the person with symptoms must be cleaned after they have left, to reduce the risk of passing the infection on to other people. See the guidance on the cleaning of non-healthcare settings.

If you are contacted by NHS Test and Trace or your local health protection team and told to self-isolate because you have been a close contact of a positive case, you have a legal obligation to do so.

FCAT

<p>2</p>	<p>Ensure face coverings are used in recommended circumstances</p>	<p>Based on the current state of the pandemic and the positive progress being made, it is no longer necessary to recommend the additional precautionary face covering measures put in place from the 8 March.</p> <p>From 17 May, in line with Step 3 of the roadmap, face coverings will no longer be recommended for pupils in classrooms or communal areas in all schools. Face coverings will also no longer be recommended for staff in classrooms.</p> <p>In all schools we continue to recommend that face coverings should be worn by staff and visitors in situations outside of classrooms where social distancing is not possible (for example, when moving around in corridors and communal areas).</p> <p>Where schools are delivering education and training, including extra-curricular activities and wraparound childcare, in a community setting (for example, library or community centre), staff and pupils will be exempt from the legal requirement to wear a face covering if they are in a private room or the premises has been exclusively hired for the sole use of its pupils and staff.</p> <p>The reintroduction of face coverings for pupils, students or staff may be advised for a temporary period in response to particular localised outbreaks, including variants of concern. In all cases, any educational drawbacks should be balanced with the benefits of managing transmission. The Local Action Committee structure (bronze/silver/gold) should be used in such circumstances to re-introduce the use of face coverings. Immediate outbreak response (at the level of individual settings or a cluster of settings) remains for local directors of public health to advise on.</p> <p>Children and young people aged 11 and over must still wear a face covering on public transport. In accordance with advice from PHE, they must also wear a face covering when travelling on dedicated transport to secondary school or college. This does not apply to children and young people who are exempt from wearing face coverings. The use of face coverings may have a particular impact on those who rely on visual signals for communication. Those who communicate with or provide support to those who do, are exempt from any recommendation to wear face coverings in education settings or requirements in public places.</p> <p>Where our guidance recommends face coverings, transparent face coverings, which may assist communication with someone who relies on lip reading, clear sound or facial expression to communicate, can also be worn. Transparent face coverings may be effective in reducing the spread of COVID-19. However, the evidence to support this is currently very limited. Face coverings (whether transparent or cloth) should fit securely around the face to cover the nose and mouth and be made with a breathable material capable of filtering airborne particles.</p> <p>The main benefit from a transparent face covering is that they can aid communication, for example enabling lip-reading or allowing for the full visibility of facial expressions, but this must be considered alongside the comfort and breathability of a face covering which contains plastic which may mean that the face covering is less breathable than layers of cloth. More broadly, schools have a duty to make reasonable adjustments for disabled pupils and students, to support them to access education successfully. The following is a nonexhaustive list which provides examples of possible adjustments where face coverings are recommended:</p> <ul style="list-style-type: none">the provision and effective use of assistive listening devices, such as radio aidsan increased focus on the listening environment, minimising all unnecessary background noise - steps should be taken so that children with hearing loss are taught in classrooms with the best possible acoustic conditionsallowing the use of speech-recognition apps on mobile devices and tablets in classrooms, taking into account possible variations in the effectiveness of such apps in different classroom situationsadditional communication support, including remote speech-to-text reporters or sign language interpreters <p>Where appropriate, education settings should discuss with pupils and parents the types of reasonable adjustments that are being considered to support an individual.</p> <p>Face visors or shields can be worn by those exempt from wearing a face covering but they are not an equivalent alternative in terms of source control of virus transmission. They may protect the wearer against droplet spread in specific circumstances but are unlikely to be effective in preventing the escape of smaller respiratory particles when</p>
----------	---	---

FCAT

		<p>used without an additional face covering. They should only be used after carrying out a risk assessment for the specific situation and should always be cleaned appropriately.</p> <p>Exemptions:</p> <p>Where face coverings are recommended there are some circumstances where people may not be able to wear a face covering.</p> <p>This includes (but is not limited to):</p> <ul style="list-style-type: none"> people who cannot put on, wear or remove a face covering because of a physical or mental illness or impairment, or disability where putting on, wearing or removing a face covering will cause people severe distress people speaking to or providing assistance to someone who relies on lip reading, clear sound or facial expressions to communicate to avoid harm or injury, or the risk of harm or injury, to the wearer or others – including if it would negatively impact on people’s ability to exercise or participate in a strenuous activity <p>The same exemptions will apply in education and childcare settings and you should be sensitive to those needs, noting that some people are less able to wear face coverings and that the reasons for this may not be visible to others.</p> <p>Access to face coverings</p> <p>Due to the use of face coverings in wider society, staff and pupils are already likely to have access to face coverings.</p> <p>You should have a small contingency supply available for people who:</p> <ul style="list-style-type: none"> are struggling to access a face covering are unable to use their face covering as it has become damp, soiled or unsafe have forgotten their face covering <p>Safe wearing and removal of face coverings</p> <p>You should have a process for when face coverings are worn within your school and how they should be removed, for example when pupils arrive at school wearing them. You should communicate this process clearly to pupils, staff and visitors and allow for adjustments to be made for those who may be distressed if required to remove a face covering against their wishes.</p> <p>Safe wearing of face coverings necessitates:</p> <ul style="list-style-type: none"> cleaning hands before and after touching face coverings, – including to remove or put them on safely storing face coverings in individual, sealable plastic bags between use not touching the front of face coverings during use or when removing them <p>Where a face covering becomes damp, it should not be worn, and the face covering should be replaced carefully. Staff may consider bringing a spare face covering to wear if their face covering becomes damp during the day.</p> <p>If pupils arrive at school wearing a face covering you must instruct pupils to:</p> <ul style="list-style-type: none"> not touch the front of their face covering when removing it dispose of temporary face coverings in a ‘black bag’ waste bin (not recycling bin) place reusable face coverings in a plastic bag they can take home with them wash their hands again before heading to their classroom
3	<p>Ensure everyone is advised to clean their hands thoroughly and more often than usual</p>	<p>COVID-19 is an easy virus to kill when it is on skin. This can be done with soap and water or hand sanitiser. You must ensure that pupils clean their hands regularly, including:</p> <ul style="list-style-type: none"> when they arrive at the school when they return from breaks when they change rooms before and after eating <p>Consider how often pupils and staff will need to wash their hands and incorporate time for this in timetables or lesson plans.</p> <p>Staff working with pupils who spit uncontrollably may want more opportunities to wash their hands than other staff.</p> <p>Pupils who use saliva as a sensory stimulant or who struggle with ‘catch it, bin it, kill it’ may also need more opportunities to wash their hands.</p> <p>Continue to help pupils with complex needs to clean their hands properly.</p> <p>Frequent and thorough hand cleaning should now be regular practice. You should consider:</p>

FCAT

		<p>whether you have enough hand washing or hand sanitiser stations available so that all pupils and staff can clean their hands regularly</p> <p>if you need to supervise hand sanitiser use given the risks around ingestion – skin friendly skin cleaning wipes can be used as an alternative</p> <p>building these routines into school culture, supported by behaviour expectations and helping ensure younger pupils and those with complex needs understand the need to follow them</p>
4	<p>Ensure good respiratory hygiene for everyone by promoting the ‘catch it, bin it, kill it’ approach</p>	<p>The ‘catch it, bin it, kill it’ approach continues to be very important. Make sure enough tissues and bins are available to support pupils and staff to follow this routine. As with hand cleaning, you must ensure younger pupils and those with complex needs are helped to get this right, and all pupils understand that this is now part of how the setting operates. The e-Bug coronavirus (COVID-19) website contains free resources for schools, including materials to encourage good hand and respiratory hygiene.</p> <p>Some pupils with complex needs will struggle to maintain as good respiratory hygiene as their peers, for example those who spit uncontrollably or use saliva as a sensory stimulant. This should be considered in risk assessments in order to support these pupils and the staff working with them and is not a reason to deny these pupils face-to-face education.</p>
5	<p>Maintain enhanced cleaning, including cleaning frequently touched surfaces often, using standard products such as disinfectants / detergents</p>	<p>In line with the risk assessment and timetabling of the day, put in place and maintain an enhanced cleaning schedule. This should include:</p> <ul style="list-style-type: none"> • more frequent cleaning of rooms or shared areas that are used by different groups • frequently touched surfaces being cleaned more often than normal • cleaning toilets regularly • encouraging pupils to wash their hands thoroughly after using the toilet • if your site allows it, allocating different groups their own toilet blocks <p>PHE has published guidance on the cleaning of non-healthcare settings. This contains advice on the general cleaning required in addition to the existing advice on cleaning when there is a suspected case.</p>
6	<p>Minimise contact between individuals and maintain social distancing wherever possible.</p>	<p>Minimising contacts and mixing between people reduces transmission of COVID-19. This is important in all contexts, and you must consider how to implement this. You must do everything possible to minimise contacts and mixing while delivering a broad and balanced curriculum.</p> <p>The overarching principle to apply is reducing the number of contacts between pupils and staff. This can be achieved through keeping groups separate (in ‘bubbles’) and through maintaining distance between individuals. These are not alternative options and both measures will help, but the balance between them will change depending on the:</p> <ul style="list-style-type: none"> pupil’s ability to distance layout of the building feasibility of keeping distinct groups separate while offering a broad curriculum <p>How to group pupils</p> <p>Consistent groups reduce the risk of transmission by limiting the number of pupils and staff in contact with each other to only those within the group.</p> <p>Maintaining distinct groups or ‘bubbles’ that do not mix makes it quicker and easier in the event of a positive case to identify those who may need to self-isolate and to keep that number as small as possible.</p> <p>When using larger groups, the other measures from the system of controls become even more important to minimise:</p> <ul style="list-style-type: none"> transmission risks the numbers of pupils and staff who need to self-isolate <p>Younger pupils and those with complex needs will not be able to maintain social distancing and it is acceptable for them not to distance within their group.</p> <p>Using small groups can:</p>

FCAT

restrict the normal operation of education present educational and logistical challenges
You will need to consider:
the cleaning and use of shared spaces, such as:
playgrounds / boarding houses / dining halls / toilets/ the provision of specialist teaching and therapies

Assess your circumstances and try to implement 'bubbles' of an appropriate size to achieve the greatest reduction in contact and mixing. Make sure this will not affect the quality and breadth of teaching or access for support and specialist staff and therapists. Whatever the size of the group, they should be kept apart from other groups where possible. Encourage pupils to keep their distance within groups. Try to limit interaction, sharing of rooms and social spaces between groups as much as possible.

Both the approaches of separating groups and maintaining distance are not 'all or nothing' options and will still bring benefits, even if partially implemented.

You may keep pupils in their class groups for most of the classroom time, but also allow mixing in wider groups for:
specialist teaching/ wraparound care/ transport / boarding pupils who may be in one group residentially and another during the school day
Siblings may also be in different groups.

All teachers and other staff can operate across different classes and year groups to facilitate the delivery of the timetable and specialist provision. Where staff need to move between groups, they should try and keep their distance from pupils and other staff as much as they can, ideally 2 metres from other adults. Try to minimise the number of interactions or changes wherever possible.

Measures within the classroom

Maintaining a distance between people while inside and reducing the amount of time they are in face-to-face contact lowers the risk of transmission. There is strong public health advice that staff in secondary schools maintain distance from their pupils, staying at the front of the class, and away from their colleagues where possible. Ideally, adults should maintain 2-metre distance from each other and from children. We know that this is not always possible, particularly when working with pupils with complex needs, or those who need close contact care. Provide educational and care support for these pupils as normal, with other increased hygiene protocols in place to minimise the risk of transmission.

Where possible, for example with older pupils with less complex needs who can self regulate their behaviours without distress, they should also be supported to maintain distance and not touch staff and their peers. This will not be possible for the youngest children, and some children and young people with complex needs. It may also not be feasible where space does not allow it. Doing this where you can, even some of the time will help.

When staff and pupils cannot maintain distancing, the risk can be reduced by keeping pupils in the smaller, class-sized groups.

You should make small adaptations to the classroom to support distancing where possible. That should include seating pupils side by side and facing forwards, rather than face-to-face or side-on. It might also include moving unnecessary furniture out of the classroom to make more space.

Measures elsewhere

You should avoid large gatherings such as assemblies or collective worship with more than one group.

When timetabling, groups should be kept apart and movement around the school kept to a minimum. While passing briefly in the corridor or playground is low risk, avoid creating busy corridors, entrances and exits. Consider staggered break times and lunch times. Make sure you allow time for cleaning surfaces in the dining hall between groups.

You should also plan how shared staff spaces are set up and used to help staff to distance from each other.

You should minimise the use of staff rooms, although staff must still have a break of a reasonable length during the day.

Measures for arriving at, and leaving the setting

Consider staggered starts or adjusting start and finish times to keep groups apart as they arrive and leave.

FCAT

Staggered start and finish times should not reduce the amount of overall teaching time. A staggered start may include:

condensing or staggering free periods or break time but retaining the same amount of teaching time

keeping the length of the day the same but starting and finishing later to avoid busy periods

You should consider how to communicate any changes to parents. Remind them about the process that has been agreed for drop off and collection, including not to:

gather at the gates come onto the site without an appointment

Travelling to the setting

Pupils and staff may use public transport where necessary, but we encourage them to walk, cycle or scoot to and from school wherever it is possible and safe to do so. Where pupils and staff need to use public transport, they should follow the safer travel guidance for passengers.

The transport to schools and other places of education guidance requires those involved in the provision of dedicated transport to schools to identify the risks. You should adopt measures to address those risks in a way that works in the local circumstances.

Distancing should be maximised and the mixing of groups should be minimised where possible and practical.

People aged 11 and over must wear a face covering when travelling on public transport. In accordance with advice from PHE, they must also wear a face covering when travelling on dedicated transport to secondary school. People who are exempt do not need to wear a face covering.

Other considerations

Some pupils with SEND (whether with EHC plans or on SEN support) will need specific help and preparation for the changes to routine that these measures will involve. Staff should plan to meet these needs, for example using social stories.

To make sure pupils with medical conditions are fully supported, work with:

local authorities, health professionals, regional schools' commissioners, other services

Use individual healthcare plans to help pupils receive an education in line with their peers. In some cases, the pupil's medical needs will mean this is not possible, and educational support will require flexibility. Further information is available in the guidance on supporting pupils at school with medical conditions.

Specialists, therapists, clinicians and other support staff for pupils with SEND should provide interventions as usual. They, as well as supply teachers, peripatetic teachers or other temporary staff, can move between settings. They should ensure they minimise contact and maintain as much distance as possible from other staff. Such specialists will be aware of the PPE most appropriate for their role. Schools should consider how to manage other visitors to the site, such as contractors, catering staff and deliveries, as well as cleaning staff on site who may be working throughout the school and across different groups. This will require close co-operation between schools and the other relevant employers.

You should have discussions with key contractors about the school's control measures and ways of working. They should ensure site guidance on physical distancing and hygiene is explained to visitors on or before arrival. Where visits can happen safely outside of school hours, they should. A record should be kept of all visitors with sufficient detail to support rapid contact tracing if required by NHS Test and Trace.

As normal, you should engage with your local immunisation providers to provide routine immunisation programmes on-site, ensuring these will be delivered in keeping with the school's control measures. These programmes are essential for children's health and wellbeing and can also provide benefits for staff.

Where a pupil routinely attends more than one setting on a part-time basis, for example, because they are dual registered at a mainstream school and a special setting, the settings should work through the system of controls collaboratively, enabling them to address any risks identified and allowing them to jointly deliver a broad and balanced curriculum for the pupil. Pupils should be able to continue attending both settings. While some adjustment to arrangements may be required, pupils in this situation should not be isolated as a solution to the risk of greater contact except when required by specific public health advice.

FCAT

		<p>Equipment For individual and very frequently used equipment, such as pencils and pens, staff and pupils should have their own items. Classroom-based resources, such as books and games, can be used and shared within the bubble. These should be cleaned regularly, along with all frequently touched surfaces. Resources that are shared between classes or bubbles, such as sports, arts, and science equipment should be cleaned frequently. When sharing equipment between different bubbles, you should either: clean it before it is moved between bubbles allow them to be left unused for a period of 48 hours (72 hours for plastics) You will need to assess the ability to clean equipment used in the delivery of therapies, for example, physiotherapy equipment or sensory equipment. Determine whether this equipment can withstand cleaning and disinfecting between each use before it is put back into general use. Where cleaning or disinfecting is not possible or practical, resources will have to be either: restricted to one user left unused for a period of 48 hours (72 hours for plastics) between use by different individuals Outdoor playground equipment should be more frequently cleaned than normal. This also applies to resources used inside and outside by wraparound care and out-of-school settings providers. Pupils should limit the amount of equipment they bring into school each day, including essentials such as: lunch boxes, hats and coats, books, stationery, mobile phones Bags are allowed. Pupils and teachers can take books and other shared resources home, although unnecessary sharing should be avoided. Similar rules on hand cleaning, cleaning of the resources and rotation should apply to these resources.</p> <p>Parent pick-up and drop-offs We know that travel to school patterns differ greatly. If those patterns allow, schools should consider staggered starts or adjusting start and finish times to keep groups apart as they arrive and leave school. Staggered start and finish times should not reduce the amount of overall time children spend in school. A staggered start may, for example, include keeping the length of the day the same but starting and finishing later to avoid rush hour. Schools should consider how to communicate this to parents and remind them about the process that has been agreed for drop off and collection, including that gathering at the school entrance and otherwise coming onto the site without an appointment is not allowed.</p>
7	<p>Keeping occupied spaces well ventilated</p>	<p>Good ventilation reduces the concentration of the virus in the air, which reduces the risk from airborne transmission. This happens when people breathe in small particles (aerosols) in the air after someone with the virus has occupied and enclosed area. When your school is in operation, it is important to ensure it is well ventilated and a comfortable teaching environment is maintained. These can be achieved by a variety of measures including: • mechanical ventilation systems – these should be adjusted to increase the ventilation rate wherever possible and checked to confirm that normal operation meets current guidance and that only fresh outside air is circulated. If possible, systems should be adjusted to full fresh air or, if not, then systems should be operated as normal as long as they are within a single room and supplemented by an outdoor air supply • natural ventilation – opening windows (in cooler weather windows should be opened just enough to provide constant background ventilation and opened more fully during breaks to purge the air in the space). Opening internal doors can also assist with creating a throughput of air • natural ventilation – if necessary external opening doors may also be used (as</p>

FCAT

		<p>long as they are not fire doors and where safe to do so) The Health and Safety Executive guidance on air conditioning and ventilation during the coronavirus outbreak and CIBSE coronavirus (COVID-19) advice provides more information. To balance the need for increased ventilation while maintaining a comfortable temperature, consider:</p> <ul style="list-style-type: none"> • opening high level windows in colder weather in preference to low level to reduce draughts • increasing the ventilation while spaces are unoccupied (for example, between classes, during break and lunch, when a room is unused) • providing flexibility to allow additional, suitable indoor clothing – for more information see school uniform • rearranging furniture where possible to avoid direct draughts <p>Heating should be used as necessary to ensure comfort levels are maintained particularly in occupied spaces.</p>
8	<p>Ensure individuals wear the appropriate personal protective equipment (PPE) where necessary</p>	<p>Face coverings are not classified as PPE (personal protective equipment). PPE is used in a limited number of settings to protect wearers against hazards and risks, such as surgical masks or respirators used in medical and industrial settings. A face covering is a covering of any type which covers your nose and mouth. Most staff in schools will not require PPE beyond what they would normally need for their work. If a pupil already has routine intimate care needs that involve the use of PPE, the same PPE should continue to be used.</p> <p>Additional PPE for coronavirus (COVID-19) is only required in a very limited number of scenarios, for example, when:</p> <ul style="list-style-type: none"> • a pupil becomes ill with coronavirus (COVID-19) symptoms, and only then if a 2 metre distance cannot be maintained • performing aerosol generating procedures (AGPs) <p>When working with children and young people who cough, spit or vomit but do not have coronavirus (COVID-19) symptoms, only any PPE that would be routinely worn, should be worn. The guidance on safe working in education, childcare and children’s social care provides more information about preventing and controlling infection. This includes:</p> <ul style="list-style-type: none"> • when and how PPE should be used • what type of PPE to use • how to source it
9	<p>Promote and engage in asymptomatic testing, where available</p>	<p>Rapid testing remains a vital part of our plan to suppress this virus. Schools should follow the guidance set out for their settings:</p> <ul style="list-style-type: none"> • Primary schools, school-based nurseries and maintained nursery schools • Secondary schools and colleges • Specialist settings
10	<p>Promote and engage with the NHS Test and Trace process</p>	<p>Staff members, parents and carers will need to:</p> <ul style="list-style-type: none"> • book a test if they or their child has symptoms - the main symptoms are: <ul style="list-style-type: none"> o a high temperature o a new continuous cough o a loss or change to your sense of smell or taste • self-isolate immediately and not come to school if: <ul style="list-style-type: none"> o they develop symptoms o they have been in close contact with someone who tests positive for coronavirus (COVID-19) o anyone in their household or support or childcare bubble develops symptoms of coronavirus (COVID-19) o they are required to do so having recently travelled from certain other countries

FCAT

		<p>o they have been advised to isolate by NHS test and trace or the PHE local health protection team, which is a legal obligation</p> <ul style="list-style-type: none"> • provide details of anyone they have been in close contact with, if they test positive for coronavirus (COVID-19) or if asked by NHS Test and Trace <p>Polymerase Chain Reactions (PCR) tests for symptomatic testing Booking a polymerase chain reaction (PCR) test through 119 Anyone who displays symptoms of coronavirus (COVID-19) can and should get a test. Tests for symptomatic illness can be booked online through the NHS testing and tracing for coronavirus (COVID-19) website, or ordered by telephone via NHS 119 for those without access to the internet.</p> <p>Essential workers, which includes anyone involved in education or childcare, have priority access to testing.</p> <p>All children and young people can be tested if they have symptoms. This includes children under 5, but children aged 11 and under will need to be helped by their parents or carers if using a home testing kit.</p> <p>Polymerase Chain Reaction (PCR) tests contingency supply Separate to the asymptomatic testing regime, all schools were sent an initial supply of 10 PCR test kits before the start of the autumn term in 2020. You can replenish these kits when they run out by making an order through the online portal. You should call the Test and Trace helpdesk on 119 if the kits that you have ordered have not arrived.</p> <p>Having a test at a testing site will deliver the fastest results for symptomatic cases. These PCR test kits are provided to be used in the exceptional circumstance that an individual becomes symptomatic and you believe they may have barriers to accessing testing elsewhere.</p> <p>You will need to decide how to prioritise the distribution of your test kits. These kits can be given directly to:</p> <ul style="list-style-type: none"> • staff • parents collecting a pupil who has developed symptoms at school <p>These PCR tests kits will also help ensure that symptomatic staff can get a test. If they test negative, they can return to work as soon as they are well and no longer have symptoms of coronavirus (COVID-19).</p> <p>Further information on test kits for schools and further education providers is available.</p> <p>Ask parents and staff to inform you as soon as they get their results.</p> <p>NHS COVID-19 app The app is available to anyone aged 16 and over to download if they choose. For some young people, particularly some with SEND, parents will need to decide whether their use of the app is appropriate.</p> <p>This will mean that some pupils in year 11, and most pupils in years 12 and above will be eligible to use the app and benefit from its features.</p> <p>Staff members are also able to use the app.</p> <p>The guidance for schools and further education colleges in England provides information about how the app works and guidance for its use within schools in England.</p>
11	<p>Manage confirmed cases of coronavirus (COVID-19) amongst the school community</p>	<p>Swift action must be taken when someone tests positive for COVID-19. If someone who uses dedicated transport tests positive, local authorities should work with schools and colleges to identify close contacts.</p> <p>Schools may receive support on this through the dedicated advice service introduced by PHE, which can be reached through the DfE helpline on 0800 046 8687, or their PHE local health protection team if escalated. Based on their advice, people who have been in close contact with the person who has tested positive must be sent home and advised to self-isolate immediately and for at least the next 10 full days counting from the day after contact with the individual who tested positive. It is a legal requirement for an individual to self-isolate if they have been told to do so by NHS Test and Trace. A risk assessment may be undertaken to determine this, but a close contact can be anyone who:</p> <ul style="list-style-type: none"> lives in the same household as someone with COVID-19 symptoms or who has

FCAT

tested positive for COVID-19
has had any of the following types of contact with someone who has tested positive for COVID-19 with either a PCR test or LFD test (if a confirmatory PCR test is negative, provided it was taken within two days of the positive LFD, it overrides the lateral flow test and close contacts can stop self-isolating):

- face-to-face contact including being coughed on or having a face-to-face conversation within 1 metre
- been within 1 metre for 1 minute or longer without face-to-face contact
- been within 2 metres of someone for more than 15 minutes (either as a one-off contact or added up together over 1 day)
- travelled in the same vehicle or a plane

Whilst awaiting the confirmatory PCR result, pupils, students and staff and close contacts should continue to self-isolate.
If someone who uses transport tests positive, the assessment is likely to take account of factors such as:

- vehicle size
- degree of face-to-face contact
- length of time in close proximity
- whether a Perspex screen is in place

The advice service (or PHE local health protection team if escalated) will provide advice on who must be sent home and asked to self-isolate. To support them in doing so, we recommend you keep a record of pupils and staff in each group, and any close contact that takes places between pupils and staff in different groups (see section 6 of the system of control for more on grouping pupils). This should be a proportionate recording process. You do not need to ask pupils to record everyone they have spent time with each day or ask staff to keep definitive records in a way that is overly burdensome. Where individuals are self-isolating and are within our definition of vulnerable, it is important that schools put systems in place to keep in contact with them, offer pastoral support, and check they are able to access education support.

A template letter has been provided for you to send to parents of children asked to self isolate. This can also be used for staff if needed. It is important that this letter is shared promptly with all parents of children that have been asked to self-isolate as this letter allows parents who are on a low income and unable to work from home to apply to their local authority for financial support under the Test and Trace Support Payment scheme. They will not be able to make an application without providing this letter as supporting evidence. You must not share the names or details of people with COVID-19 unless essential to protect others.

Household members of those contacts who are sent home do not need to self-isolate themselves unless the pupil or staff member who is self-isolating subsequently develops symptoms. This is unless they have been told to self-isolate by NHS Test and Trace or their public health protection team, in which case they must self-isolate; this is a legal obligation. If someone in a class or group that has been asked to self-isolate develops symptoms themselves within the 10 days from the day after contact with the individual who tested positive, they should follow guidance for households with possible or confirmed coronavirus (COVID-19) infection.

They should get a test, and:

- if the test delivers a negative result, they should remain in isolation for the remainder of the 10-day isolation period - this is because they could still develop COVID-19 within the remaining days
- if the test result is positive, they should inform their school immediately, and must isolate from the day of onset of their symptoms and at least the following 10 full days - their household should self-isolate starting from when the symptomatic person in their household first had symptoms and the next 10 full days, following guidance for households with possible or confirmed COVID-19 infection

You should not request evidence of negative test results or other medical evidence before admitting children or welcoming them back after a period of self-isolation. Further guidance is available on testing and tracing for COVID-19.
Reporting actual or suspected cases of COVID-19 through the education setting status form

FCAT

From 11 January, we asked you to resume completing the educational setting status form. From 8 March, the form was amended to reflect wider opening. The data you supply helps the government monitor the impact of COVID-19 on schools.

See guidance on how to submit the educational settings status form for more information.

Test and Trace Support Payments

Some school staff, parents and carers may be eligible for a one-off Test and Trace Support Payment of £500. This is payable in one lump sum from your local authority.

To be eligible for a Test and Trace Support Payment, you must:

be on a low income

be unable to work from home

be at risk of losing income as a result of self-isolating

be living in England

meet the eligibility criteria

Staff identified as close contacts of a positive case will require an NHS Test and Trace Account ID number (CTAS number) to be able to claim a Test and Trace Support Payment or discretionary payment. Parents and carers of self-isolating children should be provided with a letter to support their application for payment, but will not require an NHS Test and Trace Account ID number (CTAS number).

The Department of Health and Social Care (DHSC) has launched the self-isolation service hub (020 3743 6715). The phone line is open 7 days a week, 8am to 8pm, allowing a school to provide contact details of any staff who have been asked to self isolate and are likely to be eligible for the Test and Trace Support Payment or discretionary payment.

In order for any of your staff who may be eligible for a payment from the Test and Trace Support Payment scheme to be able to claim, you must follow these steps.

Ensure that you collate a list of appropriate close contacts for the person who has tested positive within your establishment and inform these close contacts that they now need to self-isolate.

Call the service hub on 020 3743 6715 as soon as you have the 8-digit NHS Test and Trace Account ID (sometimes referred to as a CTAS number) of the person who has tested positive.

Provide the details of the person who has tested positive, along with the details of the relevant staff members you have identified as close contacts. If you do not have NHS Test and Trace Account ID for the person who has tested positive, Hub staff will assist in tracing the person in order to register their contacts on the Test and Trace system (CTAS).

NHS Test and Trace will then contact individuals to formally advise them of their need to self-isolate and provide them with an NHS Test and Trace Account ID.

Following this, individuals who are employed or self-employed, on a low income, unable to work from home and losing income as a result may qualify for the Test and Trace Support Payment scheme through their local authority.

Applications from parents and guardians who need to take time off work to care for a child who is self-isolating

Eligible parents or guardians of children who have been advised to self-isolate by their education setting (even where they have not been told to self-isolate by NHS Test and Trace) can also apply for the Test and Trace Support Payment scheme if they are on a low income, unable to work from home and need to take time off work to care for a child who is self-isolating. Parents and carers do not require an NHS Test and Trace Account ID number in order to claim and schools are not required to register all children asked to self-isolate with NHS Test and Trace in the same way as staff.

The scheme is open to eligible parents and carers of children aged 15 and under, and parents of young people aged 16 to 25 with an education health and care plan. Further information on how parents and guardians can claim financial support under the Test and Trace Support Payment scheme is available.

Schools should provide parents and carers of children advised to self-isolate with the template letter, detailing the child's name and the dates of their isolation period. The parent or guardian will need to use this letter as supporting evidence as part of their application to their local authority for a payment from the Test and Trace Support Payment scheme. Parents whose children are told to self-isolate by their school will not

FCAT

		<p>be able to apply for financial support without a letter.</p> <p>When a parent or guardian applies to the Test and Trace Support Payment scheme because they need to care for a child who is self-isolating, their local authority will be required to contact their child's school via phone or email to verify information about the child. This includes the child's name, age and dates of self-isolation. This is a standard check against fraudulent claims, and may take place before or after a payment is made. You will only be asked to share information on children whose parents have made an application to their local authority for the Test and Trace Support Payment scheme. You may wish to update your data privacy notice to reflect this.</p>
12	<p>Contain any outbreak by following PHE local health protection team advice</p>	<p>If you have 2 or more confirmed cases within 14 days, or an overall rise in sickness absence where coronavirus (COVID-19) is suspected, you may have an outbreak. You should call the dedicated advice service who will escalate the issue to your local health protection team where necessary and advise if any additional action is required. You can reach them by calling the DfE Helpline on 0800 046 8687 and selecting option 1 for advice on the action to take in response to a positive case.</p> <p>In some cases, health protection teams may recommend that a larger number of other pupils self-isolate at home as a precautionary measure. This could be the class or year group.</p> <p>If you are implementing the system of controls, addressing any issues you have identified and therefore reducing transmission risks, whole site closure will not generally be necessary. You should not close except on the advice of health protection teams.</p> <p>Admitting children and staff back to the school</p> <p>The pupil or staff member who tested positive for coronavirus (COVID-19) can return to their normal routine and stop self-isolating after they have finished their isolation period and their symptoms have gone or if they continue to have only a residual cough or anosmia. This is because a cough or anosmia can last for several weeks once the infection has gone. If they still have a high temperature after 10 days or are otherwise unwell, you should advise them to stay at home and seek medical advice. You should not request evidence of negative test results or other medical evidence before admitting pupils or welcoming them back after a period of self-isolation.</p> <p>In the vast majority of cases, parents and carers will be in agreement that a pupil with symptoms should not attend the school, given the potential risk to others. In the event that a parent or carer insists on a pupil attending your school, you can take the decision to refuse the pupil if, in your reasonable judgement, it is necessary to protect your pupils and staff from possible infection with coronavirus (COVID-19). Your decision would need to be carefully considered in the light of all the circumstances and current public health advice.</p>

<p>Issue:</p>	<p>Infection transmission rates are high due to the new Covid variant. Further operational controls / actions / required for key worker / vulnerable students and staff during lockdown.</p>

Additional RA for LFD testing at Westcliff Primary Academy

31st March 2021 Update: Confirmatory PCR tests

Staff or pupils with a positive LFD test result must self-isolate in line with the stay-at-home guidance. They will also need to arrange a lab-based polymerase chain reaction (PCR) test to confirm the result. If the PCR test is taken within 2 days of the positive lateral flow test, and is negative, it overrides the self-test LFD test and the pupil can return to school. Those with a negative LFD test result can also continue to attend school and use protective measures.

Issue: 1		COVID-19 spreading in the school community	
Existing level of risk			
HIGH	MEDIUM	LOW	NEGLIGIBLE
How to manage it (control measures)		List your control measures required to reduce risk – add appropriate detail about the type and location of controls	

FCAT

Schools following government recommended control measures set out in the school's protective measures risk assessment.

At Westcliff, mass testing of staff will take place twice a week (Monday and Thursday morning) and staff will take these tests at home. These tests are to be taken 3-4 days apart.

Tests to be taken before staff come into work.

Staff results sent to the admin email and to be recorded on a staff register and recorded by the admin staff. This will support identifying staff with positive results for contact tracing and managing stock and distribution.

Those with symptoms are also expected to order a test online or visit a test site to take a polymerase chain reaction (PCR) test to check if they have the virus. They will then follow the current government guidelines.

Testing is not mandatory for staff and staff do not need to provide proof of a negative test result to attend school or nursery in person, although participation in testing is strongly encouraged.

The asymptomatic testing programme does not replace the current testing policy for those with symptoms. Anyone with symptoms (even if they recently had a negative LFD test result), should still self-isolate immediately according to government guidelines

Tests to be kept securely in the main office to prevent unauthorized access (in locked cupboard 4).
 Not be stored outside. Stored in a cool, dry place. Test kits will be stored in a temperature between 2 and 30 degrees.
 The kits should be used at room temperature (15 to 30 degrees). If the kit has been stored in a cool area less than 15 degrees, leave it at normal room temperature for 30 minutes before using.
 Enough space for social distancing will be allowed when giving out tests.
 Tests will be signed out and linked to a lot number and a form to sign will be made available as part of self-service.
 When collecting staff should

- wear appropriate face covering at all times
- hand sanitize before collecting and signing
- maintain 2m from staff coming to collect their test

FCAT

How to manage it (control measures)

List your control measures required to reduce risk – add appropriate detail about the type and location of controls

1. Staggered arrival/ exit/play/lunch times will be in place in Autumn term (communicated to parents on 10th July 2020, updated Jan 21) for the whole school.
2. All pupils can attend the academy each day. To enable social distancing there will be no more than 33 children per group. In breakfast / after school club, children will be in groups of no more than 15 children, with one adult. This will be so that only 2 year groups 'mix'. The early years group will have no more than 8 children.
3. Defined members of staff are recommended to be with each small group of children. For pre-school children in early years settings, the staff to child ratios within Early Years Foundation Stage (EYFS) continue to apply and these are recommended to group children.
4. Ensure that children are in the same small groups at all times each day, and different groups are not mixed during the day, or on subsequent days, wherever this is possible.
5. Where possible, practical PE will take place outdoors.
6. No assemblies will be scheduled. Picture News / Jigsaw Assemblies will be delivered by the class teachers.
7. Cleaning rotas will be updated in line with the timetables
8. Classrooms will be arranged so that desks are forward facing where possible in Key Stage 2.
9. Classrooms will have a defined teacher area to support social distancing.
10. Ensure that the same staff are assigned to each group of children and, as far as possible, these stay the same during the day and on subsequent days. Changing the assignment of staff to each group of children/young people should be a last resort but may be necessary for example due to staff absence.
11. Maximise the number of learning environments used including outdoor space as much as possible to more easily allow for distance between children and staff. Water and sand trays will be used by infant children outdoors. Water will have soap, and sand will be sprayed with dettol at the end of the day.
12. Access rooms directly from outside where possible to reduce mixing of groups. Nursery, Reception, Y1, 2, 5 and 6 can access outside directly from classrooms.
13. Ensure that wherever possible children use the same classroom or area of a setting throughout the day to minimise movement around school. Phonics groups may need to move to a different area, depending on assessments in September.
14. Remove excess furniture to increase space if able to do so.
15. Desks should be spaced as far apart as possible.
16. In primary, unlike older children and adults, early years and primary age children cannot be expected to remain 2 metres apart from each other and staff. Children will be reminded not to enter the teacher's zone.
17. Children keep to their desks when in the learning environment.
18. Where possible seat children at the same desk each day.
19. Personal property of children should be kept to a minimum e.g. bags, lunchboxes. If these are brought into school they should be stored under the pupil's table. Coats will be hung on the cloakroom pegs as normal.
20. Staff members keep a minimum 1 metre distance from each other in the learning environment.
21. Mark out a 1 metre plus area e.g. with tape for the member(s) for staff to be able to maintain social distancing from children and other staff.
22. Display signage in the learning environment regarding social distancing to reinforce, encourage and promote this for staff and children.
23. Academy SLT to create academy social distancing procedures for staff and children specific to the academy environment (include instructions how to enter and exit the learning environment, use of toilet, moving around the classroom, how to maintain social distancing whilst teaching etc.) See Social Distancing Procedures (SDP) document.
24. Toilets will be used by class bubble: Early Years: Nursery, Year 1: Infant girls, Year 2: infant boys, Year 3&5: Junior boys, Year 4 & 6: Junior girls. These will be cleaned in addition to the daily schedule, mid morning and mid afternoon between toilet breaks (see cleaning schedule).
25. For children, procedures revisited and managed in line with the academy behaviour policy, updated in light of the coronavirus pandemic.
26. Off site visits will resume with additional protective measures under FCAT policy guidance, with full and thorough additional risk assessments for every visit.
27. Senior leaders monitor areas where there are breaches of social distancing measures and arrangements are reviewed.
28. Intensive monitoring of the compliance with safety arrangements will avoid the need for quality assurance walk through classroom visits at this time.

FCAT

--	---	--	--

1. Academy SLT to create social distancing procedures for staff use of staff toilets specific to the academy environment (e.g. how many staff may enter the toilets at one time, queue system etc.). See SDP
2. Ensuring that toilets do not become crowded by limiting the number of children who use the toilet facilities at one time. See re-opening document.
3. Allocated toilets for different groups of children and staff to enable toilet facilities to be used by the same groups of staff and children as far as possible.
4. Staff and children asked to clean hands after using the toilet - wash hands thoroughly for 20 seconds with running water and soap and dry them thoroughly or use alcohol hand rub or sanitiser ensuring that all parts of the hands are covered.
5. Ensure help is available for children who have trouble cleaning their hands independently. Ensure supervision of hand sanitizer use given risks around ingestion. Small children and pupils with complex needs should continue to be helped to clean their hands properly, Skin friendly cleaning wipes can be used as an alternative.
6. Display signage in the toilets regarding hand washing to reinforce, encourage and promote this for staff and children.
7. Prop doors open, where safe to do so (bearing in mind fire safety and safeguarding), to limit use of door handles and aid ventilation.
8. Full stock of soap and sanitiser to be maintained in the toilets at all times.
9. Academy SLT agreed with the Site Supervisor cleaning schedule and frequency for staff and children's toilets in line with operational requirements. This will be at the start and end of each day as well as mid morning, lunchtime and mid afternoon. **Protocol from FCAT Premises to be issued to assist with this.**

Lack of space in corridors will mean that children may pass each other on route to/from toilets.

How to manage it (control measures)

List your control measures required to reduce risk – add appropriate detail about the type and location of controls

1. Tell staff, children, young people, parents, carers or any visitors, such as suppliers, not to enter the education or childcare setting if they are displaying any symptoms of coronavirus.
2. Non-Contact Infrared Thermometer with LCD Display will be available.
3. Staff will arrive through the main reception, activate their fob, sanitise hands and pick up any PPE (cleaning staff). They will then proceed directly to work locations and will not congregate in groups of staff. Any staff briefing will be done virtually. Staff are required to maintain 1 metre plus social distancing wherever possible. Staff should not make stops to collect drinks etc on arrival and should where possible bring their own cutlery and utensils for personal use during the day.
4. The academy has staggered arrival and departure times of children, parents and children will be expected to maintain social distancing at all times – floor markings will indicate the distance required to be maintained. As far as possible each year group will use separate entrances in order to reduce the build up of parents and children. Parents will be required to line up to collect children and children will be brought to them in turn.
5. Hand sanitiser stations will be at staff entrances/exits to building, in all classrooms and along corridors.
6. Staff to sanitise hands on each and every entry and exit from the building.
7. Prop doors open, where safe to do so (bearing in mind fire safety and safeguarding), to limit use of door handles and aid ventilation.
8. No more than 2 people will be allowed in the reception area of the academy. A glass screen is in place at the main reception window and this will remain closed at all times. No visitors will be admitted unless by appointment or in an emergency. Staff will be required to contact the office through phone or email rather than in person and no more than 2 people should be in the reception area at any one time. Where children arrive at front reception, they will be marshalled through the area in a socially distanced, self contained bubble by supervising staff.
9. As far as possible visitors to site will be limited and where possible no visitors will be allowed on site or face to face meetings undertaken, where an emergency or safeguarding need means a face to face meeting is necessary to safeguard a child, this will take place in the pentagon meeting room, chairs will be removed to that social distancing is observed. Full PPE (including visors) is also available.
10. Make clear to parents and carers that they cannot gather at entrance gates or doors, or enter the site (unless they have a pre-arranged appointment, which should be conducted safely). Communication can be done via email or phone.
11. Visitors will be advised that they cannot enter the site unless they have a pre-arranged appointment, which should be conducted safely. Contact details of all visitors will be taken in line with Test and Trace protocols.
12. If it is agreed that a visitor does need to enter the school, they should give their details to the Receptionist – name, company, car registration, arrival time and who they are visiting, these details should be recorded on a daily sheet attached to a clipboard by the employee on Reception, which can then be taken outside in the event of a fire alarm. Neither visitors nor staff should use the touch screen or sign in themselves using a pen to avoid sharing equipment.
13. Visitors must be accompanied at all times for safeguarding reasons but also to ensure they do not access areas of the school that are not being used or may not be on the cleaning schedule.
14. The visitors should be given a disposable visitor badge (a stick on label). The Receptionist will enter the time of leaving on the sheet and the badge should be placed in a lidded bin by the visitor.
15. The academy has staggered arrival and departure times of children, parents and children will be expected to maintain social distancing at all times – floor markings will indicate the distance required to be maintained. As far as possible each year group will use separate entrances in order to reduce the build-up of parents and children. Parents will be required to line up to collect children and children will be brought to them in turn. All external doors (which can be opened in line with fire regulations) will be opened and all staff/children will be expected to sanitise or wash hands upon entry and exit of any building or room.
16. Academy SLT to create arrival and exit procedures for parents, carers and children specific to the academy environment and to communicate these (e.g. drop off and collection times, markers outside/inside school at 2 metre intervals to encourage and maintain social distancing for children and adults when waiting outside school, children are queuing and walking in/out of school, allocated times and points of entry/exit for specific groups of children, prop open external doors to limit use of door handles, use of hand sanitiser upon each and every entry/exit etc.).
17. Implement staggered drop off and pick up times for different groups of children.
18. Tell parents that if their child needs to be accompanied to the education or childcare setting, only one parent should attend.

FCAT

19. Staff supervision throughout drop off/pick up to encourage and insist on social distancing.
20. Display signage outside and inside the building regarding social distancing and good hygiene to reinforce, encourage and promote this for staff, parents, carers and children.
21. Everyone should use a tissue or elbow to cough or sneeze and use bins for tissue waste ('catch it, bin it, kill it').
22. There are lidded bins for tissues and these are emptied throughout the day.

Remaining level of risk		Consider level of risk following use of control measures	
HIGH	MEDIUM	LOW	NEGLIGIBLE

Issue that could cause harm:	Lack of social distancing and poor hygiene during break/playtimes and lunchtimes which could increase the risk and rate of transmission of coronavirus (COVID-19)		
-------------------------------------	--	--	--

Existing level of risk:			
HIGH	MEDIUM	LOW	NEGLIGIBLE

How to manage it (control measures)	List your control measures required to reduce risk – add appropriate detail about the type and location of controls		
--	---	--	--

1. Stagger break times (including lunch), so that all children are not moving around the school at the same time and that any corridors or circulation routes used have a limited number of children or young people using them at any time.
2. Consider using one-way circulation, or place a divider down the middle of the corridor to keep groups apart as they move through the setting where spaces are accessed by corridors. A one way system is in place where possible - (hall, PE corridor and library corridor).
3. Access rooms directly from outside where possible to reduce mixing of groups.
4. Ensure that children and young people are in the same small groups at all times each day, and different groups are not mixed during the day, or on subsequent days.
5. Ensure that the same staff are assigned to each group of children and, as far as possible, these stay the same during the day and on subsequent days, recognising for secondary settings there will be some subject specialist rotation of staff. Changing the assignment of staff to each group of children should be a last resort but may be necessary for example due to staff absence.
6. There will be allocated different areas for different groups of children and staff. Movement will be managed to minimise proximity of groups.
7. Children and young people should clean their hands regularly including when they arrive at school, when they return from breaks, when they change rooms and before and after eating. Groups should be kept apart as much as possible and tables should be cleaned between each group. If such measures are not possible, children should be brought their lunch in their classrooms. (Children on packed lunches will eat in classrooms).
8. Prop doors open, where safe to do so (bearing in mind fire safety and safeguarding), to limit use of door handles and aid ventilation.
9. Where possible, all spaces should be well ventilated using natural ventilation (opening windows) or ventilation units.
10. Display signage outside and inside the building regarding social distancing and good hygiene to reinforce, encourage and promote this for staff and children.
11. Use markers e.g. paint/tape outside school and inside school at 1 metre plus intervals to encourage and maintain social distancing for children and adults.
12. Children and young people should clean their hands after sneezing or coughing, should be encouraged not to touch their mouth, eyes and nose, should use a tissue or elbow to cough or sneeze and use bins for tissue waste ('catch it, bin it, kill it'). This will be enforced and reminded by staff.
13. Ensure there are lidded bins in break/playtime and lunchtime areas for tissues and these are emptied throughout the day.

FCAT

14. Ensure that sufficient handwashing facilities are available. Where a sink is not nearby, provide hand sanitiser in play/break time and lunchtime areas.
15. Reduce break/playtime equipment. Remove soft furnishings, soft toys and toys that are hard to clean (such as those with intricate parts). Consider how play equipment is used ensuring it is appropriately cleaned between groups of children using it, and that multiple groups do not use it simultaneously.
16. Games discussed which encourage social distancing e.g. football passing. Any sports or other equipment shared between bubbles or classes e.g. sports, art, science will be cleaned frequently and meticulously between use by other groups of children.
17. Staff supervision throughout break/play and lunchtimes to actively encourage and insist on social distancing.

Remaining level of risk		Consider level of risk following use of control measures

Existing level of risk:			
HIGH	MEDIUM	LOW	NEGLIGIBLE
How to manage it (control measures)	List your control measures required to reduce risk – add appropriate detail about the type and location of controls		
<ol style="list-style-type: none"> Learning environments to be properly cleaned at the start and end of each day and properly cleaned between uses by different groups of children. This should be at the start and end of each day as well as more regularly than normal throughout the day across school. Cleaning protocol from FCAT Premises to assist with this. Clean surfaces that children and young people are touching, such as toys, books, desks, chairs, tables, doors, sinks, toilets, light switches, bannisters, more regularly than normal. Shared materials and surfaces should be cleaned and disinfected more frequently than normal. Ensure that sufficient handwashing facilities are available across the school. Where a sink is not nearby, provide hand sanitiser. Children and staff to wash hands/use sanitiser frequently throughout the day - wash hands thoroughly for 20 seconds with running water and soap and dry them thoroughly or use alcohol hand rub or sanitiser ensuring that all parts of the hands are covered. Children and young people should clean their hands on arrival at the setting, before and after eating, after sneezing or coughing, should be encouraged not to touch their mouth, eyes and nose, should use a tissue or elbow to cough or sneeze and use bins for tissue waste ('catch it, bin it, kill it'). 			

FCAT

7. Ensure there are lidded bins in break/playtime and lunchtime areas for tissues and these are emptied throughout the day.
8. Display signage across school regarding hand washing to reinforce, encourage and promote this for staff and children.
9. Full stock of soap and sanitiser to be maintained in school at all times.
10. Prop doors open, where safe to do so (bearing in mind fire safety and safeguarding), to limit use of door handles and aid ventilation.
11. Learning planned so stationery is individual and not shared – or on white board.
12. Resources on tables ready for learning and not distributed during the learning.
13. Use plastic packets (zippy) bags used for individual resources.
14. Limit the amount of shared resources that are taken home and limit exchange of take-home resources between children, young people and staff. Children may bring reading books in a zippy bag and water bottles only from home to school, plus a lunch box if not on school dinners.
15. Seek to prevent the sharing of stationery and other equipment where possible.
16. Practical lessons can go ahead if equipment can be cleaned thoroughly and properly cleaned between different groups of children. Specific guidance for practical subjects such as music and science will be fully implemented according to published DfE and CLEAPPS guidelines. Music group sizes will be limited, practical work will take place in larger spaces/outside and children will be positioned and undertake activities to minimise possible transmission.
17. Children will keep to the same desks when in the learning environment.
18. Equipment can be shared within bubbles but must be thoroughly cleaned (or left for 72 hours) if it is to be used in another bubble.

Issue that could cause harm:	First Aid/Accident/Administering medicines/EHP/Personal Care which could increase the risk and rate of transmission of coronavirus (COVID-19)
-------------------------------------	--

Existing level of risk:			
HIGH	MEDIUM	LOW	NEGLIGIBLE

How to manage it (control measures)	List your control measures required to reduce risk – add appropriate detail about the type and location of controls
--	---

1. Ensure there is a member of First Aid trained staff on site and only trained staff carry out First Aid (for primary requires Paediatric First Aid).
2. Ensure full and complete first aid stock on site at all times.
3. Ensure FCAT First Aid, Accident Administering medicines and EHP Policies are followed.
4. Staff should wear PPE including visor if a child or young person becomes unwell with symptoms of coronavirus while in their setting and needs direct personal care until they can return home. A fluid-resistant surgical face mask should be worn by the supervising adult if a distance of 1 metre cannot be maintained. If contact with the child or young person is necessary, then disposable gloves, a disposable apron and a fluid-resistant surgical face mask should be worn by the supervising adult. If a risk assessment determines that there is a risk of splashing to the eyes, for example from coughing, spitting, or vomiting, then eye protection should also be worn.

FCAT

5. Staff should wear PPE for children, young people and students whose care routinely already involves the use of PPE due to their intimate care needs. They should continue to receive their care in the same way.
6. Some pupils with complex needs will struggle to maintain as good respiratory hygiene as their peers, for example those who spit uncontrollably or use saliva as a sensory stimulant. Staff should wear PPE when supporting pupils with complex needs as outlined above.
7. Full and complete stock of PPE on site at all times.

<p>May 12th 2021: School workforce Page 35</p> <p>The guidance amends some aspects of CEV and CV staff – please refer to page 35 following. An additional section has been added which confirms that specialists, therapists, clinicians and other support staff for pupils with special educational needs and disability (SEND) can attend schools to provide interventions as usual where this is reasonably necessary, including where this requires them to move between settings.</p> <p>Where a pupil is unable to attend school because they are complying with clinical and/or public health advice, school will immediately offer them access to remote education. Schools should monitor engagement with this activity.</p> <p>Where children are not able to attend school as parents are following clinical and/or public health advice, absence will not be penalised. All other pupils must attend school.</p> <p>Staff who are clinically extremely vulnerable</p> <p>Shielding advice has been paused nationally from 31 March. CEV individuals are no longer advised to shield but must continue to follow the rules in place for everyone under the current national restrictions. Staff in schools who are CEV will be advised to continue to work from home where possible, but if they cannot work from home should attend their workplace.</p>			

FCAT

CEV individuals (over 18) have been prioritised for vaccination in phase 1 before the general population and in line with the priority ordering set by the Joint Committee on Vaccination and Immunisation.

Staff who are clinically vulnerable (CV)

CV staff can continue to attend school. While in school they must follow the [system of controls](#) to minimise the risks of transmission.

Staff who live with those who are CV can attend the workplace but should ensure they maintain good prevention practice in the workplace and at home.

Pregnancy

You will need to follow the specific [guidance for pregnant employees](#) because pregnant women are considered CV. In some cases, pregnant women may also have other health conditions that mean they are considered CEV, where the advice for clinically extremely vulnerable staff will apply.

[COVID-19 vaccination: a guide for women of childbearing age, pregnant or breastfeeding](#) contains vaccination advice.

Your workplace risk assessment should already consider any risks to female employees of childbearing age and, in particular, risks to new and expectant mothers. If you are notified that an employee is pregnant, breastfeeding, or has given birth within the last 6 months, you should check the workplace risk assessment to see if any new risks have arisen. An assessment may help identify any additional action that needs to be taken to mitigate risks.

Any risks identified at that point, or later during the pregnancy, in the first 6 months after birth, or while the employee is still breastfeeding, must be included and managed as part of the general workplace risk assessment. You must take appropriate sensible action to reduce, remove or control the risks.

As part of your risk assessment, you should consider whether adapting duties and/or facilitating home working may be appropriate to mitigate risks.

You should be aware that pregnant women from 28 weeks' gestation, or with underlying health conditions at any point of gestation, may be at greater risk of severe illness if they catch coronavirus (COVID-19). This is also the case for pregnant women with underlying health conditions that place them at greater risk of severe illness if they catch coronavirus (COVID-19).

We recommend that schools follow the same principles for pregnant pupils, in line with their wider health and safety obligations.

Read more [guidance and advice on coronavirus \(COVID-19\) and pregnancy from the Royal College of Gynaecologists](#).

How to manage it (control measures)		List your control measures required to reduce risk – add appropriate detail about the type and location of controls	
		<ol style="list-style-type: none"> 1. Tell staff, children, young people, parents, carers or any visitors, such as suppliers, not to enter the education or childcare setting if they are displaying any symptoms of coronavirus (following the COVID-19: guidance for households with possible coronavirus infection). 2. If anyone becomes unwell with a new, continuous cough or a high temperature in an education or childcare setting, they must be sent home and advised to follow the COVID-19: guidance for households with possible coronavirus infection guidance. 3. Test and trace protocols will be applied in full. 4. Proper cleaning of the area where anyone has become unwell with symptoms of COVID-19 should take place. 5. If a child is awaiting collection, they should be moved, if possible, to a room where they can be isolated behind a door with appropriate adult supervision if required. Ideally, a window should be opened for ventilation. If it is not possible to isolate them, move them to an area which is at least 1 metre away from other people. 6. If they need to go to the bathroom while waiting to be collected, they should use a separate bathroom if possible. The bathroom should be cleaned and disinfected using standard cleaning products before being used by anyone else. 7. PPE should be worn by staff caring for the child while they await collection if a distance of 1 metre cannot be maintained (such as for a very young child or a child with complex needs). A fluid-resistant surgical face mask should be worn by the supervising adult if a distance of 1 metre cannot be maintained. If contact with the child or young person is necessary, then disposable gloves, a disposable apron and a fluid-resistant surgical face mask should be worn by the supervising adult. If a risk assessment determines that there is a risk of splashing to the eyes, for example from coughing, spitting, or vomiting, then eye protection should also be worn. 8. Everyone must wash their hands thoroughly for 20 seconds with soap and running water or use hand sanitiser after any contact with someone who is unwell. 9. Staff and parents/carers should be advised about testing for COVID-19 for children in school. 10. Academy SLT should ensure any confirmed cases of COVID-19 following a positive test result should be notified to Jane McCumiskey (FCAT COO) to ensure that the FCAT procedure in the event of this can be followed. 11. If anyone becomes unwell with a new continuous cough, or a high temperature, or has a loss/change in their normal sense of smell or taste (anosmia), they must be sent home to self-isolate for 7 days and arrange to have a test. Other members of their household must isolate for 10 days from when the symptomatic person first had symptoms. 12. When the child, young person or staff member tests negative, they can return to their setting and the fellow household members can end their self-isolation. 13. Where a child, young person or staff member tests positive, the academy will contact the local health protection team who will investigate and provide further guidance 14. The academy will maintain records of pupils and staff in each group and further close contacts 15. Where the child, young person or staff member tests positive, the rest of their class or group within their childcare or education setting should be sent home and advised to self-isolate for 14 days. The other household members of that wider class or group do not need to self-isolate unless the child, young person or staff member they live with in that group subsequently develops symptoms. 16. All children and staff working with the group of children which contains an individual with a positive test must self-isolate at home for 14 days from the last close contact with the person testing positive. Household members do not need to self-isolate unless there is a subsequent positive test or their family member develops symptoms. 17. If a subsequent test shows a negative result, the household should remain in self-isolation for 14 days. 18. If testing positive, a person must continue to self-isolate for at least 7 days from the onset of their symptoms and other members of the household must continue self-isolating for the full 10 days from when the symptomatic person first had symptoms. 19. As part of the national test and trace programme, if other cases are detected within the cohort or in the wider setting, Public Health England's local health protection teams will conduct a rapid investigation and will advise schools and other settings on the most appropriate action to take. In some cases a larger number of other children, young people may be asked to self-isolate at home as a precautionary measure – perhaps the whole class, site or year group. Where settings are observing guidance on infection prevention and control, which will reduce risk of transmission, closure of the whole setting will not generally be necessary.

How to manage it (control measures)		List your control measures required to reduce risk – add appropriate detail about the type and location of controls	
<p>Educational day visits were able to resume from 12th April. Any educational day visits must be conducted in line with relevant COVID-secure guidelines and regulations and a full risk assessment in relation to all educational visits must be undertaken to ensure they can be undertaken safely. As part of this risk assessment, you will need to consider what control measures need to be used and follow wider advice on visiting indoor and outdoor venues. You should consult the health and safety guidance on educational visits when considering visits.</p> <p>Domestic residential educational visits can be undertaken from 17th May.</p> <p>Any domestic residential educational visits must be conducted in line with relevant COVID-19 guidance and regulations and risk assessments should be undertaken. Annex C sets out the conditions that should be met when planning and undertaking a residential educational visit as part of Step 3. There is also a section on making new bookings (page 48) and advice on speaking to insurance providers.</p> <p>Domestic residential educational visits OVERVIEW</p> <p>STAFF should familiarise themselves with the content of this guidance to ensure that accommodation arrangements for the educational visit are in line with the required standards.</p>			

FCAT

You should be fully engaged with parents, carers and children about the organisation of the visit and the COVID-19 measures in place, from the initial planning to completion of the visit.

You should be very clear and able to demonstrate that the visit has been fully risk assessed and that measures are in place to ensure that, as far as is practicably possible, the visit is and will remain COVID-19 compliant.

<https://www.gov.uk/government/publications/health-and-safety-on-educational-visits/health-and-safety-on-educational-visits>

Transitional, taster and open days can go ahead (page 49 of the guidance). You should complete thorough risk assessments before running transitional, taster and open days to ensure that they are run in line with your system of controls and align with the advice contained within this guidance and the roadmap out of lockdown.

Issue that could cause harm: Physical Activity	Physical Activity Government Guidance 6th April 2021		
Existing level of risk			
HIGH	MEDIUM	LOW	NEGLIGIBLE
How to manage it (control measures)	List your control measures required to reduce risk – add appropriate detail about the type and location of controls		
<p>You have the flexibility to decide how physical education, sport and physical activity will be provided while following the measures in your system of controls.</p> <p>Pupils should be kept in consistent groups, sports equipment thoroughly cleaned between each use by different individual groups. You can hold PE lessons indoors, including those that involve activities related to team sports, for example practising specific techniques, within your own system of controls.</p> <p>For sport provision, outdoor sports should be prioritised where possible, and large indoor spaces used where it is not, maximising natural ventilation flows (through opening windows and doors or using air conditioning systems wherever possible), distancing between pupils, and paying scrupulous attention to cleaning and hygiene. This is particularly important in a sport setting because of the way in which people breathe during exercise. External facilities can also be used in line with government guidance for the use of, and travel to and from, those facilities.</p> <p>Where you are considering team sports you should only consider those sports whose national governing bodies have developed guidance under the principles of the government's guidance on team sport and been approved by the government such as sports on the list available at grassroots sports guidance for safe provision including team sport, contact combat sport and organised sport events.</p> <p>From 29 March, outdoor competition between different schools can take place.</p> <p>From 12 April, indoor competition between different schools can take place.</p> <p>Refer to:</p> <ul style="list-style-type: none"> guidance on grassroot sports for public and sport providers, safe provision and facilities, and guidance from Sport England advice from organisations such as the Association for Physical Education and the Youth Sport Trust guidance from Swim England on school swimming and water safety lessons available at returning to pools guidance documents using changing rooms safely <p>You can work with external coaches, clubs and organisations for curricular and extra-curricular activities. You must be satisfied that it is safe to do.</p> <p>Activities such as active miles, making break times and lessons active and encouraging active travel can help pupils to be physically active while encouraging physical distancing.</p>

Issue that could cause harm:		Wraparound provision and extra-curricular activity Government Guidance 12th May 2021	
Existing level of risk			
HIGH	MEDIUM LOW		NEGLIGIBLE
How to manage it (control measures)		List your control measures required to reduce risk – add appropriate detail about the type and location of controls	
<p><i>From 17th May, in line with the commencement of Step 3 of the roadmap, where wraparound and other extra-curricular activities for children are taking place indoors, they will be able to take place in groups of any number. However, it remains important to continue to minimise mixing between children, where possible. This can be achieved by continuing to keep children in consistent groups every time they attend the setting.</i></p> <p><i>Smaller groups should be considered when it is not possible to do this. When considering appropriate group sizes it will be important to take into account factors such as the recommended occupancy levels of the premises you are operating from and levels of ventilation. For example, guidance for providers of grassroots sport and sport facilities recommends that the maximum occupancy of an indoor facility should be limited by providing a minimum of 100sqft per person.</i></p> <p><i>The guidance for providers who run community activities, holiday clubs, after-school clubs, tuition and other out-of-school provision for children may help you to plan extracurricular provision, including appropriate group sizes.</i></p> <p>You should be working to resume all your before and after-school educational activities and wraparound childcare for your pupils, where this provision is necessary to support parents to work, attend education and access medical care, and as part of pupil's wider education and training. We will amend the Health Protection (Coronavirus, Restrictions) (All Tiers) (England) Regulations 2020 to allow for this. Vulnerable children can attend these settings regardless of circumstance.</p> <p>In line with the government roadmap, from 12 April all parents may access wraparound and extra-curricular provision, without any restrictions on the reasons for which they may attend.</p> <p>You should continue to work closely with any external wraparound providers which your pupils may use to minimise mixing between children. This can be achieved by taking steps such as trying to keep children in the same school day bubble or school together, or in consistent groups. The guidance for providers who run community activities, holiday clubs, after-school clubs, tuition and other out-of-school provision for children may help you to plan extra-curricular provision.</p> <p>Where parents are using external childcare providers or out of school extra-curricular activities for their children, you should also: advise them to limit their use of multiple out-of-school settings providers, and to only use one out-of-school setting in addition to school as far as possible. encourage them to check providers have put in place their own protective measures send them the link to the guidance for parents and carers If you hire out your premises for use by external wraparound childcare providers, such as after-school or holiday clubs, make sure these organisations have: considered the relevant government guidance for their sector / put in place protective measures</p>
