

## **How does your school support children with medical needs?**

If a pupil has a medical need then a detailed Care Plan is compiled, usually by the School Nurse. This may involve support from the school nurse in consultation with parents/carers.

Care Plans are discussed with all staff that are involved with the pupil.

Staff receive regular asthma and epi-pen training delivered by the school nurse

Where necessary, and in agreement with parents/carers, medicines are administered in school but only where a signed Medicine consent form is in place to ensure the safety of both child and staff member.

Please see the school website for the The Federation of Boldmere Schools Medical Policy.
