

## Year 3 Autumn 2 Homework Project

We would like to invite you to create a project about one of our topics from this half term and bring it into school on **Monday 16<sup>th</sup> December** to show your classmates!

You could create a PowerPoint presentation, an interactive poster, a 3D model or even a comic strip! It is completely your choice how you decide to present your learning. Please note, if you decide to create a PowerPoint presentation, this will need to be emailed in advance or alternatively, you could save it to a USB stick and bring this into school.

This half term, our topic is called 'The Secrets of the Stone Age'. Some of the things we are learning about are:

- Rocks in Science
- The Stone Age in History
- Food and Nutrition (Healthy and Varied diets) in Design Technology
- Stop-frame animations in Computing

Some ideas:

- Explain the rock cycle using chocolate! You could take photos and make a poster to share with your classmates.
- Create a PowerPoint presentation all about the Stone Age.
- Plan and cook a healthy meal and then tell us all about it.
- Create an informative poster about the different types of rocks.
- Create a storyboard for a stop-frame animation about a topic of your choice.
