

Year 3 Spring 1 Homework Project

We would like to invite you to create a project about one of our topics from this half term and bring it into school on **Monday 10th February** to show your classmates!

You could create a PowerPoint presentation, an interactive poster, a 3D model or even a comic strip! It is completely your choice how you decide to present your learning. Please note, if you decide to create a PowerPoint presentation, this will need to be emailed in advance or alternatively, you could save it to a USB stick and bring this into school.

This half term, our topic is called '**Lights, Camera, Action!**' Some of the things we are learning about are:

- Land Use in Geography
- Sculptures in Art
- Light in Science
- Scratch in Computing
- We are performing songs in our Music lessons ready for the Singing Showcase

Some ideas:

- Design and create your own sculpture using your art skills.
- Find out about local land use (e.g. how the land has changed for Boldmere Junior School) and present your research.
- Create your own scratch game at home and download it for us to look at in school.
- Create a poster about 'light' and include what we have learnt about in school
- Create or perform a song of your choice.
