

<b>Working Scientifically</b>	<b>Year 3</b>	<b>Year 4</b>	<b>Year 5</b>	<b>Year 6</b>
	Ask relevant questions about the world around them and use different types of scientific enquiry to answer them	Ask relevant questions about the world around them and use different types of scientific enquiry to answer them	Planning different types of scientific enquiries including recognising and controlling variables when necessary	Planning different types of scientific enquiries including recognising and controlling variables when necessary
	Set up simple practical enquiries, comparative and fair tests (Start to make own decisions)	Set up simple practical enquiries, comparative and fair tests (Start to make own decisions)	Use different types of enquiries to answer questions (Make own decisions)	Use different types of enquiries to answer questions (Make own decisions)
	Make observations and take accurate measurements using a range of equipment	Make observations and take accurate measurements using a range of equipment	Take measurements using a range of scientific equipment with increasing accuracy and precision, taking repeat readings where appropriate	Take measurements using a range of scientific equipment with increasing accuracy and precision, taking repeat readings where appropriate
	Gather, classify, record and present data/ findings in a variety of ways e.g. using simple scientific language, drawings, labelled diagrams, keys, bar charts and tables	Gather, classify, record and present data/ findings in a variety of ways e.g. using simple scientific language, drawings, labelled diagrams, keys, bar charts and tables	Record data and results of increasing complexity using labelled diagrams, classification keys, tables, scatter graphs, bar and line graphs	Record data and results of increasing complexity using labelled diagrams, classification keys, tables, scatter graphs, bar and line graphs
	Report findings from enquiries orally, written, displays or presentations of results/ conclusions	Report findings from enquiries orally, written, displays or presentations of results/ conclusions	Report and present findings from enquiries (conclusions, causal relationships, displays, presentations, degree of trust)	Report and present findings from enquiries (conclusions, causal relationships, displays, presentations, degree of trust)
	Draw simple conclusions and make predictions for new values	Draw simple conclusions and make predictions for new values	Use test results to make predictions and set up further tests	Use test results to make predictions and set up further tests
	Suggest improvements and raise further questions	Suggest improvements and raise further questions		
	Look for differences, similarities, changes related to simple scientific ideas or processes	Look for differences, similarities, changes related to simple scientific ideas or processes	Identifying scientific evidence that has been used to support or refute ideas	Identifying scientific evidence that has been used to support or refute ideas
	Recognise when and how secondary sources might help them to answer questions	Recognise when and how secondary sources might help them to answer questions		

Animals Inc Humans	<p><b>Pupils should be taught to:</b></p> <ul style="list-style-type: none"> <li>• identify that animals, including humans, need the right types and amount of nutrition, and that they cannot make their own food; they get nutrition from what they eat;</li> <li>• identify that humans and some other animals have skeletons and muscles for support, protection and movement.</li> </ul>	<p><b>Pupils should be taught to:</b></p> <ul style="list-style-type: none"> <li>• describe the simple functions of the basic parts of the digestive system in humans;</li> <li>• identify the different types of teeth in humans and their simple functions;</li> <li>• construct and interpret a variety of food chains, identifying producers, predators and prey.</li> </ul>	<p><b>Pupils should be taught to:</b></p> <p>Describe the changes as humans develop to old age (through PSHE lessons)</p>	<p><b>Pupils should be taught to:</b></p> <ul style="list-style-type: none"> <li>• identify and name the main parts of the human circulatory system, and describe the functions of the heart, blood vessels and blood;</li> <li>• recognise the impact of diet, exercise, drugs and lifestyle on the way their bodies function;</li> <li>• describe the ways in which nutrients and water are transported within animals, including humans.</li> </ul>
Plants	<p><b>Pupils should be taught to:</b></p> <ul style="list-style-type: none"> <li>• identify and describe the functions of different parts of flowering plants: roots, stem/trunk, leaves and flowers;</li> <li>• explore the requirements of plants for life and growth (air, light, water, nutrients from soil, and room to grow) and how they vary from plant to plant;</li> <li>• investigate the way in which water is transported within plants;</li> <li>• explore the part that flowers play in the life cycle of flowering plants, including pollination, seed formation and seed dispersal.</li> </ul>			

Living Things & Habitats		<p><b>Pupils should be taught to:</b></p> <ul style="list-style-type: none"> <li>• recognise that living things can be grouped in a variety of ways;</li> <li>• explore and use classification keys to help group, identify and name a variety of living things in their local and wider environment;</li> <li>• recognise that environments can change and that this can sometimes pose dangers to living things.</li> </ul>	<p><b>Pupils should be taught to:</b></p> <ul style="list-style-type: none"> <li>• describe the differences in the life cycles of a mammal, an amphibian, an insect and a bird;</li> <li>• describe the life process of reproduction in some plants.</li> </ul>	<p><b>Pupils should be taught to:</b></p> <ul style="list-style-type: none"> <li>• describe how living things are classified into broad groups according to common observable characteristics and based on similarities and differences, including micro-organisms, plants and animals;</li> <li>• give reasons for classifying plants and animals based on specific characteristics.</li> <li>• describe the life process of reproduction in some animals (through PSHE lessons)</li> </ul>
Evolution and Inheritance				<p><b>Pupils should be taught to:</b></p> <ul style="list-style-type: none"> <li>• recognise that living things have changed over time and that fossils provide information about living things that inhabited the Earth millions of years ago;</li> <li>• recognise that living things produce offspring of the same kind, but normally offspring vary and are not identical to their parents;</li> <li>• identify how animals and plants are adapted to suit their environment in different ways and that adaptation may lead to evolution.</li> </ul>

## Materials and their properties

**Pupils should be taught to:**

- compare and group together different kinds of rocks on the basis of their appearance and simple physical properties;
- describe in simple terms how fossils are formed when things that have lived are trapped within rock;
- recognise that soils are made from rocks and organic matter.

**Pupils should be taught to:**

- compare and group materials together, according to whether they are solids, liquids or gases;
- observe that some materials change state when they are heated or cooled, and measure or research the temperature at which this happens in degrees Celsius ( $^{\circ}\text{C}$ );
- identify the part played by evaporation and condensation in the water cycle and associate the rate of evaporation with temperature.

**Pupils should be taught to:**

- compare and group together everyday materials on the basis of their properties, including their hardness, solubility, transparency, conductivity (electrical and thermal), and response to magnets;
- know that some materials will dissolve in liquid to form a solution, and describe how to recover a substance from a solution;
- use knowledge of solids, liquids and gases to decide how mixtures might be separated, including through filtering, sieving and evaporating;
- give reasons, based on evidence from comparative and fair tests, for the particular uses of everyday materials, including metals, wood and plastic;
- demonstrate that dissolving, mixing and changes of state are reversible changes;
- explain that some changes result in the formation of new materials, and that this kind of change is not usually reversible, including changes associated with burning and the action of acid on bicarbonate of soda.

## Forces and Magnets

### Pupils should be taught to:

- compare how things move on different surfaces;
- notice that some forces need contact between 2 objects, but magnetic forces can act at a distance;
- observe how magnets attract or repel each other and attract some materials and not others;
- compare and group together a variety of everyday materials on the basis of whether they are attracted to a magnet, and identify some magnetic materials;
- describe magnets as having 2 poles;
- predict whether 2 magnets will attract or repel each other, depending on which poles are facing.

### Pupils should be taught to:

- explain that unsupported objects fall towards the Earth because of the force of gravity acting between the Earth and the falling object;
- identify the effects of air resistance, water resistance and friction, that act between moving surfaces;
- recognise that some mechanisms including levers, pulleys and gears allow a smaller force to have a greater effect.

Light	<p><b>Pupils should be taught to:</b></p> <ul style="list-style-type: none"> <li>• recognise that they need light in order to see things and that dark is the absence of light;</li> <li>• notice that light is reflected from surfaces;</li> <li>• recognise that light from the sun can be dangerous and that there are ways to protect their eyes;</li> <li>• recognise that shadows are formed when the light from a light source is blocked by an opaque object;</li> <li>• find patterns in the way that the size of shadows change.</li> </ul>			<p><b>Pupils should be taught to:</b></p> <ul style="list-style-type: none"> <li>• recognise that light appears to travel in straight lines;</li> <li>• use the idea that light travels in straight lines to explain that objects are seen because they give out or reflect light into the eye;</li> <li>• explain that we see things because light travels from light sources to our eyes or from light sources to objects and then to our eyes;</li> <li>• use the idea that light travels in straight lines to explain why shadows have the same shape as the objects that cast them.</li> </ul>
Sound		<p><b>Pupils should be taught to:</b></p> <ul style="list-style-type: none"> <li>• identify how sounds are made, associating some of them with something vibrating;</li> <li>• recognise that vibrations from sounds travel through a medium to the ear;</li> <li>• find patterns between the pitch of a sound and features of the object that produced it;</li> <li>• find patterns between the volume of a sound and the strength of the vibrations that produced it;</li> <li>• recognise that sounds get fainter as the distance from the sound source increases.</li> </ul>		

Earth and Space			<p>Pupils should be taught to:</p> <ul style="list-style-type: none"> <li>• describe the movement of the Earth and other planets relative to the sun in the solar system;</li> <li>describe the movement of the moon relative to the Earth;</li> <li>• describe the sun, Earth and moon as approximately spherical bodies;</li> <li>• use the idea of the Earth's rotation to explain day and night and the apparent movement of the sun across the sky.</li> </ul>	
Electricity		<p><b>Pupils should be taught to:</b></p> <ul style="list-style-type: none"> <li>• identify common appliances that run on electricity;</li> <li>• construct a simple series electrical circuit, identifying and naming its basic parts, including cells, wires, bulbs, switches and buzzers;</li> <li>• identify whether or not a lamp will light in a simple series circuit, based on whether or not the lamp is part of a complete loop with a battery;</li> <li>• recognise that a switch opens and closes a circuit and associate this with whether or not a lamp lights in a simple series circuit;</li> <li>• recognise some common conductors and insulators, and associate metals with being good conductors.</li> </ul>		<p><b>Pupils should be taught to:</b></p> <ul style="list-style-type: none"> <li>• associate the brightness of a lamp or the volume of a buzzer with the number and voltage of cells used in the circuit;</li> <li>• compare and give reasons for variations in how components function, including the brightness of bulbs, the loudness of buzzers and the on/off position of switches;</li> <li>• use recognised symbols when representing a simple circuit in a diagram.</li> </ul>
