

Curriculum Intent: what we want children to learn

At Gagle Brook Primary and Nursery School, the geography curriculum will be delivered well with clear progression shown throughout the whole school. It is important that children develop the skills of a geographer by fully immersing them in all areas of the subject.

At Gagle Brook, we ensure that the teaching of geography will help pupils gain coherent knowledge and fascination about the local community and its people that will remain with them for the rest of their lives. This will allow pupils the opportunity to explore the inter-relationship between the earth and its people through the study of place landscapes, resources and the environment.

Geography
box of treasures?

Curriculum Implementation: how we do it at Gagle Brook

The teaching and implementation of the Geography Curriculum at Gagle Brook Primary and Nursery School is based on the National Curriculum and linked to topics to ensure a well-structured approach to this subject. The children will have opportunities to learn about and explore a range of enquiry questions such as 'Where in the World are we?' which is central to our big question curriculum, inspiring pupils' curiosity to know more about the world around them.

The local area is fully utilised to achieve desired outcomes, with opportunities for learning outside the classroom embedded in practise. School trips and fieldwork are provided to give first hand experiences, which enhance children's understanding of the world beyond their locality.

We offer all children the opportunity to participate in all aspects of the humanities curriculum.

Curriculum Impact: the celebration of learning

On leaving Gagle Brook, pupils will:

- Have an excellent knowledge of where places are and what they are like.
- Have an extensive base of geographical knowledge and vocabulary.
- Be fluent in complex, geographical enquiry and the ability to apply questioning skills and use effective analytical and presentational techniques.
- Be confident using fieldwork and other geographical skills and techniques.
- Have a real sense of curiosity to find out about the world and the people who live there.
- Have the ability to express well-balanced opinions, rooted in very good knowledge and understanding about current and contemporary issues in society and the environment.

As a result of inspiring and engaging Geography lessons with increased opportunities for hands on learning experiences, pupils have a desire to always want to know and find out more.

The 6 Principles of Teaching and Learning:

Challenge

Explanation

Modelling

Practice

Questioning
