

## Communication and Language

(Listening, Attention and Understanding, Speaking)

The development of children's spoken language underpins all seven areas of learning and development. Children's back-and-forth interactions from an early age form the foundations for language and cognitive development. The number and quality of the conversations they have with adults and peers throughout the day in a language-rich environment is crucial. By commenting on what children are interested in or doing, and echoing back what they say with new vocabulary added, practitioners will build children's language effectively. Reading frequently to children, and engaging them actively in stories, non-fiction, rhymes and poems, and then providing them with extensive opportunities to use and embed new words in a range of contexts, will give children the opportunity to thrive. Through conversation, storytelling and role play, where children share their ideas with support and modelling from their teacher, and sensitive questioning that invites them to elaborate, children become comfortable using a rich range of vocabulary and language structures.

# Literacy (Comprehension, Word Reading, Writing)

It is crucial for children to develop a life-long love of reading. Reading consists of two dimensions: language comprehension and word reading. Language comprehension (necessary for both reading and writing) starts from birth. It only develops when adults talk with children about the world around them and the books (stories and non-fiction) they read with them, and enjoy rhymes, poems and songs together. Skilled word reading, taught later, involves both the speedy working out of the pronunciation of unfamiliar printed words (decoding) and the speedy recognition of familiar printed words. Writing involves transcription (spelling and handwriting) and composition (articulating ideas and structuring them in speech, before writing).

#### **Mathematics**

#### (Number, Numerical Patterns)

Developing a strong grounding in number is essential so that all children develop the necessary building blocks to excel mathematically. Children should be able to count confidently, develop a deep understanding of the numbers to 10, the relationships between them and the patterns within those numbers. By providing frequent and varied opportunities to build and apply this understanding - such as using manipulatives, including small pebbles and ten-frames for organising counting - children will develop a secure base of knowledge and vocabulary from which mastery of mathematics is built. In addition, it is important that the curriculum includes rich opportunities for children to develop their spatial reasoning skills across all areas of mathematics including shape, space and measures. It is important that children develop positive attitudes and interests in mathematics, look for patterns and relationships, spot connections, 'have a go', talk to adults and peers about what they notice and not be afraid to make mistakes.

# Understanding the World

#### (Past and Present, People, Culture and Communities, The Natural World)

Understanding the world involves guiding children to make sense of their physical world and their community. The frequency and range of children's personal experiences increases their knowledge and sense of the world around them — from visiting parks, libraries and museums to meeting important members of society, such as police officers, nurses and firefighters. In addition, listening to a broad selection of stories, non-fiction, rhymes and poems will foster their understanding of our culturally, socially, technologically and ecologically diverse world. As well as building important knowledge, this extends their familiarity with words that support understanding across domains. Enriching and widening children's vocabulary will support later reading comprehension.

# Physical Development (Gross Motor Skills and Fine Motor Skills)

Physical activity is vital in children's all-round development, enabling them to pursue happy, healthy and active lives. Gross and fine motor experiences develop incrementally throughout early childhood, starting with sensory explorations and the development of a child's strength, co-ordination and positional awareness through tummy time, crawling and play movement with both objects and adults. By creating games and providing opportunities for play both indoors and outdoors, adults can support children to develop their core strength, stability, balance, spatial awareness, co-ordination and agility. Gross motor skills provide the foundation for developing healthy bodies and social and emotional wellbeing. Fine motor control and precision helps with hand-eye co-ordination which is later linked to early literacy. Repeated and varied opportunities to explore and play with small world activities, puzzles, arts and crafts and the practise of using small tools, with feedback and support from adults, allow children to develop proficiency, control and confidence.

Skills and Knowledge									
What do we want the children to learn and know?									

Adult lead PE	Locomotion (exploring	Stability / <b>Gymnastics</b>	Manipulation	Dance	Recap Key Skills	Recap Key Skills
	ways to move)  First PE		(throwing, catching)  Enjoy the ball	(Choose one of the units on PPP PE for Dance to link in with this terms work)	Tennis	Athletics / Sports Day
Me as an active child	I can move in a range of ways, changing my body shape and position, e.g. crawling, rolling, skipping, sliding, hopping, slithering etc	I can jump off an object and land appropriately using my arms and body to help me balance.	I can show increasing control over an object, pushing, patting, throwing, kicking etc	I can experiment with different ways of moving, adapting movements to reduce risk	I can negotiate space successfully, avoiding obstacles etc, when playing racing and chasing games.	I can travel with confidence under over and through balancing and climbing equipment. I can adjust speed and direction to avoid obstacles.
Me as a mark maker	I can use simple tools to effect changes to materials	I can show a preference for a dominant hand	I can begin to use anti- clockwise movement and retrace vertical lines	I can begin to form recognisable letters	I can handle and range of tools and materials safely and with increasing control	I can hold a pencil and hold it effectively to form recognizable letters, most of which are correctly formed
Learning Environment- Big Question Enhancements	Play dough & modelling tools  loose parts- shells, wooden buttons, sticks, etc Family/People cutters	Coloured dough with different coloured loose parts (gems, beads etc- rainbows)  Red / yellow and blue dough to mix  Jelly play	Wheeled toys to make imprints in dough  Small construction toys to build vehicles	Cutters and resources of different sizes for ordering  Playdough making station to support measuring — link to maths	Selection of small loose parts / junk to make pictures / models etc using recycled materials	Playdough / Modelling clay / plasticine used to make characters or props for story telling
Ongoing continuous Provision (third teacher)	Bikes, tyres, planks of wood, large loose parts, chalk for large scale mark-making, balls, bean bags, hoops  Variety of mark making equipment (pens / pencils etc) scissors, paper  Play dough / modelling clay / Salt Dough & tools, small items & tweezers, paper clips, hole punches, threading, pasta, pegs etc					

# Personal, Social and Emotional Development (Self Regulation, Managing Self, Building Relationships)

Children's personal, social and emotional development (PSED) is crucial for children to lead healthy and happy lives, and is fundamental to their cognitive development.

Underpinning their personal development are the important attachments that shape their social world. Strong, warm and supportive relationships with adults enable children to learn how to understand their own feelings and those of others. Children should be supported to manage emotions, develop a positive sense of self, set themselves simple goals, have confidence in their own abilities, to persist and wait for what they want and direct attention as necessary. Through adult modelling and guidance, they will learn how to look after their bodies, including healthy eating, and manage personal needs independently. Through supported interaction with other children, they learn how to make good friendships, co-operate and resolve conflicts peaceably. These attributes will provide a secure platform from which children can achieve at school and in later life.

Ongoing continuous Provision (third teacher)	sim	ple games to play (snap / p	, ,	s etc) jigsaw puzzles, role ractice various skills	taste and explore play area for social interact	tion

#### **Expressive Arts and Design**

### (Creating with Materials and Being Imaginative and Expressive)

The development of children's **artistic and cultural awareness supports** their imagination and creativity. It is important that children have regular opportunities to engage with the arts, enabling them to explore and play with a wide range of media and materials. The quality and variety of what children see, hear and participate in is crucial for developing their understanding, self-expression, vocabulary and ability to communicate through the arts. The frequency, repetition and depth of their experiences are fundamental to their progress in interpreting and appreciating what they hear, respond to and observe.
