

GATLEY PRIMARY SCHOOL

PUPIL MENTAL HEALTH AND WELLBEING

This policy is intended as a framework for staff, parents and governors of the school in outlining the ways in which the school provides support and guidance in order to promote positive mental health and wellbeing for all pupils.

January 2025

Gatley Primary School | Hawthorn Road | Cheadle | Gatley | SK8 4NB

Pupil mental health and wellbeing policy

At Gatley Primary School we recognise that positive mental health and wellbeing are essential to the development of thriving and successful pupils. It is therefore vital to our aims as an organisation that we provide high quality mental health and wellbeing support.

This policy sets out our commitment to monitoring and improving the wellbeing of our pupils. It sets out some of the ways in which key members of staff take responsibility for the school's approach to promoting positive mental health and wellbeing. It also describes our process for identifying and responding to mental ill health, and the support we make available to all pupils.

This policy is drafted by the *Senior Mental Health Lead* in consultation with *The Designated Safeguarding Lead, and school SENDCo* and will be reviewed by the governing body annually.

Aims

We aim to ensure that our school:

- reduces the stigma attached to mental health issues and promotes positive wellbeing in all pupils
- provides a secure environment that encourages openness and trust
- can respond effectively to concerns about pupils' mental health
- embeds the skills pupils need to make good decisions about their own mental health and wellbeing
- offers comprehensive pastoral and medical support that is accessible to all pupils
- encourages pupils to seek support or assistance and report concerns about others
- provides guidance and training to staff to support and care for pupils.

Roles and responsibilities

The school's designated lead for mental health and wellbeing is responsible for:

- coordinating the school's approach to promoting positive mental health and wellbeing
- providing all members of staff with the knowledge and skills they need to identify signs of mental ill health in pupils and to report these signs effectively and promptly
- building strong working relationships with child and adolescent mental health services and other external partners
- reporting to the governing body on the school's wellbeing policy and programmes
- working with the senior leadership team (SLT), governing body, school staff, parents and pupils to create an environment where everyone feel safe, supported and motivated.

The head teacher is responsible for:

- reviewing this policy on a regular basis, ensuring that it is developed in consultation with pupils, parents and members of staff
- ensuring that staff are equipped with the appropriate training to support pupils in mental health and wellbeing
- listening to the views of pupils and making sure that they have opportunities to contribute to the decision-making process
- ensuring that the school shares information on mental health with all pupils.

The head teacher implements these responsibilities with the support of appropriate members of the senior leadership team (SLT) such as the deputy head teacher, senior leaders and pastoral staff.

The designated safeguarding lead is responsible for:

- keeping detailed records of any significant mental health concerns
- liaising with external services where there are any significant mental health concerns
- acting as a source of support and expertise to the school community.

All members of school staff are responsible for:

- treating all pupils with empathy, respect and kindness

- encouraging pupils to disclose concerns or seek help when necessary
- reporting any wellbeing or mental health concerns to the school's designated lead for mental health and wellbeing.

Examples of good practice may include:

- organising whole-school or year group assemblies to discuss specific mental health and wellbeing issues
- arranging for external speakers to visit and discuss topical issues such as the use of social media or the impact of body image
- using key dates such as Mental Health Awareness Week and World Mental Health Day as opportunities to raise the profile of mental health
- dedicating time to celebrate pupils' academic and extracurricular achievements
- including pupil wellbeing in lesson observation criteria for teaching staff
- running yoga or mindfulness sessions to prepare pupils for a relaxed day
- using displays (such as the Mo scale) as a form of support for mental health and wellbeing
- Use of the Mo scale to allow children the opportunity to talk about their feelings and any worries they may have (this is monitored by staff as per the whole school provision map and graduated approach)
- having dedicated safe spaces for pupils to access (such as the wellbeing space as used by ELSA's)
- Providing pathways to external support such as effective counselling service or CAHMS where appropriate.

Mental health and wellbeing in the curriculum

The school will commit to promoting physical health and mental wellbeing through in-classroom teaching. In addition to the basic steps pupils can take to care for themselves, teachers will put specific emphasis on the skills young people need to overcome setbacks and succeed in the face of adversity.

RSHE Curriculum and 'The Golden Thread'

Through the delivery of high quality, evidence-based and age-appropriate Relationships and Health Education, we aim to help prepare pupils for the onset of puberty, give them an understanding of sexual development and the importance of health and hygiene, create a positive culture in relation to sexuality and relationships and to ensure pupils

know how and when to ask for help and where to access support. By the end of their learning journey at Gatley Primary, we hope that pupils will have developed resilience and feelings of self-respect, as well as confidence and empathy in preparation for the responsibilities of adult life.

The teaching of RSE/PSHEE appears on our curriculum progression grids as a 'Golden Thread'. It is the thread that runs through all of our curriculum areas meaning it is embedded into teaching and learning across the curriculum. The 'Golden Thread' is related to 6 concepts which have been formed from the PSHEE and RSE curriculum and related policies. These concepts enable us to embed health and wellbeing within our curriculum instead of it being taught discretely.

The six concepts are:

- English, Communication and Language: **Caring Friendships**
- Mathematical Understanding: **Economic Wellbeing**
- Physical Development, Health and Wellbeing: **Health and Wellbeing**
- History, Geography and Social Understanding: **Families and people who care for us**
- Arts: **What it means to be health** (hobbies, health mind, creativity)
- Science and Technological Understanding: **Internet Safety**

To emphasise the benefits of spending time outdoors, pupils also have the opportunity to take part in *Forest school activities time as part of the curriculum*.

Supporting individual pupils

All members of staff will work together to identify and monitor mental health concerns. Open communication between members of staff will help to create a 'first line' in supporting individual pupils and responding to disclosures. Staff will record information accurately and regularly in order to track concerns. This will complement the school's pastoral tracking processes. In addition, senior and pastoral leaders (including Mental Health First Aiders and Emotional Literacy Support Assistants) will meet half termly to discuss any ongoing concerns and make suitable arrangements as required.

Staff will be encouraged to look out for:

- erratic, unaccountable behaviour (e.g. leaving lessons suddenly)
- changes in sleeping habits
- disengagement from work or extracurricular activities
- unexpected or disproportionate reactions to ordinary situations

- aggressive or compulsive behaviour
- a drop in academic achievement
- a drop in attendance
- isolation from peers
- dysfunctionality in family life
- talking about self-harm or suicide
- changes in appetite
- changes in clothing

The whole school SEMH provision map provides staff with support and guidance where they have concerns about children's mental health and wellbeing. This whole school approach is integral to promoting positive SEMH and forms a necessary precursor to programmed or individualised intervention where these are thought to be appropriate.

Staff members are able to access support for individual children via a 'triage' system. A triage approach to directing support is an effective way to manage resources, prioritise cases, and ensure that assistance is provided where it is needed most. A triage helps support us to make the efficient and impactful use of available resources in a variety of contexts.

We understand that positive relationships are of fundamental importance in laying the foundations for continuing SEMH. We know that a child experiencing positive SEMH is more likely to approach his/her learning with confidence, which has a direct impact on attainment and vice versa. Building positive relationships between teachers and peers, as well as good and inclusive teaching practice are fundamental to improving outcomes for all children, not least within the area of SEMH.

The graduated approach as set out in the whole school provision map enable staff to have an awareness of and identify any concerns they may have in relation to a child's mental health and wellbeing as well as outlining a whole school approach in terms of mental health and wellbeing. The provision map then enables staff to be able to identify the appropriate level of support required as well as well as understanding of what the next steps may be.

The school will provide a list of all members of staff who are available to discuss mental health concerns confidentially (these include trained Mental Health First Aiders, Emotional Literacy Support Assistants and also the Mental Health Senior Leader). If a member of staff feels it is appropriate to pass on concerns, they will explain to the pupil who they are going to talk to and what they are going to tell them.

Providing a network of support

In addition to supporting individual pupils with mental health and wellbeing concerns, the school will commit to making sure that all pupils can access a cohesive network of pastoral and medical services. These include:

- Daily access to and use of the Mo scale within classrooms so that children are able to understand their emotions and staff are able to identify any concerns or patterns in emotions for children.
- Mental Health First Aiders who are available at an time of the day,
- Referral to Emotional Literacy Support assistants where support through intervention is required.
- Where appropriate (following the graduated approach of the whole school provision map) children may be given an IPM (Individual Provision Map) where more personalised support is needed, including the involvement of outside agencies (such as CAHMs).

The head teacher and designated senior mental health lead will work closely together to identify opportunities for staff training, so that all members of staff feel confident in supporting pupils. Examples of good practice include holding insets to look at mental health and wellbeing and providing staff with training opportunities to learn about specific aspects of mental health, such as dealing with anxiety or bereavement.

Working with families and the community

The school believes that effective mental health and wellbeing support depends on the input of parents, carers and the broader community. Through our *parent surveys; wellbeing focus groups; and parent workshops*, we make sure that parents have regular opportunities to inform our approach.

We are also pleased to offer parent information evenings on topics such as '*The effects of social media on pupil wellbeing*'. Senior and pastoral leaders are always available to meet parents to discuss any concerns.

Related policies

This policy should be read in conjunction with policies for:

- anti-bullying

- child protection and safeguarding
- online safety
- Relationships, sex and health education(RSHE) education.

Whole School Provision Map

SEMH

Introduction

Social and emotional skills refer to the skills that help children and young people develop their resilience and manage their thoughts, feelings and behaviour (Anna Freud National Centre for children and families).

There is extensive evidence associating childhood social and emotional skills with improved outcomes at school and in later life, in relation to physical and mental health, school readiness and academic achievement, crime, employment and income (EEF Improving Social and Emotional Learning in schools).

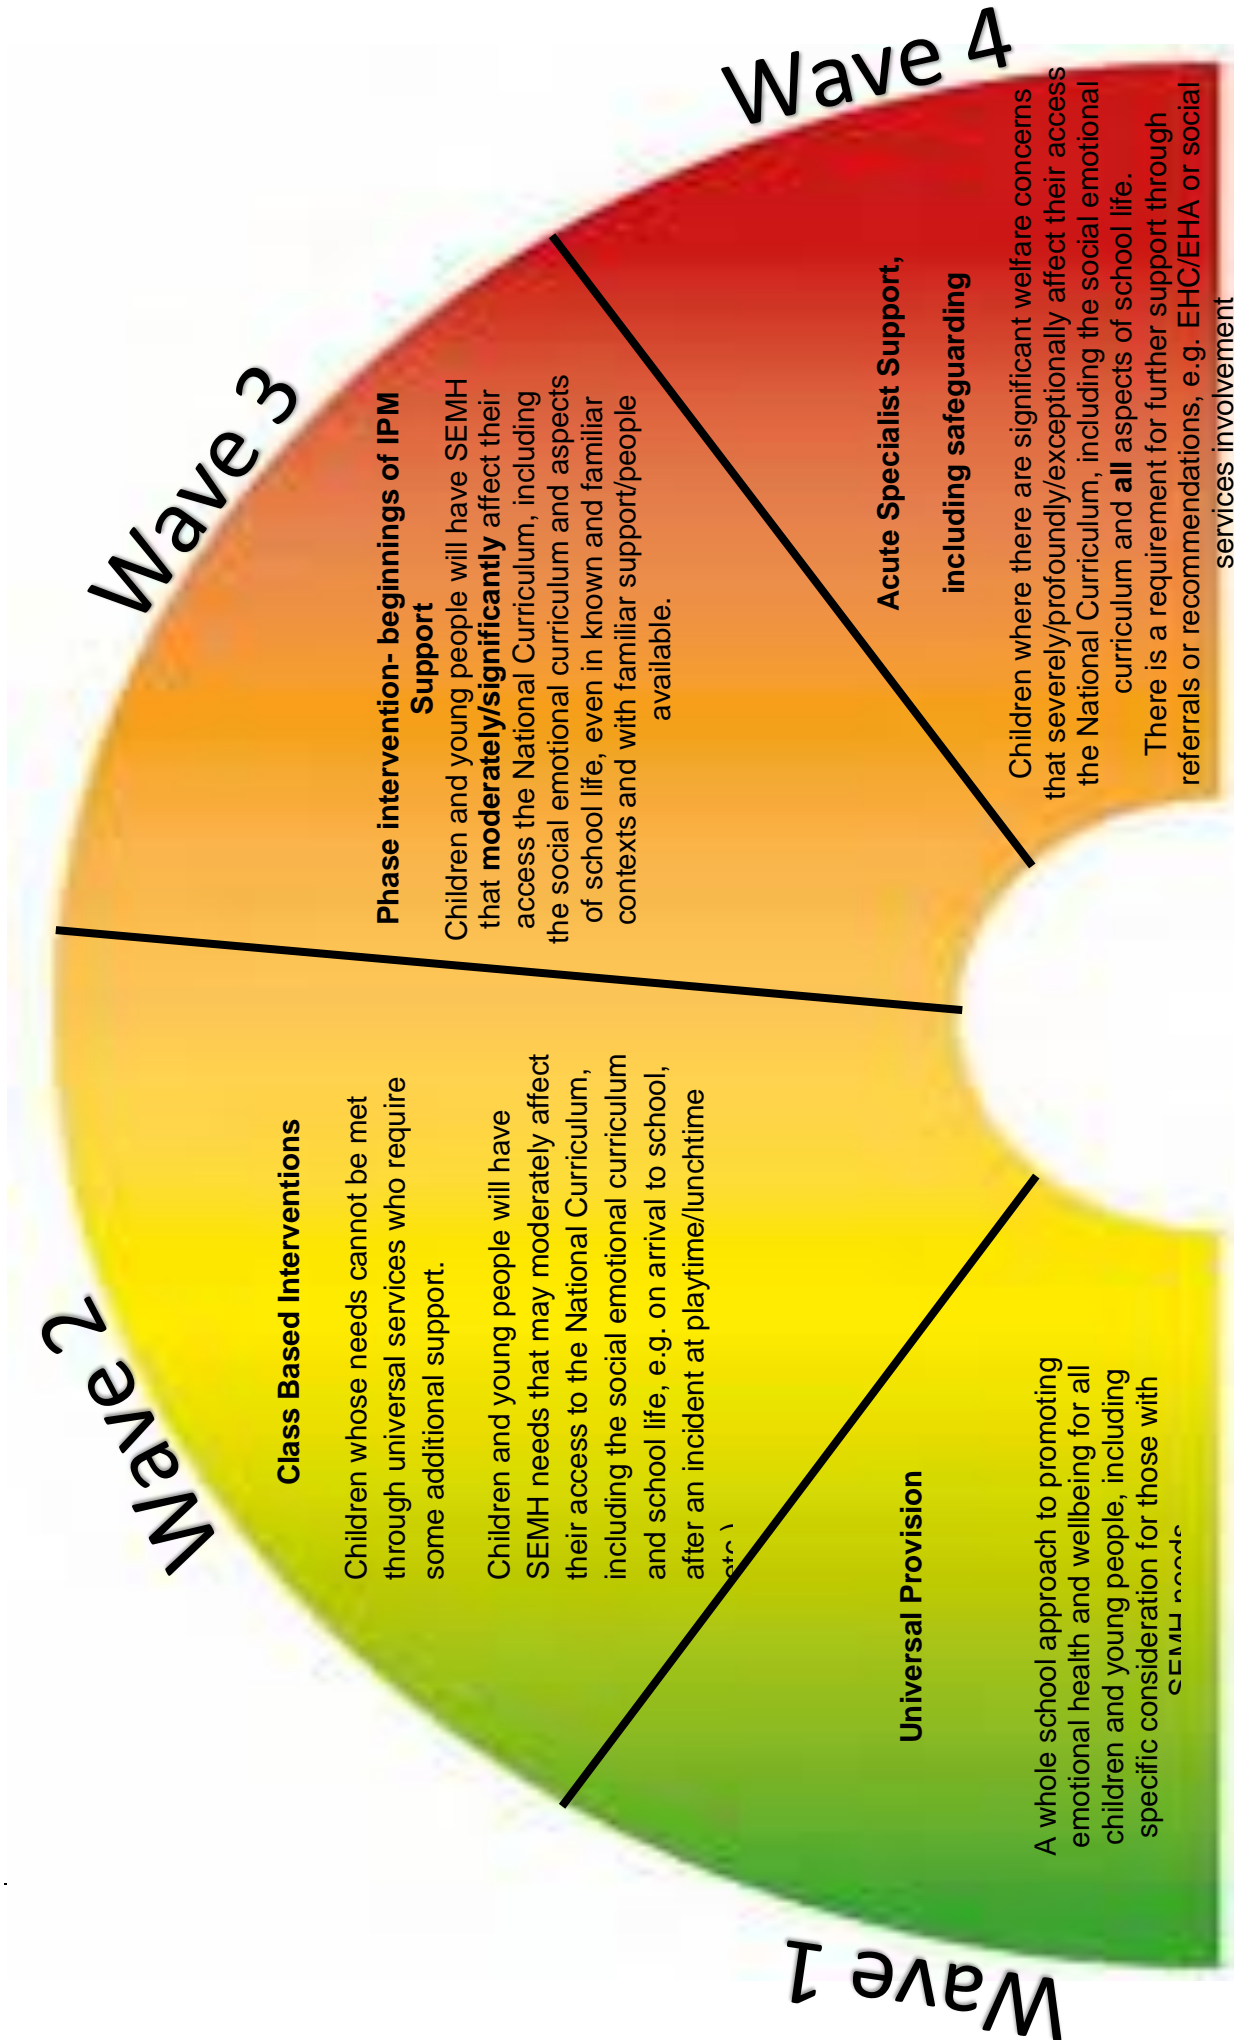

A child's environment can have a profound impact upon his or her social, emotional and mental health. This is true of the school environment where the influence of school culture, ethos and staff upon SEMH cannot be understated. Far from being limited to the domain of specialist professionals external to school, it is the quality of the seemingly every day experiences and interactions that form the fabric of each pupil's school experience. This can enhance protective factors (e.g. positive relationships with peers and teachers, positive mental health of school personnel, sense of security) and reduce risk factors (e.g. low academic achievement, disengagement, bullying and relationship difficulties) in relation to SEMH which are incorporated into the guidance below.

At Gatley Primary School we recognise the need for a whole school approach to promoting positive SEMH and this should form a necessary precursor to programmed or individualised intervention where these are thought to be appropriate. Building positive relationships between teachers and peers, as well as good and inclusive teaching practice are fundamental to improving outcomes for all children, not least within the area of SEMH.

Description of needs

The children and young people to whom this guidance relates will present with a range of social, emotional and mental health differences which impact upon their learning and social inclusion, and which manifest themselves in many ways. These may include becoming withdrawn or isolated, as well as displaying challenging, disruptive or disturbing behaviour. Such differences will vary in severity and intensity and which may change over time. To make it less likely that difficulties will arise or become more severe, schools will need to develop and maintain:

- Effective teaching and learning across the curriculum
- A fully inclusive school ethos
- A positive learning environment
- Robust curricular and pastoral arrangement
- Systems that foster positive relationships with children and young people and their parents/carers.

Graduated Response

After initial concerns are raised, children can move through the Elements following a 'Plan, do, review' process of three half terms at each stage.

Children can be moved down through each element after strategies have been implemented to support the child in making accelerated progress

Element 3 (Wave 4)

EHCP pathway/external Agency referral
One page profile, SEN support plan, termly provision map, weekly provision map
Additional and highly personalised interventions
Personnel involved: As below +

Element 2 (Wave 2/3)

Children have SEMH needs that moderately/significantly affects their access to the National Curriculum
One page profile, SEN support plan, termly provision map
Targeted support given, e.g. ELSA, SALT, Play Therapy
Referral to the Pastoral Lead for targeted support

Element 1 (Wave 1)

Universal-emerging concern form and one page profile
Quality first teaching for all
A whole school approach to promoting emotional health and wellbeing for all children and young people, including specific consideration for those with SEMH needs. Example strategy: Pastoral support will be provided by a TA or through 'check-ins' with a Mental Health First Aider

SEMH Triage Proposal

Aim: To establish a strategy for managing internal referrals for SEMH support

Proposal: To hold an 'SEMH Triage' meeting to categorise support requests based on the severity of need and by extension the order in which multiple students can be monitored and supported.

Details:

- **Who:** Senior Mental Health Lead, Pastoral Lead, SENCO, 1 x Mental Health First Aider, 1 x ELSA, Senior Mental Health Lead (Once per half term)
- **When:** 30 minutes, during Thursday SLT assembly
- **Step 1:** Teachers will complete an internal referral form (See Appendices) and e-mail to the SENCO e-mail address with the title "Triage"
- **Step 2:** The nominated panel member will print and bring to the meeting
- **Step 3:** Each referral will be reviewed by the panel and assigned a level of support
- **Step 4:** The panel update the referral register including a brief overview of any follow up
- **Step 5:** A nominated panel member feeds back the panel findings to the appropriate class teacher, and other support staff who may be involved

Rationale: A triage approach to directing support is an effective way to manage resources, prioritise cases, and ensure that assistance is provided where it is needed most. A triage helps support providers to make the efficient and impactful use of available resources in a variety of contexts.

Efficient Resource Allocation – Resources can be allocated efficiently by prioritizing those in urgent need of support. By categorising cases based on severity or importance, resources can be directed where they are most needed, optimising their use.

Maximising impact: It is essential to focus efforts where they will have the greatest impact. Triage allows support providers to address the most critical cases first which mitigates damage and resolves urgent issues before they escalate.

Reduced response time: By quickly identifying and addressing urgent cases, a triage approach reduces response times. This is crucial in situations where delays could lead to further harm or deterioration of the situation

Structured decision making: The triage will provide a structured framework for decision-making, ensuring that decisions are made consistently and fairly. By using predetermined criteria to prioritise cases, triage reduces the likelihood of bias or arbitrary decision-making.

SEMH Triage Request					
Name of child/ young person:		Gender identity: Male/Female/Non-binary Pronoun: He/ She/ They		Class:	
Is the child known by any other name?

Pupil Version of the Policy

GATLEY PRIMARY SCHOOL

Mental Health Policy

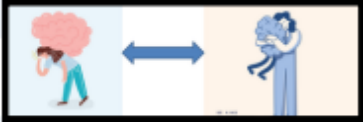

At Gatley Primary School we know that positive mental health and wellbeing are essential to the development of happy and successful pupils. It is very important that we provide high quality mental health and wellbeing support, so that all learners can thrive.

What is mental health?

We **ALL** have physical health. When our bodies are unwell, we need to look after them by resting or having medicine. We **ALL** have mental health. We have to look after our brains and emotions too!

Our mental health is all about how we think and feel, and can change all the time.

What does this look like in our learning?

The Golden Thread runs through all areas of our curriculum to help us understand the importance of mental health and wellbeing. The areas are:

- English, Communication and Language: **Caring Friendships**
- Mathematical Understanding: **Economic Wellbeing**
- Physical Development, Health and Wellbeing: **Health and Wellbeing**
- History, Geography and Social Understanding: **Families and people who care for us**
- Arts: **What it means to be health (hobbies, health mind, creativity)**
- Science and Technological Understanding: **Internet Safety**

What can I do if I feel worried or sad?

It is normal to feel different emotions, but sometimes they happen too often or feel too big. In this case, you can:

- talk to a friend or trusted adult
- write down or draw your feelings
- visit a space that helps you feel calm

Who can help us?

All adults will listen to you if you have any worries about your mental health, but there are some adults with roles specifically designed to help.

Mental Health First Aiders - Miss Milward, Mrs Newton Mrs Farrell, Miss Gibbons

Our mental health first aiders are there to help you feel supported and understood.

ELSA (Emotional Literacy Support Assistant) - Mrs Sutcliffe, Mrs Adaway

ELSA specialists help you to understand your feelings and build the tools you need to handle them
