

FAQS

Will my child's learning be disrupted by the building works ?

The project timeline has been designed to ensure disruption to learning is prevented or remains minimal. For example, holiday windows, such as the Summer Holiday, will be used to conduct ground works, which could be noisier. Due to the location of the extension, for the vast majority of classes there will be little or no effect.

To ensure no disruption to learning for those classes positioned closest to the building works, classrooms will be re-sited into purpose built modular classrooms.
