

FAQS

Why was this location chosen?

After having scoped the feasibility options around the school site we were advised to consider building above the Year 5 and 6 classrooms. This was advised for the following reasons:

- This area of school already has a pitched roof so the build will fall in line with the current height of the school building.
- The roof in this area is due for upgrade so there would have been a need for work to be undertaken regardless.
- Building 'up' would allow us to maintain our current playground space.
