

# Curriculum Intent Statement for Business Studies

## Intent

The Business Studies curriculum is designed to build entrepreneurship and encourage pupils to become risk takers.

We aim to inspire students to be ambitious and start their own businesses by creating practical and engaging lessons where they learn to analyse financial information, make operational and human resource decisions and create marketing strategies to develop their entrepreneurial skills. The department hopes to broaden student experiences through trips, guest speakers, clubs, and reading resources.

## Implementation

### Primary and KS3

Business studies is a GCSE subject and is therefore not taught at this level. Opportunities are however taken where appropriate to develop students' enterprise awareness and skills.

### KS4

KS4 follows the EDEXCEL exam board specification and is taught in mixed ability groups over 6 hours per fortnight. Business studies is delivered at Years 10-11.

The holistic teaching of our lessons reflects the collaborative way businesses in the real world work and ensures students gain a clear understanding of each department's role. Students will consider the practical application of business concepts. The units provide opportunities to explore theories and concepts in the most relevant way, through the context of events in the business and economic world. The knowledge and skills gained from Business will provide students with a firm foundation for their future career.
