Revision Tips

Organise your notes into the sections above. Use the checklist that you have been provided with in class to check you have relevant details. Review your end of topic tests, feedback and DIRT to reassess your strengths and weaknesses. Process your notes by reading, making mind maps, cue cards etc. Use memory techniques to assess how well you know that information, for instance re write topic information onto a blank sheet of paper or a revision mat and check what information you can easily recall. Attempt past exam paper questions and check your responses with mark schemes.
