

Careers and Enterprise Information, Advice and Guidance (CEIAG) Policy

Policy approval Date	January 22
Review Date:	June 26
Next Review	June 27

Policy Statement

Every child should leave school prepared for modern Britain. Careers and Enterprise Information, Advice and Guidance (CEIAG) is crucial in helping pupils emerge from school more fully rounded and ready for the world of work.

Great Sankey High School aims to deliver impartial careers guidance through a range of processes designed to develop high aspirations in pupils, encourage pupils to consider a broad and ambitious range of careers and enable individuals to make informed choices and transitions related to their personal, educational and careers development.

This range of processes will include informing, advising, counselling, enabling, advocating and careers education.

The Aims of the Policy

- To facilitate the effective transition of pupils at the end of Key Stages 3, 4 and 5 to courses of study which will lead on to higher education or training or employment which match the aspirations of pupils and their parents.
- To allow access to providers of technical education and apprenticeships so that every pupil is well-informed about their future options at every stage.
- To help pupils:
- Interested in going to university, and a technical route, including T levels or an apprenticeship.
- Seeking to progress to the highest levels of skilled employment or technical education and training at levels 4, 5, and 6. Progression options will include higher and degree level apprenticeships or higher technical education, including technical degrees.
- To provide relevant and accessible information to all pupils on the full range of opportunities open to them and to foster an understanding of where such choices may lead.
- To provide a curriculum and leadership experiences from the start of secondary education and onward which will enable all pupils to develop the skills of planning, self-appraisal, decision making, self-presentation and transition management.
- To enable all pupils to make reasoned, informed and appropriate career choices.
- To encourage and attitude of self-worth and the development of personal autonomy so that pupils may reach their highest expectations.
- To promote social inclusion and improve social mobility.
- To provide accurate and up-to-date careers resources and careers information service for pupils and staff in line with best practice.
- To enhance pupils' self-awareness and awareness of educational and careers opportunities through individual impartial guidance and careers education.
- To liaise with and support staff throughout The School and College, helping them to devise and deliver appropriate careers education within course programs and the tutorial system.
- To devise and deliver staff development in careers education, information, advice and guidance.
- To work towards providing equality of opportunity and access to all pupils.
- To negotiate partnerships with external providers of careers and guidance which will add value to school-based provision. Through this, to provide a well-integrated support service for pupils and staff.
- To keep up-to-date, through personal development programs, college provision,

apprenticeships, HEI courses and employment trends in order to ensure that advice is informed and realistic.

- To use the Gatsby Benchmarks to assess and improve the quality of The School and College 's careers strategy and program over time.
- To give all pupils in year 8 to year 13 access to a range of education and training providers for the purpose of informing them about approved technical education qualifications or apprenticeships.
- To make sure pupils have access to external sources of information on the full range of education and training options.
- To support the mission, vision and values of the Omega Multi-Academy Trust and its establishments.

Responsibilities of The School and College

- The School and College are required to provide pupils with independent careers guidance from Year 8 (12-13 year olds) to Year 13 (17-18 year olds).
- The School and College will ensure all guidance is presented in an impartial manner; and includes information on the range of education or training options, including apprenticeships and technical education routes.
- The School and College will ensure that arrangements are in place to allow a range of education and training providers to access all pupils in years 8-13 to inform them about approved technical education qualifications and apprenticeships, and that the access policy statement is published on its website.
- The School and College will use the Gatsby Charitable Foundation's Benchmarks to develop and improve careers' provision for all pupils.
- The School and College will ensure there is a designated Lead Governor who takes a strategic interest in careers education and guidance and encourages employer engagement.
- The School and College will designate a named person to the role of Careers Leader to lead the careers programme. The name and contact details of the Career Leader will be published on The School and College website.
- The School and College will provide a planned CEIAG programme with measurable aims/targets which is age appropriate. This programme will be delivered as part of the PSHE Programme and via designated enrichment/Leadership days or events.
- The School and College will work in partnership with local employers and other education and training providers such as colleges, universities and apprenticeship providers to develop and deliver its careers programme. This will ensure that young people can benefit from direct, motivating and exciting experience of the world of work to inform decisions about future education and training options.
- The School and College will ensure pupils understand that a wide range of career choices require good knowledge of maths and the sciences and take steps to ensure that pupils are exposed to a diverse selection of professionals from varying occupations which require STEM subjects.
- Opportunities to develop leadership and entrepreneurial skills for self-employment will be provided as part of the CEIAG programme. These opportunities will help pupils to develop the key personal skills and aptitudes required by employers and prestigious universities including oral communication, personal effectiveness, entrepreneurship, self-actualisation, problem-solving, resilience, grit and enhanced emotional intelligence. The programme will also enable pupils to develop the confidence, resilience and self-belief needed to help them 'break out' of more traditional career pathways in their community and into universities and more prestigious jobs.
- All pupils will be supported to make an informed choice about whether to aim for

university, including the very best universities and courses, or an apprenticeship as an equally high calibre and demanding route into employment and higher education.

- The School and College will ensure that all pupils are aware of out of school opportunities that could help them with their career aspirations, such as the National Citizen Service and other voluntary and community activities.
- The School and College will consciously work to prevent all forms of stereotyping in the advice and guidance it provides, to ensure that all pupils from all backgrounds and diversity groups consider the widest possible range of careers, including those that are often portrayed as primarily for one or other of the sexes.
- The School and College will make clear to pupils what information has been collected about them and how this will be used.
- The School and College will make clear to pupils that if they do not achieve a grade 4 or better in GCSE Maths or English by the end of key stage 4 they will be required to carry on studying these – at school, college or as an apprentice.
- Parents will be informed of the CEIAG Programme.

Inspiring young people

- The School and College have high expectations of all pupils. It will provide sustained and varied contact with employer networks, Further Education colleges, Higher Education Institutions, mentors, coaches, alumni or other high achieving individuals in order to motivate pupils to think beyond their immediate experiences and encourage them to consider a broader and more ambitious range of future education and career options.
- The School and College will create a learning environment which allows and encourages pupils to tackle real life challenges which require them to manage risk and to develop their decision making, team building and problem solving skills.
- The School and College will facilitate access to a range of inspirational role models and employers in order to instill resilience, goal setting and social confidence and challenge pre-conceived ideas about jobs.
- The School and College will use its Leadership Specialism to promote a wide range of careers and successful role models from the worlds of politics, business and the public sector who embody the very best of leadership characteristics, including moral, performance and civic leadership.
- The School and College will also draw upon 'The Pledge' – an organisation working to support relationships between educators and employers.
- CEIAG provision will have a clear focus on the enterprise skills, experience and qualifications that employers want and support preparation for work.

Meeting the Gatsby Benchmarks

- The School and College will use the Gatsby Charitable Foundation's Benchmarks to develop, assess and improve their careers provision.
- The School and College will use Compass +, which is an online self-evaluation tool to assess how their careers support compares against the Gatsby Benchmarks and the national average. Compass will be used as a baseline to help The School and College to consider the opportunities to improve The School and College's careers programme based on their confidential results, and track their progress against the Benchmarks over time.
- Gatsby 8 Benchmarks include:
 - Benchmark 1: A stable careers programme;

- Benchmark 2: Learning from career and labour market information.
- Benchmark 3: Addressing the needs of each pupil.
- Benchmark 4: Linking curriculum learning to careers.
- Benchmark 5: Encounters with employers and employees.
- Benchmark 6: Experiences of workplaces.
- Benchmark 7: Encounters with further and higher education.
- Benchmark 8: Personal guidance.
- The School and College will aim to comply fully with the Gatsby Benchmarks set out below.

Benchmark 1: A Stable Careers Programme

- The School and College will have its own careers programme in place which meets the requirements of the Gatsby Benchmarks, showing how they come together into a coherent strategy that is embedded in school structures.
- The School and College will designate a named individual with appropriate skills and experience (a Careers Leader) to ensure the leadership and co-ordination of a high quality careers programme. This role is distinct from the Careers Adviser, who provides careers guidance to pupils. The Careers Leader may be a teaching or non-teaching member of staff but should have influence across the School and College and buy-in from the Governors and Senior Leadership team.
- The School and College will publish the name and contact details of their Careers Leader on their website.
- The School and College will publish details of their careers programme so that it is known and understood by pupils, parents/carers, teachers, governors and employers. This will also include a policy statement on Provider Access.
- The School and College will invite feedback on the plan from these groups as part of a regular evaluation and impact of the careers programme.
- The programme will demonstrate how the School and College are responding to meeting the Gatsby Benchmarks.
- The School and College will be supported by 'The Pledge' - an Enterprise Adviser – a senior volunteer from business – who helps unlock relationships with other local businesses.
- The School and College will aim to gain formal accreditation of their careers programme through the Quality in Careers Standard - the national quality award for careers education, information, advice and guidance. The Standard offers an opportunity for schools to undergo an external evaluation of their careers programme and so is distinct from the Compass self-assessment.

Benchmark 2: Learning from career and labour market information

- All pupil, their parents/carers, and teachers and staff who support pupils will have access to good quality, up to date information about future study options and labour market opportunities. The National Careers Service offers information and professional advice about education, training and work to adults and young people aged 13 years and over. Pupils and their parents/carers can access support via a website helpline and web chat.
- Labour market information (LMI) will be used to help young people and their parents/carers to understand the salaries and promotion opportunities for different jobs, and the volume and location of vacancies across different sectors. Where applicable, young people with special educational needs and disabilities (SEND) and their parents and carers will be provided with different or additional information
- The School and College will make sure that, during each key stage, all pupils have accessed and used information about career paths and the labour market to inform their decisions on

study options.

- The School and College will explain the value of finding out about the labour market and support young people and their parents/carers to access and understand this information.
- LMI will be accessed from a range of sources including LMI for All which is used by a number of providers, including the National Careers Service. Unifrog will also be used for this purpose.
- Good career and labour market information will be used to support social mobility by raising pupil's aspirations and tackling stereotypical assumptions that certain jobs are 'not for people like me'.
- The School and College will use a number of interventions to tackle gender stereotypes, for example by arranging for pupils to talk to men and women who work in non-stereotypical jobs and raising awareness of the range of careers that STEM qualifications offer.

Benchmark 3: Addressing the needs of each pupil

- The School and College's careers programme will raise the aspirations of all pupils by tailoring it to individual need.
- The School and College will consciously work to prevent all forms of stereotyping in the advice and guidance they provide, to ensure that young people from all backgrounds, gender and diversity groups, including those with special educational needs and disabilities, are able to consider the widest possible range of careers.
- The School and College will keep comprehensive and accurate records to support the career and enterprise development of pupils to ensure an effective means of maintaining consistent advice and helping pupils, parents/carers and advisers to keep track of agreed actions and next steps. It will also be used to help pupils to showcase their skills to employers.
- The School will also ensure this information is available for those students who change schools.
- The School and College will assess their success in supporting their pupils to take up education or training which offers good long-term prospects through:
 - the use of destination data provided by The School and College and the Department for Education;
 - the collection and analysis of destination data to see how well The School and College is countering stereotypes; raising aspirations whilst maintaining alumni networks with employers and further/ higher education.
- Destination measures are produced and published by the Department for Education using existing data collections and are based on sustained participation. They show:
 - the percentage of a school's former pupils who continued their education or training (including through an apprenticeship), went into employment, and those who were not in education, employment or training (NEET).
 - the data are broken down by a range of pupil characteristics, including special educational needs, eligibility for free school meals in year 11 and, at key stage 4, disadvantaged pupils who would have attracted the pupil premium.

Benchmark 4: Linking curriculum learning to careers

- Subject teachers will support The School and College's approach to careers education and guidance.
 - The curriculum will offer excellent opportunities for developing the knowledge and skills that employers need. Subject teachers will be powerful role models to attract pupils towards their subject and the careers that flow from it.
- The School and College will ask all teachers to support the career development of pupils in their tutorial role and through their subject teaching.
- The School and College will deliver careers, employability and enterprise lessons through:

the curriculum as part of their commitment to Personal, Social, Health and Economic (PSHE) education; weaving careers education and guidance in to subjects across the curriculum, including PSHE.

- The School and College will ensure that, as early as possible, pupils understand that good math skills are a necessary element of citizenship, and that studying maths and science can lead to a wide range of career choices.
- The School and College will ensure that, by the age of 14, every pupil is exposed to the world of work. This will include meeting a range of professionals from occupations which require maths and science qualifications, as well as highlighting the importance of maths to all jobs. These meetings will emphasise the opportunities created for pupils who choose maths and science subjects at school and college.
- The School and College will be aware of the need to do this for girls, in particular, who are statistically much more likely than boys to lack confidence in their own ability in maths and science and be put off studying those subjects at an early age.
- The School and College will support pupils to understand that these are the subjects which provide a sound basis for a variety of careers beyond the age of 16 and can also enrich pupils' studies and give them a broad general knowledge that will enable them to participate in and contribute to society.
- The School and College will make clear to pupils that if they do not achieve a grade 4 or better in GCSE maths and English by the end of key stage 4 they will be required to continue working towards this aim as part of their 16-19 study programme. For some pupils, this may mean taking stepping stone qualifications in order to support pupils as they work towards a GCSE. There are exemptions for some pupils with Education, Health and Care plans who may not be able to take any of these qualifications, although all pupils will continue to study maths and English at an appropriate level. This is because of the vital importance and powerful labour market value of securing a good standard in maths and English.

Benchmark 5: Encounters with employers and employees

- The School and College will engage with employers on pupils' future prospects and earnings in adult life through careers talks with outside speakers.
- The School and College will place a clear focus on the enterprise and employability skills, experience and qualifications that employers want in order to support pupils' preparation for work.
- The School and College will help pupils gain the confidence to compete in the labour market by providing opportunities to gain the practical know-how and attributes that are relevant for employment. This will include the opportunity for pupils to develop entrepreneurial skills for self-employment.
- The School and College will engage fully with local employers, businesses and professional networks to ensure real-world connections with employers lie at the heart of the careers strategy. Visiting speakers can include junior employees, or apprentices, particularly alumni, with whom pupils can readily identify.
- The School and College will work with The Careers and Enterprise Company to identify an Enterprise Adviser appropriate for The School and College. An Enterprise Adviser is an experienced business volunteer who can support The School and College to connect to the labour market.
- Every year from the age of 11, pupils will participate in at least one meaningful encounter with an employer – this means at least one encounter each year from years 7 to 13. Different encounters will work for different schools and pupils, but it may mean in practice:
 - careers events such as careers talks;
 - careers carousels and careers fairs;
 - transitions skills workshops such as CV workshops and mock interviews;
 - mentoring and e-mentoring;
 - employer delivered employability workshops;

- business games and enterprise competitions.
- Because of the high returns to STEM careers, and the increasing need for many jobs to have greater quantitative skills in future, The School and College will make sure one of the encounters the pupils experience before year 11 is with a STEM employer or workplace, or one of their careers events is focused around STEM.

Benchmark 6: Experiences of workplaces

- In addition to school-based encounters with employers, pupils will have first-hand experience of the workplace. This is particularly valuable for pupils from disadvantaged backgrounds who may not have access to a diverse range of role models.
- The School and College will ensure that by the age of 16, every pupil has had meaningful experiences of the workplace. By age 18, every pupil should have had at least one.
- The School will seek to increase the opportunities for pupils in y7-9 to access work-experience opportunities – working towards to goal of 25hrs of work experience KS3 and again in KS4.
- The School and College will pay particular attention to work placements for pupils with SEND. Some pupils with SEND may find work placements particularly helpful, especially where pupils find it difficult to imagine a work context, or to counter low aspirations.
- When arranging work placements for pupils with SEND, The School and College will carefully match the placement to the abilities, needs and aspirations of the pupil. The School and College will consider whether pupils with SEND need additional support in the work placement to ensure it is a valuable and positive experience, and secure that support where needed, working with the employer.
- High quality and meaningful work experience forms a required part of 16-19 study programmes. A more flexible approach can be adopted for younger pupils and does not necessarily have to involve a traditional placement. Options could include:
 - workplace visits;
 - work experience in y10 (1 weeks);
 - job shadowing;
 - career-related volunteering and social action.

Benchmark 7: Encounters with Further and Higher education

- The School and College will encourage pupils to consider what career options different educational choices open up and close down. Under raising the participation age (RPA) requirements, all young people in England are required to continue in education or training until at least their 18th birthday. The School and College will ensure that young pupils are clear about this requirement and what it means for them. They must be clear that pupils are not required to stay in school. They can choose how to participate which might be through:
 - full time study in a school, college or training provider;
 - an apprenticeship, traineeship or supported internship;
 - full time work or volunteering (20 hours or more) combined with part time accredited study.
- Pupils will receive a range of information and opportunities to learn about education, training and career paths throughout their school life to avoid them making rushed decisions and becoming overwhelmed, these will include academic, technical and vocational routes
- The School and College will encourage pupils to use information tools such as websites and apps which display information about opportunities.
- The School and College will exploit the information available on the full range of education and training opportunities via a national course directory on the National Careers Service website which can be presented on careers information websites and apps to help young

people make choices effectively.

- The School and College will support their Year 11 pupils in particular to use these information tools as part of their careers education and guidance. In consultation with a careers professional, The School and College may recommend good quality websites and apps, whether national or local in scope, that present the full range of opportunities in an objective way, that will help pupils make good choices about post-16 options.

Benchmark 8: Personal guidance

- Every pupil will have opportunities for personal guidance meeting with a qualified careers adviser whenever significant study or career choices are being made. Careers advisers can help pupils to locate ambitious education and career options, by identifying opportunities and assessing pupils' abilities, interests and achievements.
- Every pupil will have at least one such interview by the age of 16, and the opportunity for a further interview by the age of 18.
- The School and College will integrate this guidance within the pastoral system so that personal careers interviews can be followed up by the form tutors or their equivalent. The personal guidance will be clearly connected with the wider careers programme.
- Careers advisers working with pupils with special educational needs or disabilities should use the outcome and aspirations in the Education, Health and Care plan, where they have one, to focus the discussion.
- Careers advisers, when working with looked after children or care leavers, their Personal Education Plan or pathway plan should be used to help focus the discussion. These pupils will have a named adviser who can build a relationship with them and better understand their individual needs.
- The School and College will use a qualified careers professional, who can be an appropriately trained member of school staff, to provide personal guidance interviews.
- The careers leader should work closely with the careers adviser, SEND coordinator (SENDCO) and other key staff to ensure personal guidance is effective and embedded in the careers program.
- The School and College will use the Professional Register of Careers Advisers holding Level 6 or higher qualifications from the Career Development Institute (CDI) including guidelines on how advisers can develop their own skills and gain higher qualifications. The School and College will view the Professional Register to search for a career development professional who can deliver a particular service or activity.
- The School and College may use organisations that meet the Matrix Standard, including all contractors engaged in delivering the National Careers Service and have undergone an assessment of their delivery of advice and support services on careers, training and work.

Quality assurance

- The School and College will monitor and evaluate CEIAG and Provider Access activity taking place whether that involves school staff, volunteers or external providers.
- The School and College will use the Compass tool to self-evaluate and improve the quality of careers provision against the 8 Gatsby Benchmarks.
- The School and College will monitor its success in supporting pupils to take up education or training which offers good long term prospects. One way of doing this is through use of Destination Measures data.
- Formal monitoring of the impact of CEIAG and Provider Access will be carried out through:
 - The Trust's CEIAG Checklist;
 - careers guidance interview records;
 - informal feedback from pupils and teachers through random sampling;
 - pupil questionnaires for individual guidance interviews and group work;

- lesson observations;
- Sustained destinations
- regular review meetings with external partners and evaluation of the impact of Partnership Agreements.

Monitoring, evaluation and review

- The policy will be promoted and implemented in both Great Sankey High School and Barrow Hall College.
- The Trust will monitor the operation and effectiveness of arrangements referred to in this policy with the school and college.

Targeted support for vulnerable and disadvantaged young people

- The Local Authority has a range of duties to support pupils to participate in education or training which are set out in statutory guidance on the participation of young people.
- The School and College will work in partnership with their Local Authority to ensure that 16 and 17 year olds have agreed post-16 plans and have received an offer of a suitable place in post-16 education or training under the 'September Guarantee', and that they are assisted to take up a place.
- The School and College will work with the Local Authority, particularly children's social care, to identify pupils who are in need of targeted support or who are at risk of not participating post-16. This includes:
 - pupils with particular vulnerabilities or who are receiving support to safeguard them and promote their welfare, such as Children in Need (including those who are on child protection plans or who are looked after);
 - Pupils with additional needs, such as special educational needs and disabilities;
 - Pupils who may leave care between the ages of 16 and 18.
- The School and College will need to agree how these young people can be referred for support drawn from a range of education and training support services available locally. This may require multi-agency working with other professionals involved in supporting the pupil, such as social workers.
- Pupils in Alternative Provision will require targeted support to help them achieve their full potential. The School and College will work in partnership with the alternative provider and the Local Authority to provide support and advice on transitional pathways into further education or training.
- Where appropriate, the School and College will work with Jobcentre Plus under their 'Support for Schools' programme, which is aimed particularly at those pupils in danger of becoming NEET or who are otherwise disadvantaged in the labour market.
- The School and College will ensure that pupils understand the programmes available to support them with the costs associated with staying in post-16 further education. For example, the 16 to 19 Bursary Fund is available to support young people in defined vulnerable groups, who may receive yearly bursaries of up to £1,200 and/or discretionary payments to help those who are also in financial hardship.
- The School and College will support pupils to liaise with the education or training provider they are intending to study with post 16 – this may be a school, academy, sixth form college, or general FE institution - to find out more information.
- The School and College may also work with their local authority and local post-16 education or training providers to share data on students who are likely to need support with post-16 participation costs, such as care leavers or those on Free School Meals.
- Looked after children and previously looked after children, and care leavers may need particularly strong support to ensure high levels of ambition and successful transition to post-16 education or training. The designated Careers Leader will engage with The School and College 's designated teacher for looked after and previously looked after children to:

- ensure they know which pupils are in care or who are care leavers;
- understand their additional support needs;
- ensure that, for looked after children, their personal education plan can help inform careers advice. For these pupils, careers advisers should also, in co-ordination with The School and College 's designated teacher, engage with the relevant Virtual School Head or personal adviser to ensure a joined up approach to identifying and supporting their career ambitions.

Information sharing

- The School and College will be required to provide relevant information about all pupils to local authority support services. This includes:
 - basic information such as the pupil's name, address and date of birth;
 - other information that the local authority needs in order to support the pupil to participate in education or training and to track their progress. This includes for example:
 - the pupil's contact details including phone numbers;
 - information to help identify those at risk of becoming NEET post-16;
 - the pupil's post-16 and post-18 plans and the offers they receive of places in post-16 or higher education.
- The School and College will only provide the basic information, and not this additional information, if a pupil aged 16 or over, or the parent/carer of a pupil aged under 16, has instructed the School and College not to share information of this kind with the local authority. The School and College 's privacy notice will be the means of offering pupils and their parents/carers the opportunity to ask for personal information not to be shared.
- The School and College will notify the Local Authority whenever a 16 or 17 year- old leaves an education or training programme before completion. This notification will be made at the earliest possible opportunity to enable the local authority to support the pupil to find an alternative place. The School and College and Local Authority will agree local arrangements for ensuring these duties are met.

Careers guidance for pupils with special educational needs or disabilities

- The School and College will ensure that careers guidance for pupils with special educational needs and disabilities (SEND) is differentiated, where appropriate, and based on high aspirations and a personalised approach.
- The School and College will ensure every pupil, whatever their level or type of need, is supported to fulfil their potential. The overwhelming majority of pupils with SEND, including those with high levels of need, are capable of sustainable paid employment, with the right preparation and support. All staff working with them should share that presumption, and should help them to develop the skills and experience, and achieve the qualifications they need to succeed in their careers.
- The School and College will work with families of pupils with SEND to help them understand what career options are possible, with the right support, for their child.
- Careers guidance for pupils with SEND should be based on the pupils' own aspirations, abilities and needs. The School and College will put the individual with SEND at the centre, working with the family, to start transition planning early, and supporting encounters with the workplace and work experience.
- Careers guidance for pupils with SEND will take account of the full range of relevant education, training and employment opportunities, such as traineeships and apprenticeships, supported internships (for young people with Education Health and Care plans) or routes into higher education.
- Career guidance will be well informed about ways in which adults with SEN or disabilities can be supported in the workplace (e.g. supported employment, ways in which jobs can be "carved" to fit a person's abilities, job coaching, reasonable adjustments for disabled people in the workplace and Access to Work (DWP support)). Advice on self-employment

(e.g. micro-enterprise) may also be relevant.

- The School and College will build partnerships with businesses and other employers, employment services, and disability and other voluntary organisations, to help broaden pupils' horizons.
- The School and College will facilitate encounters with employers for pupils with SEND, particularly hands on experience in the workplace.
- The School and College will prepare pupils well for workplace experiences, match them carefully to each employer and provide any special support the pupil may need to benefit fully from the experience.
- The School and College will ensure that careers guidance for pupils does not simply focus on finding a post-16 destinations to meet their immediate needs. Support will focus on the pupil's career aspirations, and the post-16 options which are most likely to give the pupil a pathway into employment, or higher education, and give them the support they need to progress and succeed. The School and College will make use of the SEND local offer published by the Local Authority. Where pupils have EHC plans, their annual reviews will, from year 9 at the latest, include a focus on adulthood, including employment. The School and College will ensure these reviews are informed by good careers guidance.
- The School and College will co-operate with the Local Authority, who has an important role to play through their responsibilities for SEND support services, EHC plans and also the promotion of participation in education and training. Statutory guidance on the SEND duties is provided in the 0-25 Special Educational Needs and Disability Code of Practice.
