Revision Tips	
	<p>Use flashcards for key theory – test yourself with the flashcards “little and often”.</p> <p>Exam question practice – test yourself as regularly as possible and compare to mark scheme answers (refer to the structure of the exams below)</p> <p>Longer Answer questions - The 15- and 25-mark questions are marked in bands: L1 - L5. In order for you to get into the top band, you need to be able to apply your knowledge and explain in detail, you cannot just bullet point or list advantages and disadvantages for example. Use the KAA EV method</p> <p>Remember your diagrams - a good well labelled diagram is worth its weight in gold in an exam answer.</p> <p>Also - remember chains of reasoning - you need to make connected explanations and not big leaps in understanding. Explain every link in the chain and use examples to show this - either from an extract/data or your own knowledge.</p>
