The SHARP System

What Is The SHARP System?

SHARP is the School Help Advice Reporting Page. It is a police approved online reporting system for incidents in school and the local community. It also provides information and support for young people and other members of the community.

SHARP allows young people to make a report online, in private.

SHARP gives young people a voice in a safe place!

SHARP deals with current issues.

SHARP provides information about what's on in the local community.

SHARP points you in the right direction for any help you may need.

We take great pride in our community and our SHARP system employs a positive approach in keeping it a safe, friendly and fun place for all.
