

Key Vocabulary

life processes	These are the things that all living things do. They move, breathe, sense, grow, make babies, get rid of waste and get their energy from food.
living	Things that are living have all the life processes .
dead	Things that are dead were once living . They did have all the life processes but don't now.
never living	Things made out of metal, plastic or rock were never living . They never had the life processes .
food chain	A food chain shows how each animal gets its food. Food chains are one of the ways that living things depend on each other to stay alive.
food sources	This is the place a living thing's food comes from.

Key Knowledge

living

dead

never living

Food chains. The arrows mean 'is eaten by'.

Key Vocabulary

habitat	A habitat is the natural place something lives. A habitat provides living things with everything they need to survive such as food, shelter and water.
microhabitat	A microhabitat is a very small habitat in places like under a rock, under leaves or on a branch. Minibeasts live in microhabitats . The microhabitats have everything they need to survive .
depend	Many living things in a habitat depend on each other. This means they need each other for different things.
survive	This means to stay alive.

Examples of **microhabitats**:

short grass

flowers

inside rotting wood

under leaves

in and on soil

Key Knowledge

Examples of **habitats**:

woodland

urban

coastal

rainforest

arctic

desert

ocean

river

mountain

Key Questions:

Can I explain the difference between living and non-living things?

Can I decide whether something is living, dead or non-living?

Can I match certain living things to the habitats they are found in?

Can I describe how a habitat provides for the basic needs of things living there?

Can I describe a range of different habitats?
