

Maths Vocabulary Document

The use of accurate mathematical vocabulary is essential for children’s understanding and communication of mathematical concepts.

To save repetition of vocabulary, words are listed only where they are first introduced. For example, although the word ‘sharing’ is used throughout school, it is listed in Reception.

Key vocabulary is revisited frequently as students’ progress through the curriculum. This progression document provides an outline of where key mathematical vocabulary is introduced and developed in the White Rose Maths schemes of learning.

Teachers can use this document to ensure that children are supported in using the correct mathematical vocabulary at each stage of their learning. By developing confidence with key terms, pupils can better articulate their thinking, reason effectively, and build a strong foundation for future learning in mathematics.
