

| Key Vocabulary                                              |                                                                                                                 |
|-------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------|
| <b>amphibians</b>                                           | Amphibians live in the water as babies and on land as they grow older. They have smooth, slimy skin.            |
| <b>birds</b>                                                | All birds have a beak, two legs, feathers and wings.                                                            |
| <b>fish</b>                                                 | Fish live and breathe under water. They have scaly skin, fins to help them swim and they breathe through gills. |
| <b>mammals</b>                                              | Mammals are animals that breathe air, grow hair or fur and feed on their mother's milk as a baby.               |
| <b>reptiles</b>                                             | All reptiles breathe air. They have scales on their skin.                                                       |
| <b>carnivore</b>                                            | Animals that mostly eat other animals (meat) are carnivores.                                                    |
| <b>herbivore</b>                                            | Animals that only eat plants are herbivores.                                                                    |
| <b>omnivore</b>                                             | Animals that eat both plants and other animals are omnivores.                                                   |
| <b>Invertebrates</b> - cold blooded animal with no backbone |                                                                                                                 |

**Mammals**

human

mouse

dog

cow

**Birds**

penguin

chicken

flamingo

robin

**Fish**

goldfish

tuna

shark

eel

**Reptiles**

snake

tortoise

lizard

alligator

**Amphibians**

frog

toad

newt

salamander

**Key Questions**

1. What kind of animals are humans?
2. What do different animals eat?
3. What is the difference between an amphibian and a reptile?

| Key Vocabulary   |                                                                                                                                                       |
|------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------|
| sight/<br>vision | Your eyes let you see all the things around you.                                                                                                      |
| hearing          | Your ears let you listen to all the things around you. Your brain is able to tell what different sounds are.                                          |
| touch            | Your skin gives you the sense of touch. You can tell if something is warm, cold, smooth or rough without even looking at it!                          |
| taste            | Your sense of taste comes from your tongue. You can tell if something tastes bitter or sweet. You might have some tastes you like and some you don't. |
| smell            | You smell using your nose. Your nose can tell if things smell nice or not nice.                                                                       |

## Senses

## Parts of the Body

Key Questions:

1. What are the different parts of the body?
2. What body part do you use to hear?
3. What do you use to smell?
4. What do you use to see?
5. What do you use to see?
6. What do you use to touch?
