

Seasons - There are four seasons each year, autumn, winter, spring and summer.

Autumn - In autumn the weather gets colder and the leaves begin to fall from the trees. The amount of daylight becomes less, so we have shorter days and longer nights.

Winter - In winter the weather is much colder. Sometimes it's so cold that frost and ice appears on the floor! Most of the leaves have fallen from the trees and the daylight hours are very short.

Spring - The weather gets warmer and the flowers and trees begin to grow again.

Summer - In summer the weather is hotter. The days become their longest with shorter nights.

Weather - The weather includes the temperature outside and the wind direction and strength, as well as rain, cloud, snow and sun.

Types of weather we will learn about:

Wind, Rain, Snow, Hail, Sleet, Fog, Sun, Hot, Warm, Cold

Daylight hours each month:

Month	Sept	Oct	Nov	Dec	Jan	Feb	Mar	Apr	May	June	July	Aug
Hours of Daylight	13	11	9	8	8	10	12	14	15	16	16	14

1. How many seasons do we have?
2. Which season has the shortest days?
3. Which season has the longest days?
4. In which season would you like to visit the beach?
5. When do leaves begin falling off the trees?
6. When might you make a snow man?
7. Which season is your birthday in?
