

# GROVE ROAD COMMUNITY PRIMARY SCHOOL

**NEWSLETTER – 29<sup>TH</sup> SEPTEMBER 2023**

# NEWSLETTER

It has been wonderful welcoming children into our school over the last few weeks. They have settled into their new classes exceptionally well and as I am sure you're aware, the children really are the stars of the show here.

I would just like to take a minute to thank each and everyone of you for welcoming myself and the new members of the team to Grove Road, we are always around on the playground and remember, our door is always open if you need us.

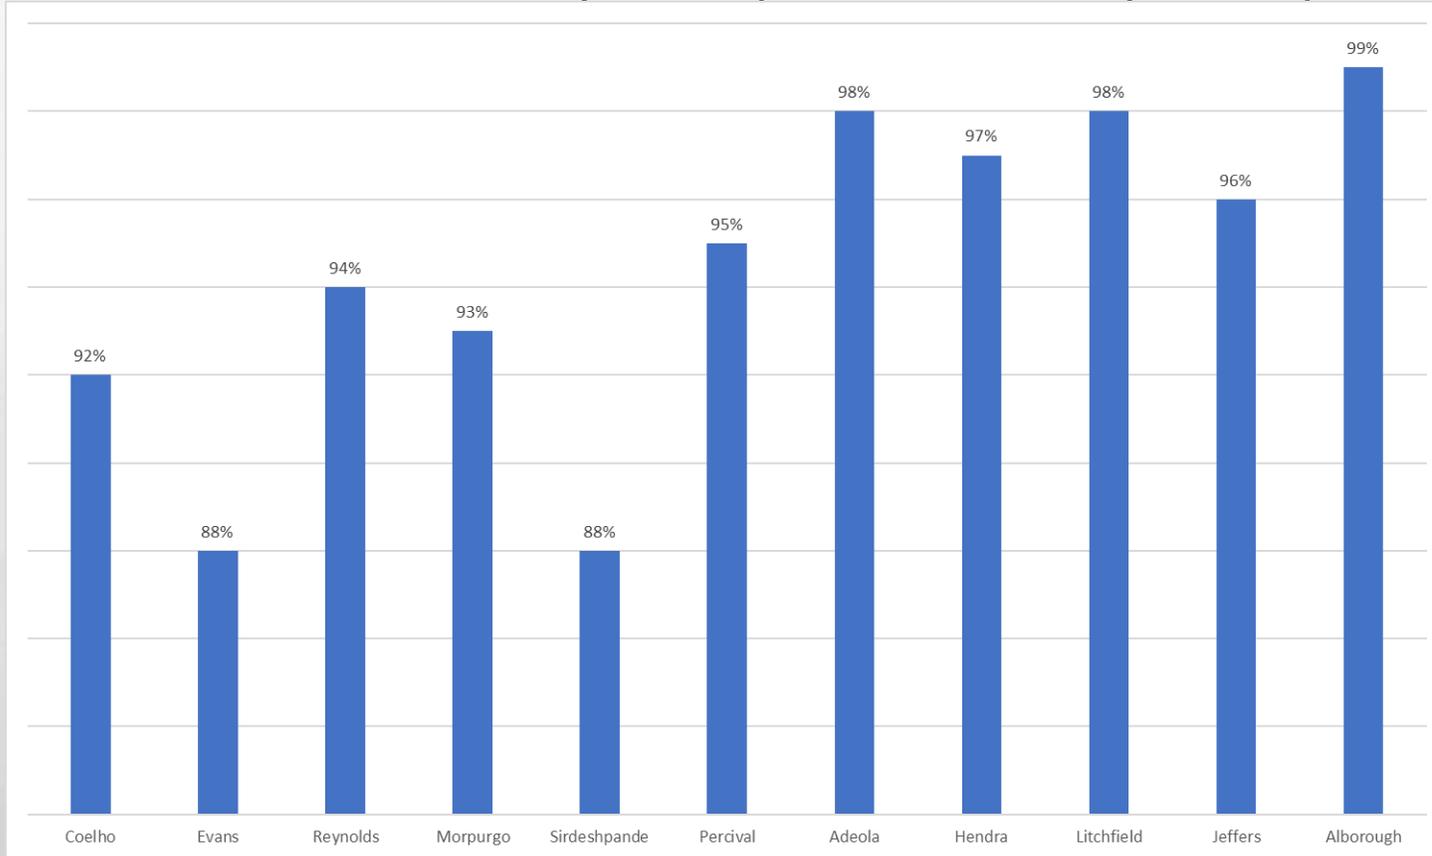

Please take a few minutes to read our newsletter, we will keep you updated with new dates and events as soon as we secure the dates.

Mr Grayston

# ATTENDANCE

Attendance totals for each class – Monday 25<sup>th</sup> September to Friday 29<sup>th</sup> September

# STARS OF THE WEEK

<b>LITCHFIELD</b>	-	<b>Paige</b>
<b>HENDRA</b>	-	<b>Wesley</b>
<b>ADEOLA</b>	-	<b>Oliwia</b>
<b>PERCIVAL</b>	-	<b>Seth</b>
<b>SIRDEHPANDE</b>	-	<b>Milena</b>
<b>MORPURGO</b>	-	<b>Emmie-Mae</b>
<b>REYNOLDS</b>	-	<b>Ashlee</b>
<b>EVANS</b>	-	<b>Bonnie</b>
<b>COELHO</b>	-	<b>Emma</b>

# SAFEGUARDING

## Grove Road Community Primary School Safeguarding Team

Designated Safeguarding Lead  
James Grayston - Headteacher

Deputy Designated  
Safeguarding Lead  
Dawn Winkley – Deputy Head  
& SENDCo

Deputy Designated  
Safeguarding Lead  
Sue McGrogan – Parent  
Support Adviser

Lead Governor for Safeguarding – Margaret Beagle

For further advice / referral information, please contact:  
North Yorkshire Safeguarding Children Partnership

# What Parents & Carers Need to Know about

# THREADS

Age Restriction  
**12+**  
However, Threads' reliance on an Instagram login effectively makes it 13+

## WHAT ARE THE RISKS?

Threads is currently the number one trending social media app. Developed by Meta, the company behind Instagram and Facebook, Threads is a clear rival of Twitter (now known as X) in that it's a text-based conversation platform which allows posts of up to 500 characters, with the option to include links, photos and short videos. Threads is connected to a user's existing Instagram account, which lets people get started on this new app straight away; their followers and favourite creators will be imported from Instagram to their freshly created Threads account.

## DIFFERING OPINIONS

Meta claim they will encourage friendly, positive engagements but haven't specified how they plan to moderate this. As we have already seen on the likes of Twitter, Facebook and so forth, any app where users can talk freely about topics meaningful to them also contains the possibility of offence being caused or hatred being spread.

## ENDLESS SCROLLING

Threads doesn't currently have the facility to search for content – only for other users. Someone's feed, therefore, is made up of either threads from people they follow or content that Meta's algorithms have recommended. This could result in users absent-mindedly scrolling for long periods of time through nothing of particular interest simply in search of that feeling of connectedness.

## ACCOUNT DELETION IS COMPLEX

As Threads is linked to a user's Instagram account, it's comparatively tricky for someone to completely remove their Threads profile without automatically deleting their Instagram as well. Most Insta users, having spent considerable time building up a bank of posts and followers, will absolutely not want to lose them and could therefore feel pressured into keeping their Threads account active.

## OPEN NETWORKING PROTOCOLS

Reportedly, Meta's plan is for Threads to be compatible with ActivityPub, which will allow users to connect and share content more easily across different apps. If your Threads account is set to 'public', therefore, your posts would be accessible from other linked apps. What's more, people using these compatible apps would be able to interact with Threads users without needing an account.

## DATA COLLECTION

In Threads' privacy policy, Meta states that certain data about users will be collected and linked to that person's identity, including details relating to (among other things) health and fitness, financial information, browsing history, usage data, purchases, location and contacts. This can paint a very detailed picture of a person's life, and Meta does not explain why it needs all this information.

## POTENTIAL FOR EXCESSIVE TRACKING

Its tracking of every interaction, engagement and activity gives the impression of Threads being a sophisticated data-collection tool. There are no adverts on the platform right now, but – given the sheer volume of information being gathered and Meta's history of selling data for advertising purposes – it may not be long before ads start appearing on young people's Threads feeds.

## Advice for Parents & Carers

### READ THE SMALL PRINT

Privacy policies for apps are usually long and probably the last thing young people read (if at all) when signing up for a trending new platform. However, we'd advise parents and carers to take time to look through Threads' policy and see if they agree with their child's data being collected. Think critically about why Meta needs all that personal information, where it goes and what's done with it.

### HIDE THE LIKES COUNT

Research has shown that young users often feel anxiety over how many likes they receive for their social media posts – and this reflects their real-world popularity. Through the settings menu, Threads allows users to hide the likes count on their (and others') posts. While your child's posts won't display an exact number of likes, they'll still be able to see who did like their post.

### FILTER OUT OFFENSIVE WORDS

Like Instagram, Threads has an option to hide replies that contain offensive words, phrases or emojis. These are predetermined by Meta, but you can also customise the list with terms that you deem offensive or which you don't want your child to read. Usefully, there's a crossover between the two apps, so words that you select to screen out on Instagram will also be hidden on Threads.

### GO PRIVATE, AND STAY ALERT

Even if your child's Instagram account is already set to private, they'll need to select this option again in Threads (it's one of the first things the app asks at sign up). You can also edit who can mention them in a comment. Try to keep a regular eye on your child's account: as Threads' popularity and number of features increases, so will opportunities for potentially harmful content to slip through the net.

# What Parents & Carers Need to Know about THE DANGERS OF VAPING

Data collected for ASH (Action on Smoking and Health) shows an increase in 11 to 17-year-olds experimenting with vaping; from 7.7% in 2022 to 11.6% in 2023. It's concerning that these age-restricted products are getting into the hands of under 18s as most contain nicotine, which can be detrimental to brain development and cause long-term addiction. Some schools have reported students having their focus in lessons affected by nicotine cravings; vaping in school toilets; and even trying vapes found in their local park. Raising awareness of the risks among young people could help to prevent these problems from escalating and reduce the number of young vapers.

## WHAT ARE THE RISKS?

### NICOTINE ADDICTION

Since they were initially developed to help people stop smoking, the vast majority of vape liquids contain nicotine. Not only is this a highly addictive stimulant, but it can also have detrimental effects on brain development in the under-25s. Nicotine can decrease the ability to pay attention, weaken impulse control, affect mood and increase the likelihood of substance addiction as an adult.

### WHAT IS VAPING?

Vapes contain a liquid (vape juice/e-liquid) that is heated by a battery and evaporates, creating a chemical vapour which the user inhales. They can be disposable (once the liquid or battery runs out, the vape is thrown away) or rechargeable (the user replaces the liquid and recharges the battery on demand). Most vape liquids contain nicotine and other chemicals.

### LACK OF AWARENESS

A proportion of young people tend to view vapes as harmless, mainly because of the products' appearance and the perception (often strengthened on social media) that "vaping is cool" and on trend. In many instances, young people don't fully appreciate the concept of addiction; that is, they aren't adequately aware of the risk of becoming hooked on nicotine before trying a vape.

### POTENTIAL TOXICITY

Many vape liquids have been found to contain heavy metals such as lead, tin, nickel and (in some cases) mercury – all of which are toxic. These metals often take the form of tiny shards inside a device's liquid tank, which are then inhaled into the body. Some media reports have suggested these metals are particularly prevalent in illegally imported vapes which don't comply with UK regulations.

### WIDER HEALTH CONCERNS

Studies are already showing a link between vaping and oral health problems such as tooth decay and gum disease. This is because vaping reduces the amount of saliva in the mouth, while increasing bacteria – resulting in bad breath and a build-up of plaque. There are also concerns that, in some users, vaping could lead to the development of asthma, a persistent cough and breathing difficulties.

### UNCLEAR LONG-TERM CONSEQUENCES

The liquids in vapes also contain solvents, which can create carcinogens at the point of evaporation. Vapes were only introduced into the UK in 2005 – and, because of the relatively short timeframe involved, there is insufficient medical evidence to assess the long-term harms that regular inhalation of these chemical fluids might have on the human body.

### UNREGULATED VAPING PRODUCTS

The number of retailers willing to sell vapes to under-18s is a worry, as the chance of these products being unregulated (and therefore containing illegal chemicals and higher levels of nicotine) is high. A related concern is that the mechanisms inside unregulated products are unlikely to have been tested and safety checked – presenting a possible fire risk if the liquid and battery come into contact.

### ATTRACTIVE PACKAGING

The packaging of many disposable vapes is very appealing to young people, frequently echoing the colours and flavours of the sweets or fizzy drinks they're used to buying. There's a relative lack of regulation around vape marketing, and vaping is often depicted positively on social media – which can lead young people to develop favourable views of vaping and overlook the possible harms.

### SCARCE INFORMATION

The lack of information about the ingredients and potentially harmful chemicals in a vape is troubling. Some vape fluids (unregulated in the UK) contain traces of nuts, which can cause an allergic reaction or anaphylactic shock. To date, medical warnings aren't required on vape packaging – with only medical disclaimers being found on the websites of the various brands.

### ENVIRONMENTAL EFFECTS

In the UK alone, around 1.3 million disposable vapes go to landfill every week. Due to such significant numbers of these products not being recycled, their components – a lithium battery and a chemical liquid – pose a toxic risk to the environment, the ecosystem and wildlife. Vapes are also predominantly made of plastic and metal; materials that, of course, do not naturally decompose.

### VAGUE INGREDIENTS LISTS

Early research has suggested that the chemicals used to produce some strawberry and banana flavour e-liquids can kill cells in the blood vessels and heart. These ingredients aren't identified on the packaging, instead falling under the umbrella term 'natural and artificial flavourings'. Such vague listings mean that consumers aren't aware of the liquid's content so can't identify potential risks.

# IMPORTANT DATES

When	Event
Wednesday 11 <sup>th</sup> October – 9:00am – 10:00am	Coffee morning – Meet Mr Grayston & Mrs Winkley in the main hall.
Friday 20 <sup>th</sup> October – 6pm start	Friends of Grove Road – Quiz Night
Wb. Monday 6 <sup>th</sup> November	Parents' Evenings – Monday, Tuesday & Wednesday (More information to follow)
Tuesday 7 <sup>th</sup> November – 10am	Open Morning for Reception New Starters – September 2024
Tuesday 14 <sup>th</sup> November	Year 3 Visit: Ripon Museums (Crime and Punishment)
Wednesday 15 <sup>th</sup> November	Year 4 Visit: Ripon Museums (Crime and Punishment)
Thursday 30 <sup>th</sup> November	Rec/ KS1 trip to Kirkstall Abbey Museum
Thursday 7 <sup>th</sup> December	Grove Road visit the panto!
Thursday 14 <sup>th</sup> December – 3:15pm	Carols on the playground with Singing Club
Thursday 14 <sup>th</sup> December – 6pm	Rec/ KS1 Nativity
