Science at Gusford Primary School

Love

Science is everywhere and science is important.

We endeavour to ignite children's **natural curiosity** in the world around them and link science learning to the **real-life world**.

We educate about the important role science has for all of our futures through learning about **recognised scientists, career inspiration** and **global change**.

Grow

We build new learning onto strong foundations with clear progression and opportunities to revisit previous learning throughout the school.

We use this approach for teaching **vocabulary, science knowledge, enquiry skills** and **independence**.

Explore

Our teaching enables children to learn through first hand experiences. We want children to **do, explore, investigate** and **enquire**.
