

Which birds and plants would Peter Rabbit find in our park?

Key Vocabulary:

Autumn	The time of year between September and November. Many leaves fall off the trees.
Spring	The time of year between March and May. There is usually lots of signs of new growth in Spring.
Summer	The hottest season in the UK. It happens between June and August. The longest day is June 21 st .
Winter	The coldest season in the UK. We can have snow in this season. It occurs between December and February.
Thermometer	This is the instrument that measures the temperature.

Key Vocabulary:

Roots	This part of a plant is normally underground. They keep the plant in the ground, absorb water and bring it to the stem
Deciduous	Deciduous trees are trees that shed their leaves in the autumn and grow new leaves in the spring.
Evergreen	Evergreen trees are the same as coniferous trees. They do not lose their leaves in Autumn.
Stem	The stem is the main part of the plant. It supports the weight of the leaves, as well as the flowers or fruit.
Woodland	A woodland is a habitat where trees are the dominant plant form.

Sticky Knowledge facts:

- Seasons change throughout the year because of the way the Earth travels around the Sun.
- Spring starts when the day and night are the same length (usually 21st March. However, many say that Spring starts on March 1st).
- In summer the longest day of the year is around June 21st and in winter the shortest day of the year is usually December 21st.
- In the Autumn, the day is shorter and the temperature falls. This stops the leaves from making food and the brown, red and orange colours in the leaf take over.
- When we have our winter Australia has its summer and when we have our summer it is winter in the southern hemisphere.
- All plants are alive, just like animals. We can find plants in almost all parts of our planet.
- There are plants almost everywhere on our planet. They may grow from a seed or a bulb.

Seasons change
throughout the year
because of the way
the Earth travels
around the Sun.

Spring starts when the day and night are the same length (usually 21st March. However, many say that Spring starts on March 1st).

In summer the longest day of the year is around June 21st and in winter the shortest day of the year is usually December 21st.

In the Autumn, the day is shorter and the temperature falls. This stops the leaves from making food and the brown, red and orange colours in the leaf take over.

When we have our winter Australia has its summer and when we have our summer it is winter in the southern hemisphere.

All plants are alive,
just like animals. We
can find plants in al-
most all parts of our
planet.

There are plants almost everywhere on our planet. They may grow from a seed or a bulb.
