

## **The Birmingham Project**

Organisations across Birmingham are working together on a project to improve outcomes for children and young people with speech, language and communication needs in the area. The project is underpinned by use of the Balanced System®, an outcomes based framework and delivery model for integrated services. More information about The Balanced System® can be found [here](#).

As part of the project we are working with children's therapy providers, commissioners and parents and carers across Birmingham to gather information about the current needs and services available to support children and young people, their families and carers. We would like to seek the views of parents and carers, schools, settings and FE, wider professional colleagues across education, health and social care.

More information about the Birmingham project can be found [here](#).

The links below will direct you to specific surveys and opportunities to join in the consultation process.
